BOARD OF HIGH SCHOOL AND INTERMEDIATE EDUCATION, UNITED PROVINCES.

THE INTERMEDIATE EDUCATION ACT, 1921.

UNITED PROVINCES ACT No. II OF 1921.

[PASSED BY THE LOCAL LEGISLATURE OF THE UNITED
PROVINCES OF AGRA AND OUDH.]

*Received the assent of the Governor of the United Provinces
of Agra and Oudh on the 30th September, 1921, and of
the Governor General on the 10th December, 1921, and
was published under section 81 of the Government of
India Act on the 7th January, 1922.*

An Act for the establishment of a Board of High School
and Intermediate Education

WHEREAS it is expedient to establish a Board to take
the place of the Allahabad University in regulating
and supervising the system of High School and Inter-
mediate education in the United Provinces, and to
prescribe courses for English Middle classes, subject to
the control of the Local Government: It is hereby
enacted as follows:—

1. (1) This Act may be called the Intermediate
Education Act, 1921.

(2) It extends to the territories for the time
being administered by the Local Government of the
United Provinces.

(3) It shall come into force on such date as the Local Government may, by notification in the Gazette, direct.

2. In this Act, and in all regulations made hereunder, unless there is anything repugnant in the subject or context,—

Definitions.

- (a) "Board" means the Board of High School and Intermediate Education ;
- (b) "Institution" means the whole of an institution, or a part thereof, as the case may be ;
- (c) "Minister" means Minister for Education in the United Provinces ,
- (d) "Recognition" means recognition for the purpose of preparing candidates for admission to the Board's examinations ;
- (e) "Regulations" means regulations made by the Board under this Act.

3. (1) The Board shall be established as soon as may be after this Act has come into force, and shall consist of—

Constitution of the Board.

- (a) the Director of Public Instruction (*ex officio* Chairman) ;
- (b) two Principals of Intermediate colleges maintained by Government, appointed by the Minister ;
- (c) four Principals of Intermediate colleges not maintained by Government, elected from among themselves ;
- (d) one head master of a High School maintained by Government, appointed by the Minister ;
- (e) two head masters of High Schools not maintained by Government, elected from among themselves ;
- (f) a representative of Engineering appointed by the Minister ;

- (g) a representative of Agriculture, appointed by the Minister ;
- (h) a member of the Medical profession, appointed by the United Provinces Medical Council ;
- (i) a member of the staff of a Training College for teachers, appointed by the Minister ;
- (j) a representative of Industries, appointed by the Minister ;
- (k) a lady appointed by the Minister to represent women's education ;
- (l) representatives elected by Universities established by law in the United Provinces, whose number shall be, as nearly as possible, one-third of the total number of the other members of the Board ;

Explanation —The number of representatives to be assigned to each University under clause (l) of sub-section (1) shall be fixed by the Minister ;

- (m) three members elected by the non-official members of the Legislative Council ;
- (n) one member each appointed by the Upper India Chamber of Commerce and the United Provinces Chamber of Commerce ;
- (o) one member each appointed by the British Indian Association and by the Agra Landholders' Association.

(2) Persons not more than three in number may be nominated by the Minister to secure the representation of minorities not otherwise adequately represented.

(3) The Board shall be authorized to co-opt persons, not exceeding three in number, on account of their possessing expert knowledge in subjects of study included in the courses prescribed by the Board.

(g) a representative of Agriculture, appointed by

4. (1) Members other than *ex officio* and co-opted members shall hold office for a term of three years from the date of the notification published under section 6.

Term of office of members.

(2) The term of office of co-opted members shall terminate on the same date as that of other appointed members.

5. When the prescribed term of office of members other than *ex officio* members has expired the vacancies so caused shall be filled as soon as conveniently may be in accordance with sub-section (1) of section 3.

Filling of vacancies on expiry of term of office.

6. The names of the persons who have been nominated or elected to be members of the Board, in accordance with sub-sections (1) and (2) of section 3 or with section 5, shall be published by notification in the Gazette.

Publication of names

7. Subject to the provisions of this Act the Board shall have the following powers, namely :—

Powers of the Board.

(1) To prescribe courses of instruction for the Intermediate classes and the High and Middle sections of English schools in such branches of education as it may think fit ;

(2) to grant diplomas or certificates to persons who—

(a) have pursued a course of study in an institution admitted to the privileges of recognition by the Board ; or

(b) are teachers ; or

c) have studied privately under conditions laid down in the regulations, and have passed the examinations of the Board under like conditions ;

(3) to conduct examinations at the end of the High School and Intermediate courses ;

(4) to recognize institutions for the purposes of its examinations ;

(5) to admit candidates to its examinations ;

special meeting of the Board at which not less than one-half of the total number of the members are present.

(2) The Secretary shall, subject to the control of the Board, be the administrative officer of the Board. He shall be responsible for the presentation of the annual estimates and statement of accounts.

(3) He shall be responsible for seeing that all moneys are expended on the purpose for which they are granted or allotted.

(4) He shall be responsible for keeping the minutes of the Board.

(5) He shall exercise such other powers as may be prescribed by the regulations.

(6) He shall be entitled to be present and to speak at any meeting of the Board, but shall not be entitled to vote thereat.

Appointment
and constitution
of
Committees

13. (1) The Board shall appoint Committees of Courses, an Examinations' Committee, a Committee for Recognition, a Finance Committee, and such other committees, if any, as may be prescribed by the regulations.

(2) Such committees shall consist of members of the Board and of such other persons, if any, as the Board in each case may think fit.

(3) A Committee may co-opt persons to serve thereon up to a limit of one-third of the total number of members of the Committee.

(4) Members of Committees other than co-opted members shall hold office for a period of three years

The term of office of co-opted members shall be one year :

Provided that the term of office of members of a Committee, whether they are members of the Board or not, shall not extend beyond that of appointed members of the Board.

14. All matters relating to the exercise by the Board of powers conferred upon it by this Act which have by regulation been delegated by the Board to any one of its committees shall stand referred to that Committee, and the Board, before exercising any such powers, shall receive and consider the report of the Committee with respect to the matter in question.

Exercise of powers delegated by Board to Committees

REGULATIONS.

15. (1) The Board may make regulations for the purpose of carrying into effect the provisions of this Act.

Power of Board to make regulations

(2) In particular and without prejudice to the generality of the foregoing power the Board may make regulations providing for all or any of the following matters, namely :—

- (a) the constitution, powers and duties of committees ;
- (b) the conferment of diplomas and certificates
- (c) the conditions of recognition of institutions for the purposes of its examinations ,
- (d) the courses of study to be laid down for all certificates and diplomas ;
- (e) the conditions under which candidates shall be admitted to the examinations of the Board and shall be eligible for diplomas and certificates ,
- (f) the fees for admission to the examinations of the Board ,
- (g) the conduct of examinations ,
- (h) the appointment of examiners and their duties and powers in relation to the Board's examinations ;
- (i) the election of members to the Board under clauses (c) and (e) of sub-section (1) of section

- (j) the admission of institutions to the privileges of recognition and the withdrawal of recognition ;
- (k) all matters which by this Act are to be or may be provided for by regulations ;
- (l) the conditions under which grants-in-aid shall be given to institutions recognized by the Board.

Previous publication and sanction of regulations made by Board

16. Regulations under section 15 shall not be made except after publication and shall not take effect until they have been sanctioned by the Minister and published in the Gazette.

Duty of Board to submit regulations and power of Minister to make regulations in default of Board.

17. (1) Within six months from the commencement of this Act or within such further period as the Local Government may fix in this behalf—

- (a) the Board, as constituted under this Act, shall prepare a body of regulations for the sanction of the Minister ;
- (b) if any alterations in, or additions to, the draft regulations submitted appear to the Minister to be necessary, the Minister may, after consulting the Board, sanction the proposed body of regulations with such additions and alterations as appear to be necessary.

(2) If a draft body of regulations is not submitted by the Board within the period of six months from the commencement of this Act or within such further period as may be fixed under sub-section (1), the Minister may, within six months after the expiry of such period or of such further period, make, after previous publication, regulations which shall have the same force as if they had been prepared and sanctioned under sub-section (1).

18. All casual vacancies among the members (other than *ex officio* members) of the Board or of a committee appointed by the Board shall be filled, as soon as conveniently may be, by the person or body who appointed, elected, or co-opted the member whose place has become vacant and the person appointed, elected or co-opted to a casual vacancy shall be a member of the Board or Committee for the residue of the term for which the person whose place he fills would have been a member

Casual
vacancies.

19. No act or proceeding of the Board or of a committee appointed by it shall be invalidated merely by reason of the existence of a vacancy or vacancies among its members.

Proceedings
not invalidat-
ed by reason
of vacancies.

20. (1) The Board and its Committees may make bye-laws consistent with this Act and the Regulations—

Power of
Board and
Committees
to make bye-
laws.

(a) laying down the procedure to be observed at their meetings and the number of members required to form a quorum,

(b) providing for all matters which consistently with this Act and the Regulations are to be prescribed by bye-laws, and

(c) providing for all other matters solely concerning the Board and its committees and not provided for by this Act and the regulations

(2) The Board and its committees shall make bye-laws providing for the giving of notice to the members of the Board or Committee of the dates of meetings, and of the business to be considered at meetings, and for the keeping of a record of the proceedings of meetings.

(3) The Board may direct the amendment or rescission of any bye law made by a Committee under this section, and the Committee shall give effect to any such direction

REGULATIONS

of the

**Board of High School and Intermediate Education,
United Provinces.**

N.B.—These regulations are subject to amendment from time to time as the Board may determine. Notice of such amendments will be given in the Gazette.

CHAPTER I**DEFINITIONS**

In these regulations, unless there is anything repugnant in the subject or context, the following terms shall have the following meaning:—

- (1) "Chairman" means the Chairman of the Board of High School and Intermediate Education, United Provinces
- (2) "College" means an educational institution preparing candidates for the Intermediate examination, or the Intermediate Examination in Commerce or the Intermediate Examination in Agriculture of the Board, and recognized by the Board for such a purpose
- (3) "Department" means the Department of Public Instruction in the United Provinces
- (4) "Director" means the Director of Public Instruction in the United Provinces
- (5) "Guardian" means the natural or legal guardian, or a person approved by the head of the institution concerned as the guardian of a student for the purposes of these regulations.
- (6) "Head Master" means the head of a High School recognized by the Board
- (7) "High School" means an educational institution preparing candidates for the High School

Examination of the Board and recognized by the Board for such a purpose.

- (8) "Inspector" means an inspecting officer of the Education department.
- (9) "Principal" means the head of a College.
- (10) "Private candidate" means a candidate for admission to an examination conducted by the Board who has not, during the session preceding the examination, been studying at an educational institution of any kind.
- (11) "Regular course of study" means a course of study prescribed by the Board.
- (12) "Scholar's Register" means the register containing the record of a scholar's progress kept in the prescribed form* by the institution to which he belongs.
- (13) "Secretary" means the Secretary of the Board of High School and Intermediate Education, United Provinces
- (14) "Session" means the period for which an institution is open for tuition during the twelve months commencing with the formation of new classes

CHAPTER II.

THE BOARD.

1. The Board shall meet ordinarily in the months of November and February.

2. The meeting of the Board held in the month of November shall be deemed to be the annual meeting of the Board.

* The prescribed form is given in the United Provinces Educational Code.

CHAPTER III

THE SECRETARY.

1. All meetings* of the Board shall be convened through the Secretary.

2. The Secretary shall conduct the official correspondence of the Board under the authority of the Chairman.

3. All fees and dues payable to the Board, and all sums received by the Secretary in his capacity as such, shall be credited without delay into the Government Treasury.

4. The Secretary shall be responsible, subject to the control of the Examinations' Committee, for making arrangements for the holding of the Board's examinations.

5. The Secretary shall receive and, subject to the control of the Examinations' Committee, deal with applications from candidates for admission to the Board's examinations.

6. It shall be the duty of the Secretary, on behalf of the Board, to issue certificates in the prescribed form to successful candidates of having passed the Board's examinations.

7. The Secretary shall have charge of the Board's library, and shall submit books received by him for consideration as text-books, etc., to the Committee concerned in accordance with the procedure laid down by the Board from time to time.

8. The Secretary shall annually in the month of March furnish the department with a list of schools and colleges recognized for the purposes of the Board's

* A Press note giving a brief report of the proceedings of the Board is published in the *United Provinces Government Gazette* and issued to the papers as soon after each meeting as possible (*vide* Board's Resolution no. 9, dated the 17th, 18th and 19th August, 1922).

examinations, specifying the optional subject or subjects in which recognition has been granted.

9. The Secretary shall perform such other duties as may be assigned to him by the Board or may be necessary for the carrying out of its decisions.

CHAPTER IV.

COMMITTEES OF THE BOARD.

1 In addition to the committees specified in section 13(1) of the Intermediate Education Act, 1921, the Board shall appoint the following other committees :—

- (a) a curriculum committee to consider general questions relating to the curriculum ,
- (b) a committee to bring out the results of examinations

2. The number of members appointed by the Board to any committee shall, unless otherwise specified, be not less than three and not more than five.

3 Election of members to fill up ordinary vacancies in committees of the Board shall be held at the meeting of the Board immediately following the occurrence of the vacancy and members shall hold office from the date of election.

4 Except in the case of the Examinations' Committee, the Board shall appoint, at its annual meeting, a member of each committee to be Convener of the committee. In the event of the Convener ceasing to hold office, the committee shall appoint a substitute from among its own members to hold office till the next annual meeting of the Board.

5. The Secretary of the Board shall act as Secretary of the Examinations' Committee, and shall perform the functions performed by the Convener in other committees. Unless elected a member of the committee, he will not have a vote.

6. No person shall be a member of more than two of the following Committees —

- (a) The Examinations' Committee
- (b) The Finance Committee
- (c) The Recognition Committee
- (d) The Curriculum Committee.

CHAPTER V.

COMMITTEES OF COURSES.

1 The Board shall appoint Committees of Courses in the following subjects which may be grouped in such manner and with such additions and alterations as the Board may from time to time decide —

- | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> (1) English. (2) Sanskrit (3) Arabic and Persian (4) Urdu. (5) Hindi. (6) History and Civics (7) Geography. (8) Bengali, Marathi and Gujarati (9) Greek, Latin, Hebrew and Modern European Languages (French and German). | <ul style="list-style-type: none"> (10) Mathematics. (11) Physics. (12) Chemistry. (13) Biology (14) Agriculture (including all subjects for the Intermediate Examination in Agriculture, except English, Botany and Elementary Zoology). (15) Drawing, Manual Training, Metal Work, Book-binding, and Spinning and Weaving. |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

examinations, specifying the optional subject or subjects in which recognition has been granted.

9 The Secretary shall perform such other duties as may be assigned to him by the Board or may be necessary for the carrying out of its decisions.

CHAPTER IV.

COMMITTEES OF THE BOARD

1. In addition to the committees specified in section 13(1) of the Intermediate Education Act, 1921, the Board shall appoint the following other committees :—

- (a) a curriculum committee to consider general questions relating to the curriculum ;
- (b) a committee to bring out the results of examinations.

2. The number of members appointed by the Board to any committee shall, unless otherwise specified, be not less than three and not more than five.

3 Election of members to fill up ordinary vacancies in committees of the Board shall be held at the meeting of the Board immediately following the occurrence of the vacancy and members shall hold office from the date of election.

4. Except in the case of the Examinations' Committee, the Board shall appoint, at its annual meeting, a member of each committee to be Convener of the committee. In the event of the Convener ceasing to hold office, the committee shall appoint a substitute from among its own members to hold office till the next annual meeting of the Board.

5. The Secretary of the Board shall act as Secretary of the Examinations' Committee, and shall perform the functions performed by the Convener in other committees. Unless elected a member of the committee, he will not have a vote.

6 No person shall be a member of more than two of the following Committees —

- (a) The Examinations' Committee.
- (b) The Finance Committee
- (c) The Recognition Committee
- (d) The Curriculum Committee

CHAPTER V.

COMMITTEES OF COURSES

1 The Board shall appoint Committees of Courses in the following subjects which may be grouped in such manner and with such additions and alterations as the Board may from time to time decide. —

- | | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> (1) English. (2) Sanskrit (3) Arabic and Persian. (4) Urdu. (5) Hindi. (6) History and Civics (7) Geography. (8) Bengali, Marathi and Gujarati (9) Greek, Latin, Hebrew and Modern European Languages (French and German). | <ul style="list-style-type: none"> (10) Mathematics. (11) Physics. (12) Chemistry. (13) Biology. (14) Agriculture (including all subjects for the Intermediate Examination in Agriculture, except English, Botany and Elementary Zoology). (15) Drawing, Manual Training, Metal Work, Book-binding, and Spinning and Weaving. |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

(16) Commerce (including all subjects for the Intermediate Examination in Commerce except English and Commercial Geography)

(17) Logic.

(18) Economics.

(19) Indian Music

(20) Domestic Science, Physiology, Hygiene and Child-Study (for girls only).

(21) General Science (Physics, Chemistry and Biology).

(22) Physiology, Hygiene and Elementary Psychology (for boys only).

2 Committees of Courses shall be constituted for such other subjects of study as may from time to time be prescribed by the Board.

3. Each Committee of Courses shall lay down a syllabus in the subject with which it is concerned and recommend or prescribe suitable text-books, when considered necessary, in conformity with that syllabus.

4. Every Committee of Courses shall ordinarily meet in the month of February every year, and draw up courses three years ahead of the examinations for which they are intended to be prescribed. The draft courses proposed by the Committee shall be circulated, as soon as may be, among the members of the Board and sent to the Curriculum Committee. Any observations made by the Curriculum Committee or by members of the Board in regard thereto shall be communicated by them direct to the Convener concerned before the end of August in the same year. If, in the opinion of the Convener, the nature of the criticisms received justifies the reconsideration of the courses drawn up by the Committee, he shall summon another meeting of the Committee to reconsider the courses or ascertain by correspondence the views of the members

of the Committee on the suggestions received; otherwise the courses drawn up shall be taken to be finally approved by the Committee.

5. The courses as finally approved by the Committee shall be submitted, along with such observations as the Curriculum Committee may have made, to the Board at its annual meeting by the Convener or by some other member of the Committee who is a member of the Board and is present at the annual meeting.

6. The courses, as finally approved and sanctioned by the Board, shall be printed in the prospectus and issued by the Secretary not less than two years before the date of the examination for which those courses have been prescribed.

7. If the Board is of opinion that a recommendation made by a Committee of Courses requires reconsideration it may refer the matter back to the Committee. After considering the views of the Committee upon its reference, the Board shall decide the matter.

8. A Committee may bring to the notice of the Board any matter connected with the examinations or courses in respect of the subject or subjects with which it is concerned.

9. Any two or more Committees of Courses may and, at the request of the Board, shall meet and render a joint report upon any matter with which they are severally and jointly concerned.

CHAPTER VI.

THE EXAMINATIONS' COMMITTEE.

It shall be the duty of the Examinations' Committee, subject to the sanction and control of the Board,—

- (a) to order examinations in conformity with the regulations and to fix dates for holding them;

- (b) to consider the recommendations of the Committees of Courses with regard to examiners and to prepare lists of examiners for the approval of the Board,
- (c) to appoint Boards of Moderators on the recommendation of the Committees of Courses;
- (d) to propose maximum and minimum marks for each subject and for each part of a subject, after receiving recommendations from the Committees of Courses concerned;
- (e) to frame rules for the award of grace marks;
- (f) to prescribe forms of application to be filled up by candidates applying for permission to appear at examinations, and forms of certificates to be granted to successful candidates;
- (g) to fix rates of honorarium for examiners, invigilators and others;
- (h) to propose the opening and closing of centres of examination,
- (i) to prescribe the mode of conducting the oral and practical tests, if any,
- (j) to appoint tabulators for the examinations conducted by the Board,
- (k) to consider all other matters arising out of the conduct of examinations, and to make recommendations, where necessary, to the Board.

2 The Examinations' Committee shall appoint a Sub-Committee to scrutinize applications from private candidates for permission to appear at the Board's examinations.

CHAPTER VII.

RECOGNITION OF INSTITUTIONS BY THE BOARD.

1. The Committee of Recognition shall consist of seven members, at least five of whom shall be elected by the Board.

2. Its duties shall be to scrutinize applications for recognition, to call for other information necessary for purposes of recognition, and to perform such other duties as may be delegated to it by the Board.

3. An institution desiring to be recognized for the purposes of an examination conducted by the Board shall not later than the 31st of October in the year preceding that in which it proposes to open classes in preparation for an examination, apply to the Secretary for permission to send up candidates.

4. On receipt of an application for recognition, the Secretary shall forward it to the Inspector of Schools within whose jurisdiction the institution is situated with a request for a local enquiry and a report and recommendation regarding the fitness of the institution for recognition. In the case of an Intermediate College the Director of Public Instruction may associate with the Inspector, for the purposes of the local enquiry and report, one or more persons who will be chosen from a list of persons nominated by the Board. Such persons shall be actually engaged in the work of teaching in the United Provinces. The report shall be submitted to the Recognition Committee through the Director of Public Instruction, who will add his comments and recommendations, if any.

5. Applications for recognitions shall set out in detail the following particulars, upon which the inspecting authority should make its report and recommendation —

- (a) whether there is a real need of the institution in the locality;
- (b) the constitution of the governing body, if any;
- (c) the name of the manager or secretary or correspondent, as the case may be;

- (d) the qualifications and rates of pay of the teaching staff ;
- (e) the examination or examinations for which it desires recognition ;
- (f) the subject or subjects of instruction in which the institution undertakes to make provision ;
- (g) the accommodation provided in class-rooms and in hostels ;
- (h) the provision made for the health, recreation and discipline of scholars ;
- (i) the financial position of the institution and the sources and amount of income ;
- (j) the scale of fees charged and the provision, if any, for the admission of poor scholars ;
- (k) the number of scholars in each class or section of a class.

6. Any other information which the Board may call for in connection with the application shall be supplied by the institution through the inspecting authority.

7. The inspecting authority in forwarding its report shall state whether, and in what subjects or on what conditions, recognition should, in its opinion, be granted.

8. No institution shall be recognized unless it agrees to comply with the following requirements :—

- (a) it shall, in the case of a High School, be open to inspection by the inspecting officers of the department, and in the case of an Intermediate College by the inspecting officer of the department with whom the Director of Public Instruction may, for purposes of formal

inspection, associate one or more persons chosen from the list referred to in Regulation 4 ;

(b) all information and returns called for by the department or the Board shall be duly furnished ;

*(c) it shall not prepare and send up candidates for a rival examination (High School, Intermediate, Intermediate in Commerce or Intermediate in Agriculture) when an examination of the same nature and similar standard is held by the Board ;

(d) it shall make suitable arrangements for the health, recreation and supervision of boarders and for the sanitation of its premises generally.

8A. An Intermediate College comprising classes III to XII may be recognized, provided its total enrolment does not exceed five hundred and provided further, a head master is appointed in charge of the junior section of the College ; but in case the total enrolment exceeds five hundred, classes IX to XII or VII to XII should be formed into a separate institution.

9. If satisfied that an institution is deserving of recognition, the Board shall direct the Secretary to enter its name upon a list of recognized institutions to be kept by him, and the Secretary shall inform the institution and the Inspector of the division in which it is situated in which subjects, on what conditions, and for what examination or examinations it has been recognized.

10 Where an institution desires to add to the subjects of instruction in respect of which recognition has

* This clause does not apply to the Cambridge School Certificate Examination in the case of European schools.

been granted, the procedure prescribed by the foregoing regulations shall, as far as may be, be followed.

11. An institution recognized by the Board for the purposes of any of its examinations shall submit to the department annual returns giving the personnel and pay of the teaching staff. Any change in the management shall be communicated as soon after the change as possible.

12. The department shall forward to the Secretary copies of all notifications from a recognized institution communicating changes in management and in the number, qualifications and salaries of the teaching staff, the result of which, in its opinion, affects the fitness of the institution for continued recognition by the Board.

13. If the department is of opinion that any institution recognized by the Board has, by reason of deterioration, ceased to meet the requirements of the Board, the department shall make a report to the Board. On receipt of the department's report the Board may, through the Divisional Inspector, institute such enquiry as it thinks fit. The report of the Inspector will be submitted to the Board through the Director of Public Instruction, who will add his comments, if any, and the Board will take the report into consideration at its next meeting and inform the department of its decision. In the case of an Intermediate College the Director of Public Instruction may associate with the inspector for the purpose of the enquiry one or more persons chosen from the list referred to in Regulation 4.

14. In any case in which the Board may decide that action is necessary upon the report, it will first call upon the authorities through the department to show cause why such action should not be taken.

15. No action shall be taken by the Board on any report by the department without first giving the institution concerned an opportunity of making any representation it may wish to make through the department to the Board.

16. The Board shall, if satisfied that the institution is no longer fit for recognition, direct the Secretary to issue a warning to the governing body through the department that unless within a period fixed by the Board the institution removes the defect or defects to which attention has been called, it will be struck off the list of recognized institutions or that recognition will be withdrawn in one or more optional subjects. The Board shall have power to extend from time to time the period so fixed

17. If within the time fixed by the Board, or within such further time as may be allowed by it, the institution fails to satisfy the Board that it is conforming to its requirements, the Board shall strike the institution off the list of recognized institutions or shall withdraw recognition in one or more optional subjects.

18. The Board may, at a subsequent date, after report by an Inspector, re-instate an institution on the list of recognized institutions, or, if recognition was withdrawn in one or more optional subjects, restore to it the privileges of preparing candidates therein.

19. No institution shall be recognized in any branch of experimental science unless it satisfies the Board—

- (a) that the number of students assigned to a single teacher in practical work at one time does not exceed 20 ;
- (b) that suitable and, in the case of Intermediate classes, separate laboratories for each branch of experimental science are provided, and that each of them is adequately equipped.

CHAPTER VIII.

THE FINANCE COMMITTEE.

1. The Finance Committee shall act as an advisory body in all matters concerning the finances of the Board.

2. It shall consist of—

- (a) the Assistant Director of Public Instruction, *ex-officio* Convener ;
- (b) one Principal of an Intermediate College not maintained by Government, who is a member of the Board ;
- (c) one representative of the non-official members of the Legislative Council, who is a member of the Board ;
- (d) four other members elected by the Board.

3. The annual financial statement of the Board shall first be laid before the Finance Committee before being submitted to the Board.

4. The Finance Committee shall also see the schedules of new demands proposed to be included in the budget relating to institutions recognized by the Board, and submit its views thereon for the consideration of the Board.

CHAPTER IX.

THE CURRICULUM COMMITTEE.

1. The number of members appointed to the Curriculum Committee by the Board shall be fifteen, of whom at least twelve shall be members of the different Committees of Courses.

2. The duties of the Curriculum Committee shall be—

- (a) to consider the total number of compulsory and optional subjects for each of the Board's examinations ;

- (b) to arrange the standards of the courses for the Middle, High School and Intermediate stages in a regular graded order ;
- (c) to recommend curricula for the Intermediate Examination leading to both University and vocational courses ;
- (d) to consider proposals for the introduction of new subjects and the exclusion of existing subjects ,
- (e) to consider questions of the formation of groups of subjects and the alternation of one group with another ;
- (f) to lay down courses for the middle section of English schools, and to recommend or prescribe suitable text-books, when considered necessary, in conformity with the syllabus ;
- (g) to fix the number of question papers to be set in each subject after receiving recommendations from the Committees of Courses concerned ,
- (h) to recommend the standard of length for written tests in different subjects after receiving recommendations from the Committees of Courses concerned ,
- (i) to consider the recommendations of the Committees of Courses with regard to the courses of study.

CHAPTER X

CONDITIONS UNDER WHICH GRANTS-IN-AID MAY BE GIVEN TO RECOGNISED INSTITUTIONS.

1. No grant-in-aid shall be recommended to any institution unless it has been recognized by the Board.
2. An institution receiving grant-in-aid shall, unless

especially exempted by the Government, invest all Government grants not disbursed within a month of their receipt in a Presidency or post office savings bank.

3. An institution shall be liable to have its grant withdrawn if it continues, even after a warning by the department to employ a teacher who takes an active part in political agitation calculated to subvert the authority of Government.

4. The provisions of the Educational Code, United Provinces, with regard to grants-in-aid shall apply to all institutions recognized by the Board, so far as they are not inconsistent with these Regulations.

CHAPTER XI.

RESIDENCE OF STUDENTS.

1. Where accommodation is available, every student of a recognized institution shall reside in a hostel provided by it, or in a hostel recognized by the head of the institution, or with a parent or guardian.

2. Where no accommodation is available in a recognized hostel, the head of an institution may permit a student or students to live in lodgings reserved by the keeper thereof for students of recognized institutions, provided—

(a) that the lodgings are open to inspection by the head of the institution concerned or by any member of the staff who is deputed for the purpose; and

(b) that the keeper is willing to submit to the requirements regarding supervision of students laid down by the head of the institution or heads of institutions concerned

CHAPTER XII.

EXAMINATIONS.

General Rules.

1. The Board shall conduct the following examinations :—

- (a) The High School Examination.
- (b) The Intermediate Examination
- (c) The Intermediate Examination in Commerce.
- (d) The Intermediate Examination in Agriculture.

2. The Board's examinations shall be held at such centres and on such dates and at such times as the Board may from time to time appoint.

3. The tests at the Board's examinations may be partly oral or practical and partly written. Oral and practical tests shall be carried out by examiners appointed by the Board in such manner as the Examinations^t Committee may prescribe from time to time. Written tests shall be by means of question papers, and the question papers shall be given out simultaneously at every centre at which the examination is being held.

4. Every candidate for admission to an examination held by the Board shall, not later than the seventh of January each year—

- (a) pay the fee prescribed for the examination,
- (b) state the optional subject or subjects in which he desires to present himself for examination, and
- (c) furnish the Secretary with a certificate showing—
 - (i) that he has completed a regular course of study* in a recognized institution, or
 - (ii) that he has been permitted by the Board to appear as a private candidate,

* See clause (11), Chapter I and Regulation 4, Chapter XVII.

(iii) (for* Science candidates of the High School Examination only) that he has actually performed the experiments laid down in the syllabus.

5. The following fees shall be paid in respect of the examinations held by the Board :—

- | | |
|---------------------------------------------|---------------------------------------------------------------------------------------------------------|
| (1) High School Examination. | Rupees 15 by each candidate from a recognized institution. |
| (2) Ditto .. | Rupees 20 by each private candidate. |
| (3) Intermediate Examination. | Rupees 25 by each candidate from a recognized institution. |
| (4) Intermediate Examination. | Rupees 30 by private candidates. |
| (5) Intermediate Examination in Commerce. | Rupees 25 by each candidate from a recognized institution. |
| (6) Intermediate Examination in Commerce. | Rupees 30 by private candidates. |
| (7) Intermediate Examination in Agriculture | Rupees 25 by each candidate from a recognized institution and Rs 30 by each private candidate (if any). |
| (8) Examination in one subject only. | Rupees 5. |
| (9) Examination in more than one subject. | Rupees 5 for each subject. |

*The term "science" includes "General Science."

- (10) Fee for checking the results of failed candidates. Rupees 10 per candidate.
- (11) Fee for communicating the total marks in each subject obtained by a candidate at an examination. Rupees 2 per candidate.

*Provided that women candidates may pay fees for the High School or the Intermediate Examination at half the rates prescribed.

6. A candidate who fails to pass or who from sickness or other sufficient cause is unable to present himself for any examination, shall not receive a refund of his fee

Provided the board may, on application, admit a candidate who was unable to present himself for any examination to the next ensuing examination without payment of a further fee :

Provided also that the fee may not be held over for the next ensuing examination in the case of a candidate who absented himself from a part of the examination.

7. The Secretary shall, after satisfying himself that a candidate has complied with all the requirements for admission to an examination of the Board, furnish the candidate with a card of admission, on presentation of which to the local superintendent of the examination, the candidate shall be permitted to sit for the examination.

the examinations
fees prescribed
communicating the

(vide resolution 5 of the Examinations⁷ Committee, dated January 12, 1931, adopted by the Board).

8 Notwithstanding anything contained in these Regulations, no candidate who is still undergoing rustication or who has been expelled within the academical year preceding the date of his application for permission to appear at an examination shall be admitted to any examination of the Board.

9. The Secretary, if satisfied that a candidate's admission card has been lost or destroyed, may grant a duplicate card on payment of a further fee of Rs. 2.

10. Private candidates* shall be eligible to appear at the Board's examinations on the conditions hereinafter laid down

11. A candidate who desires to offer himself for examination as a private candidate shall, not later than the first of October preceding the date fixed for the next

* The following rules for the admission of private candidates to the Board's examinations have been approved by the Board (vide Board's Resolution no. 22, dated November 8, 1924) :—

1. A candidate must be a resident of the United Provinces.

2. A candidate must be a resident of the United Provinces.

E
class 1A or class A1).

3 (a) Private candidates may change their subjects of examination from those previously offered by them, if more than one year has elapsed since their last appearance at the examination; they will not be required to give any reasons for the change.

(b) Private candidates who are - - - - -

4 Candidates residing outside the present territorial jurisdiction of the Board may be permitted to appear at the Board's examination, as private candidates, provided they submit an adequate explanation as to why they prefer to take the United Provinces Board's examination.

5 Where an age-limit or other restriction is imposed by the Local University or Examining Body, such restriction shall be rigorously enforced before permission to appear as private candidates at the Board's examinations is granted to outside candidates.

ensuing examination, send in an application to the Secretary, through the Inspector of Schools of his division or the Chief Educational Officer of the Indian State where he resides, unless he is a failed candidate of a previous year, in which case the application may be forwarded by the head of the institution at which he last studied. In the case of a female candidate the application may be forwarded by the head of any institution

6. Residents of places beyond the territorial jurisdiction of the

apply to residents of such places who have passed any examination conducted by the Board or its predecessors and desire to appear for the first time at a higher examination conducted by the Board.

recognized institutions shall be grouped according to the institutions in which they have studied.

16. A candidate who has failed in an examination may present himself for one or more subsequent examinations, provided that he shall on each and every such occasion satisfy the Secretary that he has fulfilled the conditions laid down in the Regulations for the admission of candidates to the Board's examinations.

17. A candidate who has failed in an examination may be admitted to a subsequent examination without attending a regular course of study in a recognized institution, provided—

(a) that he has not pursued his studies at an educational institution of any kind ;

(b) that, not less than six months before the date fixed for the next examination, he sends an application to the Secretary through and recommended by the head of the institution at which he last studied, in the prescribed form, setting out—

(i) the conditions under which he has been studying and is now proposing to continue his studies and

(ii) the dates of his failing in the examination :

*Provided, further, that this Regulation shall not apply to candidates who have taken a subject or subjects for which practical work or a practical examination is prescribed :

Provided, lastly, that private candidates may be allowed to take Economics as one of their optional subjects if they have studied the subject as regular students at a recognized institution and failed at the Intermediate Examination of a previous year.

* See the footnote to Regulation 11, Chapter XII.

18. *Any candidate who has obtained 40 per cent of the aggregate number of marks, but has failed in one subject only, obtaining not less than 25 per cent in that subject, shall be admitted to a subsequent examination in the subject in which he failed on payment of the fee prescribed in these Regulations ; and if he passes in that subject he shall be deemed to have passed the examination.

18(a). The answer-books of candidates who are eligible^o for the compartmental examination under Regulation 18, Chapter XII, as well as of those who have failed in one subject only by not more than five per cent. of the marks assigned to that subject shall be scrutinized in accordance with the rules framed by the Board.

19. Heads of recognized institutions are not entitled to detain candidates who have fulfilled the conditions laid down for permission to appear at one of the Board's examinations, except for very grave reasons and with the previous sanction of the Chairman of the Board.

* Compartmental candidates have the option of appearing at the

ter XII.

Compartmental candidates are not eligible for admission to class XI of a recognized College unless and until they have passed completely the High School Examination under Regulation 2, Chapter XIII (vide Examinations' Committee's Resolution no. 9, dated February 6, 1925, adopted by the Board).

The prescribed fee for admission to the compartmental examination is Rs. 5.

Failed candidates may have two chances of re-appearing at the

... on November 9, 1927, adopted by the Board).

CHAPTER XIII.

HIGH SCHOOL EXAMINATION.

1. The following are the subjects prescribed for the High School Examination of the Board :—

Compulsory.

- (1) English.
- (2) Mathematics.
- (3) History or Geography.
- (4) One of the following Modern Indian Languages :—

Hindi, Urdu, Bengali, Marathi and Gujarati.

Optional.

- (1) One of the following Classical Languages :—
Sanskrit, Arabic, Persian and Latin.
- (2) Commerce.
- (3) Physics and Chemistry.
- (4) Agriculture.
- (5) Drawing.
- (6) Manual Training.
- (7) A Modern European Language.
- (8) Domestic Science.
- (9) Metal work.
- *(10) History or Geography.
- (11) Book-binding.
- (12) Spinning and Weaving.
- (13) General Science (Physics, Chemistry and Biology).

N.B.—Candidates must take up one optional subject for examination and no candidate will be examined in more than one such subject. In addition to the compulsory subjects, at one and the same examination; provided that a candidate who has passed the High School or an equivalent examination in a place outside the United Provinces may

*A candidate taking History or Geography as a compulsory subject must not offer the same subject as an optional subject.

present himself for examination in any subsequent year in one or more optional subjects without re-examination in the compulsory subjects; and such a candidate will, if successful, be entitled to have an entry made in the certificate already granted to him, certifying in which additional optional subject or subjects he has passed.

2. A candidate is not entitled to a certificate of having passed the High School Examination unless he qualifies separately in each subject offered by him thereat.

3. Diaries shall be kept by all teachers employed in teaching classes preparing for the High School Examination showing the work done in class in each subject taught by them, and such diaries shall be inspected by the oral or practical examiners or by such other authorities as the Board may depute.

4. The question papers set and the written answer-books of all candidates at terminal examination shall also be subject to inspection in such manner and by such authorities as the Board may direct.

5. The head of the institution shall furnish the oral or practical examiner, or such other authority as the Board may appoint, with a list of the candidates undergoing examination in the subject or subjects with which he is concerned, and shall make an entry against each name regarding the proficiency of the candidate as judged by his record therein during the course of study prescribed for the examination.

6. *Cancelled.*

7. Any candidate who has passed a *public examination in an Oriental Language (Sanskrit, Persian or

* (a) The following examinations are recognized by the Board as public examinations in an Oriental Language under the Regulations and Regulation 7, Chapter XIV :—

(1) Maulvi, Ahm, Mulla (now defunct) and Fard in Arabic, and Munshi and Kamil in Persian.
 department of t
 minations condu
 Benares, and
 Boards' Resoluti.

Arabic) or the examination in advanced Urdu or Hindi conducted by the department may be admitted as a private candidate to the High School Examination in English only, and shall, if successful, be entitled to a certificate of having passed the examination in English only. Similar concession may be given to candidates residing in the United Provinces, who have passed an examination in a vernacular language (Hindi or Urdu) conducted by the Oriental Faculty of the Punjab University, and to Drawing Masters working in institutions recognized by the Board who have read up to the High School standard

8. *Candidates for the High School Examination are permitted to answer questions in English, Urdu, or Hindi in all subjects other than English.

and paragraph 2 of the report of the meeting of the Examinations' Committee held on February 4, 1926, adopted by the Board), (3) the Diploma Examinations in Arabic and Persian conducted by the Lucknow University [vide Board's Resolution no 18(g), dated November 3, 1926] and (4) the Sanskrit examinations conducted by the Department of Public Instruction, Jaipur State [vide resolution 7 of the meeting of the Examinations' Committee held on November 8, 1923 and Resolution 31(c) of the meeting of the Board held on November 9, 1924]

(b) Candidates residing in the United Provinces who have passed an examination (Sanskrit, Persian or Arabic) of the Oriental Faculty of the Punjab University may also apply for permission to appear at the High School Examination in English only as private candidates (vide paragraph 39 of the report of the meeting of the Examinations' Committee held on November 9, 1927, adopted by the Board)

* This regulation should be read in the light of the following notes —

(1) A candidate for the High School Examination may answer questions in English in one or more subjects and in Hindi or Urdu in the remaining subjects in which a vernacular medium is permitted.

(2) The option of using a vernacular medium of examination has been given in the following subjects only and in the following manner with effect from the date noted against each. —

(a) Sanskrit and Hindi—through the me-

of

} High School Examination of 1927.

English, Arabic or Urdu.

CHAPTER XIV.

INTERMEDIATE EXAMINATION.

1. Every candidate for admission to the Intermediate Examination shall be required to have passed the Board's High School Examination, or to have passed an examination which by Regulation is declared equivalent thereto, before entering upon the course of study prescribed for the Intermediate Examination.

2. The following examinations are declared equivalent to the Board's High School Examination for the purpose of enabling candidates to enter upon the course of study prescribed for the Intermediate Examination :—

- (1) the Matriculation Examination of any University established by law in India approved for the purpose by the Board. (The Matriculation Examinations of the following Universities are approved by the Board :—Allahabad, the Punjab, Bombay, Calcutta, Madras, Patna, Benares* and Aligarh*);
- (2) the School-Leaving Certificate Examination of the United Provinces, or of another province, provided this examination is accepted as 'equivalent to Matriculation by the University established by law in that province ;
- (3) the Cambridge School Certificate (formerly called Senior Local) Examination, provided a

| (e) Mathematics—through the medium of English, Hindi or Urdu | } High School Examination of 1929. |
| (f) Domestic Science—through the medium of English, Hindi or Urdu. | |
| (g) Physics and Chemistry—through the medium of English, Hindi or Urdu on condition that in case of the vernacular medium, English Technical terms may be used | } High School Examination of 1931. |

*By Matriculation Examination of the Benares Hindu and Aligarh Muslim Universities the Admission Examination of the former and the High School Examination of the latter are meant.

candidate has passed in five of such subjects as are recognized for the High School Examination of the Board of High School and Intermediate Education, United Provinces ;

- (4) the Diploma Examination of the Chiefs' Colleges ;
- (5) the High School Examination for European Schools in the Central Provinces and in other provinces ;
- (6) the High School Certificate Examination of the Board of High School Education, Central Provinces ;
- (7) the Anglo-Vernacular High School and the English High School Examinations of Burma ;
- (8) the London University Matriculation Examination ;
- (9) the English School-Leaving Certificate Examination of the Travancore State ;
- (10) the High School-Leaving Certificate Examination of Hyderabad (Deccan), provided a candidate has passed in class I or class II ;
- (11) the Secondary School-Leaving Certificate Examination of Mysore, provided a candidate has been declared eligible for admission to a University course ;
- (12) the Diploma Examination of the Royal Indian Military College, Dehra Dun, so long as the syllabus and the standard of the examination continue to be the same as those of the examination recognized in the foregoing clause (4) ;

- (13) *the High School Examination of the Board of Secondary Education, Delhi, provided a candidate has passed the examination with an additional subject under Regulation 3, Chapter XI of the Delhi Board's Regulations, and provided, further, that he has passed in five full subjects excluding Elementary Economics and (except in the case of female candidates) Physiology and Hygiene, and Domestic Science,
- (14) the High School Examination of the Board of High School and Intermediate Education, Rajputana (including Ajmer-Merwara), Central India and Gwalior, Ajmer.

*A candidate who has passed the High School Examination of the Delhi Board in English, Mathematics and any three† of the following subjects is eligible to enter upon the course of study prescribed for the Intermediate Examination :—

- (1) A Classical Language (Sanskrit, Arabic, Persian, Hebrew, Latin or Greek).
- (2) Physics and Chemistry.
- (3) Any two of the following as one subject :—
 - I. Indian History.
 - II. English History.
 - III. General Geography.
 - IV. Commercial Geography.
 - V. Elementary Economics
- (4) Agriculture.
- (5) Drawing.
- (6) An Indian Vernacular.
- (7) French
- (8) Any two of the following as one subject (Commerce) :—
 - I. Business or Commercial Practice.
 - II. Elementary Book-keeping.
 - III. Indian System of Accounts.
- (9) Domestic Science (for female candidates only).
- (10) Physiology and Hygiene (for female candidates only).

†At least one of these three subjects must be taken from among subjects numbered (1), (2), (3), and (8), the last subject intended for female candidates only.

3. No candidate shall be admitted to the Intermediate Examination unless two academical years shall have elapsed since the date of his or her passing the High School or an equivalent examination :

* Provided that candidates who have passed the Cambridge School Certificate (Senior Local) Examination may be admitted to the Intermediate Examination in the academical year following that in which they pass the Cambridge School Certificate Examination.

4 Any student who has kept one academical year at a college affiliated to the Universities of Calcutta, Madras, Bombay, Patna, Benares, the Punjab, Nagpur, Delhi, Aligarh or Rangoon after matriculation, may be allowed a year corresponding to that which he has so kept, provided he produces a satisfactory certificate from the Principal of a college affiliated to the Universities of Calcutta, Madras, Bombay, Patna, Benares, the Punjab, Nagpur, Delhi, Aligarh or Rangoon that the corresponding year has been duly kept according to the regulations in force at the University from which he has migrated, and that the said Principal has no objection to his transfer.

5. Every candidate for the Intermediate Examination shall be examined in English and any three of the following subjects :—

(1) Mathematics.

(2) Chemistry.

* Candidates intending to appear under this proviso are eligible to appear as private candidates also, provided they fulfil the necessary conditions [vide Board's Resolution no. 24 (last paragraph), dated November 8, 1924.]

† The Board has framed no rules nor prescribed any form regarding migration of students from or to its territorial jurisdiction. A candidate intending to migrate to a place outside the jurisdiction of the Board should communicate with the Divisional Inspector of Schools through the head of his last institution. In case the candidate is a resident of a place outside the United Provinces, he should communicate with the Head of his last institution.

- (3) Physics.
- (4) Biology.
- (5) Drawing
- (6) Economics.
- (7) Civics.
- (8) History and Allied Geography.
- (9) Histories of Greece and Rome and Allied Geography.
- (10) Geography.
- (11) Logic.
- (12) A Modern Indian Language (Urdu or Hindi or Bengali or Marathi or Gujarati), or a Modern European Language (German or French).
- (13) A Classical Language, viz., Sanskrit, Arabic, Persian, Latin, Greek or Hebrew.
- (14) *Physiology, Hygiene and Child-Study (for girls only).
- (15) Physiology, Hygiene and Elementary Psychology (for boys only).

6. Any candidate who has passed the Intermediate Examination of the Board or an examination equivalent thereto may appear at any subsequent Intermediate Examination or Examinations conducted by the Board in any subject in which he has not previously passed the Intermediate Examination, provided that in the case of a subject for which practical work or a practical examination is prescribed he produces evidence satisfactory to

*A special subject intended to prepare girls either for the teaching profession or for domestic life (*vide* Board's Resolution no. 3, dated November 8, 1924).

the Board that he has completed the practical course prescribed for the subject.

7. *Any candidate who holds a certificate of having passed the High School Examination in English only under Regulation 7, Chapter XIII, or of having passed an examination equivalent to the High School Examination in English only under similar conditions, may be admitted as a private candidate to the Intermediate Examination in English only, provided at least one academical year shall have elapsed since the date of his or her passing the High School or an equivalent Examination in English, and such a candidate shall, if successful, be entitled to a certificate of having passed the examination in English only.

CHAPTER XV.

INTERMEDIATE EXAMINATION IN COMMERCE.

1. Every candidate for admission to the Intermediate Examination in Commerce shall be required to have passed the Board's High School Examination or an examination equivalent thereto, and to have, since the passing of this examination, prosecuted a regular course of study for not less than two academical years at an institution recognized by the Board for the Intermediate Examination in Commerce.

2. † Inspecting officers of an Education department and teachers in schools and colleges recognized by the

* See Regulation 2, Chapter XIV.

† Failed candidates of the Intermediate Examination in Commerce may also be admitted to a subsequent examination as private candidates under Regulations 16 and 17, Chapter XII (vide paragraph II of the report of the meeting of the Committee of Courses in Commerce held on November 8, 1923).

Board may be admitted to this examination as private candidates by special permission of the Board, provided that by the date of the examination not less than two academical years shall have elapsed since the date of their passing the High School Examination or an examination equivalent thereto.

3. The following are the subjects of examination. These may be arranged in alternative groups in such manner and with such additions and alterations as the Board may, from time to time, decide :—

Compulsory.

- (1) English.
- (2) Book-keeping and Accountancy.
- (3) Business Methods and Correspondence.
- (4) (a) Elementary Economics.
(b) Commercial Geography.

Optional.

One of the following :—

- (1) Steno-typing (shorthand and typewriting).
- (2) Elements of Banking.
- (3) Elements of Industrial Organization.
- (4) Mathematics.

CHAPTER XV(a).

INTERMEDIATE EXAMINATION IN AGRICULTURE.

1. Every candidate for admission to the Intermediate Examination in Agriculture shall be required to have passed the Board's High School Examination, or an examination equivalent * thereto, and to have, since the passing of this examination, prosecuted a regular course of study for not less than two academical years

* See Regulation 2, Chapter XIV.

at an institution recognized by the Board for the Intermediate Examination in Agriculture :

Provided that a candidate who has passed the Intermediate Examination of the Board or an examination equivalent thereto with Chemistry and Biology as optional subjects, may be admitted to the Intermediate Examination in Agriculture after prosecuting a regular course of study for not less than one academical year since the date of his passing the aforesaid examination at an institution recognized by the Board for the Intermediate Examination in Agriculture.

2. The following are the subjects of examination arranged in groups The Board may make such additions and alterations in them as it may, from time to time, decide —

Group I.—Chemistry and Physics.

Practical Chemistry and

Practical Physics.

Group II.—Botany and Zoology.

Practical Botany and

Practical Zoology.

Group III.—Physical properties of soil, Soil Geology, Climatology.

Tillage and Plant Feeding, Principles of Manuring.

Principles of Irrigation and Drainage

Practical Farming.

Practical A.—Crop culture, Climatology.

Practical B.—Farm Machinery, including ploughing and other tillage operations.

Practical C.—Animal Husbandry.

Group IV.—English.

Translation and Composition.

Essay and Unseen passages from textbooks.

Group V.—Economics or Mathematics.

CHAPTER XVI.

ELECTION OF MEMBERS OF THE BOARD UNDER CLAUSES
(c) AND (c) OF SUB-SECTION (1) OF SECTION 3 OF THE
INTERMEDIATE EDUCATION ACT, 1921

1. An election to fill any vacancy amongst members of the Board which is to be filled by election by Principals of Intermediate Colleges not maintained by Government or by Head Masters of High Schools not maintained by Government shall be held on such dates as the Chairman shall appoint.

2. As soon as the Chairman has fixed the date for election, the Secretary shall circulate a notice to every Principal or Head Master, as the case may be, inviting the nomination of a candidate other than himself for election within the time to be named in the notice. Such time shall be not less than a fortnight from the date of the issue of the notice. Such notice shall state the date and hour up to which nominations will be received by the Secretary at his office.

3. Within the said time any Principal or Head Master, as the case may be, may propose a candidate other than himself for election as a member, provided that such candidate is willing to stand for election. This proposal need not be seconded.

4. On the expiration of the period fixed by the notice, the Secretary shall, after scrutiny of the nominations received, prepare and send to every voter a list of candidates who have been duly nominated, and have not withdrawn their candidature, together with a voting paper, and shall also specify the date fixed for election and the time on the said date up to which votes must be deposited with him : provided that if the number of such candidates is equal to the number of vacancies, all such candidates shall be deemed to be elected ; and provided,

further, that if the number of such candidates is less than the number of vacancies, all such candidates shall be deemed to be elected, and the Secretary shall invite fresh nominations for the remaining vacancy or vacancies

5. The voting paper must be signed by the voter and shall be placed by him in a sealed cover superscribed "Voting paper for the election of a member of the Board." He shall either deliver the cover in person to the Secretary at his office or send it by registered post to him. The voting paper must reach the Secretary before the expiry of the time fixed within which votes will be received. The Secretary shall deposit all covers containing voting papers in a safe in his office, until the time fixed by the Chairman for opening them, and for scrutinizing and counting the votes.

6. The Chairman shall appoint two members of the Board to act with the Secretary in the scrutiny and counting of the votes

7. At the time fixed for opening the covers of the voting papers the covers shall be opened by the Secretary in the presence of the said members, and the voting papers shall then be duly scrutinized.

8. Every Principal or Head Master, as the case may be, of an institution recognized by the Board shall be entitled to vote. Every voter shall have as many votes as there are vacancies to be filled: provided that no voter shall give more than one vote to any one candidate. If more than one vote be recorded by a voter for the same candidate such votes shall be recognized as one vote. If the voter records more votes than the vacancies, his voting paper shall be declared invalid. The decision of the Secretary and the two members of the Board appointed to act with him shall be final as to the validity of any votes recorded. In case of difference

of opinion between them, the decision shall be in accordance with the opinion of the majority.

9. After the scrutiny is completed and the votes have been counted, a statement shall be prepared for submission to the Chairman, showing the number of valid votes received by each candidate. Such statement shall be signed by the Secretary and the said two members of the Board.

10. A candidate who has received the largest number of valid votes shall be deemed to be elected. In the event of two or more candidates obtaining an equal number of votes, the election shall be determined by lot to be drawn in the presence of the Secretary and the two members of the Board and in such manner as the Secretary may think fit.

11. The voting papers shall be preserved in the Secretary's office after the election till such time as the Chairman may direct.

CHAPTER XVII.

MISCELLANEOUS.

1. Detailed information regarding the examinations of the Board shall be given in the prospectus of the examinations, which is issued annually by the Secretary of the Board and can be obtained from the Superintendent, Government Press, Allahabad, on payment of the fixed price.

2. The rules of the Educational Code of the United Provinces of Agra and Oudh shall apply to all institutions recognized by the Board in so far as they are not inconsistent with these regulations.

3. The Board shall, from time to time, prepare such forms and registers as may be deemed necessary. The forms when so prepared shall be appended to these regulations and shall, with such variations as circumstances

may require, be used for the respective purposes therein mentioned.

4. The Board shall, for the purposes of a regular course of study, prescribe the minimum *number of meetings of a class that must be held in preparation for any of its examinations.

5. Admission to any class or section of a class shall be limited to a maximum of 35 scholars in a class or section of a class of a High School, excluding primary classes, and 45 in a section of the Intermediate classes : provided that in the case of colleges which were affiliated up to the Intermediate standard by the Allahabad University the maximum in a section may be 60 for a period of five years

* NOTE — The minimum † number of days that recognized institutions, including classes XI and XII, will be open will be 180; for other recognized institutions the minimum number will be 200.

No candidate will be presented for an examination of the Board by a recognized institution unless he has been present (in classes IX and X in the case of the High School Examination and in classes XI and XII in the case of the Intermediate Examination) for at least 75 per cent. of the days the institution was open during two† academical years.

In the case of failed and § detained candidates the percentage will be calculated for one academical year only.

The head of a recognized institution may condone a deficiency of not more than six days. All cases in which this privilege is exercised will be reported to the Board.

The Board may, in very special cases, condone a deficiency of not more than 15 days.

† This minimum applies to the institution as a whole and not to attendance in class X or class XII separately (vide paragraph 16 of the minutes of the meeting of the Board held on November 30 and December 1, 1923).

‡ The two academical years need not be consecutive. (vide resolution 20 of the meeting of the Examinations Committee held on January 24, 1930, adopted by the Board.)

§ The term "detained" is used in the minutes of the meeting of the Board held on January 24, 1930, adopted by the Board, and resolution II of the meeting of the Examinations Committee held on September 20, 1930, adopted by the Board.

* The term "detained" is used in the minutes of the meeting of the Board held on January 24, 1930, adopted by the Board, and resolution II of the meeting of the Examinations Committee held on September 20, 1930, adopted by the Board.

RULES OF THE EXAMINATIONS' COMMITTEE.

Rules for the scrutiny of marks and the checking of the results of failed candidates under regulation 5 (10), Chapter XII of the Board's regulations.

1. Any candidate who has failed at an examination conducted by the Board may apply to the Secretary for the scrutiny of his marks and the re-checking of his result.

2. Such applications must be made within two months from the date of the publication of the result and must be forwarded by the head of the institution or other authority who forwarded the candidate's original application for permission to appear at the examination.

3. All such applications must be accompanied by a copy of the Treasury chalan showing that the prescribed fee of Rs. 10 has been paid. In the case of candidates belonging to Indian States this fee must be sent in cash to the office of the Secretary.

4. A candidate shall not be entitled to a refund of the fee unless as a result of the scrutiny he is declared successful in the examination.

5. If on scrutiny and re-checking a failed candidate is found to have passed, his name shall be at once published in the Gazette in a supplementary list. In all other cases the result of the scrutiny shall be communicated to the candidate through the head of the institution or other forwarding authority as soon as possible.

6. The work of scrutiny does not include re-examination of the answer-books of a failed candidate. It consists of re-checking the marks entered in the answer-books with a view to seeing whether there has been any mistake in totalling the marks assigned to individual questions or in the form of omitting the marks assigned to any question.

Rules for communicating the total marks in each subject obtained by a candidate at an examination under regulation 5 (11), Chapter XII of the Board's regulations.

- (1) Only the total marks in each subject obtained by a candidate at an examination will be communicated.
- (2) Any candidate desiring to know the total marks in each subject obtained by him at an examination held by the Board shall send an application to the Secretary through the officer who forwarded his application for admission to the examination, not later than six months ordinarily after the publication of the results in the *United Provinces Government Gazette*.
- (3) All such applications must be accompanied by a copy of the Treasury chalan showing that the prescribed fee of Rs. 2 has been paid. In the case of candidates belonging to Indian States this fee must be sent by money-order to the Secretary.

N.B.—Fees sent by money-order by candidates residing in the United Provinces will not be accepted.

- (4) No refund of the fee shall be allowed.
- (5) Each application should furnish necessary information on each of the following particulars :—
 - (a) The name and year of the examination.
 - (b) The name of the candidate.
 - (c) His roll number.
 - (d) The name of his college, or the district of which he was a resident.
 - (e) The name of his examination centre.
 - (f) The subjects offered.

es for communicating the total marks in each subject obtained by a candidate at an examination under regulation 5 (11), Chapter XII of the Board's regulations.

(1) Only the total marks in each subject obtained by a candidate at an examination will be communicated.

(2) Any candidate desiring to know the total marks in each subject obtained by him at an examination held by the Board shall send an application to the Secretary through the officer who forwarded his application for admission to the examination, not later than six months to the publication of the results in the *United Provinces Government Gazette*.

(3) All such applications must be accompanied by a copy of the Treasury chalan showing that the prescribed fee of Rs. 2 has been paid. In the case of candidates belonging to Indian States this fee must be sent by money-order to the Secretary.

N.B.—Fees sent by money-order by candidates residing in the United Provinces will not be accepted.

(4) No refund of the fee shall be allowed.

(5) Each application should furnish necessary information on each of the following particulars:—

(a) The name and year of the examination.

21. Government High School, Fatehgarh.

- (3) Dr. K. N. Bahl, Professor, Lucknow University, Lucknow (to act as convener)

MISCELLANEOUS RULES.

Travelling Allowance Rules.

1 All non-official members will be paid at the rates admissible for first class officers, viz., 1 3/5th first class railway fare, 0-6-0 per mile as mileage and Rs. 5 as daily allowance

2. Official members, viz., those who are in Govern-

ment service, will be paid according to the class to which they belong. They should, therefore, mention in the Travelling Allowance bill the salary which they are getting. Government servants getting over Rs. 750 are treated as first class officers and those getting over Rs. 200 as second class officers: for the latter class daily allowance is four annas for every Rs. 25 or fraction of Rs. 25 of pay, subject to a maximum of Rs. 3.

3. When a member (official or non-official) travels at a concession rate his mileage allowance will be restricted to the actual cost of the railway ticket plus three-fifths of the ordinary fare. In cases where concession fares are allowed for return journeys, the mileage allowance for the return journey will be limited to the actual cost of the return ticket plus three-fifths of the ordinary fare each way.

All claims for full mileage allowance for travel by railway must be supported by a certificate in one of the following forms according to the circumstances:—

“Certified that concessional rates were not obtainable for any of the journeys covered by this bill”

or

“Certified that the concessional rates obtainable for the journeys on (date) could not be availed of for the following reasons:—”

4. Members are required to further certify on the Travelling Allowance bill to the effect that they actually travelled in the class for which they are claiming the railway fare.

Maximum and minimum marks assigned to the various subjects for the examinations of 1932.

HIGH SCHOOL EXAMINATION.

Maximum marks	..	150 in English and 100 in every other subject.
Minimum pass marks	..	50 in English and 33 in every other subject.

INTERMEDIATE EXAMINATION.

Maximum marks	..	150 in English and 100 in every other subject.
Minimum pass marks	..	50 in English and 33 in every other subject.

INTERMEDIATE EXAMINATION IN COMMERCE

Maximum marks	..	100 in each subject.
Minimum pass marks	..	33 ditto

INTERMEDIATE EXAMINATION IN AGRICULTURE.

Maximum marks	..	100 in groups I and II each, 150 in group III and 50 in groups IV and V each.
Minimum pass marks	..	33 per cent in each group.

DISTINCTION.

Minimum marks required	75 per cent. of the aggregate marks in a subject.
------------------------	---------------------------------------------------

DIVISION.

Minimum pass marks required for division I	60 per cent. in the aggregate
Minimum pass marks required for division II.	45 per cent. in the aggregate.
Minimum pass marks required for division III.	33 per cent. in the aggregate.

COURSES OF STUDY.

- (14) The little Match Girl, by Hans Anderson.
- (15) The Death of Nelson, by Southey.
- (16) The Life of Buddha, by Max Muller.

Group B.—

- 1 Paths of Peace, Book II, by Mrs Laurence Bin-
yon (Oxford University Press)
2. The Story of the Buddha, by E Holland (Harrap).
- 3 Romance of Indian History, Part III (Macmil-
lan)

Group C.—

- 1 Indian Schools Book of Verse, Part II, from which
the following poems are prescribed —The
Slave's Dream, The Plate of Gold, The Honest
Man; Incident of the French Camp, The Old
Order Changeth, My Heart Leaps Up, Under
the Greenwood Tree; Blow, Blow, Thou Winter
Wind, The Burial of Sir John Moore; About
Ben Adhem; The Brook, Ring Out Wild Bells.
2. High School Poetry (Indian Press, Limited,
Allahabad), the whole book omitting "The
Tiger," "The Isles of Greece," and "Hora-
tius," Stanzas 1—20, 27, 28, 33, 34, 36—43,
45, 46, 54—57 and 60—61
- 3 Types of English Poetry, Part I (Macmillan &
Co), annas 6, from which the following poems
are prescribed —

Hymn to God, The Rainbow, Psalm of Life; Short-
ness of Life, Patriotism, The Child's First
Grief, The Beggarmen; The Sailor Boy;
The Ladder of St Augustine, Home they

brought her Warrior Dead; To the Cuckoo;
Stanzas written in his Library; Casabianca;
The Village Blacksmith.

N.B.—The above text-books are arranged in three groups.—A, B and C. Group A contains books of Prose Selections, Group B books of Inspirational Stories, and Group C books of Poetry. Every school must select for study one book only from each of the above groups.

Books recommended for rapid reading and indicating the standard of the unseen passages to be set in the second paper.—

1. Scott's Ivanhoe (Oxford University Press, abridged, by Wren or Victory Series, Ram Narain Lal, Allahabad)

2. Golden Deeds of India, First Series, by L. and H. G. D. Turnbull (Oxford University Press)

3. Tanglewood Tales (Longmans, Green & Co.).
4. The Vicar of Wakefield (Indian Press, Allahabad).
5. Shakespeare in Prose (Blackie)

6. Stories from the Arabian Nights (Nelson).
7. Westward Ho (Victory Series).

8. Jungle Book (Macmillan).

9. A Persian Hero (Macmillan).

10. The Exploits of Brigadier Gerard (Oxford University Press)

11. Stories from Tagore (Macmillan).

12. Don Quixote (Blackie).

13. Simple Chapters in English Life (Rai Sahib Gulab Singh & Sons, Lahore).

14. Stories from Shakespeare, by Wyatt (Oxford University Press).

15. The Little Duke (Indian Press School Classics).

16. Pioneers of Invention (George G. Harrap & Co.).
17. Men of Science (George G. Harrap & Co.).

18. The Story of the Ramayana (Indian Press, Allahabad).
19. The Story of the Mahabharata (Indian Press, Allahabad).
20. Teachers of India (Oxford University Press)
21. Masterman Ready (Longmans, Green & Co).
22. Legends from Greece and Rome (Victory Series)
23. Robinson Crusoe (Victory Series)
24. Tales from Indian History, by Roe (Macmillan).
25. Lamb's Tales from Shakespeare (Indian Press, Allahabad).
26. A Book of Stories (Ram Narain Lal, Allahabad).
27. In Other Lands (Uttar Chand Kapur, Lahore)

II.—MATHEMATICS

There will be two papers, each of three hours—one in Arithmetic and Algebra and the other in Geometry and Mensuration

SYLLABUS -

(1) Arithmetic and Algebra.

The four simple rules ; British and Metric systems of measurement ; Factors , Prime numbers , H. C F and L C M. ; Decimal and vulgar fractions (including conversions of a recurring decimal to a vulgar fraction and conversely); Square Root ; Ratio and Proportion ; Average ; Percentages ; Profit and Loss ; Interest, simple and compound , Present Worth and Discount (true and commercial) , Areas and volumes ; Simple equations of one or more unknown quantities , Quadratic equations of one unknown quantity , Graphs of statistics , Graphs of straight lines and graphical solution of linear simultaneous equations , Problems

N B —Candidates will be provided with squared paper, if necessary

(2) Geometry and Mensuration.

The course includes theoretical, practical and numerical Geometry, and every candidate will be expected to

answer questions in both branches of the subject. The questions on practical Geometry will be set on the constructions contained in the annexed Schedule A, together with easy extensions of them. All figures should be drawn accurately, for which purpose every candidate should provide himself with a graduated scale, a pair of set squares, a protractor, a compass and a hard pencil. The questions on theoretical Geometry will consist of theorems and problems contained in the annexed Schedules A and B, together with easy extensions and deductions with numerical illustrations. Any proof of a proposition will be accepted which appears to the examiners to form part of a systematic treatment of the subject the order in which the theorems are stated in Schedule B is not imposed as the sequence of their treatment. In the proof of the theorems hypothetical constructions will be permitted.

N B—Candidates will be provided with squared paper, if necessary.

SCHEDULE A.

Bisection of angles and of straight lines.

Construction of perpendiculars to straight lines.

Construction of an angle equal to a given angle.

Construction of parallels to a given straight line.

Simple cases of the construction from sufficient data of triangles and quadrilaterals.

Division of straight lines into a given number of equal parts.

Construction of a triangle equal in area to a given polygon.

Construction of tangents to a circle and of common tangents to two circles.

Simple cases of the construction of circles from sufficient data.

Construction of a rectangle equal to a given polygon.

Construction of a rectangle on a given base equal in area to a given rectangle.

Construction of a square equal to a given rectangle.

Construction of a rectangle of given area the sum or difference of whose sides is given. (These constructions should be based on the propositions on the Geometry of the circle.)

Construction of a fourth proportional to three given straight lines and a mean proportional to two given straight lines (as corollaries to previous constructions of rectangles)

Construction of regular figures of 3, 4, 6 or 8 sides in or about a given circle.

Mensuration of triangles and simple rectilineal figures, finding their area by means of field-book; application of formulæ for length of circumference and for area of a circle in terms of its radius.

SCHEDULE B.

Angles at a point

If a straight line stands on another straight line the sum of the two angles so formed is equal to two right angles; and the converse.

If two straight lines intersect, the vertically opposite angles are equal

Parallel straight lines

When a straight line cuts two other straight lines, if—

- (i) a pair of alternate angles are equal, or
- (ii) a pair of corresponding angles are equal, or
- (iii) a pair of interior angles on the same side of the cutting line are together equal to two right angles, then the two straight lines are parallel; and the converse.

Straight lines which are parallel to the same straight line are parallel to one another.

Triangles and rectilinear figures.

The sum of the angles of a triangle is equal to two right angles.

If the sides of a convex polygon are produced in order the sum of the angles so formed is equal to four right angles.

If two triangles have two sides of the one equal to two sides of the other, each to each, and also the angles contained by these sides equal, the triangles are congruent.

If two triangles have two angles of the one equal to two angles of the other, each to each, and also one side of the one equal to the corresponding side of the other, the triangles are congruent.

If two sides of a triangle are equal, the angles opposite to these sides are equal; and the converse.

If two triangles have the three sides of the one equal to the three sides of the other, each to each, the triangles are congruent.

If two right-angled triangles have their hypotenuses equal and one side of the one equal to one side of the other, the triangles are congruent.

If two sides of a triangle are unequal, the greater side has the greater angle opposite to it; and the converse.

Of all the straight lines that can be drawn to a given straight line from a given point outside it, the perpendicular is the shortest.

The opposite sides and angles of a parallelogram are equal, each diagonal bisects the parallelogram and the diagonals bisect one another.

If there are three or more parallel straight lines and the intercepts made by them on any straight line that cuts them are equal, then the corresponding intercepts on any other straight line that cuts them are also equal.

Areas.

Parallelograms on the same or equal bases and of the same altitude are equal in area.

Triangles on the same or equal bases and of the same altitude are equal in area.

Equal triangles on the same or equal bases are of the same altitude.

Illustrations and explanations of the geometrical theorems corresponding to the following algebraical identities.—

$$k(a + b + c + \dots) = ka + kb + kc + \dots$$

$$(a \times b)^2 = a^2 \times 2ab \times b^2.$$

$$(a-b)^2 = a^2 - 2ab + b^2.$$

$$a^2 - b^2 = (a + b)(a - b).$$

The square on a side of a triangle is greater than, equal to, or less than the sum of the squares on the other two sides, according as the angle contained by these sides is obtuse, right or acute. The difference in the case of inequality, is twice the rectangle contained by one of the two sides and the projection on it of the other.

In any triangle the sum of the squares on two sides is equal to twice the square on half the base together with twice the square on the median which bisects the base

Loci

The locus of a point which is equidistant from two fixed points is the perpendicular bisector of the straight line joining the two fixed points.

The locus of a point which is equidistant from two intersecting straight lines consists of the pair of straight lines which bisect the angles between the two given lines.

The circle.

A straight line drawn from the centre of a circle to bisect a chord which is not the diameter is at right angles

to the chord; conversely, the perpendicular to a chord from the centre bisects the chord.

There is one circle and one only which passes through three given points not in a straight line.

In equal circles (or in the same circle)—(i) if two arcs subtend equal angles at the centres they are equal; (ii) if two arcs are equal, they cut off equal arcs; (iii) conversely, if two arcs are equal, the chords of the arcs are equal.

Equal chords in a circle are equidistant from the centre, and the converse.

The tangents at any point of a circle and the radius through the point are perpendicular to one another.

If two circles touch, the point of contact lies on the straight line through the centres.

The angle which an arc of a circle subtends at the centre is double that which it subtends at any point on the remaining part of the circumference.

Angles in the same segment of a circle are equal, and if the line joining two points subtends equal angles at two other points on the same sides of it, the four points lie on a circle.

The angle in a semi-circle is a right angle, the angle in a segment greater than a semi-circle is less than a right angle, and the angle in a segment less than a semi-circle is greater than a right angle.

The opposite angles of any quadrilateral inscribed in a circle are supplementary; and the converse.

If a straight line touch a circle, and from the point of contact a chord be drawn, the angles which this chord makes with the tangent are equal to the angles in the alternate segments.

If two chords of a circle intersect either inside or outside the circle the rectangle contained by the parts of the one is equal to the rectangle contained by the parts of the other.

The following books are suggested :—

For *Arithmetic*—

Workman, adapted by Sime and revised by Parkinson : A New Arithmetic for Indian Schools (R. S. Gulab Singh and Sons, Lahore).

For *Algebra*—

1. ROSS : Elementary Algebra, Part I. *Longmans, Green & Co.*
2. BAKER AND BOURNE : Elementary Algebra, Part I. *G. Bell & Sons.*
3. H. S. HALL : School Algebra, Parts I and II. *Macmillan & Co.*

In *Geometry*—

1. HALL AND STEVENS : A Shorter School Geometry, Parts I and II. *Macmillan & Co.*
2. PARKINSON AND PRESSLAND . A PRIMER of Geometry, Clarendon Press, Oxford (Indian edition), Re. 1-12.
3. PIERPOINT'S Elements of Geometry.

III—HISTORY.

There will be two papers, each of three hours :—

- (i) Indian History and Allied Geography, and
- (ii) English History and Allied Geography.

N.B.—Candidates are expected to draw freehand maps of India and Great Britain and Ireland

Indian History.

Indian History in outline from the earliest time to the present day.

The following syllabus is suggested :—

- I.—The influence of Geography on Indian History.

II.—Ancient India—

- A. Vedic period till 600 B. C.
1. The Dravidians.
 2. The Aryan immigration.
 3. Character of culture—
 - (a) Vedic religion—outline.
 - (b) Vedic society—caste, woman.
 - (c) Literature—Veda (Brahman, Upanishad, Smṛiti).

B. Buddhist period 600—180 B.C.

1. Life and teaching of Buddha.
2. Mauryas, Asoka
3. Culture—

(a) Dharma.

(b) Government.

C. Hindu period 180 B. C—650 A. D.

1. Sungas, Kanvas, Andhras.
2. Yuehis, Kushanas, Kanishka.
3. Guptas—Samudragupta, Chandragupta, Vikramaditya.
4. Harsha.
5. Culture—

(a) Religion—Puranas, Epics (toleration).

(b) Literature—Kālidasa.

(c) Art—Ajanta, Amaravati.

D. Rajput period 650 A. D.—1200 A.D.

1. The origin of Rajputs.
2. Rajput kingdoms, Chauhanas, Chandels, Caharwar (Rathor).
3. The South—Pandyas, Pawas, Cholas and Kerala.
4. The Deccan—Yadavas, Chalukyas, Rashtrakutas.

III. Mediæval India—

A. Early Mediæval.

1. Life and teaching of Muhammad.
2. The Arab expansion.
3. The Turks and their kingdoms.
4. Turkish invasions—
 - (a) Mahmud of Ghazni.
 - (b) Muhammad Shahab-ud-din Ghori.
 - (c) The Slave kings—Balban and Mongol invasions.
 - (d) The Khiljis, Ala-ud-din, and conquest of the south.
 - (e) The Tughlaks—Muhammad and Firoz—break-up of early mediæval empire.
 - (f) Provincial principalities and invasion of Timur.
 - (g) The Hindu kingdoms of the south.
 - (h) Culture.

Religion—Kabir.

Literature—Growth of Modern Indian Languages

B. Later mediæval—

- (a) 1. Sayyads and Lodis—Dissensions.
2. Babar and Humayun—Conquest and failure.
3. Sher Shah
4. Akbar—Conquest and Consolidation
5. Jahangir, Shahjahan—Prosperity.
6. Aurangzeb—
 - Religious quarrels.
 - Conquest of the south.
7. Successors of Aurangzeb.
 - Decay of Empire.
 - (b) Mahrattas—Shivaji—The struggle with the Mughals—The Peshwas up to 1761.
 - (c) Sikhs—Nanak and Guru Govind Singh.

- (d) Early European settlements, 1600—1708.
1. Portuguese—Discovery of the route from Europe to India.
 2. Dutch—Settlement in the Spice archipelago.
 3. English—Embassies to Mughal emperors and establishment of factories.
 4. French—Establishment of factories.
- (e) Culture—
- Religion, Bhakti Movement.
- Art—Taj.
- Literature 1. Hindi—Tulsidasa, Surdas, Rahim, Malik M. Jaisi.
2. Urdu.

IV.

- Modern India—
1. Struggle between the empire and the Marhattas.
 2. Break-up of the empire and the establishment of Subedars.
 3. Sikhs—Ranjit Singh.
 4. Marhatta and other Indian States.
- B. 1 Struggle of the European Powers. The French and the British (1700—1763).
2. Struggle between the English and Indian Princes (1756—1774) Conquest of Bengal.
- C. British rule, 1774—1857—
1. Warren Hastings—

(i) Regulating Act.

(ii) Internal difficulties.

(iii) Wars with the Indian rulers.

Cornwallis—

(i) The permanent settlement.

(ii) Wars with Indian rulers.

3.

Wellington—

(i) The subsidiary alliance system

(ii) The French rivalry.

(iii) Wars and expansions of British territory.

4. Minto—Embassies to Asiatic Powers.
 5. Hastings—Nepal War, Mahratta wars.
 6. Bentinck—Reforms.
 7. Auckland and Ellenborough—Afghan Wars.
 8. Hardinge—Punjab War.
 9. Dalhousie—Completion of dominion.
- D. British rule, 1857—1919—
- (a) Wars and expansions.
 1. Afghanistan.
 2. Burma
 - (b) Internal developments—
 1. Constitutional, 1861, 1892, 1909, 1919
 2. Local Self-Government.
 3. Education.
 4. Justice.
 5. Administration.
 - (c) National movements—
 1. Hindu reforms
 2. Muslim reforms.
 3. Growth of Nationalism, Indian National Congress.

The following books indicating the scope and standard of knowledge required are recommended :—

1. *V. A. Smith*—Oxford Students' History of India, (Clarendon Press, Oxford). Rs 2.
2. *R. D. Banerji*—History of India (The Book Co., College Square, Calcutta).
3. *Thompson* —History of India (Christian Literature Society, Madras).
4. *Har Prasad Shastri*.—History of India (Blackie).
5. *Hoernle and Stark*.—A History of India (Orissa Mission Press, Cuttack).
6. *E. B. Havell* —A Short History of India (Macmillan & Co).

(2) Relations with Europe—

Crimean War; England and Russia.

(3) Imperial development.

(2) 1883-1914.

(1) England and Russia.

Germany.

" "

(2) Ireland.

(3) Internal developments—

(a) Parliament.

(b) Commerce and Industry.

N.B.—Students are expected to have a knowledge of "Representations of the People Act, 1918."

The following books indicating the scope and standard of knowledge required are recommended:—

1. S. R. Gardiner.—A School Atlas of English History. (Longmans, Green & Co.)

2. Ed J S. Lay.—The English People (Macmillan).
3. Oman.—Junior History of England (Arnold).

4. S. R. Gardiner.—Outline of English History. (Longmans, Green & Co.)

5. T. F. Tout.—A History of Great Britain, Book II. (Longmans, Green & Co.)

6. Kerr and Rushbrooke Williams.—Growth of the British Empire (Longmans, Green & Co.).

7. Macmillan's Atlas of the British Empire.

8. Guest, G.—Outlines of British History (Oxford University Press, 1922). 2s. 6d.

9. Pupils' Study Book of English History by J. T. Muir, Books II, III and IV, published by R. J. Arnold & Sons.

10. Raghu Kari Triak : A History of Modern England, Urdu and Hindi (Indian Press, Allahabad).

11. S. D. Tripathi Shastri : History of the English People, Urdu and Hindi (Macmillan & Co.).

12. Ram Krishna Mathur : A Handbook of English History (Hindi and Urdu versions), (S. S. Mathur, Anand Pushtakalaya, Cawnpore).

13. Shiva Chandra Kapoor ; History of England (Urdu and Hindi), (Nandkishore Bros., Benares).

14. Pran Nath Vidyalkar : History of England (Hindi), (Ganga Pushtakmala Karyalaya, Lucknow).

15. J. Nelson Fraser : A first History of England (English), (K & J Cooper, Educational Publishers, Bombay)

16. Brij Mohan Sharma : History of England (Urdu), (Newal Kishore Press, Lucknow).

or

Geography.

There will be two papers, each of three hours' duration, as follows :—

Paper I—General Geography of the World outside of India (sections I and II of the syllabus).

Paper II—India and its world relations (section III of the syllabus).

SYLLABUS.

I. (a) Shape of the Earth ; rotation and revolution ; duration of day and night ; the seasons. Latitude and longitude

(b) Practical exercises based on simple contour maps. Outlines of the relief and drainage of the lands and study of the chief land-forms.

(c) The atmosphere. Study and measurement of temperature, pressure and rainfall as factors of weather. Climate. Seasonal distribution over the globe.

(2) Relations with Europe—

Crimean War; England and Russia.

(3) Imperial development.

(2) 1885—1914.

(1) England and Russia.

" " Germany.

" " Empire.

(2) Ireland.

(3) Internal developments—

(a) Parliament.

(b) Commerce and Industry.

N.B.—Students are expected to have a knowledge of "Representation of the People Act, 1918."

The following books indicating the scope and standard of knowledge required are recommended:—

1 S. R. Gardiner.—A School Atlas of English History. (Longmans, Green & Co.)

2. Ed. J. S. Lay.—The English People (Macmillan).
3 Oman.—Junior History of England (Arnold).

4 S. R. Gardiner.—Outline of English History. (Longmans, Green & Co.)

5. T. F. Tout.—A History of Great Britain, Book II. (Longmans, Green & Co.)

6. Kerr and Rushbrooke Williams.—Growth of the British Empire (Longmans, Green & Co.).

7. Macmillan's Atlas of the British Empire.

8. Guest, G.—Outlines of British History (Oxford University Press, 1922). 2s. 6d.

9. Pupils' Study Book of English History by J. T. Mulley, Books II, III and IV, published by E. J. Arnold & Sons.

10. Raghu Kuli Tila: A History of Modern England, Urdu and Hindi (Indian Press, Allahabad).

11. S. D. Tripathi Shastri : History of the English People, Urdu and Hindi (Macmillan & Co.).

12. Ram Krishna Mathur : A Handbook of English History (Hindi and Urdu versions), (S. S. Mathur, Anand Pushtakalaya, Cawnpore)

13. Shiva Chandra Kapoor ; History of England (Urdu and Hindi), (Nandkishore Bros., Benares).

14. Pran Nath Vidyalkar : History of England (Hindi), (Ganga Pushtakmala Karyalaya, Lucknow).

15. J. Nelson Fraser : A first History of England (English). (K & J. Cooper, Educational Publishers, Bombay)

16. Brij Mohan Sharma : History of England (Urdu), (Newal Kishore Press, Lucknow).

or

Geography.

There will be two papers, each of three hours' duration, as follows.—

Paper I—General Geography of the World outside of India (sections I and II of the syllabus).

Paper II—India and its world relations (section III of the syllabus).

SYLLABUS.

I. (a) Shape of the Earth ; rotation and revolution ; duration of day and night ; the seasons. Latitude and longitude.

(b) Practical exercises based on maps. Outlines of the relief and study of the chief land-forms.

(c) The atmosphere. Study of temperature, pressure and rainfall. Climate. Seasonal distribution.

Urdu.

1. قد آرد by Jalal-ud-din Ahmad (Anwar Ahmadi Press, Allahabad), (revised edition of 1926),

or

Khyaban Urdu (Indian Publishing House, Allahabad).

2. Nisab-i-Jahid, by Maulvi Mahdi Husain Nasiri, (Anwar Ahmadi Press, Allahabad.)

3. مصاح القرآن by Fatch Mohammad Jalandhari (Muslim University Press, Aligarh).

NOTE.—Obsolete portions in the text-books are omitted.

For *Shikast* the book recommended is—

Majmua-1-Khatt-i-Shikast, by M. A. Siddiqui (Indian Publishing House, Allahabad),

or

جدید خط شیکست by Mohammad Zamin Ali (Indian Press, Allahabad).

Books recommended for supplementary reading are not meant for teaching. They simply denote the standard of the passages to be set as “unseen” :—

(1) تریبۃ المصوح by Dr. Nazir Ahmad.

(2) پریم پتیسری by Prem Chand.

(3) حواہرات نثر by Makhmoor of Agra.

Bengali.

Prose.

Text prescribed :—

“Matriculation Bengali Selections”, published by the Calcutta University (prose portion only).

The following books are recommended for supplementary reading :—

1. Iswarchandra Vidyasagar—“Sakuntalar Patigriha Yatra”.

2. Akshaykumar Dutt—“Santosh-o-Parisram”.

3. Bhudeo Mukhopadhyaya—“Kajkara”.

4. Gangaprasad Mukhopadhyaya—"Nitisksha".
5. Jagdishchandra Basu—"Bhagirathi Utsa Sandhane".

Poetry.

Text prescribed :—

"Katha o Kahini", by Rabindra Nath Tagore (excluding Avishar and Porishad, pages 26 to 43).

"Bhasha Bodh Vyakaran", by Nakuleshwara Vidya-bhushan Re. 1 (recommended).

MARATHI.

Paper I—Poetry सवित्राची कविता published by Wasudeo Govind Maydeo at the Jagadhitechhu Press, Poona, price Re. 1-4-0.

Paper II.—Prose मी (a novel), by Hari Narayan Apte.

Grammar.—R. B. Joshi's *Marathi Grammar*—"Praudhabodha"

Recommended for the use of teachers.

Marathi Grammar, by M. K. Damle (published by the Inderprakash Press, Bombay).

Gujarati.

Paper I, Prose—Balavilas, by M. N. Dwivedi

Paper II, Poetry—"Kusummala", by N. B. Divitla.

For Grammar the following book is recommended :—

Madhyama Gujrati Vyakarana, by K. P. Trivedi (N. M. Tripathi, Bombay).

B.—OPTIONAL SUBJECTS.

I.—CLASSICAL LANGUAGES.

There will be two papers, each of three hours, in each of these languages—the first paper will be in the prescribed texts and grammar, and the second paper in Translation, Composition, and Unseen.

SYLLABUS.

(a) Sanskrit.

Paper I.—(a) Text-books.

1. Sanskrit Pathavali, by Babu Ram Saksena (National Press, Allahabad), of which the following selections are prescribed.—

Numbers 1, 2, 4, 5, 7, 9, 10, 12, 13, 16, 17, 19, and 21 of part I and nos 1, 3, 7, 8, 10, 13, 14, 16, 17, 18 and 20 of part II.

2. संस्कृत परिचय by M. M. Guridhara Sarma (Motilal Banarsidas, Lahore)

NOTE.—The students should be taught to understand the passages, give their context and substance, and to learn the analysis of compounds, sandhis and the prose order of the poetry pieces

(b) Grammar—Simple sandhis and simple samasas. Declension of nouns and pronouns of frequent occurrence. Conjugation in लट् लङ्, लोट्, विधिलिङ् and लृट् of verbs of frequent occurrence of all classes (गण) except those of अदादि, क्धादि, क्वादि and जुहोत्यादि.

NOTE.—Questions on Grammar exclusively should be asked from the prescribed books, as far as possible, and should carry about one-third of the total marks.

Books recommended for Grammar—

1. First and Second Book of Sanskrit by Bhandarkar

2. R. K. Banerjee's Sanskrit Grammar.

3. Sanskrit Teacher, by K. P. Trivedi.

4. Sanskrit Pīthama Pustaka, by Professor Ram Bihari Lal, D. A -V. College, Cawnpore.

5. Sanskrit Praveshika, by Pandit Raja Ram, Professor, D. A -V. College, Lahore.

6. Upakramanika, printed by Khadgavilas Press, Bankipore.

7. Vigyan Dipika, by Pandit Sadashiva Shastri.

8. Sanskrit Vyakarana Bodha, by Pandit Kanhaiya Lal Shastri (Rai Sahib Ram Dayal Agarwala, Allahabad).

Paper II.—Translation, Composition, and Unseen.

- (a) Selected passages from books recommended for rapid reading and from others of equal difficulty for translation into the vernacular of the candidate ; and (b) translation of easy English or Hindi prose passage or sentences into Sanskrit.

Books recommended for rapid reading and for composition :—

(1) सरल कथा तरङ्गिणी by Veda Vyas, M.A. (Messrs. Uttar Chand Kapur and Sons, Lahore).

(2) राम कथा मञ्जरी compiled by Sant Gopal Chand Shastri (published by Ram Narain Lal).

(3) A Manual of Sanskrit Composition, by Lallaram Tewari (National Press, Allahabad).

(4) प्रवेशिका संस्कृत रचनानुवाद शिक्षा by महामहोपाध्याय पण्डित रघुनन्दन त्रिपाठी साहित्याचार्य ।

N B.—Sanskrit must be written in Devanagari character.

(b) Arabic.

Prescribed course—

Paper I (a)—Text. کتاب المومنین compiled by Zafar Iqbal, M.A., B.T., Lecturer, Central Training College, Lahore. (Atar Chand Kapoor and Sons, Anarkali, Lahore) and the poems beginning with the following lines :—

(من الديوان المنسوب إلى أمير المؤمنين علي)

(۱) الناس من جهة التمثيل اناء -

(۲) لبيك لبيك انت مولا -

- (۲) امن بعد تكفين النى ص و دفنه -
 (۳) كنا كروج حمامة فى اينة -
 (۵) اذما الدنيا داء ليس الدنيا ثبوت -
 (۶) تعرب عن الوطن فى طلب العلى -
 (۷) اشد حياز يمك للموت -
 (۸) الحمد لله الصمىل المفضل -
 (۹) تنزه عن مصادقة اللئام -
 (۱۰) ان المكارم احلاق مطهرة -
(للشاعى و ص)

- (۱۱) شكوت الى و كيع سره حفظى
(وحدث مكتوبة على قمر)
 (۱۲) انظر الى ما ترى يا ابنها الرجل
(المباحاة)

- (۱۳) لك الحمد يا ذا الجود والمجد والعلى
(اول شعر فى رثاء الحسين و لعنة بن عميق السهمى)
 (۱۴) اذ العيون قمت فى الكفاة و اتم
(قال يزيد بن الحكم يعطى امه يدرا)
 (۱۵) يا ندر والامال يصير بها لدى اللب الحكيم

(b) Grammar—Mabadi-ul Arabia by مبادى العربىة، Shartuni, Urdu edition, edited by Maulvi Izzat Ullah (the Majidi Press, Cawnpore).

N B—Questions on Grammar exclusively should be asked from the prescribed books, as far as possible, and should carry about one-third of the total marks.

Paper II.—Translation, Composition, and Unseen :—

- (a) Selected passages for translations into Urdu
 (Books recommended for supplementary reading indicate the standard of the passages to be set)
- (b) Translation of English prose into Arabic.

Book recommended for supplementary reading :—

مدارج المرأة (Anwar Ahmadi Press, Allahabad).

NOTE.—Arabic words must be written in Arabic character.

(c) Persian.

*Prescribed course—**Paper I(a).—Text—**Prose.**Gulistan.—*

- (الف) سیب نالیف کتاب - یکشب کامل ایام گذشته می
کردم مانده بود که کتاب گلستان تمام شد -
- (ب) باب اول - در سیرت پادشاهان :-
- (۱) حکایت اول - پادشاهی داشنیدم که بکشتن اشیاء
چیز نکو گوید -
- نصیحت مر طاق ایوان فرہنوں مر دے خاک -
- (۲) حکایت دوم - یکے از ملوک خراسان ظن نماید -
- (۳) حکایت سوم - ملوکراہے داشنیدم در بند اولیہ می
نگر -
- (۴) حکایت چهارم - طائفہ دزدان عرب بجای نیک
مردان -
- (۵) حکایت پنجم - سرحدک زانہ را کہ آفتاب سیاہ -
- (۶) حکایت ششم - یکے را از ملوک عدم زمینستی
روزگار -
- (۷) حکایت ہفتم - پادشاهی باغلم عجمی اعراف
ہمیشہ است -
- (۸) حکایت ہشتم یکی از ملوک عدم حذر بکنید -
- (۹) حکایت نهم - ہرمز را گفتند چشم بملک -
- (۱۰) حکایت دہم - ببالین تربیت نہند آدمی -
- (۱۱) حکایت یازدہم - درویشے مستجاب مردم آزاری -
- (۱۲) حکایت دوازدهم - یکے از ملوک مردہ بہ -
- (۱۳) حکایت سیزدہم - یکے را از ملوک شنیدم گرد
آیند -
- (۱۴) حکایت چہاردهم - یکے از پادشاهان در عالم -
- (۱۵) حکایت پانزدہم - یکے از دژرا نیا زار
مثل سیاہ گوش را ندیمان بگرار

- (۱۶) حکایت شانزدهم - یکے از رفیقان سوراخ کردم -
 (۱۷) حکایت هفدهم - قتی چند از روزدگان می بر
 سنگ -
- (۱۸) حکایت هجدهم - ملک زانہ کنج نکر گذاشت -
 (۱۹) حکایت نوزدهم - آورده اند کہ مرغ بسیج -
 (۲۰) حکایت بیستم - عاملے را دیدم مردم آزار
 بار آمدیم بحکایت لعنت پائدار -
- (۲۱) حکایت بیست و یکم - مردم آزار مغزش در -
 (۲۲) حکایت بیست و دوم - یکی را از ملوک پادشاه
 پیل -
- (۲۳) حکایت بیست و سوم - یکے از بندگان نشستی -
 (۲۴) حکایت بیست و چهارم - ملک زوزن اهل خرد -
 (۲۵) حکایت بیست و پنجم - یکی از ملوک عرب
 آستان دار -
- (۲۶) حکایت بیست و ششم - طالبے را بهم برکند -
 لطیفه بر قاج بخواهد دست -
- (۲۷) حکایت بیست و هفتم - یکے در صفت نشانه نکرد -
 (۲۸) حکایت بیست و هشتم - درویشے معصوم دست
 بدست -
- (۲۹) حکایت بیست و نهم - یکی از وزرا ملک بود -
 (۳۰) حکایت سی ام - نادشاهی بکشتن برخاست -
- (۳۱) حکایت سی و یکم - وزراے نویسین رواں پروین -
 (۳۲) حکایت سی و دوم - شیدائے کسل کنند -
- (۳۳) حکایت سی و سوم - یکے از پسران باطل نگوید -
 (۳۴) حکایت سی و چهارم - باطائفه روزگان کارها باشد -
 (۳۵) حکایت سی و پنجم - دو پیراندر دوتا -
- (۳۶) حکایت سی و ششم - کسی مژده حاوانی نیست -
 (۳۷) حکایت سی و هفتم - گروهی حکما گدا است -
- (۳۸) حکایت سی و هشتم - هارون الرشید الخ - Omitted
 (۳۹) حکایت سی و نهم یکی را از ملوک الخ - Omitted
 (۴۰) حکایت چهلیم - اسکندر رومی پائدار -

باب چہارم - در فوائد خاموشی

- (۱) حکایت اول - یکی از دوستان مرشد کور -
 (۲) حکایت دوم - بازرگانی شادی کزان -
 (۳) حکایت سوم - جوانی خردمند دایکش دیار -
 (۴) حکایت چهارم - عالمی مدبّر - Omitted
 (۵) حکایت پنجم - جالینوس فدائی -
 (۶) حکایت ششم - سحران رئیس -
 (۷) حکایت هفتم - یکی را از حکما خروش -
 (۸) حکایت هشتم - فنی چند ریاست -
 (۹) حکایت نهم - در عدل ارژن -
 (۱۰) حکایت دهم - یکم از شعرا ... در می چند -
 ایچہ مرد نند (Instead of)
 (این چه مرد مامد read)

(۱۱) حکایت یازدهم - مذہبی (الح - Omitted)

(۱۲) حکایت دوازدهم - خطیبہ عیب خویشت -

from (سفر انگلستان) سفر نامہ ناصرالدین شاہ 3.
 اینها می و تصدیقند to روز درشنہ دوم درقده

 خان من خون کردہ را تدبیر نیست Chapter I up to

Poetry.

۱ - بوستان

باب اول - در عدل و راستی و تدبیر جهانداري -

- (۱) نگہبود کہمہاے بندہ حق گذار -
 (۲) حکایت - یکم دیدم پسند آیدش
 (۳) بند دادن کسرہ ہمز را - شنیدم کہ ... ہاشی بس -
 (۴) بند دادن خسرو شیر و یہ را - شنیدم کہ خسرو
 مردم درید -
 (۵) حکایت - چہ خروش بست هست -
 (۶) حکایت شنیدم کہ شاپور بادہ بست -
 (۷) حکایت در تدبیر بادشاہان و تاخیر کردن درسیاست -
 ز دریاعہ چندین ملک -

Omitted پشیمان شوي ملک را در خورشيد Lines

(۸) گفتار - نه بر حکم بر نکرد -

(۹) حایک در معنی یی شتمت بر رعیت شنیدم که
فرماندهی زمین -

(۱۰) حکایت - شنیدم که جهشید در گم دنت -

(۱۱) حکایت - شنیدم که دارا کم برد -

(۱۲) گفتار - تو کی شدوی خروای نگوی -

(۱۳) حکایت خمر یافت دان خواست -

(۱۴) حکایت - از بزرگن بن سعد راست

(۱۵) حکایت - اناک مرحوم تکه بن رنگی ، حمد الله
تعالی - در اخبار داشتند -

(۱۶) حکایت - شنیدم که دروست نا گاشتر -

(۱۷) حکایت - خدا دروست نامی ده و گوش -

(۱۸) گفتار - مرا زور مندی در گذشت -

(۱۹) حکایت در معنی رحمت بزرگوار در حال توانایی
چندان قسط سالی در نوستان -

(۲۰) حکایت - شبی درون من فدروی -

(۲۱) گفتار - خبر داری بگریه کست -

(۲۲) حکایت - شنیدم که در مهری طالم جست -

(۲۳) حکایت - یک بر سر شاخ ر سعدی شد -

(۲۴) صفت حمیعت اوقات درویش راضی - مگو حایه
شداخت -

(۲۵) حکایت - شنیدم که یکبار آید بگوش -

(۲۶) در معنی نکوکاری و بدکاری و عاقبت آن - نکوکار مرد
نه پیش -

(۲۷) حکایت - گریزی چشم دار -

(۲۸) حکایت - حکایت کنند از یک قیامت بماند -

(۲۹) حکایت - یک پند می داد لغزان - مع گفتار -
اقتا مرض -

(۳۰) حکایت درین معنی - یک را حکایت
برخواستست -

باب چهارم - در فوائد خاموشي

- (۱) حکایت ازل - یکی از داستان موشک کور -
 (۲) حکایت دهم - بازار گاني شادي کنان -
 (۳) حکایت سوم - جواني حرم مند دايهش بيار -
 (۴) حکایت چهارم - عالمی مبتدی - Omitted
 (۵) حکایت پنجم - چاليدوس نداني -
 (۶) حکایت ششم - سحيان ريس -
 (۷) حکایت هفتم - یکی را از حکما خموش -
 (۸) حکایت هشتم - قني چند ياست -
 (۹) حکایت نهم - در عدد ارزن -
 (۱۰) حکایت دهم - يکه از شعرا در مي چيد -
 اينچه مرد م'ند (Instead of)

(اين چه مرد مامد read)

- (۱۱) حکایت يازدهم - منجمي الح - Omitted
 (۱۲) حکایت دوازدهم - خطيبه عيب خويش -
 from (سفر انگلستان) سفر نامه ناصرالدين شاه 2.

- Meaning of ordinary commercial transactions. Preparation of simple bills of exchange, such as indents, invoices, bills of lading, statements of account, etc. (۱۷) آن به که دریں
- such as indents, invoices, bills of lading, statements of account, etc. (۱۸) چندین غم مال
- (۱۹) چوں مرسن تو مرسن
- (۲۰) همدار که روزگار شور انگیزد
- Lading and Railway Receipts, involving the use of the telegraphic code. (۲۱) نا دشمن و دوست فعل نیکو
- (۲۲) ای دل چو نصیب تو هم خون شده
- (۲۳) بتختاه و کاهه خانه بزدگی است
- (۲۴) گل گشت به ار لقاے من روے نیست

NOTE.—Obscure portions in the text-books are omitted.

(b) *Grammar*.—*توانداری عملی* by Maulvi Ishaq Ali (Lucknow Indian Press, Allahabad) or *جامع القواعد* by Azad (R. S. Gulab Singh and Sons, Lahore).

Paper II.—Translation, Composition and Unseen :—

(a) Selected passages for translation into Urdu. Books recommended for supplementary reading indicate the standard of the passages to be set; (b) an easy composition exercise in Persian, and (c) translation of English prose into Persian.

Books recommended for supplementary reading :—

1. *فارسی جدید حصہ دوم مصنفہ مولوی محمد علی*
ایرانی پرنٹیسر نظام کالج حیدرآباد دکن
2. *عیار دانش*

Students who offer Persian are required to have such a knowledge of the etymology of the Arabic language as will enable them to explain all Arabic words and phrases which may occur in the text-books and in the books recommended for rapid reading in Persian.

NOTE.—Persian words must be written in Persian character.

(d) *Latin*.

Paper I.—(a) Prescribed Prose and Poetry.

Meaning of ordinary commercial terms and abbreviations. Preparation of simple commercial documents, such as indents, invoices, bills of exchange, promissory notes, statements of account. Nature and use of Bills Lading and Railway Receipts. Simple banking transaction, involving the nature and use of cheques, deposit and pass books.

Books recommended :—

Extracts from Business Methods and Correspondence, by Arthur Fieldhouse.

2. Commercial Practice by Roop Ram Gupta and K. L. Govil, Part I (Messrs. Gautama Bros. & Co., Cawnpore).

Typewriting.

There will be no practical examination on the typewriter, but only a theory paper of two hours' duration involving questions on—

- *(a) The mechanical construction of the typewriter;
- (b) care of the machine;
- (c) display of matter, including headings and titles; centering; contractions and abbreviations; hyphenation; punctuation; stencilcutting; adaptation of one or more characters to represent characters not given on the keyboard; corrections; erasures.

There will also be a second paper of one hour's duration consisting of type-copying of three manuscripts.

Book recommended :—

Pitman's or Remington's Typewriting Manual.

* Questions on the mechanism of the typewriter will be of a general nature, so that students who are acquainted with the mechanism of any of the more popular typewriting machines will be able to answer the questions (vide G. L. no. B/2773/VI—3, dated September 15, 1924, from the Secretary of the Board).

Book-keeping.

Elementary theory of double entry book-keeping. Preparation and keeping of the Cash Book, Bought and Sold Books, Returns Books, Bills Receivable and Bills Payable Books, Journal and Ledger; recording in simple transactions involving purchases and sales; bills receivable and payable; real, personal and nominal accounts such as rent, salaries, interest, discounts, bad debts, and depreciation. Drawing up the Trial Balance, Closing the Ledger, and Preparing Trading and Profit and Loss Accounts and Balance Sheet. Simple banking transactions involving the nature and use of cheques, deposit slips and pass book, and preparation of Bank Reconciliation Statements. The nature and use of Bills of Exchange and Promissory Notes. Petty Cash and Imprest Systems.

Book recommended.—

Elementary Book-keeping, by Arthur Fieldhouse (Simpkin, Marshall & Co., Limited, London, E.C., 4.)

III.—SCIENCE (PHYSICS AND CHEMISTRY).

The examination will consist of two papers—one in Physics and one in Chemistry, each of three hours.

Physics.

SYLLABUS.

Definition of Physics, measurements of length, area, volume, mass and weight. The balance. Density, specific gravity. Principle of Archimedes. The three states of matter. Pressure of air, simple barometer.

Heat.—Expansion of solids, liquids, and gases, temperature, thermometers, melting and boiling points, conduction, convection and radiation. Unit of heat, specific heat, change of state, latent heat. Easy calculations.

Light.—Rectilineal propagation of light. Reflection, refraction, plane concave, convex mirrors, concave and convex lenses and prisms. Position of object and image with easy calculations. Dispersion.

Magnetism.—Attraction and repulsion, magnetization, terrestrial magnetism, magnetic meridian. The compass.

Electricity.—Electrification by friction. Properties of a charged body. Conductors and insulators. The electroscope. Induction. The electrophorus. A simple cell, simple forms of primary cells, arrangement of cells in series and parallel, magnetic and heating effect of a current. The simple galvanoscope, simple explanation of the telegraph, the electric bell, electric light.

Practical Work.

The following list of experiments indicates the minimum amount of practical work required to be performed by students. Other experiments of equal educational value may be substituted. The experiments should be performed individually as far as can be arranged. The teaching of theory should be fully illustrated by experiments, and demonstrations are to be considered an essential part of the teacher's work.

NOTE.—A chart giving a list of the experiments to be performed and the date on which each student completes each experiment should be maintained and hung in the laboratory at each school recognized in Science (vide G. L. no. B/3149—3300/V—38, dated December 21, 1923, from the Secretary of the Board).

General.—Determination of the relative density of—

- (a) bodies which float in water,
- (b) bodies which sink in water,
- (c) liquids.

Use of the calipers.

Determination of the radius of a wire by Archimedes' Principle.

Determination of the internal radius of a narrow tube.

Principle of moments.

Light.—Reflection at a plane mirror.

Focal length of a concave mirror.

Refraction through a prism.

Refractive index of glass and water.

Focal length of a convex lens.

Heat.—Cooling curve of water and wax or naphthalene.

Determination of the water equivalent of a calorimeter.

Determination of Specific Heat.

Determination of the Latent Heat of Ice.

Determination of the Latent Heat of Steam.

Magnetism —Mapping out lines of force by a small magnet.

Determination of the direction of the Magnetic Meridian.

Electricity.—Charging an electroscope by Conduction and Induction.

The magnetic effect of a current on a magnetic needle.

The electro-magnet.

Book recommended :—

Experimental Science for Indian Schools, by Gregory and Hodges (Macmillan), Rs. 3

The following books on Physics are recommended for teachers' reference library —

1. Everyday Physics, by H. E. Hadley. (Macmillan & Co). Rs. 4, or

- An Introduction to Physical Science, by Ivor B. Hart. (Oxford University Press.) Rs. 2.
2. A Class Book of Physics, by R. A. Gregory and H. E. Hadley. (Macmillan & Co.) Rs. 3-12.
 3. A Course of Physics, by Charles H. Draper. (Blackie & Sons.) Rs. 3-12.
 4. An Elementary Physics, by K. C. Bhattacharya. (Indian Press, Allahabad) Rs. 2.

Chemistry.

Definition of chemistry.

Common properties of matter : hardness, porosity, brittleness, solid, liquid and gaseous states. Change of state. Melting and boiling points.

Crystalline shape, effect of heat on common things.

Solution in water. The above to be studied with NaCl , KNO_3 , CaCO_3 , Na_2CO_3 , $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$, $\text{FeSO}_4 \cdot 7\text{H}_2\text{O}$, $\text{ZnSO}_4 \cdot 7\text{H}_2\text{O}$, Fe, Zn, Sn, Mg, Pb, Hg, P, S, Shellac and linseed oil.

Solution, melting, evaporation, distillation, filtration, solution in water and alcohol. Water of crystallization. Slow and rapid evaporation, saturated solutions. Crystallization studied from solutions in water and of melted sulphur. Distillation of water, mixtures immiscible liquids. Elementary and compound substances. Non-metals and metals. Chemical symbols. Chemical action, the laws of definite proportion, atoms, molecules, atomic and molecular weights, valency, relation between equivalent and atomic weights. Simple formulae and equations.

Study of air—Rusting of metals, oxidation, active and inactive gases in air. Burning of phosphorus. Meaning of combustion, slow and rapid combustion studied with iron, magnesium, and phosphorus.

Oxygen gas ; prepared from oxide of mercury, and potassium chlorate. Important properties of oxygen gas.

Acidic and basic oxides, acids, bases and salts.

Preparation and properties of the following :—

Hydrogen, Nitrogen, Ammonia, Chlorine, Hydrochloric acid, Nitric acid, Carbon dioxide.

Carbon—Properties and varieties

Action of carbon dioxide on animal and plant life.

Sulphur—Properties and varieties.

Preparation and properties of sulphur dioxide and sulphuric acid, their preparation treated in a very elementary manner—sulphur dioxide by burning sulphur in air and by the action of hydrochloric acid on calcium sulphite and sulphuric acid by the action of nitric acid on sulphur dioxide and water.

Study of Water—Action of steam on red-hot iron filings

Action of sodium on water Action of magnesium on steam. Electrolysis of water.

NOTES.—1 The detailed course given below indicates the minimum amount of practical work required to be performed by students and suggests a method of treatment of the syllabus for the guidance of teachers. They may substitute other experiments of equal educational value. Practical work should be co-ordinated with the theoretical work and follow it consecutively, as far as possible. The practical experiment should be performed individually so far as can be arranged.

2 A chart giving a list of the experiments to be performed and the date on which each student completes each experiment should be maintained and hung in the laboratory of each school recognized in Science (vide G. L. no. B/3119—3300, V—36, dated December 21, 1925, from the Secretary of the Board).

The use of stencils in answering papers in science is not allowed.

(Classes IX and X.)

Classes IX and X will have six periods of Science per week—for at least 27 working weeks; this gives a total of 162 periods in class IX :—

Subject.	Detailed syllabus.	Minimum list of experiments which should be done by the pupils individually.
Chemistry ..	Effect of dissolved substances on boiling point.	To find B. P. of solutions of calcium chloride. Solution of different strengths.
	Distillation. Purification of water.	To bend tubes, bore corks, set up apparatus for distillation, and find B. P. before and after distillation.
	Elements and compounds..	To examine the element—sulphur, copper, lead, mercury, zinc. To examine the compounds, ferrous sulphate, copper sulphate, lead oxide, mercury oxide, and regain the elements where possible.
	Metals and non metals, properties —	
	<i>The atmosphere.</i> Combustion, active and inactive air	Burning a candle in a bell jar Repeat with sulphur, phosphorus To measure the proportion of air used up when a substance burns in air.
	Rusting	To show iron will not rust in dry air. To measure the air used up when iron rusts in air.
	Increase in mass in rusting and burning.	To show increase in mass when magnesium and iron burn in air and when iron rusts in air—when a candle burns in air.

Subject.	Detailed syllabus.	Minimum list of experiments which should be done by the pupils individually.
	Explanation of above : Introduction of terms "Oxygen" and "Nitrogen".	
	<i>Oxygen</i>	Preparation from mercuric oxide and potassium chlorate in small quantities and on large scale from manganese dioxide and potassium chlorate, its properties. To show loss in mass when potassium chlorate is heated.
	Metals and non-metals. <i>Oxides.</i>	Their basic and acidic properties.
	<i>Nitrogen</i> Its use in the atmosphere.	Properties, to find accurately percentage of nitrogen in air by pyrogallous acid. (Lecture-room)
	<i>Water</i> not an element ..	Action of sodium on water. Action of magnesium on boiling water Action of steam on iron (Lecture room) Examination of oxide of iron formed. Increase in mass, comparison with iron rust.
	<i>Résumé</i> of above. Introduction of term "Hydrogen".	
	Preparation of Hydrogen and its properties.	From zinc and sulphuric acid. What happens to the zinc ? What happens when hydrogen burns in air ? Explosion of hydrogen with air. Electrolysis of water and its composition by volume. Action of hydrogen on the oxides of copper and iron when heated. (Lecture room.) Carbon Properties and varieties.

Subject.	Detailed syllabus.	Minimum list of experiments which should be done by the pupils individually.
	Demonstration lesson : ..	Formation with carbon or carbonaceous matter burns in air.
	Carbonic acid gas, Chalk ..	Effects of acids on chalk. Examination of the gas, properties of gas obtained by the effect of strongly heating chalk. Examination of lime, difference between properties of chalk and lime, tests in mass on heating chalk.
	Resumé of above. Animal and plant life.	Formation of oxygen by plants. (Lecture room.)
	Chlorine gas ..	Preparation from manganese dioxide and hydrochloric acid. Its properties.
	Hydrochloric acid gas ..	Preparation from sodium chloride and sulphuric acid. Its properties.
	Ammonia gas ..	Preparation from ammonium chloride and quicklime. Its properties.
	Sulphur ..	Effect of heat.

The books recommended for use in Chemistry are—

1. Gregory and Hodges : Experimental Science for Indian Schools. (Macmillan).
2. Wilson and Hedley : A School Chemistry for India (Oxford University Press).
3. K. Kumar : Chemistry for Classes IX and X. (Bhargava, Chandausi).

IV.—AGRICULTURE.

The examination will consist of two papers of three hours each.

The first paper will be on the subject-matter in the syllabus up to and including sub-section (5)—Tillage; and the second paper on the remaining portion.

SYLLABUS.

(1) *Climatology*—Weather and seasons in the country and in the provinces.

(2) *Soils*—Soil-forming processes.

Classification of soils.—Local classification—Clayey, Loam, Sandy, Kankar, Saline, Silt, Goind, Ahar, Uparhar Subsoil

Mechanical analysis of soils.—Determination of Stones. Gravels, Sand and Clay.

Texture of soils.—Arrangement and size of particles of soil; Specific gravity; Pore space; Surfaces exposed; Friability.

Organic matter in the soils.—Its sources and distribution and maintenance. Its effect on soil.

Soil water.—Its forms, its movements.

Control of soil moisture.—Run-off losses; Percolation; Evaporation. Methods of checking the same.

Soil heat.—Relation of heat to germination and growth. Sources of soil heat. Factors affecting soil temperature. Effect of colour, Radiation, Convection and Conduction.

(3) *Irrigation and Drainage* :—

Water requirements of plants.—Factors affecting transpiration. Wilting point. Conserving of moisture. Effect of excessive moisture.

Sources of water of irrigation.—Rain, its annual and seasonal variations; Wells, Rivers, Canals, Tanks and Bandhis.

Types of simple water lifts.—Persian Wheel, Chain Pump, Charsa, Baldeo Balti, Dhekli.

Subject.	Detailed syllabus.	Minimum list of experiments which should be done by the pupils individually.
	Demonstration lesson ..	Formation when carbon or carbonaceous matter burns in air.
	Carbonic acid gas. Chalk ..	<i>Effects of acids on chalk.</i> Examination of the gas, properties of gas obtained by the effect of strongly heating chalk. Examination of lime, difference between properties of chalk and lime, loss in mass on heating chalk.
	<i>Résumé</i> of above. Animal and plant life	Formation of oxygen by plants. (Lecture room.)
	Chlorine gas ..	Preparation from manganese dioxide and hydrochloric acid. Its properties.
	Hydrochloric acid gas ..	Preparation from sodium chloride and sulphuric acid. Its properties.
	Ammonia gas ..	Preparation from ammonium chloride and quicklime. Its properties.
	Sulphur	Effect of heat.

The books recommended for use in Chemistry are—

1. Gregory and Hodges : Experimental Science for Indian Schools. (Macmillan).
2. Wilson and Hedley : A School Chemistry for India (Oxford University Press).
3. K. Kumar : Chemistry for Classes IX and X. (Bhargava, Chandausi).

IV.—AGRICULTURE.

The examination will consist of two papers of three hours each.

The first paper will be on the subject-matter in the syllabus up to and including sub-section (5)—Tillage; and the second paper on the remaining portion.

SYLLABUS.

(1) *Climatology*.—Weather and seasons in the country and in the provinces.

(2) *Soils*.—Soil-forming processes.

Classification of soils.—Local classification—Clayey, Loam, Sandy, Kankar, Saline, Silt, Gound, Ahar, Uparhar Subsoil.

Mechanical analysis of soils—Determination of Stones, Gravels, Sand and Clay

Texture of soils.—Arrangement and size of particles of soil; Specific gravity; Pore space; Surfaces exposed; Friability.

Organic matter in the soils.—Its sources and distribution and maintenance. Its effect on soil.

Soil water.—Its forms, its movements.

Control of soil moisture.—Run-off losses; Percolation; Evaporation. Methods of checking the same.

Soil heat—Relation of heat to germination and growth; Sources of soil heat. Factors affecting soil temperature. Effect of colour, Radiation, Convection and Conduction.

(3) *Irrigation and Drainage*.—

Water requirements of plants.—Factors affecting transpiration. Wilting point. Conserving of moisture. Effect of excessive moisture.

Sources of water for irrigation.—Rain, its annual and seasonal variations; Wells, Rivers, Canals, Tanks and Bandhis.

Types of simple water lifts.—Persian Wheel, Chain Pump, Charas, Baldeo Batti, Dhokil.

7. Records of notes of cultivation of at least one kharif crop, one rabi crop, one garden crop, from the time of preparation of seed-bed to marketing, actually observed by the candidate.

8 Description of local breeds of farm animals. Recognition of different feeding stuffs.

General lay-out of farm buildings.

Books recommended .—

1. Meston Readers, Parts 1 to 3, by K. S. M. A. Quyum.
2. Krishi Shastra or Ilm Zarayat, by Tej. Shanker Kochak.
- 3 Notes on Poultry-keeping in India, by Mrs. A. K. Fawkes
4. Tisdale's Books on Dairying.
5. Monthly Journals, Leaflets, and Bulletins issued by the United Provinces Agricultural Department
6. Lessons in Indian Agriculture, by D. Clouston. Macmillan & Co, Ltd.
7. Ilahber Zarait, by T. S. Kochak, published by the author. Price, Rs. 2-8-0.
8. Krishi Vigyan, Part I, by Sita Prasad Tiwari.

V.—DRAWING.

The examination will consist of two papers of three hours each ; the first paper on Free Arm Drawing and the second paper on Geometrical Drawing.

SYLLABUS

Free Arm.—This should be in Pastel, and should comprise common objects from nature.

The round.—Such as Orange, Mango, Apple, Tomato, Lichi, Melon, Peach ; Hockey and other Balls, Nutmeg, Walnut, etc.

The Cylindrical.—Such as Flower-pot, Household Utensils, Degchies, Cups, Saucers, Surahi, Bowls, Tumblers, Lotas, Bottles of kinds, Ink-pots, Gloy Bottle, Paper-weight, Candle-stick, etc.

The Rectilinear.—Open Book, Cigar and Cigarette Boxes, Match Box, Attaché Case, Cash Box, Flags, etc.

Miscellaneous—Hockey Sticks, Cricket Bat, Tennis Racket, Mallet, Hammer, Screw Driver, Chisels, Padlock Key, Scissors, Knives, Hatchet, etc.

Nature Study—Simple flowers and leaves of all sorts, Butterflies, Beetles, etc.

The above outline which is but suggestive should be in Pastel on Tinted Paper and will involve instruction in the art of Blending Colours, Colour Harmonies, Colour Schemes, and Shadows.

Text-books recommended :—

Pastel work for the standards, 3 volumes, by A. G. Tomkins, Messrs Isaac Pitman & Sons, London, Bath and New York. Rs 3 each volume.

Materials.—Pastels, Paper, etc. (Reeves). Obtainable from Messrs. J. N. Navalakhi & Co., Kalbadevi Road, Bombay.

Pastels, Agra Pencil Factory, Tajganj, Agra.

Geometrical Drawing.—(1) The theory and use of instruments especially of the protractor and Marquise scale.

(2) Plain block-letter writing.

(3) The whole of practical plane geometry.

(4) Drawing to scale, viz, scale of chords; diagonal scale; plain scale; comparative scales (to be done in ink)

Text-books recommended :—

1. Geometry, Plane and Solid (Morris), Longmans, Green & Co., Bombay and London.

8. Educational Handwork or Manual Training, by A. H. Jenkins. (University Tutorial Press, Burlington House, Cambridge).

9. The "Self-Help" Course of Woodwork Exercise, by E. J. Andrews. (Charles and Dible, 10, Paternoster Square, London.) 2s. net.

10. Handicraft in Wood and Metal, Shirley and Hooper, Batsford, Rs. 9.

VII.—A MODERN EUROPEAN LANGUAGE.

French.

There will be two papers of three hours each. The first paper will consist of passages for translation from the prescribed Text-books, questions on the prescribed Text-books, and questions on Grammar. The second paper will consist of Unseen passages and idiomatic phrases for translation from French into English and *vice versa*.

Books prescribed :—

1. *Ed. About* :—*Le Nez d'un Notario*. Macmillan's Edition (Siepmann's Series)
2. *Du Camp* :—*La Dette de Jeu* (Cambridge University Press).
3. *Daudet* :—*Letters de mon Moulin* [Edited by Bradley and Rieu (Clarendon Press)].
4. French Poetry for advanced students by A. Watson Bain (Macmillan and Co.), of which poems numbered 1, 9, 11, 12, 13, 14, 16, 31, 48 and 56 are prescribed.

Grammar recommended —

French Grammar (Sonnenchein's Parallel Grammar Series) or Heath's Modern French Grammar (Harrap).

NOTE.—The 1932 1000 Examination has been dropped for the present.

VIII.—DOMESTIC SCIENCE.

The examination will consist of two papers of three hours each. The first paper will contain questions on Physiology, Hygiene, Household Management, and Home-Nursing. The second paper will consist of the practical examination in Sewing to be held at the same

time as the examination in written work. There will also be an oral test in First Aid and Home-Nursing and a practical test in Cooking.

SYLLABUS.

As a basis for the teaching of Hygiene and Home-Nursing there should be a preliminary simple treatment of the following topics on Elementary Physiology :—

The human skeleton, the organs of digestion, the circulation of the blood, the nervous system, respiration.

I.—Hygiene.

NOTE—Great importance should be attached to practical work wherever the subject admits of this.

Air.—Composition of air, importance of pure air, impurities of air, diseases caused by impure air, ventilation.

Water.—Composition of water; quantity of water required; source of water-supply, springs, deep wells, surface wells, rivers, tanks; how water is polluted; how to prevent pollution of water; how to purify water; boiling and filtering.

Food.—Composition of food, composition of good diet and its importance; preservation of food; cooking of food; drinks and condiments.

Personal Hygiene.—Cleanliness of body (hair, nails, teeth, etc.); clothing; exercise; importance of temperance; the use of *pan*, opium, and other drugs; spitting.

Precautions against diseases.—Infectious diseases (small-pox, measles, and diphtheria, etc.); colds and influenza; tuberculosis; enteric fever; dysentery and diarrhoea; cholera; plague; malaria; itch; leprosy; ophthalmia (sore eyes).

II.—First Aid.

Roller bandage, figure of eight as applied to knee, elbow, finger, ear; bandage for eye, nose, chin; Bleeding of different kinds; how to stop bleeding; drowning;

burns ; scalds ; bruises ; sprains ; broken bones ; dislocation ; carrying injured people ; fainting ; sunstroke ; hysteria ; epilepsy ; suffocation ; foreign bodies in eye, ear, nose, and throat ; bites of mad dogs ; signs of madness in dogs ; snake-bites, stings.

III.—Home-nursing.

NOTE.—None of the work is to be purely theoretical. Practice must be given in every point which allows of practical work

1. *Room*—Bed ; bedding , furniture ; light ; warmth ; ventilation.

2. *Nurse*.—Health ; dress ; qualifications of a nurse.

3. *Duties of Nurse*. Administration of medicine ; pulse and temperature charts , bathing ; changing of garments and bedding.

4. *External Remedies*.—Poultices ; plasters , fomentations , ice ; sponging ; baths ; temperature of baths.

5. *Food*.—Kind of food and preparation ; way of giving.

6. *Infectious illness*.—Precautions during illness ; disinfection of room, clothing, and bedding after illness ; use of disinfectants

7. *Convalescence*.—Occupations ; visitors ; rest ; sleep and food

IV.—Care and Training of Children

Food, sleep, exercise, play, clothing, cleanliness, surroundings.

V—Household Management.

A.—Choice of House Furniture and Decoration. Distribution of rooms. Cleansing and care of house and furniture Disposal of refuse and sewage Precautions against flies and mosquitoes.

B.—Care of the kitchen.

Preparation of simple food.

Two of the following groups :—

- (i) preparation of *roti*, rice, *dal*, and *tarhari* ;
- (ii) preparation and care of milk ;
- (iii) preparation and care of meat. (One dish only required.)

C.—Duties of the mistress of household.

Proper distribution of daily activities. Accounts and budgeting of expenditure.

VI.—Clothing.

(i) Choice and care of the clothing.

(ii) Methods of washing cotton, woollen, and silk materials.

NOTE.—Practical work should be done, if possible.

(iii) Sewing and cutting out

A good standard of skill will be required in the various stitches that are necessary in making up garments and in mending worn articles of clothing.

Each candidate should select three of the following groups —

- (a) To cut and make up coat (*achkan*) or (*pyjama*) or shirt (*kurta*) or waistcoat for a man.
- (b) To cut out and make up *kurti* or blouse or skirt or petticoat or *pyjama* for a woman.
- (c) To cut out and make up frock or bonnet or *pyjama* or *bandi* for a child
- (d) Drawn thread or crewel work or English embroidery or *chikan* work or *sulme sitare*.
- (e) Spinning.
- (f) Weaving.

NOTE —As an indication of the scope and standard of instruction in Hygiene and Home-Nursing, teachers are referred to sections II, III and IV of Personal and Domestic Hygiene for the School and Home by Mrs. Harold Hindley (Rai Sahib M. Gulab Singh & Sons, Lahore), also to Indian Manual of First Aid and Indian Home-Nursing, published by the Indian Council of the St. John's Ambulance Association (Thacker, Spink & Co., Calcutta).

Books for teachers' reference :—

1. Physiology, by T. Huxley.
 2. Tropical Hygiene, Lukis and Blackham (Thacker, Spink & Co.)
 3. Outline of Domestic Science (for Indian Readers), by Lilian Sawtell (Longmans, Green & Co.)
 4. Training of Children under five years.
 5. Child-Welfare, by Dr. S. K. Mukherji (Indian Press, Allahabad).
-

IX.—METAL WORK

The examination will consist of one paper of three hours in Drawing and Theory and a practical test for four hours in Forging and Fitting Work.

Syllabus.

(a) *Practical work* —A series of models graded in respect of tool manipulations to be made in metal from Working Drawings or from Patterns, and involving the use of Forge, Anvil, Vice, Tongs, Top and Bottom Tools, Drills, Hammers, Files, Stocks and Dies, etc. Exercises should include Drawing Down, Upsetting, Welding, Annealing, Hardening and Tempering, Rivetting, etc., and such objects as Punches (nail and centre) Scribing Knife, Nuts and Bolts, Rings, Chain Links, Hasp and Staple, Keys (for shafting), Coat Hook, Wall Bracket, Letter Weight, Calipers, Wall-Holdfast, Cold Chisels, Drills, etc

(b) *Theoretical work* —Properties and uses of different metals, Iron (malleable and cast), Steel, Brass, etc. Sections and weights of above, Length calculations. Working heats, Care and maintenance of tools, forge, etc.

(c) *Drawing*.—In orthographic projection of all models made during the course.

Books recommended :—

1. Smithy and Forge Crane, approximate price Rs. 2, Publishers, Crosby Lockwood.
2. Smith's Works, Hasluck, Rs. 2, Cassels.
3. Educational Handwork, Jenkins, Rs. 3, University Tutorial Press.
4. Handicraft in Wood and Metal, Shirley and Hooper, Rs. 9, Batsford
5. Plain and Ornamental Forging, Schwarzkopf, Wiley & Sons, Rs. 6-8-0.

X.—HISTORY OR GEOGRAPHY.

(The same course as in the compulsory subject.)

XI.—BOOK-BINDING

The examination will consist of one paper of three hours and a practical examination (including oral test) not exceeding four hours.

Syllabus—

*Theory (a) :—*Paper, its history and manufacture, varieties, sizes, weight, colour, surface, etc.

General book-binding materials, threads, tapes, covers, edges, tops, backings in various materials, cloth, leather, vellum. Adhesives, manufacture and use. Forms of binding, cloth paper, quarter and half leather.

Decorative materials, gold leaf, silver-leaf, inks, colours and varnishes

*Tools and appliances (b) :—*Guillotine, Stitching, Frame, Punching Frame, Backing Press, Standing Press, hand working tools, hammers, punches, scissors, needles, knives, embossing tools, etc.

*Practical (c) :—*Folding and cutting papers to various sizes. Sewing by various methods including section, and Tannu Silai. Rounding and backing, covers and corners in cloth, leather, etc. Simple decoration of book covers by tooling, embossing and colouring on various materials, lettering and gilding. The repair and re-backing of old books, care of books, preservation and repair.

Books suggested—(a) for teachers—Book-binding and the care of Books, by John Hogg.

(b) for students—Book-binding, by Cassels.

XII.—SPINNING AND WEAVING.

The examination will consist of one paper of three hours and a practical examination (including oral test) not exceeding four hours.

Syllabus—

Spinning—(a) Theory.

1. A brief survey of the principles of seed selection, land preparation, cultivation, growth, distribution, ginning and marketing of cotton.

2. Types and classes of the different cottons grown in the various parts of the world with particular reference to Indian-grown cottons. The utilization of all classes of cotton for the various kinds of cloth

3. The physical properties of cotton, structure, length, diameter and colour of the different varieties.

4. The preparation of the cotton fibre for hand spinning, hand ginning and cleaning.

5. Spinning by the spinning wheel. The principles of hand drawing, twisting and winding in comparison with various types of spinning wheel.

6. The qualities and usefulness of well-spun yarn. The effect of spinning on the preparatory and weaving processes.

7. Methods of disposal of yarn.

8. A brief survey of other raw materials used in spinning such as wool, silk, waste silk.

Spinning—(b) Practical.

The spinning wheel and its manipulation, three principles in operation, viz., drawing, twisting, and winding.

Weaving—(a) Theory.

1 Its numeration and explanation of the different forms in which yarn is supplied to the weaving section for making into cloth, e g., cops, hanks, cones, cheeses, etc.

2. Winding on the "Charkha" and methods adopted when winding from the forms mentioned above. The necessity of good winding and also of the traverse showing how badly-made bobbins affect the subsequent processes.

3. Warping and its object. The methods used, such as single-end, multiple and Ball-warping machine in the making of warps for the loom

4. Sizing and its necessity. The common ingredients used and the methods of application to the yarn. The effect of faulty sizing and application in the after processes.

5 Methods used in the running-off of warps on the weaver's beam.

6. Drawing in, its necessity, object and manipulation, Hcalds and Reeds, Drawing-in-implements.

Weaving :—" Gaiting " the warp in the loom. Explanation of the three main motions, viz., shedding, picking, beating-up. Shedding as done by pedals and applied to the various types

of cloth. The manipulation of the pedals, picking and how it is done. Beating-up to produce different thickness or fineness of cloth. Description of the parts in a sley; shuttle, pickers, shuttle boxes and all sundry parts.

Calculations :—The system of counting cotton-wool, silk, etc., yarns.

The testing of counts, folding of yarns, quantity of warp and weft in a piece of cloth. Head knitting, reeds and warping.

Designing :—The standard weaves such as plain, twill, satins, combination and re-arrangement of these weaves, stripes, mock lenos and similar cloths. Analysis of these cloths with drafting and lifting plans.

The make-up and marketing of the above.

Finishing of cloths.

Weaving—(b) *Practical*

The making of warps by the "single," "multiple" and "Ball warp" methods—Winding on to warp, bobbins and also weft-pirns. Sizing of yarn by hank and in ball warp. "Running-off" of warps on to plains, drills, twills and simple tie-up designs.

Books suggested for teachers' use and students' reference :—

1. Cotton Spinning, Vol I, by W. S. Taggart (Macmillan)
2. Cotton Weaving and Designing, by T. J. Tayler (Longmans)
3. Hand-loom Weaving, by L. Hooker (Pitman).

XIII.—GENERAL SCIENCE (PHYSICS, CHEMISTRY AND BIOLOGY).

There will be two papers, of three hours each, as follows :—

1st Paper—Physics and Chemistry.

2nd Paper—Biology and Chemistry.

(NOTE —Each paper will consist of eight questions three of which will be in Chemistry).

Syllabus—

General Science—Pressure at different depths in liquid. Density. Specific Gravity. Archimedes' Principle and applications. Flotation (Ships, Airship, Balloons, Iceberg) Air pressure. Effects of air pressure. Syringe. Simple water pump. How the pressure of the air is measured. Barometer movements and weather. Action of the foot-ball and bicycle pumps. Bicycle valve. Kites, aeroplanes. Steam pressure. Force on piston of steam engine. Simple manometer.

Light—Rectilinear propagation of light. Eclipses of sun and moon. Candle-power. Plane mirrors. Laws of reflection. Images in spherical mirrors (no formulæ). Refraction. Magnifying glass. Camera. Telescope. Microscope. Dispersion. Colour

Sound—Nature of waves on water surface. Sound waves in air, wave length. Frequency. Gramophone. Klaxon horn. The human voice.

Electricity.—Electrification. Electroscope. Conductors and insulators. Magnets. Polarity. Earth's Magnetism. Compass needle. Cells and batteries. Electromagnet. Electric Bell. Telegraph. Simple galvanometer. Heating and chemical effects of a current. Electric light.

Heat.—Sources of heat. Expansion of solids, liquids and gases. Effects of expansion; platinum and glass; pendulums. Thermometers. Air, clinical, maximum and minimum thermometers. Effects of salt on melting

point. Freezing mixtures. Effect of salt and pressure on boiling point. Transference of heat Davy's lamp. Winds. Cold nights with cloudless sky. Thermos-flask. Units of heat. Measuring of specific and latent heats. Cold on evaporation Heat on compression. Snow. Hail. Humidity. Change of volume on melting. Freezing of ponds. Change of volume on boiling; hence steam pressure

Chemistry.—Solutions in water and other liquids. Crystallization. Slow and rapid evaporation. Saturated solutions. Elements, compounds and mixtures Study of the atmosphere. Oxygen and Nitrogen. Combustion · slow and rapid. Flame Water Properties of Hydrogen. Ammonia. Limestone Properties of sodium carbonate and caustic soda Mortar and cement. Hard and soft waters Acids Bases. Salts Atoms and molecules Chemical symbols Conservation of mass. Carbon · properties and varieties. Carbon dioxide. How plants use air. Respiration Coal gas. Coal-tar products. Sulphur: properties and varieties Sulphur dioxide. Chlorine. Hydro-chloric acid. Phosphorus. Matches Common salt. Properties of metals, non-metals. Alloys Iron and steel. Petroleum how obtained and properties. Soap Sugar Glass.

Biology —A LIFE OF ANIMALS, BASED ON THE FROG—

(1) External parts and their work.

(2) Internal parts and their work—

(a) Digestive system: food and digestion; uses of food

(b) Circulatory system and blood: work of the blood and need for circulation

(c) Lungs and breathing

(d) Kidneys and excretion.

(e) Nervous system: sensation and the special senses.

- (3) Care of food.
- (4) Breeding places for harmful insects and other animal pests.
- (5) Making the home and community healthful and beautiful.

I. INTERDEPENDENCE OF PLANTS AND ANIMALS—

- (1) Plants as food for animals ; grazing lands.
- (2) Animal products and remains used again by plants.
- (3) Plants and animals living together in communities ; plants as the home for animals.
- (4) Domestication of animals and cultivation of plants.
- (5) The warfare against injurious plants and animals
- (6) Human society, the crowning achievement of the world of life.
- (7) The unity of life

Practical work.

The following list of experiments indicates the minimum amount of practical work required to be done by each student. Other experiments of equal educational value may be substituted. It should be possible for most teachers to get their students to perform additional experiments. The experiments should be performed individually as far as can be arranged. The teaching of theory should be fully illustrated by experiments and demonstrations which are to be considered an essential part of the teacher's work. The course in Biology will not require extensive expenditure on equipment and materials. Practically all materials can be collected from the local fauna and flora. No microscopic work is expected to be done individually by the pupils ; only that may be done by demonstration on the part of the

teacher, when he believes it will add to the effectiveness of the work.

NOTE.—A chart giving a list of the experiments to be performed and the date on which each student completes each experiment should be maintained and hung in the laboratory at each school recognized in General Science.

General.—To show that the weight of a floating body is equal to the weight of the liquid displaced (using a loaded test tube in a graduated jar with different liquids).

Determination of the radius of a wire by Archimedes' Principle.

Determination of the relative density of (a) bodies which sink in water, (b) liquids

To measure (a) the pressure of the lungs, (b) gas supply (if any).

Light—Reflection at a plane mirror

Focal length of (a) concave mirror, (b) convex lens by parallel rays method.

Relation between image and object produced by (a) concave mirror, (b) convex lens (no calculations).

Refractive index of glass and liquids.

Refraction through a prism

Heat—Cooling curve of water and wax.

Determination of the apparent expansion of water (by heating water in a flask and noting rise in level of surface).

To compare heat required to melt ice and to boil water

To show that the loss of heat of one body is equal to the gain of heat in another.

Determination of specific heat of a solid.

Magnetism.—To map lines of force by a small magnet.
Charging an electroscope.

Magnetic effect of a current.

Chemistry.—To observe the action of water on sodium, sodium chloride, potassium nitrate, sodium carbonate, copper sulphate.

To observe the action of heat on potassium nitrate, calcium carbonate, copper sulphate, iron, zinc, tin, lead, mercury, sulphur, phosphorus.

To determine the change in weight due to oxidation when a substance is sufficiently heated in air.

To find the proportion of oxygen and nitrogen in air.

To prepare oxygen from potassium chlorate and study its properties.

To prepare hydrogen from zinc and sulphuric acid and study its properties.

To prepare chlorine from manganese dioxide and hydrochloric acid and to study its properties.

To prepare hydrochloric acid from sodium chloride and sulphuric acid

To prepare ammonia gas from ammonium chloride and quicklime and study its properties.

To prepare carbon dioxide from limestone and hydrochloric acid and study its properties.

To prepare coal gas

To find the volume of oxygen given off by heating 15 grams of potassium chlorate

Biology—A. Observation of living frogs : habits and mode of life

Demonstration of more important features of the internal parts. Students should sketch easier parts.

Observation of life history in the field and in the laboratory.

B. Demonstration of common representatives of animal kingdom. Students should be encouraged to collect materials ; should be developed as a museum activity.

C. Collection and sketching of common plant forms.

Study and sketch parts of plant. No microscopic work, except such demonstration as the teacher may think desirable.

Simple experiments, mainly demonstrations, to show—

1. Accumulation of food (starch) in leaves exposed to light.
2. That water is lost through the leaves.
3. That plant require a continuous supply of water.
4. That water rises through the stem.
5. That CO_2 is given off during respiration
6. That plants grown in darkness are not green, but become green upon exposure to light
7. That stems grow towards light, and roots towards moisture.

8. Tests of plant parts for food substances. Process of germination; study and sketch (bean, chana, castor bean).

D Demonstration of common representatives of plant kingdom The project to be developed as for animals (B).

E. Observation of the uses man makes of plants and animals : the parts that are used ; the general method of preparation ; the value of more important Indian products.

F Collection of animal and human parasites , observation of their habits, and of their adaptations for such a mode of life.

Observation and collection of insects that feed on cultivated plants · at what stage in the life history of the insect is the damage done ?

Collection of fungus diseases of plants, especially of crop plants , a study of the damage they cause.

Collection of animals that carry disease : their habits and life-histories.

Chemistry.—To observe the action of water on sodium, sodium chloride, potassium nitrate, sodium carbonate, copper sulphate.

To observe the action of heat on potassium nitrate, calcium carbonate, copper sulphate, iron, zinc, tin, lead, mercury, sulphur, phosphorus

To determine the change in weight due to oxidation when a substance is sufficiently heated in air.

To find the proportion of oxygen and nitrogen in air.

To prepare oxygen from potassium chlorate and study its properties.

To prepare hydrogen from zinc and sulphuric acid and study its properties.

To prepare chlorine from manganese dioxide and hydrochloric acid and to study its properties.

To prepare hydrochloric acid from sodium chloride and sulphuric acid

To prepare ammonia gas from ammonium chloride and quicklime and study its properties.

To prepare carbon dioxide from limestone and hydrochloric acid and study its properties

To prepare coal gas

To find the volume of oxygen given off by heating 15 grams of potassium chlorate.

Biology—A. Observation of living frogs: habits and mode of life.

Demonstration of more important features of the internal parts. Students should sketch easier parts.

Observation of life history in the field and in the laboratory.

B. Demonstration of common representatives of animal kingdom. Students should be encouraged to collect materials; should be developed as a museum activity.

C. Collection and sketching of common plant forms.

Study and sketch parts of plant. No microscopic work, except such demonstration as the teacher may think desirable.

Simple experiments, mainly demonstrations, to show—

1. Accumulation of food (starch) in leaves exposed to light.
2. That water is lost through the leaves
3. That plant require a continuous supply of water.
4. That water rises through the stem.
5. That CO_2 is given off during respiration.
6. That plants grown in darkness are not green, but become green upon exposure to light
7. That stems grow towards light, and roots towards moisture.

8 Tests of plant parts for food substances ; Process of germination , study and sketch (bean, chana, castor bean)

D Demonstration of common representatives of plant kingdom The project to be developed as for animals (B).

E. Observation of the uses man makes of plants and animals : the parts that are used ; the general method of preparation ; the value of more important Indian products

F. Collection of animal and human parasites , observation of their habits, and of their adaptations for such a mode of life

Observation and collection of insects that feed on cultivated plants at what stage in the life history of the insect is the damage done ?

Collection of fungus diseases of plants, especially of crop plants , a study of the damage they cause.

Collection of animals that carry disease : their habits and life-histories.

Chemistry.—To observe the action of water on sodium, sodium chloride, potassium nitrate, sodium carbonate, copper sulphate.

To observe the action of heat on potassium nitrate, calcium carbonate, copper sulphate, iron, zinc, tin, lead, mercury, sulphur, phosphorus.

To determine the change in weight due to oxidation when a substance is sufficiently heated in air.

To find the proportion of oxygen and nitrogen in air.

To prepare oxygen from potassium chlorate and study its properties

To prepare hydrogen from zinc and sulphuric acid and study its properties.

To prepare chlorine from manganese dioxide and hydrochloric acid and to study its properties.

To prepare hydrochloric acid from sodium chloride and sulphuric acid.

To prepare ammonia gas from ammonium chloride and quicklime and study its properties.

To prepare carbon dioxide from limestone and hydrochloric acid and study its properties

To prepare coal gas

To find the volume of oxygen given off by heating 15 grams of potassium chlorate.

Biology.—A. Observation of living frogs: habits and mode of life

Demonstration of more important features of the internal parts. Students should sketch easier parts.

Observation of life history in the field and in the laboratory.

B. Demonstration of common representatives of animal kingdom. Students should be encouraged to collect materials; should be developed as a museum activity.

C. Collection and sketching of common plant forms.

Study and sketch parts of plant. No microscopic work, except such demonstration as the teacher may think desirable.

Simple experiments, mainly demonstrations, to show—

1. Accumulation of food (starch) in leaves exposed to light.
2. That water is lost through the leaves.
3. That plant require a continuous supply of water.
4. That water rises through the stem.
5. That CO_2 is given off during respiration
6. That plants grown in darkness are not green, but become green upon exposure to light
7. That stems grow towards light, and roots towards moisture

8. Tests of plant parts for food substances. Process of germination; study and sketch (bean, chana, castor bean).

D. Demonstration of common representatives of plant kingdom. The project to be developed as for animals (B).

E. Observation of the uses man makes of plants and animals the parts that are used; the general method of preparation, the value of more important Indian products

F. Collection of animal and human parasites; observation of their habits, and of their adaptations for such a mode of life

Observation and collection of insects that feed on cultivated plants: at what stage in the life history of the insect is the damage done?

Collection of fungus diseases of plants, especially of crop plants; a study of the damage they cause.

Collection of animals that carry disease: their habits and life-histories.

Observation, collection, and study of plants and animals that destroy property.

Methods of control of plant and animal pests. (One of the most important aims in the study of the life-history is to find some means for controlling pests.)

Control of bacteria by heat, cold, drying, chemicals.

G. Test for CO_2 in exhaled air ; the need for ventilation ; whether ventilation is sufficient in home and school.

Consideration of the various kinds of exercise, and their value.

Consideration of clothes, various kinds ; various materials ; purpose and value.

H Study the drainage of the school premises, the home ; and the village or city. How can the drainage be improved ?

Study of various sources of water-supply ; see how they are polluted. How improved. Danger of polluted water.

Study, preparation and care of food in the home ; in the bazar. Sources of contamination, and methods of protection. Dangers of dirty food.

Study of breeding places of mosquitoes, flies, rats.

Study of life history of mosquito and house-fly in nature and in the laboratory. Methods of control

I. Trips out into the field for the study of nature should be as frequent as possible. The life of plants and animals should be observed in nature as far as possible, especially to see the inter-relations and inter-dependence of plant and animal life. What the pupils see will depend largely on the teacher.

The following book is recommended :—

Experimental Science for Indian Schools, by Gregory and Hodges (Macmillan & Co.) Rs. 3.

Recommended for the use of the teachers :—

Life by Shipley (Macmillan & Co.).

INTERMEDIATE EXAMINATION OF 1932.

N.B.—Alternative questions will be set in all question papers for the Intermediate Examination.

The following grouping of subjects is approved for the guidance of students and teachers. The subjects have been so grouped that, while providing a sound general education, suitable as an introduction to University studies, they should also fit the students to enter upon higher specialized courses in technical and professional institutions :—

General Arts.—Mathematics, Economics, Civics*, Geography, Drawing, a Modern Indian or European Language, Logic, a Classical Language, History and Allied Geography, Histories of Greece and Rome and Allied Geography. (*Any three should be taken*)

General Science.—Mathematics, Drawing, Chemistry, Physics, Biology, Geography, Economics. (*Any three should be taken*)

For Medicine—Chemistry, Physics and Biology.

For Engineering—Mathematics, Physics and Chemistry.

For Teaching.—(1) History, Civics and Geography
(2) History, Geography and Mathematics
(3) History, Geography and (Physiology, Hygiene and Child-Study) (*women students*).
(4) Geography, Mathematics and (Physiology, Hygiene and Child-Study) (*women students*)

* Students taking Civics are advised also to take Hist. or /

- (5) Geography (or Mathematics),
Biology and (Physiology, Hygiene and Child-Study) (*women students*).
- (6) History, Geography and Economics.
- (7) Mathematics, Geography and Economics (or Drawing).
- (8) Mathematics, Physics and Chemistry.
- (9) Mathematics, Physics and Biology
- (10) Chemistry, Physics, and Biology.
- (11) Biology, Physics (or Chemistry) and Drawing.
- (12) (Physiology, Hygiene, and Child-Study), a Classical Language and History or Geography or Mathematics (*women students*)
- (13) (Physiology, Hygiene and Child-Study), Drawing and Biology or Geography or a Classical Language (*women students*).

ENGLISH.

There will be *one* paper of three hours on the prescribed Prose course and a *second* paper of three hours on the prescribed Poetry course ; and in each paper there will be one question on " Unseen " passages. The prose paper will contain one or more prose unseens and the poetry paper will contain one or more poetical unseens.

A *third* paper of three hours will include (a) translation from a Modern Indian Language into English, and (b) a narrative or descriptive piece of composition in English. In the case of candidates who offer English as their mother tongue, the third paper will consist of an

Essay, together with questions on English composition and on the history of English Literature from 1500, as in Hudson's Outline History of English Literature (Bell & Co.).

NOTES —1. In the case of books prescribed for detailed study candidates will be expected to show a close familiarity with the text, including meaning of words, construction of sentences, historical and other allusions as well as knowledge and understanding of the subject-matter. They should be able to indicate contexts and to paraphrase and explain any difficult passages in simple and correct English.

2. In the case of books prescribed for general study, detailed knowledge of the text will not be required, but candidates will be expected to show that they have read the course with intelligence and with some appreciation.

Books prescribed :—

Prose :—(a) For detailed study—

- 1 A book of English Prose, by P. Sheshadri (Oxford University Press), (omitting the Convalescent; the Beautiful, Dr. Skinner; El Dorado, the Dedicated Life, War).
- 2 Southley's Life of Nelson (abridged edition, the Indian Press, Ltd., Allahabad)

(b) For general study—

- 1 George Eliot's Silas Marner (Indian Press, Ltd., Allahabad)
- 2 A Second Round of Tales (Oxford University Press)

Poetry—(a) For detailed study—

1. Goldsmith—The Traveller
2. The following poems from the 1829 edition of Palgrave's Golden Treasury, with additional poems (Oxford University Press, Indian edition, Re. 1) are prescribed —

Shakespeare—"When to the sessions of sweet silent thought "

"Since brass, nor stone, nor earth,
nor boundless sea."

Keats—"La Belle Dame Sans Merci."

Milton—"On his Blindness."

"Captain, or Colonel, or Knight in Arms."

Tennyson—"Ring out, wild bells."

"Tears, idle tears."

"The splendour falls on castle walls."

Wordsworth—"The world is too much with us."

"Upon Westminster Bridge."

Browning—"Prospice."

Bridges—"Gird on thy sword."

Yeats—"The Lake Isle of Innisfree."

Rupert Brooke—"If I should die."

S. Sasson—"Every one sang."

3. *Tagore* (Macmillan's Poems from Tagore)—

"Where the mind is free."

"Traveller must you go."

"The fair was on before the temple."

"The Champa Flower."

(b) For general study :—

Shakespeare—"The Merchant of Venice."

NOTES.—(a) Half the total of marks will be allotted to the portion for detailed study, 30 per cent. to the portions for general study and 20 per cent. to Unseen passages and Grammar.

(b) Grammatical questions will be asked, including Parsing, Analysis, the Sequence of Tenses, and Conversion of the Direct and Indirect forms of speech.

(c) The attention of candidates is drawn to the fact that examiners have been instructed to deduct marks for inaccuracy in English.

MATHEMATICS.

There will be three papers of three hours each : one paper in Algebra and Trigonometry, a second in

Mensuration and Pure and Analytical Geometry, and a third on Elementary Dynamics and Statics.

(1) (a) *Algebra*.—Quadratic equations involving two or more unknown quantities, the theory of quadratic equations and of expressions of the second degree; surds and imaginary expressions; arithmetical, geometrical, and harmonical progressions; permutations and combinations; theory of indices and logarithms, proof of binomial theorem for a positive integral index and the use of binomial and exponential theorems for any index.

(b) *Trigonometry*.—Including solution of triangles and simple problems on inscribed, circumscribed, and ascribed circles

(2) (a) *Pure Geometry*.—Loci; proportion and similarity; radical axis of two circles, simple properties of pole and polar with respect of a circle; simple properties of parabola

(b) *Analytical Geometry*.—Straight line, pair of straight lines, circle (including radical axis and pole and polar), equation to parabola in form $y^2 = 4ax$ and simple properties deduced therefrom; simple properties of tangents and normals to the ellipse deduced from the equation $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$ (Oblique cartesian and polar co-ordinates will not be required).

(c) *Mensuration of Solids*.—Surfaces and volumes of parallelopipeds and right prisms, pyramids circular cylinders and cones, spheres, and spherical segments, frusta of pyramids, cones, and spheres

The use of Trigonometry and Logarithms will be permitted in solving numerical examples

(3) *Dynamics and Statics*.—Velocity, composition of velocities, relative velocity, acceleration rectilinear motion under uniform acceleration, composition of

accelerations; Newton's Laws of Motion; rectilinear motion under gravity in a vertical and down an inclined plane; motion of two masses connected by a string passing over a pulley; projectiles; direct impact of smooth bodies; definition and calculation of kinetic energy; co-planar forces, parallel and non-parallel and their composition; equilibrium of a body under three forces; moments, conditions of equilibrium of a body under a system of co-planar forces and simple examples; centre of gravity; friction; work and power; simple machines (lever, balance, system of pulleys, wheel and axle).

NOTE.—The use of stencils and slide rule in answering questions in Mathematics is not allowed.

The following books are suggested (*not prescribed*) in addition to more elementary text-books:—

1. School Algebra, H S Hall, Parts I—III.
2. School Algebra, Part II, by Paterson. (Clarendon Press)
3. Elementary Algebra, Part II, by P. Ross (Longmans)
4. Higher Algebra, Chapters I—XVII, by Hall and Knight (Macmillan).
5. Hall and Stevens' School Geometry, Part VI.
6. Elements of Analytical Geometry, Part I, by Wano'oo (Indian Press, Ltd., Allahabad)
7. Co-ordinate Geometry, Smith or Loney (Macmillan).
8. Elements of Statics and Dynamics by Loney. (Cambridge University Press)
9. Intermediate Trigonometry, by C. C. Ghosh. (Macmillan.)
10. Plane Trigonometry, Part I, by S. L. Loney. (Macmillan.)

CHEMISTRY.

(N.B.—Candidates will be required to pass in the theoretical as well as practical part of each Science subject. The use of stencils and slide rule in answering papers in Chemistry is not allowed.)

There will be two papers of three hours each and a practical examination. The first paper will include metals and non-metals and the second paper general Chemistry and organic Chemistry.

The following syllabus is prescribed.—

The course for the High School Examination of 1932 with the following additions:—

Elementary and compound substances, mixtures, solution, chemical action, the laws of definite and multiple proportions, simple methods of the determination of equivalent weights, atoms, molecules, atomic and molecular weights, vapour density, the atomic theory and Avogadro's hypothesis, combination of gases by volume.

Valency, relation between equivalent and atomic weights, simple methods of determination of atomic weights, Dulong and Petit's Law, Boyle's Law, Charles' Law, vapour pressure, diffusion.

Chemical symbols, formulae and equations, calculations of an easy nature.

Oxidation and reduction

Elementary ideas as to the nature of dissociation in gases and electrolytic dissociation theory.

The outlines of the periodic law, studied from elements prescribed in the course.

Preparation and important properties of the following elements and compounds and proofs of the composition of the compounds marked* —

Hydrogen, oxygen, water,* ozone, hydrogen dioxide, nitrogen, the atmosphere*, the effects of animal and vegetable life upon its composition, ammonia*, nitric acid and nitrates, nitrous acid and nitrites, nitrous* and nitric*

accelerations ; Newton's Laws of Motion ; rectilinear motion under gravity in a vertical and down an inclined plane ; motion of two masses connected by a string passing over a pulley ; projectiles ; direct impact of smooth bodies ; definition and calculation of kinetic energy ; co-planar forces, parallel and non-parallel and their composition, equilibrium of a body under three forces ; moments ; conditions of equilibrium of a body under a system of co-planar forces and simple examples ; centre of gravity, friction ; work and power ; simple machines (lever, balance, system of pulleys, wheel and axle).

NOTE —The use of sterels and slide rule in answering questions in Mathematics is not allowed

The following books are suggested (*not prescribed*) in addition to more elementary text-books :—

1. School Algebra, H S Hall, Parts, I—III.
2. School Algebra, Part II, by Paterson. (Clarendon Press.)
3. Elementary Algebra, Part II, by P. Ross (Longmans)
4. Higher Algebra, Chapters I—XVII, by Hall and Knight (Macmillan).
5. Hall and Stevens' School Geometry, Part VI.
6. Elements of Analytical Geometry, Part I, by Wanchoo (Indian Press, Ltd., Allahabad).
7. Co-ordinate Geometry, Smith or Loney (Macmillan).
8. Elements of Statics and Dynamics by Loney. (Cambridge University Press.)
9. Intermediate Trigonometry, by C. C. Ghosh. (Macmillan.)
10. Plane Trigonometry, Part I, by S. L. Loney. (Macmillan.)

CHEMISTRY.

(NB—Candidates will be required to pass in the theoretical as well as practical part of each Science subject. The use of stenils and slide rule in answering papers in Chemistry is not allowed.)

There will be two papers of three hours each and a practical examination. The first paper will include metals and non-metals and the second paper general Chemistry and organic Chemistry.

The following syllabus is prescribed :—

The course for the High School Examination of 1932 with the following additions.—

Elementary and compound substances, mixtures, solution, chemical action, the laws of definite and multiple proportions, simple methods of the determination of equivalent weights, atoms, molecules, atomic and molecular weights, vapour density, the atomic theory and Avogadro's hypothesis, combination of gases by volume.

Valency, relation between equivalent and atomic weights, simple methods of determination of atomic weights, Dulong and Petit's Law. Boyle's Law. Charles' Law, vapour pressure, diffusion.

Chemical symbols, formulae and equations; calculations of an easy nature.

Oxidation and reduction.

Elementary ideas as to the nature of dissociation in gases and electrolytic dissociation theory.

The outlines of the periodic law, studied from elements prescribed in the course.

Preparation and important properties of the following elements and compounds and proofs of the composition of the compounds marked* :—

Hydrogen, oxygen, water,* ozone, hydrogen dioxide, nitrogen, the atmosphere*, the effects of animal and vegetable life upon its composition, ammonia*, nitric acid, nitrates, nitrous acid and nitrites, nitrous* and

accelerations; Newton's Laws of Motion; rectilinear motion under gravity in a vertical and down an inclined plane; motion of two masses connected by a string passing over a pulley; projectiles; direct impact of smooth bodies; definition and calculation of kinetic energy; co-planar forces, parallel and non-parallel and their composition; equilibrium of a body under three forces; moments, conditions of equilibrium of a body under a system of co-planar forces and simple examples; centre of gravity; friction; work and power; simple machines (lever, balance, system of pulleys, wheel and axle).

9. Intermediate Trigonometry, by C. C. Ghosh. (Macmillan.)
10. Plane Trigonometry, Part I, by S. L. Loney. (Macmillan.)

CHEMISTRY.

(N.B.—Candidates will be required to pass in the theoretical as well as practical part of each science subject. The use of pencils and slide rule in answering papers in Chemistry is not allowed.)

There will be two papers of three hours each and a practical examination. The first paper will include metals and non-metals and the second paper general Chemistry and organic Chemistry.

The following syllabus is prescribed —

The course for the High School Examination of 1932 with the following additions —

Elementary and compound substances, mixtures, solution, chemical action, the laws of definite and multiple proportions, simple methods of the determination of equivalent weights, atoms, molecules, atomic and molecular weights, vapour density, the atomic theory and Avogadro's hypothesis, combination of gases by volume.

Valency, relation between equivalent and atomic weights, simple methods of determination of atomic weights, Dulong and Petit's Law, Boyle's Law, Charles' Law, vapour pressure, diffusion.

Chemical symbols, formulae and equations, calculations of an easy nature

Oxidation and reduction

Elementary ideas as to the nature of dissociation in gases and electrolytic dissociation theory

The outlines of the periodic law, studied from elements prescribed in the course

Preparation and important properties of the following elements and compounds and proofs of the composition of the compounds marked* —

Hydrogen, oxygen, water,* ozone, hydrogen dioxide, nitrogen, the atmosphere*, the effects of animal and vegetable life upon its composition, ammonia*, nitric acid and nitrates, nitrous acid and nitrites, nitrous* and

3. Peroxide, carbon, carbon* dioxide, elementary ideas about combustion

4. (a) Silica of flame, coal gas, chlorine, hydrochloric* the chlorides, chlorine peroxide, chloric acid and rates, bromine, iodine, their hydracids and salts. Sulphur, hydrogen* sulphide, sulphur* dioxide and trioxide, sulphuric acid and the sulphates, sulphurous acid and sulphites.

Phosphorus, hydrogen phosphide, chlorides of phosphorus, phosphorus trioxide and pentaoxide, orthophosphoric acid.

Silica, silicates of Na, K & Ca, glass.

Sodium, potassium, their hydroxides, chlorides, nitrates, carbonates, sulphates.

Calcium, strontium, barium, and their oxides, carbonates, sulphates, chlorides, nitrates.

Magnesium, its oxide, chloride, sulphate, carbonate and nitrate.

Lead, its chloride, sulphate, nitrate and acetate.

Copper, the outlines of its metallurgy, its oxides, chlorides, sulphate, nitrate and sulphides.

Iron, the outlines of its metallurgy, its oxides (FeO , Fe_2O_3 , Fe_3O_4), chloride, sulphates, and sulphides

Zinc, its oxide, chloride, carbonate and sulphate.

Mercury, oxides, chlorides, nitrates, sulphides.

Aluminium, oxide, chloride, sulphate.

Arsenic, hydride, oxides, sulphides.

Antimony, hydride, oxides, chlorides, sulphides.

Tin, oxides, chlorides, sulphides.

Silver, oxide, hydroxide, chloride, bromide, iodide, nitrate, and sulphate.

Organic :—

A.—The preparation, typical properties, and structural relationship of the following compounds :—

Methane ethane, ethylene, chloroform, iodoform.

Methyl alcohol, ethyl alcohol, and ether.

Formaldehyde, acetaldehyde, and acetone. Chemistry
 Formic acid and acetic acid
 Ethyl acetate and methyl acetate. Chemistry,
 Acetamide, acetyl chloride, acetic anhydride.
 Acetylene.
 Methylamine.

B.—The simpler properties of the following :—

Glycerol, oxalic acid, tartaric acid, fats, soaps
 (and saponification), starch, cane sugar,
 grape sugar (and fermentation), urea,
 benzene, nitrobenzene, phenol, aniline, benzoic
 acid, proteins.

Practical work.

Students will be examined in Practical Chemistry

Students are expected to perform the following experiments in the laboratory. An account of each experiment must be written by the student in a special note-book, which will be liable to examination by the Examiners. This note-book should be kept in the charge of the laboratory instructor and each account of an experiment should be signed by him. The Principal of a College will be responsible for the production of this note-book when demanded by the proper authorities.

The practical course is as follows :—

1. Such practical work as is required for the High School Examination of 1932.

2. Analysis of simple salts, soluble in water or hydrochloric acid composed of acids and bases mentioned in the following list :—

Ag, Pb, Hg, Cu, Cd, Bi, As, Sb, Sn, Fe, Al, Cr, Ni, Co, Zn, Mn, Mg, Ca, Sr, Ba, Na, K, NH₄, Cl, Br, I, ClO₃, SO₄, SO₃, NO₃, NO₂, PO₄, S, CO₃, C₂O₄, acetate
 (dry and wet methods)

3. Preparation and purification of simple salts involving no special difficulty.

4. (a) Simple gravimetric experiments, such as change in mass on oxidation of magnesium and on heating barium chloride, sodium bicarbonate, or ferrous ammonium sulphate.

(b) Simple volumetric estimations, such as the estimation of alkali, acids and alkaline carbonates by titration.

5. Determination of melting and boiling points.

6. Qualitative detection of nitrogen, sulphur and one of the halogens, alone or together in an organic compound.

Books suggested :—

1. SHENSTONE : Inorganic Chemistry (Arnold).
2. J. W. MELLOR : Introduction to Inorganic Chemistry (Longmans).
3. ROSCOE AND HARDEN : Inorganic Chemistry for Advanced Students.
4. A Class Book of Organic Chemistry by J. B. Cohen.
5. Organic Chemistry, Part I, by Perkin and Kipping. (W. and R. Chambers)
6. Donington's Class Book of Chemistry, Parts 1—4.
7. HOLMYARD'S Inorganic Chemistry, Arnold, 6s. 6d.
8. HOLMYARD : Practical Chemistry (Bell & Sons, Ltd.). 1s.
9. OSCROFT : Inorganic Chemistry, for Upper Forms (Bell & Sons, Ltd.). 6s. 6d.
10. MALVEA : Practical Chemistry for Intermediate Colleges (Indian Press, Allahabad). Rs. 2.
11. NEWTH : Chemical Lecture Experiments for teachers use (Messrs. Longmans, Green & Co.) (latest edition). 3s. 6d.

12. HOLMYARD : Introduction to Organic Chemistry (Arnold).
13. BRUCE AND HARPER : Practical Chemistry, edition 1925 (Macmillan).

PHYSICS.

(N.B.—Candidates will be required to pass in the theoretical as well as practical part of each Science subject.)

There will be two papers of three hours each as follows :—

1st Paper—Properties of Matter, Heat and Light.

2nd Paper—Sound, Electricity and Magnetism.

The following syllabus is recommended :—

General properties of Matter.—Fundamental units and their measurement, Principle of Balance, Verniers, Calipers, Screw-gauge, Spherometer, Volume, Density, Specific gravity, Fluid pressure, Principle of Archimedes, Nicholson's hydrometer, Barometer, Boyle's Law, Pumps, Siphon, Elementary notions of volume, elasticity and Young's modulus in the case of solids. Isothermal and adiabatic elasticities of gases Gravitation, simple harmonic motion Pendulum. Value of "*g*." Laws of simple machines, such as levers and pulleys Laws of motion.

Heat—Temperature. Thermometers Calorimetry. Specific heat. Latent heat Expansion of solids, liquids, and gases. Vapour pressure Hygrometry. Change of state. Laws of unsaturated and saturated vapour. Conduction Convection. Radiation Reflection and absorption of heat. Isothermal and adiabatic changes. Specific heat at constant volume and constant pressure Relation of heat to work Determination of "*J*."

Light—Laws of propagation Reflection and refraction from plane and spherical surfaces. Dispersion.

3. Preparation and purification of simple salts involving no special difficulty.

4. (a) Simple gravimetric experiments, such as change in mass on oxidation of magnesium and on heating barium chloride, sodium bicarbonate, or ferrous ammonium sulphate.

(b) Simple volumetric estimations, such as the estimation of alkali, acids and alkaline carbonates by titration

5. Determination of melting and boiling points.

6. Qualitative detection of nitrogen, sulphur and one of the halogens, alone or together in an organic compound

Books suggested :—

1. SHENSTONE : Inorganic Chemistry (Arnold).
2. J. W. MELLOR : Introduction to Inorganic Chemistry (Longmans).
3. ROSCOE AND HARDEN : Inorganic Chemistry for Advanced Students.
4. A Class Book of Organic Chemistry by J. B. Cohen.
5. Organic Chemistry, Part I, by Perkin and Kipping (W. and R. Chambers).
6. Donington's Class Book of Chemistry, Parts 1—4.
7. HOLMYARD'S Inorganic Chemistry, Arnold, 6s. 6d.
8. HOLMYARD . Practical Chemistry (Bell & Sons, Ltd.) 4s.
9. OSCROFT : Inorganic Chemistry, for Upper Forms (Bell & Sons, Ltd.). 6s. 6d.
10. MALVEA : Practical Chemistry for Intermediate Colleges (Indian Press, Allahabad). Rs. 2.
11. NEWTH : Chemical Lecture Experiments for teachers use (Messrs. Longmans, Green & Co.) (latest edition). 8s. 6d.

The following syllabus is prescribed. Instructions for the teaching of Biology are appended :—

I.—Zoology.

(N.B.—Candidates will be required to pass in the theoretical as well as practical part of each Science subject.)

A.—Living and non-living matter. The distinctive properties of living matter or protoplasm and its chemical composition. The structure and life-history of Amoeba and malaria parasite as examples of the Protozoa. A general conception of the structure and phenomena of the animal cell, direct and indirect cell division. The union of cells to form tissues and the combination of tissues to form organs.

B.—The structure of Hydra as an example of the Metazoa. The principle of the physiological division of labour and the correlated differentiation of structure.

C.—The structure and bionomics of an Indian Earthworm as an example of a segmented animal.

D.—The structure of the Cockroach as a type of Arthropoda. A general survey of the life-history of the Mosquito and House-fly, and their economic importance.

E.—The general characters of the Chordata.

F.—The general anatomy, histology, and physiology of the various systems or organs in the Frog.

G.—An elementary knowledge of the anatomy and osteology of the Rabbit or other common Mammal. The brain and eye of the Sheep, and the skull of the Dog may be substituted for those of the Rabbit.

H.—A general classification of the animal kingdom with the characteristics of the principal phyla.

I.—Reproduction, sexual and asexual, ova and spermatozoa; oogenesis and spermatogenesis. The elementary facts of the fertilisation and segmentation of

the ovum, the outlines of the development and larval history of the Frog, the three primary germ-layers and the organs derived from them.

II.—Botany.

(N II —Candidates will be required to pass in the theoretical as well as practical part of each Science subject.)

A.—The structure and germination of seeds, the morphology of the root, stem, and leaf. The chief types of floral structures. The chief types of inflorescence and the common types of fruits.

B.—The parts of a typical vegetable cell, the cell contents and their microchemical reactions, the division of a cell, the chief types of plant tissues. A comparative study of the internal structure of the root, stem, and leaf of the Angiosperms. The structure of the reproductive organs of the Angiosperms.

C.—The structure of *Bacillus subtilis* and the modes of nutrition among the Bacteria.

D.—The structure, physiology, and life-histories of *Ulothrix*, *Spirogyra*, *Mucor*, and Yeast.

E.—The structure and life-histories of a moss and a fern, and the phenomenon of alteration of generations.

F.—The life-history of Angiosperms. General structure of flowers and fruits, recognition and economic importance of the following families :—

Cruciferae, Malvaceae, Leguminosae, Compositae, and Liliaceae.

G.—An outline of the classification of the vegetable kingdom to illustrate grades of structure and methods of reproduction.

H.—Elementary plant physiology ; stability of the plant body ; the usual constituents of plant food ; assimilation ; transpiration ; respiration ; the main facts about growth ; the chief types of movements.

Practical Work.

Students are expected to keep a record of all practical work in a special laboratory sketch-book, which will be liable to examination by the examiners. The laboratory instructors should sign the result of each day's practical work

A —The microscopical study of Amoeba and Hydra ; the study of Hydra by means of transverse and longitudinal sections

The general dissection of the earth-worm, cockroach, and frog ; life-history of the mosquito : a microscopical study of the chief animal tissues from fresh or prepared preparations of muscle, nerve, cartilage, bone, blood, and connective tissue. The microscopical study of the earth-worm by means of fresh preparations and transverse sections, a microscopical examination of the kidney, liver, spinal cord, stomach, ovary, and testis of the frog. The skeleton of the frog.

The osteology of the rabbit, substituting the skull of the dog for that of the rabbit, and the dissection of the alimentary, vascular, and reproductive systems of that animal.

B —The dissection of plants and parts of plants ; the preparation, simple staining, and study of microscopical sections of plants. A practical study by microscopical examination and otherwise of Syzygya, Ulothrix, bacteria, yeast, Mucor ; a moss, a fern, and the vegetative and reproductive organs of Angiosperms treated in an elementary manner.

The description of a flowering plant and its parts in semi-technical language.

(Where fresh material cannot be obtained recourse should be had to prepared specimens)

Text-books suggested :—

1. PARKER and BHATIA : Elementary Course of Practical Zoology. (Macmillan.)
2. HOLMES : Biology of the Frog. (Fourth edition.)
3. MARSHALL and HURST : Practical Zoology. (Murray.)
4. RANGACHARI : Handbook of Botany for India (Varadachary & Co., Madras, 1925).
5. GAGER : Fundamentals of Botany. (Blakiston.)
6. HUXLEY : Elementary Physiology. (Macmillan.)
7. SHIPLEY Life. (Ditto.)
8. TRANSEAU : General Botany. (World Book Company, New York)
9. BAHL, K. N. : Indian Zoological Memoirs. I, Pheretima. (Methodist Publishing House, Lucknow), 1926. Rs. 1-8-0.
10. SMITH, OVERTON AND OTHERS. : Text-book of General Botany (second edition), (Macmillan & Co.).

APPENDIX.

Instructions for the teaching of Biology—

1. The teacher must consider the purpose for which he teaches Biology—to prepare students for the University, for medical and forest colleges, and for more intelligent and more joyful living. Biology deals with the world of life surrounding the students, and every effort should be made to present Biology as a living subject, rather than as a vast mass of unrelated and (to the students) often meaningless facts to be memorised.

2. Teachers may take more liberty in teaching Biology than has been considered possible in the past. They should feel that they are not too rigidly bound by

the syllabus. Much of what is commonly accepted as the interpretation of the syllabus, and as the proper content of Biology, is a tradition from the past. Teachers may to a much larger extent determine for themselves what they are to regard as the proper things to include in their teaching, and the proper emphasis to be given to these things; the syllabus will then become a friendly guide

3. The syllabus is a record of work that ought to be covered and the teacher may take up the various topics in whatever order he thinks best.

4. The additional items in the new syllabus are not intended to enlarge the syllabus, but to shift the emphasis given to the various parts of it. For instance, it is not intended that the cockroach shall be studied in minute detail, but that it shall be made the basis for acquaintance with the great assemblage of arthropods. The mosquito is to illustrate metamorphosis, and is used because of the great importance of mosquitoes to man, because it can be observed anywhere, and because it can be readily reared in the laboratory. The mosquito is to illustrate also the carrying of disease by insects, and the malaria parasite is an illustration of a disease-producing organism transmitted by an insect. The economic and bionomic importance of these animals is to be emphasized rather than complete details of their structure.

Likewise it is intended to allow considerable freedom to the teacher by permitting the use of mammalian types that are most readily available. The purpose is to become acquainted with characteristic features of mammalian anatomy, rather than with minute details of one animal only, to the exclusion of all others.

In Botany more emphasis should
plants do and how they work,

wh
study

of various growth forms, which have little meaning for the student unless correlated with the great problems of plant economy. Moss is added to the syllabus as a simple, clear, and easily accessible plant illustrating sex organs and alteration of generations; it should be treated from this point of view, and no effort should be made to consider its anatomy in the detail usually regarded necessary in the fern.

DRAWING.

There will be two papers, each of three hours' duration the first paper on Solid Geometrical Drawing and the second paper on Free Arm Memory Drawing.

Syllabus.—

Free Arm.—In pastels on Tinted Paper or Water Colours on White Cartridge Paper.

Progressive work in groups of the common objects listed for High Schools, such as—

Plate of Oranges, Tomatoes, and Bananas; Candle-stick and Matches; Ink-pot and Pen; Gloy Bottle and Brush; Bundles of Firewood; Glass of Water or Milk; Chinese Lantern; Liquids in Bottles; Umbrellas, etc.

Nature Study Advanced.—The more difficult Flowers, Bunches of Flowers, Leaves with Fruit and Flowers, Compound Leaves.

The above, which is but suggestive, will involve instruction in the art of blending colours, colour harmonies, colour schemes and shadows, together with technicalities such as tint-softening, blending, direct colouring, light tint on dark and dark on light, use of opaque colours and back-grounds.

Memory Drawing.—(a) Objects such as listed above which may be placed before students for a limited period after which the object shall be taken away and the drawing made.

(b) The drawing of some familiar and common objects entirely from memory.

A number of small objects may be placed once a week on a covered up tray, exposed, say for ten seconds, and the class be asked to write down as many objects as they remember to have seen.

Text-books recommended.—Pastel work, Vols. I and II, by H. A. Rankin, (Messrs. Isaac Pitman & Sons). Price Rs 4 per vol.

Materials—As for the High School Examination of 1932 (Free Arm).

Geometrical—Solid Geometry, simple solids, plans, elevations, sections, and sectional elevations of such, isometric orthographical projection, elementary perspective drawing, and all forms of Plain and Diagonal Scales

Text-books and Materials—As for the High School Examination of 1932 (Geometrical).

ECONOMICS.

There shall be two papers of three hours each. The first paper shall cover Production, Consumption, and Taxation, and the second paper Exchange and Distribution.

Introductory.

Subject-matter. Relation to other sciences. The development of Economic life.

Production.

Relation between wants and production. The factors of production.

Land.—Natural resources of India. Soil and Climate. Sources of Power. Raw materials.

Labour.—Density and distribution of population in India. Health and vital statistics. Occupations.

Capital (fixed and circulating).—Buildings and machinery. Means of communication and transportation in India. Irrigation.

Organization (management plus enterprise).—Combination of the factors of production in village industries and in factories. Efficiency of the factors of production. Different uses and how efficiency increases. Efficiency of labour increased by education. Division of labour and specialization of machinery. Large scale production and its limitations. Diminishing and increasing returns. Development of industrial organization. Its relation to means of transportation. Accompanying changes in rural industries and in agriculture in India. Extensive and intensive cultivation.

Exchange.

Utility.—Marginal and total utility. Law of diminishing utility. Law of demand. Elasticity of demand.

Barter—Conditions of barter. How both parties gain in utility by exchange.

Exchange by sale and purchase. Demand and supply schedules and curves. Balancing of demand and supply in a local market. Relation of price to expenses of production. Changes in the expenses of production. The development of markets. Causes of the extension of markets. India's imports and exports.

The machinery of exchange. Money and banking, both to be illustrated from Indian examples (including the *sahukari* system in the villages and the *sarafi* system in cities). Convertibility of paper money in India. Cheques and Hundies (*Foreign exchanges are included*).

Distribution.

The problem of distribution.

Rent.—The law of rent as applied to India. Land tenure in the United Provinces.

Salaries and wages—Real and money wages. Wages as determined by supply and demand of labour. The standard of living. Mobility of labour in India. Influence of social customs.

Interest—Net and gross interest. Mobility of capital in India. Principles of co-operative credit and its advantages for India.

Profits—As the reward of enterprise. The field for enterprise in India.

Consumption.

Satisfaction as the end of all economic activity. Wants and their classification. Division of income among different items of expenditure. Family budgets. Relations of saving to spending. The social side of spending.

Taxation.

A description of the taxes and other sources of revenue and items of expenditure of the Imperial Government, of Bombay and the Province or State in which the College is situated; simple distinction between direct and indirect taxes. (Nothing of the theory of taxation is to be taught.)

NOTE—Candidates may be required to draw charts, graphs and maps in the written examination, to frame budgets and analyse them and to solve problems relating to costs of production.

The following books should be consulted :—

1. *Carver*.—Elementary Economics.
2. *Morland*.—Introduction to Economics for Indian students. (Macmillan & Co.).
3. India in 1928-29 (the latest edition of the publication available in July 1930, being recommended), published by the Central Publicity Office. (Chapters dealing with economic progress only are to be read.)

4. *P. Banerjee*.—A study of Indian Economics (third edition, 1928), (Macmillan & Co.).

5. The chapter on the United Provinces in the Appendix to the Report of the Royal Commission on Agriculture.

Teachers should also consult—

1. *V. G. Kale*.—Indian Economics. (Aryabhusan Press, Poona).

2. *Marshall*.—Economics of Industry. (Macmillan & Co.).

3. *Clay*.—Economics for the General Reader. (Macmillan & Co.).

4. *Jack*.—Economic Life of a Bengal District. (Clarendon Press, Oxford).

5. *Mann*.—Life and Labour in a Deccan Village. (Oxford University Press).

6. *B. G. Bhatnagar*.—Bases of Indian Economy. (Ram Narain Lal, Allahabad).

7. *Lettice Fisher*.—Getting and Spending : Collin's Clear Type Press, London. 3/6.

8. *R. K. Mukerjee*.—Groundwork of Economics (Longmans)

9. *Fairchild*.—Elements of Economics.

10. *F. H. Robinson*.—Elements of Economics, Books I and II.

11. *Devi Lal Dubey*.—Elementary Indian Economics (Indian Press, Allahabad, price Rs. 3-12)

12. *Frank O'Hara*.—Introduction to Economics.

13. Report on an Enquiry into Working Class Budgets in Bombay, by G. Findlay Shirras (Government of Bombay Labour Office).

Teachers should give facts and figures from the latest edition of the Indian Year Book ("Times" Press).

Practical Work.

Teachers should take out students to study small industries, markets, and conditions of living in both city and country. The principles should be illustrated from these studies. The following is the minimum amount of practical work that should be done by students —

- (1) Two budgets of consumption — one of an artisan, one of a cultivator, if possible, with the students' own suggestions for improvement.
- (2) Two statements showing the expenses of production, for one month, or a longer period, or for a fixed quantity of product, of two small industries, with suggestions for the improvement of the industry.
- (3) Four diagrams illustrating the above four statements.
- (4) Two maps representing economic conditions in India or parts of India.

Written Work.

Teachers should insist on as much written work as possible. The following methods are suggested :—

NOTE.—Teachers should not usually dictate notes, but should require students to write out their own notes after each lecture from rough notes taken in class and from memory. These notes should be inspected and corrected by the teacher.

Questions.—At the beginning of the lecture period teachers should frequently give out a single question on the work of the day before and allow the students 5 or 10 minutes to write out the answer, which should be corrected and returned to the students.

Essays.—Occasional essays may be assigned.

The following written work is the minimum to be done by each student :—

- (1) Two long examinations of at least 2½ hours each or six one-period tests, or one such examination and three such tests.
- (2) Ten questions set in class to be answered in about ten minutes each.
- (3) Two essays of about ten pages, or four essays of about five pages. (One long essay and two short essays are advised.)

In the case of *private candidates*, double the number of essays *plus* a description of a market or fair and of a cottage industry or a Co-operative Society may be submitted in place of items nos. (1) and (2) of the written work.

CIVICS.

There will be two papers of three hours each : the first paper on Civic Theory and the second paper on Indian Civics.

Paper I.—Civic Theory.

Syllabus—

Nature of society. The State in relation to society. Functions and structure of government, forms of government. The place of local institutions in political life. Meaning of citizenship. Benefits from society, State or local institutions to the citizen. Duties and rights of citizenship. A citizen's participation in the life of his town, his province, his country. A citizen's relations with non-political associations like the colleges, clubs, religious organizations, co-operative societies, etc.

Books recommended :—

1. Raleigh .. Elementary Politics (Oxford University Press).

2. Lay .. Citizenship.
- 3 Sir Henry Jones Principles of Citizenship.

Paper II.—Indian Civics.

Syllabus—

Structure of Indian government, central and provincial Working of Indian government. Indian municipalities, district boards, village institutions with particular reference to those of the United Provinces of Agra and Oudh Education in India Indian social life. Cultural movements in modern India. National movements in modern India

Books recommended :—

1. Marris and Garner. Civil Government.
2. G Anderson .. British Administration.
3. S. M. Bose .. Working of the Indian Constitution (Oxford University Press).
4. S V Puntambekar. An Introduction to Civics and Politics (The Indian Press, Limited, Allahabad).
5. J. N. Farquhar.. Modern Religious Movements in India.
6. C. F. Andrews... Renaissance in India.

HISTORY AND ALLIED GEOGRAPHY.

There will be two papers of three hours each.

N. II—Candidates are expected to draw freehand maps of India and Great Britain and Ireland.

Paper I.—Indian History from the earliest time to 1919.

Alternative groups of books recommended :—

Group A.

1. SMITH, V. A. : The Oxford History of India. (Clarendon Press, Oxford.)

no. 53 (Delhi and Simla), also 1-inch Survey of India map no. 63K, 12. Study of the principles of the chief map-projections, such as Cylindrical (Mercator), Orthographic, Stereographic, Spherical, Conical, Elliptical (Mollweic). Study of the weather maps for the months January 1931 and July 1932, published by the Meteorological Offices, Simla, and of other distribution maps.

The work should show that outdoor geographical studies including practical map-work have formed a feature of the course.

III.—Economic Geography with special reference to India. The world position of India, its natural resources, its economic development. The general relation between geographic factors and the production of the major raw materials and food-stuffs. Sources of power. Factors affecting transport, exchange of commodities. and the localization of major industries.

The world distribution of the following vegetable products :—

Wheat, rice, tea, coffee, vine, cotton, jute, sugar, rubber, tobacco, conditions of their growth.

Books recommended :—

of India, *with explanatory handbooks*.

Philip's sets of synthetic maps (for students' use).
1s per packet.

Philip's Modern School Atlas of Physical, Political,
and Commercial Geography. 7s. 6d.

LOGIC.

There will be two papers of three hours each : the
first paper on Deductive Logic and the second paper on
Inductive Logic.

Deductive Logic.

The following syllabus is prescribed :—

Definition, scope and value of Logic. Nature of thinking The laws of thought. The relation of thought and language Terms and their classification Denotation and Connotation of terms. The predicables. Formal division and definition. Propositions, their import. Reduction of statements to logical form. Distribution of terms Nature and forms of inference. The opposition of propositions and various forms of deduction. The syllogism, its figures and moods. Reduction direct and indirect. Hypothetical, disjunctive and mixed syllogisms. The Dilemma, Enthymeme, Sorites, and Epicheirema. Function and value of syllogism Analysis of deductive arguments. Fallacies

Inductive Logic.

The following syllabus is prescribed :—

The nature and presuppositions of inductive inference. Causation, its significance and importance in induction. Observation and experiment. Classification, nomenclature, and terminology. Hypothesis. Imperfect induction—simple enumeration and analogy. Methods of scientific induction. The deductive method of investigation Analysis of inductive arguments and application of inductive methods. Explanation and establishment of laws. The relation of induction to deduction. Fallacies.

Books recommended (*not prescribed*) to indicate the standard of treatment of the topics prescribed in the syllabus :—

1. *Introductory Text-book of Logic* : S. H. Mellor, (Blackwood & Sons, Edinburgh).

2. Intermediate Logic : Welton & Monahan. (University Tutorial Press, London).

3. Elementary Logic, Deduction and Induction : Diwan Chand. (Narayan & Co., Meston Road, Cannopore).

4. Inductive Logic : P. K. Ray.

A MODERN INDIAN LANGUAGE.

Hindi.

There will be three papers, each of three hours' duration : the first paper will be set on the prescribed Poetry and Alankar, the second paper on the prescribed Prose and Drama, and the third paper on Unseen and Composition. Questions on History of Hindi literature and critical questions will be distributed over the first and second papers.

Paper I—Poetry and Alankar.

Text-books prescribed .—

1. Padya Ratna Sangrah (Sahitya Ratna Bhandar, Agra).
2. Din Daya' Giri—अन्योक्ति वचनसुद्ध (Nagari Pracharini Sabha, Benares).
3. वचन संग्रह and वचन वैभव (Sahitya Sadan, Chirgaon, Jhansi). Annas 8.

Paper II—Prose and Drama.

Text-books prescribed :—

1. Jai Shankar Prasad—अज्ञातशत्रु (revised edition), (Bharati Bhandar, Benares)
2. Shyamsundar Das—गद्यकुसुमावली (Indian Press, Allahabad).
3. Premchand—प्रेम द्वादशी (Saraswati Press, Benares), or वचन रत्नावली by Ram Chandra Verma (Sahitya Ratnamala Karyalaya, Benares).

Paper III—Unseen and Composition.

Books recommended for Alanka and History of Hindi Literature :—

1. Ram Ratna—रत्नकर प्रबोध (Ratnasram, Agra).
2. सरसपिण्ड by Ram Chandra Sukul, 'Saras' (Ram Narain Lal, Bookseller, Allahabad.)
3. Badri Nath Bhatta—हिन्दी (Ganga Pustak Mala, Lucknow).
4. Kaye—Hindi Literature (Heritage of India Series).

The following books are recommended for supplementary reading :—

1. Tulsidas—कवितावली (N. P. Sabha, Benares).
2. Shridhar Pathak—स्कान्तवासो योगी (Padmakot, Allahabad).
3. Satya Jiwan Verma चित्रावली (Ram Narain Lal, Bookseller, Allahabad).
4. Ramchandra Shukla—समाह्व (N. P. Sabha, Benares).
5. Viyogi Hari—अन्तर्नाद
6. Pratap Narayan Misra—निबन्ध नवनीत (Abhyudaya Press, Allahabad).
7. Padum Lal Bakshi—सङ्गुपात्र (Gandhi Hindi Pustak Bhandar, Allahabad).

N.B.—Students are expected to read at least two books out of those recommended for supplementary reading.

Urdu.

There will be three papers in this language, each of three hours' duration; the first paper will be set on the prescribed Prose, the second on the prescribed Poetry, and the third on Unseen and Composition. Critical questions will be set in the first and second papers.

Paper I—P ose and Grammar.

Books prescribed :—

(1) from page 2 سہندان پارس حصہ اول - محمد حسین آزاد کہے لگا کئے باشد up to page 54 ending with یورپ میں علم زبان

آبھیات - نظم اردو کی تاریخ - محمد حسین آزاد (2) from مرثیوں سے ۲۴ دیکھی up to لافٹ یونان کہے ہیں

حصہ ۳ - باب اول - شعری کی حقیقت - شملی نعمانی (3) the who'e of the 1st chapter. شعرا اعجم -

آمید کی خوشی (c) تکمیل (b) تعصب (a) مضامین سر سید (4) (g) انسان کے خیالات (f) خون غرضی (e) سراب حیات (d)

خط و کتابت (j) اخلاق (i) اپنی مدد آپ (h) بحث و تکرار (فصل اول تا ششم و ہشتم تا دہم) رویاے صادقہ - (5)

دائرۂ فہرہ ادب

Grammar. — مجمع الفرائد. "Majma-ul-Fawaid," by Maulvi Syed Hamid Ali (Rai Sahib Ram Dayal Agarwala, Allahabad).

Paper II—Poetry and Grammar.

(۱) سودا - آیا عمل میں نایب سے تیری بہ کاردار

سودا - اب سامنے میرے جو کوئی پیر خواں ہی (شہر آشوب)

omit lines 14, 15, 16, 26, 48, 49, 57, 58, 62, 63, 76, 77, 78, 86, 96

(۲) ذوق - سادہ میں دیا تو سے سوال دکھائی

ذوق - واہ را کیا معتدل ہی باغ عالم کی ہوا

(۳) مہیر - آئینہ سخن کے لیئے ہو گھر آب میں

(۴) امیر - فصل گل آئی ہوا گلزار چمن دوستان

(۵) انیس - یارب چمن نظم کو گلزار ارم کر

(۶) وحید - اے قلم دامن کفّہ پہ گھر ریز ہو ریز

(۷) سردر جہان آبادی - حسرت دیدار - پیر وئی

(۸) - چکبست }
سیر دہر و دنوں
گہریال کوشن گہرے
راسمین کا اک سہن

شمع و شاعر }
 تصویر درد } (۹) اقبال
 گورستان - مہی

(۱۰) چراغ پرشاد برق - مثنوی بہار (از گلدستہ بدیع)

The first 7 Ghazals from the first diwan of each of the following poets. —

(۱۱) مصحفی - دربر - صبا - رند

Grammar :—

Majma-ul-Fawa'id by Maulvi Syed Hamid Ali (Rai Sahib Ram Dayal Agarwala, Allahabad).

Paper III. Unseen and Composition.

The following books indicate the standard of the passages to be set :—

1. مزرا رسوا - شریف زادہ (National Press, Allahabad).
2. چکبست - مضامین چکبست (Indian Press, Allahabad).
3. الیاس بہرہ - جذبات طہارت حصہ اول (ترقیب حدید)

There will be three papers in each of the following languages. Each paper will be of three hours; the first paper will be set on the prescribed Poetry and Drama, the second on the prescribed Prose, and the third on Unseen and Composition. Critical questions will be set in the first and the second papers :—

Bengali

Poetry.

1. *Kirtibas*.—Ramayan, Ajodhya Kanda.
2. *Rabindra Nath Tagore*.—Naivedya (Viswa Bharti Series).
3. *Karnarjuna* (drama) by Aparesh Chandra Mukhopadhyaya (Guru Das Chatterji and Sons, Calcutta). Re. 1-8.

Prose.

1. *Bankim Chandra Chatterji*.—Durgesh Nandini (novel).

2. *Ishanchandra Ghosh*.—Jatak, Volume I (nos. 1—25 and introduction).
3. *Hara Prashad Sastri*.—Bharat Mahila.

Composition.

Rakhal Das Vidyaratna.—Bengali Composition.
(Recommended.)

Marathi.

Paper I, Poetry—

- (1) *सुगीत सरदा नाटक* by Deval.
- (2) "Selections from Tukaram," as published in the latest edition of "Navnit."

Paper II, Prose —

- (1) "Ragini (novel)," volumes I and II, by Vaman Malhar Joshi (Manoranjak Grantha Prasarak Mandali, Bombay).
- (2) "Ashoka Charitra," by Vasudeo Govind Apte, published by the manager, "Anand," Poona City. Rs. 1-8-0.

Paper III, Unseen and Composition.—

Books recommended—(1) *सताढी वाक्प्रचार वङ्गणी*, by Vidyadhar Vaman Bhide (Chitra Shala Press, Poona City).

- (2) *चातर कौंचे निबंध भाग १-२-३* Rs. 3-12-0.

Gujarati.

Paper I, Poetry and Drama—

- (1) "Kavyamadhurya," selected by H. G. Anjaria.
- (2) "Jaya-ane-Jayant," by N. D. Kavi.

Paper II, Prose—

- (1) "Kavijivan," by Navalram (Naval Granth-avali, Part I).
- (2) "Sarasvatichandra," Part II, by Govardhanram M. Tripathi (N. M. Tripathi, Bombay). (Chapters I—V, pages 1—136, 4th edition).

- (3) "Kavita-ane-Sahitya," by Sir Ramanbhai M. Nilkanth (Gujarat Vernacular Society edition, Ahmedabad). Vol. 1 (pages 1—72).

Paper III, Unseen and Composition—

No special recommendation.

A MODERN EUROPEAN LANGUAGE.

There will be three papers of three hours each. The first paper will consist of extracts from the prescribed Text-books together with grammatical questions. The second paper will contain Unseen passages for translation from French into English; these passages are not to be taken from the prescribed Text-books. The third paper will consist of a passage or passages of English prose to be translated into French.

French.

Prescribed Text-books—

1. ERCKMANN-CHATRIAN : *Le Conscrit*.
2. MICHAND : *Conteurs Francairs d'aujourd'hui* (Heath).
3. French poetry for advanced students by A. Watson Bain (Macmillan & Co.), of which poems numbered 2, 15, 23, 24, 30, 34, 35, 38, 43, 57, 61, 75, 102, 108 and 116 are prescribed.

Grammar recommended—

French Grammar (Sonnenschein's Parallel Grammar Series) or Heath's Modern French Grammar. (Harrap.)

Books recommended for rapid reading :—

La Bastide Rouge (Elie Berthet). *La Rose Blanche* (Louise Enau't) and *La Viede Polichinelle* (Octave Feuill t), all of Siepman's French series Macmillan & Co.

Book recommended for French Composition :—

Easy steps in French Composition by Horsley and Bonne (Rivington).

2. *Ishanchandra Ghosh*.—Jatak, Volume I (nos. 1—25 and introduction).

3. *Hara Prasad Sastri*.—Bharat Mahila.

Composition.

Rakhal Das Vidyaratna.—Bengali Composition.
(Recommended.)

Marathi.

Paper I, Poetry—

(1) *सुगीत यादव नाटक* by Deval.

(2) "Selections from *Tukaram*," as published in the latest edition of "*Navnit*."

Paper II, Prose —

(1) "*Ragini* (novel)," volumes I and II, by Vaman Malhar Joshi (Manoranjak Grantha Prasarak Mandali, Bombay).

(2) "*Ashoka Charitra*," by Vasudeo Govind Apte, published by the manager, "*Anand*," Poona City. Rs 1-8-0.

Paper III, Unseen and Composition.—

Books recommended—(1) *मलतो वाक्प्रचार बहुरूपो*, by Vidyadhar Vaman Bhide (Chitra Shala Press, Poona City).

(2) *अंगर काँवे निबंध भाग १-२-३* Rs. 3-12-0.

Gujarati.

Paper I, Poetry and Drama—

(1) "*Kavyamadhurya*," selected by H. G. Anjaria.

(2) "*Jaya-ane-Jayant*," by N. D. Kavi.

Paper II, Prose—

(1) "*Kavijivan*," by Navalram (Naval Granth-avali, Part I).

(2) "*Sarasvatichandra*," Part II, by Govardhanram M. Tripathi (N. M. Tripathi, Bombay). (Chapters I—V, pages 1—136, 4th edition).

- (3) "Kavita-ane-Sahitya," by Sir Ramanbhai M. Nilkanth (Gujarat Vernacular Society edition, Ahmedabad). Vol. 1 (pages 1—72).

2. MICHAND : Conteurs Francairs d'aujourd'hui (Heath).

3. French poetry for advanced students by A. Watson Bain (Macmillan & Co), of which poems numbered 2, 15, 23, 24, 30, 34, 35, 38, 43, 57, 61, 75, 102, 108 and 116 are prescribed.

Grammar recommended—

French Grammar (Sonnenschein's Parallel Grammar Series) or Heath's Modern French Grammar. (Harrap.)

Books recommended for rapid reading :—

La Bastide Rouge (Elie Berthet). La Rose Blanche (Louise Enau't) and La Viede Polichinelle (Octave Feuill t), all of Siepman's French series Macmillan & Co.

Book recommended for French Composition :—

Easy steps in French Composition by Horsley and Bonne (Rivington).

2. *Ishanchandra Ghosh*.—Jatak, Volume I (nos. 1--25 and introduction).

3. *Hara Prashad Sastri*.—Bharat Mahila.

Composition.

Rakhal Das Vidyaratna.—Bengali Composition.
(Recommended.)

Marathi.

Paper I, Poetry—

(1) *सुगीत गारदा नाटक* by Deval.

(2) "Selections from Tukaram," as published in the latest edition of "Navnit."

Paper II, Prose.—

(1) "Ragini (novel)," volumes I and II, by Vaman Malhar Joshi (Manoranjak Grantha Prasarak Mandali, Bombay).

(2) "Ashoka Charitra," by Vasudeo Govind Apte, published by the manager, "Anand," Poona City. Rs. 1-8-0.

Paper III, Unseen and Composition.—

Books recommended—(1) *मराठी वाङ्मयचर वङ्मणी*, by Vidyadhar Vaman Bhide (Chitra Shala Press, Poona City).

(2) *आगर काँचे निबंध भाग १-२-३* Rs. 3-12-0.

Gujarati.

Paper I, Poetry and Drama—

(1) "Kavyamadhurya," selected by H. G. Anjaria.

(2) "Jaya-ane-Jayant," by N. D. Kavi.

Paper II, Prose—

(1) "Kavijivan," by Navalram (Naval Granth-avali, Part I).

(2) "Sarasvatichandra," Part II, by Govardhanram M. Tripathi (N. M. Tripathi, Bombay). (Chapters I—V, pages 1—136, 4th edition).

- (3) "Kavita-ane-Sahitya," by Sir Ramanbhai M. Nilkanth (Gujarat Vernacular Society edition, Ahmedabad). Vol. 1 (pages 1—72)

Paper III, Unseen and Composition—

No special recommendation.

A MODERN EUROPEAN LANGUAGE.

There will be three papers of three hours each. The first paper will consist of extracts from the prescribed Text-books together with grammatical questions. The second paper will contain Unseen passages for translation from French into English; these passages are not to be taken from the prescribed Text-books. The third paper will consist of a passage or passages of English prose to be translated into French.

French.

Prescribed Text-books—

1. ERCKMANN-CHATRIAN : *Le Conscrit*.
2. MICHARD : *Conteurs Francairs d'aujourd'hui* (Heath).
3. French poetry for advanced students by A. Watson Bain (Macmillan & Co.), of which poems numbered 2, 15, 23, 24, 30, 34, 35, 38, 43, 57, 61, 75, 102, 108 and 116 are prescribed.

Grammar recommended—

French Grammar (Sonnenschein's Parallel Grammar Series) or Heath's Modern French Grammar. (Harrap.)

Books recommended for rapid reading :—

La Bastide Rouge (Elie Berthet). La Rose Blanche (Louise Enau't) and La Viede Polichinelle (Octave Feuill t), all of Siepman's French series Macmillan & Co.

Book recommended for French Composition :—

Easy steps in French Composition by Horsley and Bonne (Rivington).

A CLASSICAL LANGUAGE.

There will be three papers of three hours each in each of the languages : the first paper will be on Poetry and Drama, the second paper on Prose and Unseen and the third paper on Grammar, Composition, and Translation into the classical language. Questions in Grammar relating to the text may be included in each of the first two papers, the number of marks assigned to such questions in each paper being not more than 20 per cent. of the total in the case of Sanskrit only.

(a) Sanskrit.

Paper I.—Poetry and Drama—

- (a) Raghuvamsha, Canto XIII (as in Astapuspika by Nilkamal Bhattacharya or in any other edition).
- b) Shakuntala, Act IV (as in Astapuspika by Nilkamal Bhattacharya or in any other edition).

NOTES—1. Students are expected to explain selected passages in their own Sanskrit.

- 2. No Prakrit passages shall be set for the examination.

Paper II.—Prose and Unseen—

- (a) Prose—Chandrapida Charitam (the story of Kadambari written concisely in Bana's own words), by Pandit V. Anantacharya, published by the editor in 1917, Nungambakkam, Madras, and printed at the Law Printing House, Mount Road, Madras. Price, annas 6.

(b) Unseen—

- (1) Bharatanuvarnanam भारतानुवर्णनम् by M. M. T. Ganapati Sastri (Shridar Power Press, Trivandrum).

(2) Shakuntalopakhyana from the Mahabharata.

NOTE—Easy passages from the above-mentioned books and similar passages from other similar books should be set for translation.

Paper III—Grammar, Composition, and Translation.*Books recommended* .—

- 1 Apte's Guide to Sanskrit Composition.
- 2 Kale's Higher Sanskrit Grammar.
3. Vidya Bhushan's Sanskrit Grammar
- 4 Bhandarkar's Second Book of Sanskrit.
- 5 Sanskrit Vyakaran Prabeshika, by Babu Ram Saksena (National Press, Allahabad).

In addition to the course in Grammar prescribed for the High School Examination of 1930, the course in Grammar for the Intermediate Examination of 1932 shall consist of the following :—

The remaining declensions of all nouns and pronouns, conjugations of verbs of frequent occurrence in classical literature of all the *ganās* in all the *lakāras*, the use of *karakas*, the *samasas*, and the *krit* and *taddhita* forms.

N.B.—Sanskrit must be written in Devanagari character.

(b) Arabic.

Paper I.—Poetry and Unseen.

Text :—

(a) حسان بن ثابت

١ عفت ذات المابع بالبراء

٢ هل رسم دامة المقام يناد

٣ عرفت ديار زينب بالنثيب

٤ صلى الله على الذين تقابعوا

٥ والى ما تدري هذيل

٦ والله اننا لنارق ماحدا

٧ وشق له من اسم كى بعده

٨ ما بال عيني لا تنام لانا

٩ ايت حلفة بر غير ذي دخل

- ١٠ نأو بنني ليل بيثرب اعسر -
 ١١ أظن عيونة إذ زارها -
 ١٢ ألا بالقوم هل لماحم دافع -
 ١٣ اعرض عن العوراء أن اسمعتها -
 ١٤ لقد جدعت أذان كعب و عامر -
 ١٥ إدا لله حيا معشرها مفعالوم -
 ١٦ ذهبت بأبن الزبير رقة -
 ١٧ ولقد بكيت و عز مهلك جعفر -
 ١٨ لقد درث الضلالة عن أبيه -
 ١٩ أنا لهم إبانع بأن محمدا -
 ٢٠ الله اكرمنا مفصر نبيه -
 ٢١ هل المجدد السوود العود و الذئبي -
 ٢٢ ايك بكت عيناك ثم فبادرت -
 ٢٣ الين اذال العشير فان كان -
 ٢٤ ويثرب تعلم إننا بها -
 ٢٥ و مسك بصداع الراس من سكر -
 ٢٦ ابلغ وازن اعلاها و اسفلها -
 ٢٧ سقم كمانه حبل من عداوتكم -
 ٢٨ لو خلق اليوم انسانا يكلمهم -
 ٢٩ ثوب بمكة بضع عشرة حدة -

Dr. A. S. Tritton's edition of these selections is approved.

Unseen—

The following book indicates the standard of passages to be set —

نواثر الحكايات by قليوبي 1st half.

Paper II — *Prose and Unseen.*

Text —

(a) ابن خلدون (The biography of the Prophet.)

(b) *Tajaribul Umam*, Eclipse of the Abbaside Caliphate, volume I, pages 83 to 91. Imprisonment of Um Musa, the stewardess, and appointment of Ibn Furat as Wezir, 310 to 311 Hijra, pages 202 to 216.

Unseen—

The following book indicates the standard of passages to be set :—

نواثر الحكايات by قليوبي 1st half.

Paper III.—Grammar, Composition, and Translation into the classical language. *

Grammar—

مدارج العربية by M. Izzat Ullah, (Chashmai Rahmat Book Agency, Ghazipur, U. P.)

NOTE.—Arabic words must be written in Arabic character.

*NOTE.—Alternative questions to the extent of 25 per cent. shall be set in this paper.

(f) Hebrew.

Prescribed course :—

I.—Text—SAMUEL, Book I.

PSALMS, I—LX.

II.—Genesis is recommended for rapid reading in connexion with Unseen.

III.—Grammar :—Duff's Hebrew Grammar is recommended.

NOTE.—Alternative questions to the extent of 25 per cent. shall be set in this paper.

PHYSIOLOGY, HYGIENE AND CHILD-STUDY.

(For female candidates only.)

NOTE.—The subject should be taught in such a way as to be of practical value to the students.

There will be two papers of three hours each : the first paper will contain questions on (1) Activities of the Modern Home, (2) Physiology and Hygiene, and (3) Public Health and the second paper questions on Child-Study

I.—Activities of the Modern Home.

- (1) To provide for the physical needs and development of the members of the family.
- (2) To provide for their mental, moral and social needs.
- (3) To co-operate with the community for the better meeting of these needs.
- (4) To maintain the home on an economically sound basis so as to make possible the meeting of the above needs.

II.—The study of Physiology and Hygiene, especially from the point of view of the physical development of the child.

A.—The cells, the supporting tissue and their structure

B.—The skeleton ; bones ; joints ; the muscular system. A special study of the conditions making for the normal development of these systems, such as posture, etc

C.—Digestion and nutrition.

- (1) The organs and processes of digestion.
- (2) The food needs of the body.
- (3) The classes of food-stuffs.
- (4) The diet of the pre-school and school child.
- (a) Constipation as a special dietary problem of school children.
- (b) Mal nutrition, how to detect and remedy it.
- (5) Effect of cooking on food ; method of cooking with special emphasis on methods of cooking food for children.
- (6) Treatment of minor digestive ailments.
- (7) Alcohol and drugs and their effect on the digestive system.

D.—The excretory system—The skin, kidney, bowels. Health habits of children in relation to the above.

E.—The circulation of the blood—The heart ; arteries ; veins ; capillaries. The regulation of the blood supply. The composition of the blood and its work in the body.

The problem of the child with the weak heart.

F.—Respiration.

- (1) The lungs ; trachea ; larynx ; the composition of pure and impure air, effect of breathing on air.
- (2) Formation of proper breathing habits in children. Posture ; special breathing exercises.
- (3) Ventilation for the school and home.

G.—The nervous system and sense organs.

- (1) The nerves ; spinal cord ; brain.
- (2) The structure of the eye ; ear ; nose.

- (3) Health habits to promote the normal development of these organs.
- (4) Common defects of these organs—how to detect them.
- (5) Treatment of minor ailments and accidents.
- (6) The effect of alcohol and drugs on the nervous system and sense organs.

H.—Clothing.

- (1) Selection of clothing, especially for children.
- (2) Training of children as to care and cleanliness of clothing.

I—Occupation, exercise, recreation, rest, sleep.
Health habits to be established in children in the above.

J.—Precautions against common diseases.

- (1) Health habits which will protect the child from common diseases.
- (2) Health habits which will prevent the spread of infectious diseases.

III.—Public Health

A—Responsibility of the individual.

B—Disposal of refuse and waste water. Drainage.
Latrines.

C—Water supply, Food supply.

D.—Prevention and arrest of infectious diseases.

E.—Gardens. Play grounds. Open spaces.

F.—Modern movements for the education of society in the laws of health, e.g., "Child Welfare."

IV —Child-Study.

The study of children's development from the point of view of physique, intelligence, and character, based as far as possible on the observation of individuals and classes.

An elementary study of the means by which children acquire knowledge and skill, including such as the following :—

The senses and sense training ; instincts and their relation to children's interests ; forms of activity and expression ; the function of play ; imitation and suggestion ; habits and their formation, memory and imagination ; interest and attention ; the formation of clear and connected ideas , simple processes of reasoning ; growth of the will.

The aims and methods of discipline ; training in responsibility, in the right use of freedom and in the social duties.

Books of reference—

1. *Elementary Physiology, by W. B. Drummond
- 2s. 2d. (Publisher, Arnold).
2. * Elementary Hygiene for India, by C Beresford (Lahiri & Co , College Street, Calcutta).
3. Physiology and Hygiene, by G D Cathcart. (Macmillan).
4. Elementary Physiology, by Bhatia and Suri (Longman's Green & Co)
5. Child Mind, by Dumville
6. Modern Psychology, by Meredith (Constable)
7. Dawn of Mind, by Drummond (Arnold)
8. Child-welfare, by Dr S K Mukerji (Ind an Press, Allahabad).
9. Physiology, by T. Huxley.

(The books marked* indicate the scope of the work required in Physiology and Hygiene)

INTERMEDIATE EXAMINATION IN COMMERCE OF 1932.

The following are the subjects of examination :—

Compulsory subjects—

1. English
2. Book-keeping and Accountancy.
3. Business Methods and Correspondence.
4. (a) Elementary Economics.
(b) Commercial Geography.

Optional subjects—

One of the following :—

1. Steno-typing (shorthand and typewriting).
2. Elements of Banking.
3. Elements of Industrial Organization.
4. Mathematics.

The following papers will be set :—

1. *English*.—Two papers of three hours each.
2. *Book-keeping and Accountancy*.—Two papers of three hours each

3. *Business Methods and Correspondence*.—Two papers of three hours each : one paper on Business Methods and one paper on Correspondence, précis-writing, etc.

4. *Elementary Economics and Commercial Geography*.—Two papers of three hours each : one paper on Elementary Economics and one paper on Commercial Geography.

5. *Steno-typing*.—

{	<i>Shorthand</i> .—One paper of three hours <i>Typewriting</i> .—One paper of one hour.
---	--------------------------------------------------------------------------------------------

6. *Elements of Banking*.—One paper of three hours.

7. *Elements of Industrial Organization*.—One paper of three hours.

8. *Mathematics*.—Two papers of three hours each.

No.	Subject.	Paper	Time (hours)	Marks for each paper.	Total marks for each subject	Minimum pass marks.
COMPULSORY						
1	English	First paper (Prose)	3	50	100	33
		Second paper (Composition and translation.)	3	50		
2	Book-keeping and Accountancy.	First paper	3	50	100	33
		Second paper	3	50		
3	Elementary Economics and Commercial Geography	First paper (Economics)	3	50	100	33
		Second paper (Geography)	3	50		
4	Business Methods and Correspondence.	First paper (Business methods).	3	50	100	33
		Second paper (Correspondence, precise writing, etc.)	3	50		
OPTIONAL						
1	Steno typing	First paper (Shorthand)	3*	50	100	33
		Second paper (Typewriting)	1	50		
2	Elements of Banking	One paper	3	100	100	33
3	Elements of Industrial Organisation	One paper	3	100	100	33
4	Mathematics	First paper	3	50	100	33
		Second paper	3	50		

* Excluding five minutes' interval between the dictation of the two sections in shorthand.

The syllabus in each subject is as follows:—

English.

(The same course as is prescribed for the Intermediate Examination of 1932, excluding poetry portion.)

Book-keeping and Accountancy.

The principles of Double Entry Book-keeping and their application Books of original entry, including Tabular Forms. The Ledger. Trial Balance. Manufacturing, Trading and Profit and Loss Accounts, with apportionments and adjustments

Balance-sheets. Loose Leaf and Card Index system of Book-keeping, Self-balancing Ledgers, Single Entry Book-keeping.

In the treatment of the above the following matters will be included :—Cheques, Bills of Exchange and Promissory Notes, Goodwill; Classification of Assets; Bad Debts; Depreciation, Reserves and Sinking Funds; Consignment, Joint Venture and Contract Accounts; Partnership and Company Accounts (including the Double Account system), Capital and Revenue, Investment Accounts, Accounts Current and Average Due Dates.

Books recommended:—

1. Students' Elementary Book-keeping, by Arthur Fieldhouse (Simpkin-Marshall & Co, Ltd., London, E. C.4).

2. Advanced Accounts (fifth edition), by J. R. Batliboi. (S. Govind & Co., Bombay).

3. Advanced Accounts, by R. N. Carter. (Pitman & Sons.).

Business Methods.

1. The general routine of a Business House :—Inward and Outward correspondence (excluding drafting);

Methods of rapid communication ; Duplicating processes.

2. The significance of Trade, Commerce and Industry ; Manufacturing and Distribution Houses. The buying and selling of goods. Mercantile Enquiry Agencies. Importation and Exportation of goods. Documentary Bills. Elementary Fire and Marine Insurance as applicable to this section. Use of Card Indexes.

3. The meaning of the principal commercial terms occurring in connexion with the above and the preparation of the chief documents involved, including arithmetical calculations.

4. An elementary knowledge of the Law relating to Contracts and Negotiable Instruments

Contract Law —Agreements that are contracts ; essentials of a good contract , offer and acceptance , genuineness of consent , contractual capacity of parties , legality of objects (agreements, unlawful, immoral and against public policy void) , performance and discharge of contracts ; breach of contract ; damages

Sale of goods —Sale of ascertained and unascertained goods, passing of ownership, delivery, actual and constructive implied warranties, rights of unpaid seller.

Negotiable instruments —Making, drawing, accepting and endorsing of Promissory notes, Bills of Exchange and Cheques, holder in due course, dishonour noting and protest, presentment for payment and acceptance, acceptance for honour.

Books recommended —

1. Modern Business Training. by John K. Grebb (Macdonald & Evans, London).

2. Commercial Practice. by Roop Ram Gupta and K. L. Govil, Parts I and II (Messrs. Gautama Bros. & Co., Cawnpore).

Correspondence.

This will consist of—

- (a) Commercial and official correspondence.
- (b) Rewriting in plain language of passages from market reports (financial and commodity markets) with explanations of selected terms and phrases occurring in the passages.
- (c) *Precis-writing.*

Book recommended (not prescribed) :—

Modern Commercial Correspondence, by John K. Grebby (MacDonald & Evans, London).

Elementary Economics.

(The treatment of the subject should be very elementary and, as far as possible, it should be illustrated by reference to Indian conditions.)

The subject-matter and scope of Economics, fundamental notions and simple definitions. Relation between wants, efforts and satisfaction.

Production.—Factors of production : Land, Labour, Capital and Organization

Nature and Limitations of Land, Division of Labour and other factors of efficiency of labour ; Organization of capital.

Laws of increasing, diminishing and constant returns.

Wants.—Diminishing utility. Value—its determination. Balancing of supply and demand

The Machinery of exchange. Money and banking, both to be illustrated from Indian examples (including the Sahukari system in the villages and the Sarafi system in cities). Convertibility of paper money in India. Cheques and Hundis (Foreign exchanges are excluded).

Distribution.—Rent—interest—wages—profits (with particular reference to Indian conditions).

Books recommended (but not prescribed as text-books):—

1. Outlines of Economics, by J. T. Goodechild (University Book Dépôt, Agra)
2. PENSON : Economics of Every-day Life, Part I.
3. MORELAND : Introduction to Economics (Macmillan & Co.)
4. JEVONS : Money and Banking in India.
5. Introduction to Economics for Indian Students by W. H. Moreland (Macmillan & Co., St. Martin's Street, London).
6. The Economics of Every-day Life, by Sir T. H. Penson (Cambridge University Press).

Commercial Geography.—(a) An elementary study of the principles of economic Geography on the basis of regional divisions, and their correlation with the distribution of the principal commercial commodities and industries

(b) Trade centres, Ports, Trade Routes

(c) Detailed study of India on the regional basis on the lines indicated above

Books recommended —

- (1) Rudmose Brown's "Principles of Economic Geography."
- (2) Howarth's "A short Commercial Geography"

TYPE-WRITING.

The syllabus will be the same as in Commerce for the High School Examination of 1932, but of a more advanced character—the speed to be 30 words per minute

There shall be no paper on the theory of typewriting.

Correspondence.

This will consist of—

- (a) Commercial and official correspondence.
- (b) Rewriting in plain language of passages from market reports (financial and commodity markets) with explanations of selected terms and phrases occurring in the passages.
- (c) *Precis-writing.*

Book recommended (not prescribed) :—

Modern Commercial Correspondence, by John K. Grebby (MacDonald & Evans, London).

Elementary Economics.

(The treatment of the subject should be very elementary and, as far as possible, it should be illustrated by reference to Indian conditions.)

The subject-matter and scope of Economics, fundamental notions and simple definitions. Relation between wants, efforts and satisfaction.

Production.—Factors of production : Land, Labour, Capital and Organization.

Nature and Limitations of Land , Division of Labour and other factors of efficiency of labour ; Organization of capital.

Laws of increasing, diminishing and constant returns.

Wants.—Diminishing utility. Value—its determination. Balancing of supply and demand.

The Machinery of exchange. Money and banking, both to be illustrated from Indian examples (including the Sahukari system in the villages and the Sarafi system in cities). Convertibility of paper money in India. Cheques and Hundis (Foreign exchanges are excluded).

Distribution.—Rent—interest—wages—profits (with particular reference to Indian conditions).

Books recommended (but not prescribed as text-books):—

1. Outlines of Economics, by J. T. Goodchild (University Book Dépôt, Agra)
2. PENSON : Economics of Every-day Life, Part I.
3. MORELAND : Introduction to Economics (Macmillan & Co.)
4. JEVONS : Money and Banking in India
5. Introduction to Economics for Indian Students by W. H. Moreland (Macmillan & Co., St. Martin's Street, London).
6. The Economics of Every-day Life, by Sir T. H. Penson. (Cambridge University Press)

Commercial Geography.—(a) An elementary study of the principles of economic Geography on the basis of regional divisions, and their correlation with the distribution of the principal commercial commodities and industries

(b) Trade centres, Ports, Trade Routes.

(c) Detailed study of India on the regional basis on the lines indicated above.

Books recommended :—

(1) Rudmose Brown's "Principles of Economic Geography"

(2) Howarth's "A short Commercial Geography"

TYPE-WRITING.

The syllabus will be the same as in Commerce for the High School Examination of 1932, but of a more advanced character—the speed to be 30 words per minute.

There shall be no paper on the theory of typewriting

Premium, Simple and Compound Interest (the use of logarithms will be permitted when necessary).

- (b) *Algebra*.—The Theory of Quadratic Equations, Arithmetical, Geometrical and Harmonic Progression, Permutations and Combinations, Theory of indices and logarithms, Use of binomial and exponential theorems.
- (c) *Trigonometry*.—Measurements of angles, trigonometrical ratios, identities and trigonometrical equations, practical applications of Logarithms; Solution of Triangles, properties of triangles.

Paper II. (a) (1).—Pure Geometry as given in parts V and VI of Hall and Stevens' Geometry.

(2) *Analytical Geometry*.—Straight Lines, Circles, Elementary Properties of conics.

(b) Elements of differential Calculus.

INTERMEDIATE EXAMINATION IN AGRICULTURE OF 1932.

N.B.—Preference for admission to this course will be given to candidates who have studied (a) Chemistry and Physics or (b) Agriculture for their admission test examination.

The following are the subjects of examination :—

Group 1.

	<i>Maximum marks.</i>	<i>Time allowed.</i>
PAPER I.—Chemistry ..	25	Three hours.
PAPER II.—Physics ..	25	Ditto.
Practical Chemistry ..	25	Ditto.
Practical Physics ..	25	Ditto.
Total	100	

Group 2.

PAPER I.—Botany ..	25	Three hours.
PAPER II.—Zoology ..	25	Ditto.
Practical Botany ..	25	Ditto.
Practical Zoology ..	25	Ditto.
Total	100	

Group 3.

PAPER I.—Physical properties of soil, soil geology, climatology	30	Three hours..
PAPER II.—Elements of Plant Feed- ing, Principles of ma- nuring, Principles of Irrigation and Drain- age ..	30	Ditto.
Practical farming ..	30	Ditto.
Practical A. Crop cul- ture ..	30	Ditto.
Practical B. Farm Ma- chinery, including ploughing and other til- lage operations ..	30	Ditto.
Practical C. Animal Hus- bandry ..	30	Ditto.
Total	150	

Premium, Simple and Compound Interest (the use of logarithms will be permitted when necessary).

- (b) *Algebra*.—The Theory of Quadratic Equations, Arithmetical, Geometrical and Harmonic Progression, Permutations and Combinations, Theory of indices and logarithms, Use of binomial and exponential theorems.
- (c) *Trigonometry*.—Measurements of angles, trigonometrical ratios, identities and trigonometrical equations, practical applications of Logarithms; Solution of Triangles, properties of triangles.

Paper II. (a) (I).—Pure Geometry as given in parts V and VI of Hall and Stevens' Geometry.

(2) *Analytical Geometry*.—Straight Lines, Circles, Elementary Properties of conics.

(b) Elements of differential Calculus.

INTERMEDIATE EXAMINATION IN AGRICULTURE OF 1932.

N.B.—Preference for admission to this course will be given to candidates who have studied (a) Chemistry and Physics or (b) Agriculture for their admission test examination.

The following are the subjects of examination :—

Group 1.

	<i>Maximum marks.</i>	<i>Time allowed.</i>
PAPER I—Chemistry ..	25	Three hours.
PAPER II—Physics ..	25	Ditto.
Practical Chemistry ..	25	Ditto.
Practical Physics ..	25	Ditto.
Total ..	<hr/> 100 <hr/>	

Group 2.

PAPER I.—Botany ..	25	Three hours.
PAPER II.—Zoology ..	25	Ditto.
Practical Botany ..	25	Ditto.
Practical Zoology ..	25	Ditto.
Total ..	<hr/> 100 <hr/>	

Group 3.

PAPER I—Physical properties of soil, soil geology, climatology	30	Three hours..
PAPER II—Elements of Plant Feeding, Principles of manuring, Principles of Irrigation and Drainage ..	30	Ditto.
Practical farming ..	30	Ditto.
Practical A. Crop culture ..	30	Ditto.
Practical B. Farm Machinery, including ploughing and other tillage operations ..	30	Ditto.
Practical C. Animal Husbandry ..	30	Ditto.
Total ..	<hr/> 150 <hr/>	

Phosphorus.—Phosphorus pentoxide, phosphoric acid and the phosphates.

Arsenic and arsenious oxide.

Silicon, silica, and the silicates.

Mercury and Silver—their oxides, chlorides and nitrates.

Copper—its sulphate, nitrate and oxides.

Lead—its oxides, chlorides and sulphate.

Iron—its oxides, sulphate, chloride and phosphate; steel, cast iron and wrought iron.

Aluminium—its oxides; sulphate and chloride.

Zinc—its oxide, chloride and nitrate.

Manganese—its oxides, chloride, sulphate and potassium permanganate.

Calcium—its oxide, hydroxide, chloride, nitrate, sulphate, carbonate and phosphate.

Barium—its oxides, carbonate, chloride and sulphate.

Magnesium—its oxide, chloride, sulphate, carbonate and phosphate.

Sodium, Potassium and Ammonium—their hydrates, chlorides, nitrates, sulphates, carbonates and phosphates.

B.—Organic.

General composition; physical properties and general classification of carbon compounds.

Hydrocarbons, saturated and unsaturated;—methane, ethane, ethylene and acetylene.

Alcohols; methyl and ethyl alcohols; glycerine.

Aldehydes and ketones; formaldehyde, acetaldehyde, acetone.

Ethers:—Ethyl ethers.

Acids; formic, acetic, butyric, oxalic, lactic and citric.

Fats, oils and soaps.

Carbohydrates: grape sugar, fruit sugar, cane sugar, starch and cellulose.

Proteins: Albumin.

Practical work in chemistry.

Differentiation between chemical compounds and mechanical mixtures.

Solution ; suspension ; sedimentation ; decantation ; filtration , precipitation ; crystallisation and distillation.

Examination of the important atmospheric constituents.

Preparation of hydrogen, oxygen, nitrogen, nitrous oxide, nitric oxide, nitric acid, ammonia, chlorine, hydrochloric acid, sulphur dioxide and carbon dioxide.

Examination of hard water and methods of softening.

Preparation of the following in their pure form :—

Sodium chloride, potassium or ammonium sulphate, calcium carbonate and ferric oxide.

Acidimetry and alkalimetry.

Qualitative reactions of the following :—

Chlorides, nitrates, sulphates and sulphides, carbonates, phosphates : arsenic, silver, mercury, copper, lead, iron, aluminium, zinc, manganese, calcium, barium, magnesium, sodium, potassium and ammonium.

Qualitative analysis of single salts containing one acid and one base.

Preparation of methane.

Examination of the following organic compounds :—

Ethyl alcohol, glycerine, oxalic acid, grape sugar, fruit sugar, cane sugar and starch.

Study of the physical and chemical properties of vegetable and mineral oils. Saponification.

Qualitative reactions of proteins.

The following books are suggested for reference :—

1. *Every-day Chemistry*, Alfred Vivian (American Book Co., New York). Price, about Rs. 5.
2. *A foundation course in Chemistry for students of Agriculture and Technology*, by J. W. Dodgson and J. A.

Murray. (Longmans, Green & Co., Calcutta). Price, about Rs. 3.

3. Introduction to the Study of Inorganic Chemistry, by W. A. Miller. (Longmans, Green & Co., Calcutta). Price, about Rs. 4

4. Organic Chemistry, by Perkin and Kipping. (W. R. Chambers, Ltd, London) Price, about Rs. 7.

5. Elementary Agricultural Chemistry, by H. Ingle, (Charles, Griffin & Co, Ltd, London). Price, about Rs. 4.

6. Inorganic Chemistry, by F. J. Holmyard (Edward Arnold & Co, Ltd, London)

II—PHYSICS.

Units and measurements; Metric system: Length; Area; Volume, Mass; Time. The Vernier and the micrometer scales. Balance and density.

Velocity, acceleration and momentum. Kinematical equations of rectilinear motion. Composition and resolution of velocities or accelerations; the parallelogram law

Force and motion, inertia. Newton's laws of motion. Measure of a force. Composition and resolution of forces. Gravity and laws of falling bodies; mass and weight; centre of gravity. Centripetal and centrifugal forces defined. Projectiles, torques or moments.

Equilibrium of forces; triangle and polygon of forces; Simple illustrations of friction and its laws. Stable and unstable equilibrium and conditions of equilibrium as in levers, pulleys, inclined plane, ploughs, etc.

Pressure of liquids at rest, variation with depth. Transmission of liquid pressure; Hydraulic press; Principle of Archimedes; Laws of hydrometers. Specific gravity.

The atmospheric pressure. Boyle's Law. Force and suction pumps. Syphon.

Work ; energy : power ; efficiency of machines : definitions and simple illustrations.

Matter and energy Properties of matter Surface tension , capillarity , viscosity ; osmosis ; rigidity and elasticity Molecular structure of matter. Different forms of energy

Liquids and gases in motion, wave motion (elementary treatment).

Heat energy.—Source ; modes of transference ; effects of heat on matter , thermometry ; specific heats ; evaporation and boiling ; vapour pressure , condensation and frost ; latent heats ; hygrometry and dew point ; mechanical equivalent of heat.

Radiant energy :—Source of light ; mode of propagation ; light waves ; shadows , illumination ; reflection ; transmission ; absorption and dispersion of light ; magnification , images , telescope ; microscope.

Magnetic energy :—Magnets ; magnetic forces ; magnetisation ; compass

Electric energy.—Electrification by friction ; insulators , conductors ; electroscope ; electrophorus. Electricity generated by chemical action ; by dynamos. Resistance , magnetic effect of current ; transformation of electric energy into heat, light and power ; practical acquaintance with galvanometers, voltmeters, ammeters, electrolysis (Simplest forms)

Practical Work in Physics.

Accurate determination of length, area, mass, volume and density. Use of calipers, screw gauge, spherometer, balance, burette and squared paper.

Determination of acceleration due to gravity by the simple pendulum.

Verification of the law of parallelogram of forces.

Verification of the principles of parallel forces and of the lever.

Determination of centre of gravity of plane laminas.

Determination of co-efficient of friction.

Determination of efficiency of a system of pulleys.

Use of the Nicholson's Hydrometer.

Use of the hydrostatic balance : determination of specific gravities of—

(1) insoluble sinking solid, (2) floating solid, (3) liquid.

Verification of Boyle's Law and practice in barometer reading.

Use of the density bottle : determination of true and apparent density of soils and porespace.

Practice in reading various thermometers.

Determination of Humidity and Dew point.

Determination of Boiling point.

Preparation of a graph showing cooling of water by radiation.

Determination of specific heat :—(1) method of mixture, (2) method of radiation

Determination of Latent heats of vaporisation and fusion

Reflection of light : use of plane and concave mirrors.

Refraction of light : determination of Refractive index.

Determination of focal length of a converging lens.

Practice in use of a telescope and of a microscope.

Magnetisation of needles and determination of their poles.

Charting of lines of force due to a magnet in different positions.

Use of simple electroscopes (Gold leaf and Pith ball).

Construction of a simple cell and use of the simple galvanometer.

Determination of Electromotive force by the potentiometer or balance method.

Determination of Electric resistance by substitution method.

The following books are suggested for reference :—

1. A High School Course in Physics, by F. R. Gorton (D. Appleton and Co., New York). Price about Rs 5.
- 2 Every Day Physics, by H. E. Hadley (Macmillan and Co, Ltd, London)

GROUP II

BOTANY.

Zoology.

(The course will aim at the study of the phenomena exhibited by living matter as illustrated by lower plants animals and their organs)

Introduction—Living and non-living matter , study of life in its simplest form as illustrated by Amoeba, Nostoc, Euglena, Volvox, Paramoecium and Spirogyra ; general properties of protoplasm as the basis of all life

The cell, animal and vegetable, its growth and simple division; combinations of cells to form tissues; combination of tissues to form organs as illustrated by Hydra and Moss.

I.—Botany.

Study of plant in general.

External morphology of the plant organs · stem, root, leaf, flower, fruit and seed.

Internal Morphology—

(a) Plant cell.

(b) Stem, root and leaf.

Reproduction—

Vegetative reproduction.

Sexual reproduction—

(a) The flower . structure and functions.

(b) Pollination.

(c) The seed · development, structure, dissemination.

(d) The fruit : development, types functions.

(e) Germination.

Physiology : elementary study of the following :--

(a) Chemical composition of plants.

(b) Water in plants ; intake of water and inorganic salts.

(c) Carbon-assimilation.

(d) Transportation ; food storage.

(e) Transpiration.

(f) Respiration.

(g) Growth.

Rapid survey of the plant kingdom :—Bacteria, spirogyra, mucor, moss, fern, cycas.

Study of botanical characters of : (Field and garden crop plants should be used as far as possible)—Cruciferae, Malvaceae, Leguminosae, Rosaceae, Cucurbitaceae, Compositaceae, Solanaceae, Euphorbiaceae, Liliaceae, Gramineae.

Books recommended :—

1. Lawson and Sahni :—Text book of Botany (Indian edition), (London University Tutorial Press or Thacker Spink and Company, Calcutta).
- * 2. Percival .. Agricultural Botany (Duckworth).
3. Ranga Chari .. Elementary Botany for Indian Schools (Government Press, Madras).
4. Gager Fundamentals of Botany (Blakiston).
5. Transeau .. General Botany (World Book Company).
6. Farmer and Chowdhry .. Practical introduction to the Study of Botany (Longmans, Green and

II.—Zoology.

Acquaintance with the following types as illustrations of the various kinds of life :—

Tapeworm, Earthworm, Leech, Snail and Slug, Termite, Fish, Frog.

General organization of Earthworm, Fresh water mussel, Lobster and Cockroach.

Elementary, anatomy and physiology of the important systems of the following :—

Amphioxus, Fish, Frog, Fowl and Squirrel or other small mammal.

Books recommended .—

1. Theobald .. Agricultural Zoology
(W. Blackwood).
2. Gilbert Bourne . Comparative Anatomy
of Animals (G. Bell
and Sons).
3. Marshall .. Physiology of Farm
Animals (Macmillan,
Calcutta).
4. Marshall and Hurst .. Practical Zoology (Smith
Elder and Company).

GROUP III.

I.—ELEMENTARY SOIL SCIENCE.

Soil Geology.—The origin of soils ; classification and nature of soil forming rocks , recognition of the following rocks and their chief characteristics :—

- (1) Igneous Granite ; Syenite , Diorite ; Biabase ; Gabbro ; Basalt.
- (2) Sedimentary limestone ; Sand stone ; Shale ; Dolomite
- (3) Metamorphic Schists, Gneiss ; Marble ; Slate ; Quartzite.

The mineral constituents of the more important soil forming rocks, their nature and composition.

The importance of Felspars in the formation of clay.

The nature of Kaolinite.

Acid and basic rocks and their effect upon soils formed from them.

The Physical properties of soils.—Pore space ; number of soil particles per given volume and their relation to surface area exposed to moisture and air, resistance to cultivation operations, plasticity, absorption, cohesion ; limits of moisture for successful tillage ; effect of presence of organic matter on soil structure ; effect of lime ; effect of cultivation ; sources of soil heat ; specific heat of the soil ; specific gravity apparent and absolute of the soil ; effect of colour on absorption of heat and of humus on conductivity of heat ; effect of decay of organic matter on soil temperature ; control of soil temperature.

Soil classes.—Classification of soils into sand, loam, clay, calcareous, humic and peaty soils and the nature of each class ; division of the United Provinces into its natural soil classes and the characteristics of each class.

Sources of Plant Food in the soil.—Elements necessary for plant growth and their sources ; abundant and deficient elements in the soil ; conversion of organic matter into plant food, conditions necessary for bacterial activity in the soil ; the Nitrogen cycle briefly explained ; the relation of air, water and heat to plant food in the soil, the presence of lime and its importance to the production of plant food.

General Principles of manuring in relation to soils.—The effect of organic manures on the texture of soils, the correct time of application of manures in relation to irrigation and rain water ; losses of plant food by incorrect manuring ; losses by incorrect storage and their

prevention ; acidity and deslocation due to excessive and unsuitable manuring , remedies for this condition ; condition of soil necessary before application of fertilisers can be profitable , the essential difference between organic manures and inorganic manures as regards effect on soils ; methods of manuring both with organic manures and chemical fertilisers.

The following books are suggested for reference —

1. "The Soil," by A D Hall (John Murray, London).

2. "The Physical Properties of Soils," by A. G McCall (Orange Judd and Company, New York). Price about Rs 2-12.

3. "First Principle of Soils Fertility," by Alfred Vivian (Orange Judd and Company, New York ; or Christian Book and Tract Society, Allahabad) Price Rs 2-7.

4. "Soils, their Properties and Management," by Lyon, Fippin and Buckman (Macmillan and Compnay, New York). Price Rs 10

5. "Soils and Fertilizers," by Harry Snyder (Macmillan and Company, New York)

Climatology —The distribution of rainfall, its effect upon the composition of soils ; determination of humidity ; factors affecting dew , changes in atmospheric temperature and their effect upon humidity , winds and their importance in farming , snow, ice and frost and their relation to the soil , methods of obtaining data for climatic reports, simple instruments used in meteorological observations ; climate in relation to soil and plant growth.

The following books are suggested for reference —

1. "Agricultural Meteorology," by Warren Smith (Macmillan and Company, New York)

2. "Forecasting Weather," by W A Shaw (Constable and Company, London).

2. *The Complete Farmer*, by Premirose McCommell (Cassel and Company, London).

3 Roberts and Fawlkner : *A Text-book of Punjab Agriculture*.

4 *Crop Production*, by A. and G. Howard, Institute of Plant Industry, Indore, C. I.

II. Introduction to Animal Husbandry.—The course to deal with the draft bullock, the dairy cow and the goat. The naming of the different external parts ; relation of form and function ; ability to judge ages : Score-card methods of judging ; measurement of speed of work of the draft bullock, the handling of bullocks, cows and goats ; cleaning of animals and byres ; milking ; practice in preparation of balanced rations for dairy cow, bullock, young stock and goat ; practice in watering and exercising , familiarity with the appearance and use of common medicines and antiseptics ; ability to throw an animal with ropes, market value of dairy, draft cattle and goats , keeping of records of dairy cattle.

The following books are suggested for reference :—

1. "Feeding of Crops and Stock," by A. D. Hall.

2 "The Complete Farmer," by Premirose McCommell.

3. "Judging Live-stock," by John A. Craig (Kenyon Printing Company, Des Moines, Iowa). Price Rs. 7.

4 "Feeds and Feeding" (abridged edition), by Henry and Morrison. (Henry and Morrison, Madison, Wiscon.). Price Rs. 10

III. Farm Machinery.—Handling in the field of the plough, harrow, cultivator, roller and plunker ; ability to plough with desi, Mould Board and Disc ploughs ; familiarity with the methods of hitching ; adjustment of implements and methods of ploughing ; familiarity with

the use of common seed-drills; weeding and cultivation with power and hand implements; grinding, cane crushing and fodder cutting.

The following books are suggested for reference:—

1. "Farm Mechanics," by Crawshaw and Leman (Manual Arts Press, Peoria, Illinois, U S A)

2. "Farm machinery and Farm Motors," by Davidson (Thacker, Spink and Company) Price, Rs. 11-8.

IV *Calculations.*—The following simple calculations to be noted in the student's note book. Field notes attested by the teacher to be produced at the examinations:—

(1) Time taken to plough, harrow, cultivate and plant one acre under the following conditions.—

Hard soil,

Soft soil,

Sod and

Stubble

(2) The variation in time taken in area ploughed with differences in depth and width of ploughing under similar conditions.

(3) The area sown with simple seed drills per day calculated from the work done in two hours; probabilities of error

(4) Quantity of work done in hand-weeding, harrowing, etc., per hour by a given number of labourers, in this case students

(5) Calculations of discharge of water from outlets, from irrigation channels and from irrigation appliances

(6) Estimation of loss by evaporation and seepage

(7) Estimation of area of land irrigated in a given time by irrigation appliances in common use, duty of water.

Why do wages differ? Grades of labour. Efficiency of labour. Real and nominal wages. Cost of living and the standard of living. Relation of wages to the supply of labour. Relation of birth-rates and death-rates to income.

Organization and management.—In what different ways might wheat be produced? Does the method depend upon situation? Wages? The rate of interest? Education? Quality of the product? How is the method actually determined? By whom?

Carry out this reasoning for milk and other common necessities

In what cases is it most profitable to use a railway, a bicycle and one's feet? Compare the uses of hand-writing, typewriting and printing press. Hand-sewing and the sewing machine. Why do primitive methods continue in use along with more advanced ones?

Money, banking and foreign exchange, barter, uses of money, reasons for minting and for free coinage, paper money and cheques. The work of banks and their economic importance. India's foreign trade and its advantages.

Taxation.—The necessity for taxation. The income-tax, custom duties, land revenue and excise. Who bears these taxes? Reasons for progressive taxation. Imperial and local taxation.

The following books are suggested for reference :—

1. Elements of Economics, Vol. I, by Alfred Marshall (Macmillan & Co., London).
2. An Introduction to Economics for Indian Students, by Moreland.

MATHEMATICS.

ALGEBRA :—Quadratic equations involving one or two unknown quantities.

Arithmetical and Geometrical Progressions.

Permutations and Combinations.

The Binomial Theorem for positive integral index.

Proportions and Variations

Use of indices and logarithms

Practical use of the slide Rule.

GEOMETRY AND MENSURATION:—Simple Plane and Solid Figures, excluding any detail about the sections of a cone.

Similar figures and proportionals.

Field book.

Collinear points and concurrent straight lines

TRIGONOMETRY —Trigonometrical Ratios

Easy trigonometrical identities and equations

Solution of triangles.

Practical measurement of angles of elevation, heights, distances, including the necessary calculations

GRAPHS —Variables and co-ordinates

Statistical graphs and those governed by a natural law.

Continuity and discontinuity of graphs Problems

Graphs and Algebraical expression of functions

The linear graphs

Use of Cartesian co-ordinates —Distance between two points. Distance between a straight line and a point

Angle between two straight lines.

The quadratic graphs.

Practical Graphical Interpolation.

INTEGRATION :—Small errors ; Infinitesimal quantities.

Differentials ; Differential coefficient.

Easy standard forms of differentiation explained
(without elaborate proofs). Sum and product
of functions.

Summation of series.

Integration, considered as summation of a series of
differentials.

A few very easy standard forms of integrals (without
elaborate proofs). Integration by parts.

Easy determinations of length, area and volume.

Practical use of the planimeter and the opisometer.

Maximum and Minimum marks assigned to the various subjects for the Examinations of 1933.

HIGH SCHOOL EXAMINATION

Maximum marks	..	150 in English and 100 in every other subject.
Minimum pass marks		50 in English and 33 in every other subject.

INTERMEDIATE EXAMINATION.

Maximum marks	..	150 in English and 100 in every other subject.
Minimum pass marks		50 in English and 33 in every other subject.

INTERMEDIATE EXAMINATION IN COMMERCE.

Maximum marks	..	100 in each subject.
Minimum pass marks		33 ditto

INTERMEDIATE EXAMINATION IN AGRICULTURE

Maximum marks	..	100 in groups I and II each, 150 in group III and 50 in groups IV and V each
Minimum pass marks		33 per cent. in each group.

DISTINCTION.

Minimum marks required		75 per cent of the aggregate marks in a subject
------------------------	--	-------------------------------------------------

DIVISION.

Minimum pass marks required for division I.	60 per cent in the aggregate
Minimum pass marks required for division II.	45 per cent in the aggregate.
Minimum pass marks required for division III.	33 per cent in the aggregate.

COURSES OF STUDY.

HIGH SCHOOL EXAMINATION OF 1933.

A.—COMPULSORY SUBJECT.

I.—ENGLISH.

Three papers, each of three hours, will be set (1) on the prescribed course in Prose and Poetry with questions on Grammar and Idiom, (2) on Unseen Passages with questions on Grammar and Idiom; (3) passages in a Modern Indian Language for translation into English and a simple narrative or descriptive composition in English. There will be no oral test, but there will be an examination in English Dictation at each centre. In selecting passages for Dictation care will be taken to avoid passages of a highly abstract character.

Text-books prescribed :—

Group A.—

- 1 School Selections from Modern Prose, by Egerton Smith (K. and J. Cooper, Bombay). Re. 1.
- 2 Modern English Prose, by Brown (Macmillan).
3. New High School Prose Selections (National Press, Allahabad). Re. 1.

Group B.—

1. Paths of Peace, Book II, by Mrs. Laurence Binyon (Oxford University Press).
- 2 Forerunners, by H. G. Rawlinson (Oxford University Press).
3. Romance of Indian History, Part III (Macmillan)

Group C —

1. Indian Schools Book of Verse, Part II, from which the following poems are prescribed :—
The Slave's Dream; The Plate of Gold;

The Honest Man ; Incident of the French Camp , The Old Order Changeth ; My Heart Leaps Up ; Under the Greenwood Tree ; Blow, Blow, Thou Winter Wind ; The Burial of Sir John Moore ; Abou Ben Adhem ; The Brook ; Ring Out Wild Bells.

2. High School Poetry (Revised edition), (Indian Press, Limited, Allahabad), from which the following poems are prescribed —

The Burial of Sir John Moore , The last Minstrel ; Jaffar , John Gilpin ; Hohenlinden , How they Brought the Good News ; Yussouf , The Deserted Village ; The Ocean , An Evening Walk , The Poet , The Little Black Boy , The Mountain and the Squirrel , Frolic ; A Consecration

- 3 Types of English Poetry, Part I (Macmillan & Co), annas 6, from which the following poems are prescribed —

Hymn to God , The Rainbow , Psalm of Life Shortness of Life ; Patriotism , The Child's First Grief , The Beggarmen ; The Sailor Boy , The Ladder of St. Augustine ; Home They Brought Her Warrior Dead , To the Cuckoo , Stanzas Written In His Library , Casabianca , The Village Blacksmith.

N.B —The above text books are arranged in three groups—A, B and C. Group A contains books of prose selections, Group B books of inspirational stories, and Group C books of poetry. Every school must select for study one book only from each of the above groups

Books recommended for rapid reading and indicating the standard of the unseen passages to be set in the second paper —

1. Scott's Ivanhoe (Oxford University Press, abridged by Wien or Victory Series, Ram Narain Lal, Allahabad).

2. The Golden Deeds of India, First Series, by L. and H. G. D. Turnbull (Oxford University Press).
 3. Tanglewood Tales (Longmans, Green & Co.).
 4. Sakuntala (Longmans, Green & Co.).
 5. Shakespeare in Prose (Blackie).
 6. Stories from the Arabian Nights (Nelson).
 7. Up from Slavery (H. G. Harrap).
 8. Jungle Book (Macmillan).
 9. A Persian Hero (Macmillan).
 10. The Exploits of Brigadier Geraid (Oxford University Press).
 11. Stories from Tagore (Macmillan).
 12. Treasure Island (Oxford University Press).
 13. Simple Chapters in English Life (Rai Sahib Gulab Singh & Sons, Lahore).
 14. Stories from Shakespeare, by Wyatt (Oxford University Press).
 15. The Little Duke (Indian Press School Classics).
 16. Pioneers of Invention (George G. Harrap & Co.).
 17. Men of Science (George G. Harrap & Co.).
 18. The Story of the Ramayana (Indian Press, Allahabad).
 19. The Story of the Mahabharata (Indian Press, Allahabad).
 20. Socrates in an Indian Village (Rupeo edition, Oxford University Press).
 21. Masterman Ready (Longmans, Green & Co.).
 22. Legends from Greece and Rome (Victory Series).
 23. Robinson Crusoe (Victory Series).
 24. Tales from Indian History, by Roe (Macmillan).
 25. Lamb's Tales from Shakespeare (Indian Press, Allahabad).
 26. A Book of Stories (Ram Narain Lal, Allahabad).
 27. In Other Lands (Uttar Chand Kapur, Lahore).
- Recommended for use by students:—

The Little Oxford Dictionary.

II.—MATHEMATICS.

There will be two papers, each of three hours—one in Arithmetic and Algebra and the other in Geometry and Mensuration.

SYLLABUS.

(1) Arithmetic and Algebra.

The four simple rules, British and Metric systems of measurement, Factors, Prime numbers; H C F. and L. C. M.; Decimal and vulgar fractions including conversion of a recurring decimal to a vulgar fraction and conversely; Square Root; Ratio and Proportion; Average; Percentages, Profit and Loss; Interest, simple and compound, Pre-ent Worth and Discount (true and commercial), Areas and volumes; Simple equations of one or more unknown quantities; Quadratic equations of one unknown quantity; Graphs of statistics; Graphs of straight lines and graphical solution of linear simultaneous equations, Problems

N B —Candidates will be provided with squared paper, if necessary.

(2) Geometry and Mensuration.

The course includes theoretical, practical and numerical Geometry, and every candidate will be expected to answer questions in both branches of the subject. The questions on practical Geometry will be set on the constructions contained in the annexed Schedule A, together with easy extensions of them. All figures should be drawn accurately, for which purpose every candidate should provide himself with a graduated scale, a pair of set squares, a protractor, a compass and a hard pencil. The questions on theoretical Geometry will consist of theorems and problems contained in the annexed Schedules A and B, together with easy extensions and deductions with numerical illustrations. Any proof of a proposition will be accepted which appears to the

examiners to form part of a systematic treatment of the subject; the order in which the theorems are stated in Schedule B is not imposed as the sequence of their treatment. In the proof of the theorems hypothetical constructions will be permitted.

N.B.—Candidates will be provided with squared paper, if necessary.

SCHEDULE A.

Bisection of angles and of straight lines.

Construction of perpendiculars to straight lines.

Construction of an angle equal to a given angle.

Construction of parallels to a given straight line.

Simple cases of the construction from sufficient data of triangles and quadrilaterals.

Division of straight lines into a given number of equal parts

Construction of a triangle equal in area to a given polygon.

Construction of tangents to a circle and of common tangents to two circles.

Simple cases of the construction of circles from sufficient data.

Construction of a rectangle equal to a given polygon.

Construction of a rectangle on a given base equal in area to a given rectangle.

Construction of a square equal to a given rectangle.

Construction of a rectangle of given area, the sum or difference of whose sides is given. (These constructions should be based on the propositions on the geometry of the circle.)

Construction of a fourth proportional to three given straight lines and a mean proportional to two given straight lines (as corollaries to previous constructions of rectangles).

Construction of regular figures of 3, 4, 6 or ∞ sides in or about a given circle.

Mensuration of triangles and simple rectilineal figures; finding their area by means of field-book; application of formulae for length of circumference and for area of a circle in terms of its radius.

SCHEDULE B

Angles at a point.

If a straight line stands on another straight line, the sum of the two angles so formed is equal to two right-angles; and the converse.

If two straight lines intersect, the vertically opposite angles are equal

Parallel straight lines.

When a straight line cuts two other straight lines, if—

- (i) a pair of alternate angles are equal, or
- (ii) a pair of corresponding angles are equal, or
- (iii) a pair of interior angles on the same side of the cutting line are together equal to two right-angles, then the two straight lines are parallel; and the converse

Straight lines which are parallel to the same straight line are parallel to one another

Triangle and rectilineal figures

The sum of the angles of a triangle is equal to two right-angles

If the sides of a convex polygon are produced in order, the sum of the angles so formed is equal to four right-angles

If two triangles have two sides of the one equal to two sides of the other, each to each, and also the angles contained by these sides equal, the triangles are congruent.

examiners to form part of a systematic treatment of the subject ; the order in which the theorems are stated in Schedule B is not imposed as the sequence of their treatment. In the proof of the theorems hypothetical constructions will be permitted.

N.B.—Candidates will be provided with squared paper, if necessary.

SCHEDULE A.

Bisection of angles and of straight lines.

Construction of perpendiculars to straight lines.

Construction of an angle equal to a given angle.

Construction of parallels to a given straight line.

Simple cases of the construction from sufficient data of triangles and quadrilaterals.

Division of straight lines into a given number of equal parts.

Construction of a triangle equal in area to a given polygon.

Construction of tangents to a circle and of common tangents to two circles.

Simple cases of the construction of circles from sufficient data.

Construction of a rectangle equal to a given polygon.

Construction of a rectangle on a given base equal in area to a given rectangle.

Construction of a square equal to a given rectangle.

Construction of a rectangle of given area, the sum or difference of whose sides is given. (These constructions should be based on the propositions on the geometry of the circle.)

Construction of a fourth proportional to three given straight lines and a mean proportional to two given straight lines (as corollaries to previous constructions of rectangles).

Construction of regular figures of 3, 4, 6 or 8 sides in or about a given circle

Mensuration of triangles and simple rectilineal figures; finding their area by means of field-book; application of formulae for length of circumference and for area of a circle in terms of its radius

SCHEDULE B.

Angles at a point.

If a straight line stands on another straight line, the sum of the two angles so formed is equal to two right-angles; and the converse

If two straight lines intersect, the vertically opposite angles are equal

Parallel straight lines

When a straight line cuts two other straight lines, if—

- (i) a pair of alternate angles are equal, or
- (ii) a pair of corresponding angles are equal, or
- (iii) a pair of interior angles on the same side of the cutting line are together equal to two right-angles, then the two straight lines are parallel, and the converse.

Straight lines which are parallel to the same straight line are parallel to one another

Triangle and rectilineal figures.

The sum of the angles of a triangle is equal to two right-angles.

If the sides of a convex polygon are produced in order the sum of the angles so formed is equal to four right-angles.

If two triangles have two sides of the one equal to two sides of the other, each to each, and also the angle contained by these sides equal, the triangles are congruent.

examiners to form part of a systematic treatment of the subject ; the order in which the theorems are stated in Schedule B is not imposed as the sequence of their treatment. In the proof of the theorems hypothetical constructions will be permitted.

N B —*Candidates will be provided with squared paper, if necessary.*

SCHEDULE A.

Bisection of angles and of straight lines.

Construction of perpendiculars to straight lines.

Construction of an angle equal to a given angle.

Construction of parallels to a given straight line.

Simple cases of the construction from sufficient data of triangles and quadrilaterals.

DIVISION of straight lines into a given number of equal parts

Construction of a triangle equal in area to a given polygon.

Construction of tangents to a circle and of common tangents to two circles.

Simple cases of the construction of circles from sufficient data.

Construction of a rectangle equal to a given polygon.

Construction of a rectangle on a given base equal in area to a given rectangle.

Construction of a square equal to a given rectangle.

Construction of a rectangle of given area, the sum or difference of whose sides is given. (These constructions should be based on the propositions on the geometry of the circle)

Construction of a fourth proportional to three given straight lines and a mean proportional to two given straight lines (as corollaries to previous constructions of rectangles).

Construction of regular figures of 3, 4, 6 or 8 sides in or about a given circle.

Mensuration of triangles and simple rectilinear figures, finding their area by means of field-book, application of formulae for length of circumference and for area of a circle in terms of its radius

SCHEDULE B.

Angles at a point.

If a straight line stands on another straight line, the sum of the two angles so formed is equal to two right-angles; and the converse.

If two straight lines intersect, the vertically opposite angles are equal

Parallel straight lines

When a straight line cuts two other straight lines, if—

- (i) a pair of alternate angles are equal, or
- (ii) a pair of corresponding angles are equal, or
- (iii) a pair of interior angles on the same side of the cutting line are together equal to two right-angles, then the two straight lines are parallel; and the converse

Straight lines which are parallel to the same straight line are parallel to one another

Triangle and rectilinear figures.

The sum of the angles of a triangle is equal to two right-angles.

If the sides of a convex polygon are produced in order the sum of the angles so formed is equal to four right-angles

If two triangles have two sides of the one equal to two sides of the other, each to each, and also the angles contained by these sides equal, the triangles are congruent.

In equal circles (or in the same circle), (i) if two chords are equal, they cut off equal arcs ; (ii) conversely, if two arcs are equal, the chords of the arcs are equal.

Equal chords in a circle are equidistant from the centre ; and the converse.

The tangents at any point of a circle and the radius through the point are perpendicular to one another.

If two circles touch, the point of contact lies on the straight line through the centres.

The angle which an arc of a circle subtends at the centre is double that which it subtends at any point on the remaining part of the circumference.

Angles in the same segment of a circle are equal, and if the line joining two points subtends equal angles at two other points on the same side of it, the four points lie on a circle.

The angle in a semi-circle is a right-angle, the angle in a segment greater than a semi-circle is less than a right-angle, and the angle in a segment less than a semi-circle is greater than a right-angle.

The opposite angles of any quadrilateral inscribed in a circle are supplementary ; and the converse.

If a straight line touch a circle and from the point of contact a chord be drawn, the angles which this chord makes with the tangent are equal to the angles in the alternate segments.

If two chords of a circle intersect either inside or outside the circle, the rectangle contained by the parts of the one is equal to the rectangle contained by the parts of the other.

The following books are suggested :—

For Arithmetic—

(۱۰) حکایت دهم — بهالین تربت نهند آدمی —

(۱۱) حکایت یازدهم — درویش مستجاب مردم آزاری —

(۱۲) حکایت دوازدهم — یکی از ملوک مرده به —

(۱۳) حکایت سیزدهم — یکی از ملوک شنیدم گود آید —

(۱۴) حکایت چهاردهم — یکی از بادشاهان در عالم —

(۱۵) حکایت پانزدهم — یکی از وزرا نیا زارن —

مثل سیاه گوی را ندیمان نگزار

(۱۶) حکایت شانزدهم — یکی از رفیقان سوراخ کردم —

(۱۷) حکایت هجدهم — تنه چند از روندگان بی بر سنگ —

(۱۸) حکایت هجدهم — ملک زاده گنج نکو گذاشت —

(۱۹) حکایت نوزدهم — آورده اند که مرغ بسیج —

(۲۰) حکایت بیستم — عاملی را دیدم مردم آزار —

باز آمدم به حکایت لعنت پائدار —

(۲۱) حکایت بیست و یکم — مردم آزار مغزش برآر —

(۲۲) حکایت ہست و دوم - یکے را از ملوک پائے
پیل -

(۲۳) حکایت ہست و سوم - یکے از بندگان نشستی -

(۲۴) حکایت ہست و چہارم - ملک زوزن اہل خرد -

(۲۵) حکایت ہست و پنجم - یکی از ملوک عرب
آستان دارن -

(۲۶) حکایت ہست و ششم - ظالمے را بہم برکند -
لطیفہ ہر ناچ بتخواہد رفت

(۲۷) حکایت ہست و ہفتم - یکے در صنعت نشانی نکرد -

(۲۸) حکایت ہست و ہشتم - درویش معجز دست
بدست -

(۲۹) حکایت ہست و نهم - یکے از وزرا ملک ہودے -

(۳۰) حکایت سی ام - نادشاہے بکشتن بہخاست -

(۳۱) حکایت سی یکم - وزراے نوشین روان ہر دین -

(۳۲) حکایت سی و دوم - شایدے کسل کدند -

(۳۳) حکایت سی و سوم - یکے از پسران باطل نگویند -

(۳۴) حکایت سی و چہارم - باطلانہ ہر گن کارہا نشد -

(۳۵) حکایت سی و پنجم - دو ہرادر دو تا -

(۳۶) حکایت سی و ششم - کسے مؤدے جاوہانی نیست -

(۳۷) حکایت سی و ہفتم - گر وہ حکما گذار است -

(۳۸) حکایت سی و ہشتم - ہارون الرشید الخ - Omitted

(۳۹) حکایت سی و نهم - یکے را از ملوک الخ -
Omitted

(۴۰) حکایت چہلم - اسکندر رومی پائدار -

باب چہارم - در فوائد خاموشی

(۱) حکایت اول - یکے از دوستان موشک کور -

(۲) حکایت دوم - بازار گانی شادی کزان -

(۳) حکایت سوم - جوانی خندمند دایلمش بیار -

(۴) حکایت چہارم - عالمی معتبر - Omitted

(۵) حکایت پنجم - جالیفوس ندانی -

(۶) حکایت ششم - سعبان رعس -

(۷) حکایت ہفتم - یکے را از حکما خموش -

(۸) حکایت هشتم - تنی چند یافت -

(۹) حکایت نهم - در عقد ارزد -

(۱۰) حکایت دهم - یکی از شعرا در می چند -

اینچه مرد مانند (Instead of

read مرد مانند)

جان من خود کردہ خون کردہ را تدبیر نیست Chapter I up to

Poetry.

۱ - بوستان

باب اول - در عدل و راء و تدبیر جهانداري -

(۱) نگنجد کرمهای ندند حق گزار -

(۲) حکایت - یکم دیدم پسند آیدش -

(۳) پند دادن کسری هر مژرا - شنیدم که باشی سے -

(۴) پند دادن خسرو شرو و یکہ - شنیدم که خسرو

مہم در پند -

(۵) حکایت - چہ خوش بست هست -

(۶) حکایت شنیدم کہ شاپور یادہ بست -

(۷) حکایت در تدبیر بادشاهان و تاخیر کردن دوسیاست -

ز در پاء چندین ملک

Lines omitted پشیمان شوم ملک را در خویشید

(۸) گفتار - نہ ہر حکم نہ نکون -

(۹) حکایت دو معنہ شفتت در رعیت شنیدم کہ

فرماندہی زمین -

(۱۰) حکایت - شنیدم کہ جمشید در گردنت -

(۱۱) حکایت - شنیدم کہ داراء کم بود -

(۱۲) گفتار - تو کے بشنوی خواہی بگوے -

(۱۳) حکایت خبر یافت داد خواست -

- (۱۴) حکایت - از بزرگان من سعد راست
- (۱۵) حکایت - اتانک موحوم تکه من زنگی و حمة الله تعالى - در اخبار داشتند -
- (۱۶) حکایت - شنیدم که نگریست تا گشتن -
- (۱۷) حکایت - خدا درست نامی بند و گوش -
- (۱۸) گفتار - بها زور مندی در گذشت -
- (۱۹) حکایت در معنی رحمت بر ناتوان در حال توانائی - چنان تحطالی در بوستان -
- (۲۰) حکایت - شبی دود من ندردی -
- (۲۱) گفتار - خبرداری نگریست -
- (۲۲) حکایت - شنیدم که در هرزه ظالم حسرت -
- (۲۳) حکایت - یکی پسر شاخ ز سیدی شنو -
- (۲۴) صفت جمعیت اوقات درویش راعی - مگو چاه شناخت -
- (۲۵) حکایت - شنیدم که یکبار آید بگوش -
- (۲۶) در معنی نکوکاری و بدکاری و عاقبت آن - نکو کار مردم به پیش -
- (۲۷) حکایت - گریزی چشم دار -
- (۲۸) حکایت - حکایت کفند از یکی قیامت بماند -
- (۲۹) حکایت - یکی پند می داد لغزلان - مع گفتار -
- الا تا مرض -
- (۳۰) حکایت در پس معنی - یکی را حکایت برخاست -
- (۳۱) گفتار - جهان اے پسر گذشتند -
- (۳۲) حکایت شنیدم که در مصر بالین گور -
- (۳۳) حکایت تزل ارسالن کس است -
- (۳۴) حکایت - چنین گفت پی -
- (۳۵) حکایت - چوالب ارسالن نه خناست -
- (۳۶) حکایت در رگه جمایه اشارت پس است -
- Line omitted بهت چوبام
- (۳۷) حکایت - شنیدم که از نیکمردی خانمت -
- (۳۸) حکایت - یکی مشق زن زر نداشت -

- (۲۹) حکایت - حکایت کنند از جما مستجاب -
- (۳۰) گفتار - همی تا برآید در حلقه کارزار -
- (۳۱) گفتار - اندر نواخت لشکریان - دلاور کارزار -
- (۳۲) گفتار - به پیکار مصائبش نکشت -
- (۳۳) حکایت - چه خوش گفت غنیمت شمار -
- omitted اگر چوں در Line
- (۳۴) گفتار - در تن پرور -
- omitted زن تلمذ Line
- (۳۵) گفتار - میان دو بد حوا به آرام دل -
- (۳۶) گفتار - اندر ملاطفت دشمن از روی عاقبت اندیشی -
- چو شمشیر شایسته خون روی -
- (۳۷) گفتار - اندر حذر کردن از دشمنی که در طاعت
- آید - گرت خویش پیش برد -
- باب دوم در احسان
- (۱) اگر هوشمندی در مران -
- (۲) گفتار اندر نواختن یقیمان و رحمت در حال
- ایشان - پدر مرده سر بر فتم پدر -
- (۳) حکایت در ثمر فکر کاری - کسی دید در خواب
- پیدمیران -
- (۴) حکایت در اخلاق پندمیران - شنیدم که یکپخته
- یک زمان -
- (۵) and پرست بگفتا نگیرم (1) Lines
- omitted حال بدانست
- (۵) گفتار اندر احسان با مردم نیک و بد - گره به سر
- خرن -
- (۶) حکایت عابد باشیاد شوخ دیده - زبانزدانی
- سعدی بگوش -
- omitted در نزد خون از کوه Line
- (۷) حکایت پدر مسک و پسر جوانمرد - یکم وقت
- حسیب -
- (۸) مثل - بدختر چه خوش لاف شوی -

- (۹) باز آمدم بحکایت نرزند خلف بوی -
 (۱۰) حکایت اندر راحت رسانیدن همسایگان - بزارید
 علیست -
 (۱۱) حکایت شنیدم که مردی بوی مزله -
 (۱۲) حکایت - بزرهنگ تمیز -
 (۱۳) حکایت کریم تفکدست ناسائل - یک را کرم
 چه پاک -
 (۱۴) حکایت در معنی احسان - یکی در دیابان
 زبردست -
 (۱۵) حکایت - نهالید درویش زبر شد -
 (۱۶) حکایت یک سیرت کسی ست -
 (۱۷) گفتار اندر جوانمردی و ثمره آن - ببخش ای پسر
 دوست -
 (۱۸) حکایت در معنی صید کردن دلها با احسان - بچه
 در یک در روز -
 (۱۹) حکایت درویش با دیوانه - یک درویش بختی
 خدایت -
 (۲۰) حکایت عابد بخیل - شنیدم که مردیست
 سست -
 (۲۱) حکایت حاتم طائی و ملت جوانمردی وی - شنیدم
 در ایام ماجرا شنو -
 (۲۲) حکایت در آزمودن ناساها بمن حاتم را بازاد مردی
 ندانم که گفت همروند -
 (۲۳) حکایت در آزاد مردی حاتم و ذکر ناساها اسلام -
 زنگاه حاتم ز سعدی سخن -
 (۲۴) حکایت در عالم بان شاهان - یک را خرم من اس -
 Line omitted زن یک گفت Line
 (۲۵) حکایت توانگر سقاء و درویش صاحب دل - شنیدم که
 مغرور و زان که آز -
 (۲۶) گفتار - الا گر طالبکار هدف -
 (۲۷) حکایت - یک را پسر خاها -

- (۲۸) حکایت - زجاج ملکزاده ظریف -
- (۲۹) حکایت احسان اندک و ثمره آن به نهایت - جوانی
بدانگی ندانندهم -
- (۳۰) حکایت در معنی ثمره فیکو کاری - کسی دید
سایه در -
- (۳۱) گفتار اندر هیبت ملوک و سیاست - به گفتیم در
باب و دان -
- (۳۲) گفتار در معنی احسان ما کسی که سرادر نباشد -
شنیدم که مردم زاعراس -
- (۳۳) گفتار - چه خوش گفت تدبیر راه -
باب ششم در قناعت
خدا را ندانست تیرش خوری -
باب هفتم در تربیت
- (۱) سخن در - بندن کسی تا گفتار اندر فضیلت
خاموشی سوختست -
- (۲) حکایت در حفظ اسرار - لکس با غلامان دم مزین -
- (۳) حکایت - سلامت جاهل در جواب خاموشی -
یکه خوب خلق و میباش -
- (۴) حکایت - یکی ناسزا مغرم برند -
- (۵) حکایت - عضد را مشغول باش -
باب هشتم در شکر
- (۱) حکایت جوان سه نکوش مع گفتار اندر صوم
باری سپاس -
- (۲) حکایت - نهد از مای به هیچ مع گفتار اندر
نظر میزدی -
باب نهم در توبه
- (۱) بیا اینکه عورت فرصت شمار -
- (۲) حکایت - شی در جوانی نکور -
- (۳) حکایت کهن سالی دورگار -
- (۴) گفتار جوانان بخیز -
باب دهم در مناجات
بیا تا بر آریم نیند از دم -

2. Aijnai Sikandari, by Khusru خسرو

(a) Ode گہ آسانشے خرواعی از روزگار up to

طرب مایہ زندگانی ہوں

(b) Ode اے ایک راے داری اے ایک راے up to

کہ خواہد شدن منزل دیگرے

3. beginning with the following lines .—

- (۱) عشاق بدرگہت اسپند بیا
- (۲) مرد آن نبین کہ خلق خوارند او را
- (۳) خرم بتو داشتم دل پُر غم را
- (۴) عاقل بچہ آمید درین سوم سراے
- (۵) اے خواہد یکے کام روا کن مرا
- (۶) اے دل ؛ زمانہ رسم احسان مطلاب
- (۷) چون کار نہ مر مراد ما خواہد رفت
- (۸) ہر کو درتے ز عقل دو دل نکاست
- (۹) امروز ترا دسترس بردا نیست
- (۱۰) مر ار ہمہ ناکسان نہاں داید داشت
- (۱۱) ہر دل کہ درو سہر و مستیست ہر شست
- (۱۲) ہر گہ کہ غمہ ملارم دل شودت
- (۱۳) درچشم متدققان چہ زیبار چہ زشت
- (۱۴) بسیار بگشتیم نگرود درو دشت - اندر ہمہ الخ
- (۱۵) ایضا یک کار من الخ
- (۱۶) ہر سوزہ کہ نوکبار جوئے رستست
- (۱۷) آن نہ کہ درین زمانہ کم گیروی دوست
- (۱۸) جندہیں غم مال و حسرت دنیا چہیست
- (۱۹) چون مردن تو مردن یکبارگی است
- (۲۰) ہمدار کہ روزگار شورانگیر است
- (۲۱) نادشمن و دوست فعل نیکو نیکوست
- (۲۲) اے دل چو نصیب تو ہمہ چون شدنست
- (۲۳) متخانہ و کعبہ خانہ مددگی است
- (۲۴) کل گفت بہ از لقاء من روے نیست

- (۲۸) حکایت - زجاج ملکزاده ظریف -
- (۲۹) حکایت احسان اندک و نمره آن بے نهایت - جوانی
بدانگی ندانندهم -
- (۳۰) حکایت در معنی نمره نیکو کاری - کسی دید ...
سایه در -
- (۳۱) گفتار اندر هیبت ملوک و سیاست - به گفتیم در
باب و داد -
- (۳۲) گفتار در معنی احسان تا کسی که سرآورد نباشد -
شنیدم که مرد زاعراس -
- (۳۳) گفتار - چه خوش گفت تدبیر راه -
باب ششم در قناعت
خدا را ندانست تیرش خوری -
باب هفتم در تربیت
- (۱) سخن در - بندگان کسی تا گفتار اندر فضیلت
خاموشی و خست -
- (۲) حکایت در حفظ اسرار - نگش با غلامان دم مزن -
- (۳) حکایت - سلامت جاهل در حجاب خاموشی -
یکم خوب خلق و مباحث -
- (۴) حکایت - یکی ناسزا معزم برند -
- (۵) حکایت - عصب را مشغول باش -
باب هشتم در شکر
- (۱) حکایت جوان سه نگوش مع گفتار اندر صلح
باری سیاسی -
- (۲) حکایت - نبود از مایه به هیچ مع گفتار اندر
نظر میروی -
باب نهم در توبه
- (۱) بیا اینکه عورت فرصت شمار -
- (۲) حکایت - شبی در جوانی نکور -
- (۳) حکایت کهن سالی روزگار -
- (۴) گفتار حواناته بخیز -
باب دهم در مناجات
بیا تا بر آوریم نیند از دم -

2. Aynai Sikandari, by Khusru خسرو

(a) Ode up to گم آسائش خراعی از روزگار

طرب مایه زندگانی بود

(b) Ode up to اگر دانشه داری اے یک راء

که خواعد شدن مهزل دیکه

3. beginning with the following lines :—

- (۱) عشاق بدرگهت ایچوند بیا
- (۲) مہن آں ندون کہ خلق خوارند از را
- (۳) خرم بتو داشتم دل پُر غم را
- (۴) نائل بختہ اُمید درین شوم سراے
- (۵) اے خواجہ یکم کام روا کن مہرا
- (۶) اے دل ز زمانہ رسم احسان مطلب
- (۷) چوں کار نہ بر مراد ما خواعد رفت
- (۸) ہر کو ورقہ ز عقل دو دل شکاشت
- (۹) امروز ترا دسترس فہدا نیست
- (۱۰) سر از ہمہ ناکسان نہاں باید داشت
- (۱۱) ہر دل کہ درو مہر و مستی بسرشت
- (۱۲) ہر گمہ کہ غمہ ملازم دل شودت
- (۱۳) درچشم متدققان چہ زیبار چہ زشت
- (۱۴) بسیار نگشتیم بگرد درو دشت - اہلو ہمہ الخ
- (۱۵) ایضا یکسا کار من الخ
- (۱۶) ہر سوزہ کہ ترکناں جوئے رستست
- (۱۷) آں نہ کہ درین زمانہ کم گیرئی دوست
- (۱۸) چندہن غم مہل ز حسرت دنیا چیتست
- (۱۹) چوں مہدن تو مہدن یکبارگی است
- (۲۰) ہمدار کہ روزگار شور افکیز است
- (۲۱) بانہمن و دوست فعل نیکو نیکوست
- (۲۲) اے دل چو نصیب تو ہمہ چون شدنت
- (۲۳) متخانہ و کعبہ خانہ زندگی است
- (۲۴) کل گمت بہ از لقاء من روے نیست

(b) *Grammar*.—تواعد فارسی عملی by Maulvi Ishaq Ali (Indian Press, Allahabad) or جامع التواعد by Azad (R. S. Gulab Singh and Sons, Lahore).

Paper II—Translation, Composition and Unseen :—

(a) Selected passages for translation into Urdu (Books recommended for supplementary reading indicate the standard of the passages to be set) ; (b) an easy composition exercise in Persian ; and (c) translation of English prose into Persian.

Books recommended for supplementary reading :—

(1) عیار دانش

(2) گلدسته دانش (Anwar-i-Ahmadi Press, Allahabad).

(3) تارسی جدید حصہ دوم by Maulvi Muhammad Ali Irani.

Students who offer Persian are required to have such a knowledge of the etymology of the Arabic language as will enable them to explain all Arabic words and phrases, which may occur in the text-books and in the books recommended for rapid reading in Persian.

NOTE.—Persian words must be written in Persian character.

(d) Latin.

Paper I.—(a) Prescribed Prose and Poetry.

Text-books—

1. Caesar : De Bello Gallico, Book IV.

2. Livy : Hannibahan War, Selections from Books XXIII and XXIV (Macmillan).

3. Virgil : Æneid, Books II and IV.

(b) *Grammar*.—Gildersleeve's Latin Grammar or Allen's Latin Grammar is recommended.

N.B.—Questions on Grammar exclusively should be asked from the prescribed books, as far as possible, and should carry about one-third of the total marks.

Paper II.—Translation, Composition and Unseen :—

Composition will include translation into Latin of easy English sentences and also of a simple passage of continuous English Prose.

Book prescribed—

Junior Latin Composition, by J. Mathewson Blain
(Harrap & Co.)

II.—COMMERCE.

The examination will consist of two papers each of three hours : (a) one paper on Business or Commercial Practice, and (b) one paper on either (i) Typewriting or (ii) Book-keeping.

The following is the syllabus in each subject :—

Business or Commercial Practice.

Office routine. Drafting simple business and official letters ; preparation of telegrams and cablegrams, including a knowledge of simple codes. Docketing, filing, copying and despatch of letters. Ordinary postal regulations, use of postal forms such as Money Order, V.P.O., Acknowledgment, Registration and Insurance forms, Post Office Savings Bank Accounts. Telephone, Stamp duplicating and other labour-saving appliances.

Meaning of ordinary commercial terms and abbreviations. Preparation of simple commercial documents such as indents, invoices, bills of exchange, promissory notes, statements of account. Nature and use of Bills of Lading, and railway receipts. Simple banking transactions, involving the nature and use of cheques, deposit slips and pass books.

Books recommended :—

1. Extracts from *Business Methods and Correspondence*, by Arthur Fieldhouse.

2. Commercial Practice, by Roop Ram Gupta and K. L. Govil, Part I (Messrs. Gautama Bros. & Co., Cawnpore).

Typewriting.

There will be no practical examination on the typewriter, but only a theory paper of two hours' duration involving questions on—

- *(a) the mechanical construction of the typewriter ;
- (b) care of the machine ;
- (c) display of matter, including headings and titles ;
centering ; contractions and abbreviations ;
hyphenation ; punctuation ; stencil cutting ;
adaptation of one or more characters to
represent characters not given on the key-
board ; corrections ; erasures.

There will also be a second paper of one hour's duration, consisting of type-copying of three manuscripts.

Book recommended :—

Pitman's or Remington's Typewriting Manual.

Book-keeping.

Elementary theory of double entry book-keeping. Preparation and keeping of the Cash Book, Bought and Sold Books, Returns Books, Bills Receivable and Bills Payable Books, Journal and Ledger ; recording therein simple transactions involving purchases and sales ; bills receivable and payable, real, personal and nominal accounts, such as rent, salaries, interest, discounts, bad debts and depreciation. Drawing up the Trial Balance.

* Questions on the mechanism of the typewriter will be of a general nature, so that students who are acquainted with the mechanism of any of the more popular typewriting machines will be able to answer the questions (rule G. L. no. B-2773/VI—3, dated September 5, 1924, from the Secretary of the Board).

Closing the Ledger and preparing Trading and Profit and Loss Accounts and Balance-sheet. Simple banking transactions involving the nature and use of cheques, deposit slips and pass book, and preparation of Bank Reconciliation Statements. The nature and use of Bills of Exchange and Promissory Notes. Petty Cash and Imprest Systems.

Book recommended :—

Elementary Book-keeping, by Arthur Fieldhouse (Simpkin, Marshall & Co., Limited, London, E C. 4).

III.—SCIENCE (PHYSICS AND CHEMISTRY).

The examination will consist of two papers—one in Physics and one in Chemistry, each of three hours.

Physics.

SYLLABUS.

Definition of Physics, measurements of length, area, volume, mass and weight. The balance. Density, specific gravity. Principle of Archimedes. The three states of matter. Pressure of air, simple barometer.

Heat.—Expansion of solids, liquids and gases, temperature, thermometers, maximum and minimum thermometers, clinical thermometer, melting and boiling points, conduction, convection and radiation; thermos-flask, Unit of heat, specific heat, change of state, latent heat. Easy calculations.

Light.—Rectilineal propagation of light. Reflection, refraction, plane, concave, convex mirrors, concave and convex lenses and prisms. Position of object and image with easy calculations. Dispersion.

Magnetism.—Attraction and repulsion, magnetization, terrestrial magnetism, magnetic meridian. The compass.

2. Commercial Practice, by Roop Ram Gupta and K. L. Govil, Part I (Messrs. Gautama Bros. & Co., Cawnpore).

Typewriting.

There will be no practical examination on the typewriter, but only a theory paper of two hours' duration involving questions on—

- *(a) the mechanical construction of the typewriter ;
- (b) care of the machine ;
- (c) display of matter, including headings and titles ;
centering ; contractions and abbreviations ;
hyphenation ; punctuation ; stencil cutting ;
adaptation of one or more characters to
represent characters not given on the key-
board ; corrections ; erasures.

There will also be a second paper of one hour's duration, consisting of type-copying of three manuscripts.

Book recommended :—

Pitman's or Remington's Typewriting Manual.

Book-keeping.

Elementary theory of double entry book-keeping. Preparation and keeping of the Cash Book, Bought and Sold Books, Returns Books, Bills Receivable and Bills Payable Books, Journal and Ledger ; recording therein simple transactions involving purchases and sales ; bills receivable and payable, real, personal and nominal accounts, such as rent, salaries, interest, discounts, bad debts and depreciation. Drawing up the Trial Balance.

* Questions on the mechanism of the typewriter will be of a general nature, so that students who are acquainted with the mechanism of any of the more popular typewriting machines will be able to answer the questions (rule G. L. no. B-2773/VI—3, dated September 5, 1924, from the Secretary of the Board).

Closing the Ledger and preparing Trading and Profit and Loss Accounts and Balance-sheet Simple banking transactions involving the nature and use of cheques, deposit slips and pass book, and preparation of Bank Reconciliation Statements. The nature and use of Bills of Exchange and Promissory Notes Petty Cash and Imprest Systems.

Book recommended :—

Elementary Book-keeping, by Arthur Fieldhouse (Simpkin, Marshall & Co., Limited, London, E C 4).

III.—SCIENCE (PHYSICS AND CHEMISTRY).

The examination will consist of two papers—one in Physics and one in Chemistry, each of three hours

Physics.

SYLLABUS.

Definition of Physics, measurements of length, area, volume, mass and weight. The balance. Density, specific gravity. Principle of Archimedes. The three states of matter. Pressure of air, simple barometer.

Heat.—Expansion of solids, liquids and gases, temperature, thermometers, maximum and minimum thermometers, clinical thermometer, melting and boiling points, conduction, convection and radiation, thermos-flask, Unit of heat, specific heat, change of state, latent heat. Easy calculations.

Light.—Rectilineal propagation of light. Reflection, refraction, plane, concave, convex mirrors, concave and convex lenses and prisms. Position of object and image with easy calculations. Dispersion.

Magnetism.—Attraction and repulsion, magnetization, terrestrial magnetism, magnetic meridian. The compass.

2. A Class Book of Physics, by R. A. Gregory and H. E. Hadley. (Macmillan & Co.). Rs. 3-12.
3. A Course of Physics, by Charles H. Draper. (Blackie & Sons.) Rs. 3-12.
4. An Elementary Physics, by K. C. Bhattacharya. (Indian Press, Allahabad.) Rs. 2.
5. Matriculation Physics, Heat, Light and Sound. (University Tutorial Press).

Chemistry.

Definition of Chemistry.

Common properties of matter : hardness, porosity, brittleness, solid, liquid and gaseous states. Change of state. Melting and boiling points.

Crystalline shape, effect of heat on common things.

Solution in water. The above to be studied with NaCl , KNO_3 , CaCO_3 , Na_2CO_3 , $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$, $\text{FeSO}_4 \cdot 7\text{H}_2\text{O}$, $\text{ZnSO}_4 \cdot 7\text{H}_2\text{O}$, Fe , Zn , Sn , Mg , Pb , Hg , P , S , Shellac and linseed oil

Solution, melting, evaporation, distillation, filtration, solution in water and alcohol. Water of crystallization. Slow and rapid evaporation, saturated solutions. Crystallization studied from solutions in water and of melted sulphur. Distillation of water, mixtures, immiscible liquids. Elementary and compound substances. Non-metals and metals. Chemical symbols. Chemical action, the laws of definite proportion, atoms, molecules, atomic and molecular weights, valency, relation between equivalent and atomic weights. Simple formulae and equations.

Study of air—Rusting of metals, oxidation, active and inactive gases in air. Burning of phosphorus. Meaning of combustion, slow and rapid combustion studied with iron, magnesium and phosphorus.

Oxygen gas; prepared from oxide of mercury and potassium chlorate Important properties of oxygen gas.

Acidic and basic oxides, acids, bases and salts.

Preparation and properties of the following :—

Hydrogen, Nitrogen. Ammonia, Chlorine, Hydrochloric acid, Nitric acid Carbon dioxide.

Carbon—Properties and varieties

Action of carbon dioxide on animal and plant life.

Sulphur—Properties and varieties

Preparation and properties of sulphur dioxide and sulphuric acid, their preparation treated in a very elementary manner—sulphur dioxide by burning sulphur in air and by the action of hydrochloric acid on calcium sulphite and sulphuric acid by the action of nitric acid on sulphur dioxide and water

Study of Water—Action of steam on red-hot iron filings.

Action of Sodium on water. Action of magnesium on steam. Electrolysis of water.

NOTES—1. The detailed course given below indicates the minimum amount of practical work required to be performed by students and suggests a method of treatment of the syllabus for the guidance of teachers. They may substitute other experiments of equal educational value. Practical work should be co-ordinated with the theoretical work and follow it consecutively in far as possible. The practical experiment should be performed individually so far as can be arranged.

2. A chart giving a list of the experiments to be performed and the date on which each student completes each experiment should be maintained and hung in the laboratory of each school recognized in Science (vide G. L. no. B/3149—3300/V—36, dated December 31, 1925, from the Secretary of the Board.)

The use of stencils in answering papers in Science is not allowed.

(Classes IX and X.)

Classes IX and X will have 6 periods of Science per week—for at least 27 working weeks; this gives a total of 162 periods in class IX :—

Subject	Detailed syllabus.	Minimum list of experiments which should be done by the pupils individually.
Chemistry	<p>Effect of dissolved substances on boiling point.</p> <p>Distillation. Purification of water</p> <p>Elements and compounds.</p> <p>Metals and non-metals, properties —</p> <p>The atmosphere</p> <p>Combustion, active and inactive air</p> <p>Rusting</p> <p>Increase in mass in rusting and burning</p> <p>Explanation of above</p> <p>Introduction of terms "Oxygen" and "Nitrogen."</p> <p>Oxygen</p> <p>Metals and non-metals, Oxides.</p> <p>Nitrogen. Its use in the atmosphere.</p>	<p>To find B. P. of solutions of calcium chloride. Solution of different strengths.</p> <p>To bend tubes, bore corks, set up apparatus for distillation and find B. P. before and after distillation.</p> <p>To examine the elements—sulphur, copper, lead, mercury, zinc. To examine the compounds—ferrous sulphate, copper sulphate, lead oxide, mercury oxide and regain the elements, where possible.</p> <p>Burning a candle in a bell jar Repeat with sulphur, phosphorus.</p> <p>To measure the proportion of air used up when a substance burns in air.</p> <p>To show iron will not rust in dry air.</p> <p>To measure the air used up when iron rusts in air.</p> <p>To show increase in mass when magnesium and iron burn in air and when iron rusts in air—when a candle burns in air.</p> <p>its properties.</p> <p>To show loss in mass when potassium chlorate is heated.</p> <p>Their basic and acidic properties.</p> <p>Properties, to find accurately percentage of nitrogen in air by pyrogallous acid (Lecture room).</p>

(Classes IX and X.)

Classes IX and X will have 6 periods of Science per week—for at least 27 working weeks; this gives a total of 162 periods in class IX:—

Subject	Detailed syllabus	Chemistry
		<p>Effect of dissolved substances on boiling point.</p> <p>Distillation. Fractionation of water.</p> <p>Elements and compounds.</p> <p>Metals and non-metals, properties—the atmosphere.</p> <p>Combustion, active and inactive</p> <p>Rusting</p> <p>Increase in mass in rusting and burning.</p> <p>Explanation of above</p>
<p>Minimum list of experiments which should be done by the pupils individually.</p>		<p>To find B. P. of solutions of calcium chloride. Solution of different strengths.</p> <p>To bend tubes, bore corks, set up apparatus for distillation and find B. P. before and after distillation.</p> <p>To examine the elements—sulphur, copper, lead, mercury, zinc. To examine the compounds—ferrous sulphate, copper sulphate, lead oxide, mercury oxide and regain the elements, where possible.</p> <p>Burning a candle in a bell jar. Heat with sulphur, phosphorus. To measure the proportion of air used up when a substance burns in air.</p> <p>To show iron will not rust in dry air. To measure the air used up when iron rusts in air.</p> <p>To show increase in mass when magnesium and iron burn in air and when iron rusts in air—when a candle burns in air.</p>

The books *recommended* for use in Chemistry are :—

1. Gregory and Hodges : Experimental Science for Indian Schools (Macmillan).
2. Wilson and Headley : A school Chemistry for India (*Oxford University Press*).
3. K. Kumar : Chemistry for classes IX and X (Bhargava, Chandausi).
4. An Elementary Chemistry for Indian Schools, Parts I and II, by K. C Bhattacharyya (*Indian Press, Allahabad*), 1929.

IV.—AGRICULTURE.

The examination will consist of two papers of three hours each.

The first paper will be on the subject-matter in the syllabus up to and including sub-section (5) Tillage ; and the second paper on the remaining portion.

SYLLABUS.

(1) *Climatology*—Weather and seasons in the country and in the provinces.

(2) *Soils*.—Soil-forming processes.

Classification of soils on the basis of size of soil particles :—

Gravel (kankar).

Sand (bhur).

Sandy loam (retili domat).

Loam (domat).

Clay loam (matyar domat).

Clay (matyar).

Mechanical analysis of soils.—Determination of Stones, Gravels, Sand and Clay by simple sedimentation.

Texture of soils.—Arrangement and size of particles of soil ; Specific gravity ; Pore space ; Surfaces exposed ; Friability.

Organic matter in the soils —Its sources and distribution and maintenance. Its effect on soil

Soil water.—Its forms, its movements

Control of soil moisture —Run-off losses ; Percolation ; Evaporation : Methods of checking the same.

Soil heat.—Relation of heat to germination and growth. Sources of soil heat. Factors affecting soil temperature. Effect of colour radiation, convection and conduction.

(3) *Irrigation and Drainage*—

Water requirements of plants.—Factors affecting transpiration Wilting point Conserving of moisture Effect of excessive moisture.

Sources of water of irrigation —Rain, its annual and seasonal variations ; Wells, Rivers, Canals, Tanks and Bandhis.

Types of simple water-lifts —Persian Wheel, Cham Pump, Charsa, Baldeo Balti, Dhekli

Distribution of water —Flow systems ; Pacca and Kachcha channels ; Planning and laying-out of irrigation channels

Drainage —Earth bunds. Conditions making drainage necessary. Possible relation between irrigation and drainage.

(4) *Manures and manuring* —Farm-yard manure. Oil-cakes, Green manuring, poudrette, preservation, application ; Chemical fertilizers.

The books *recommended* for use in Chemistry are :—

1. Gregory and Hodges : Experimental Science for Indian Schools (Macmillan).
2. Wilson and Headley : A school Chemistry for India (*Oxford University Press.*).
3. K. Kumar : Chemistry for classes IX and X (Bhargava, Chandausi).
4. An Elementary Chemistry for Indian Schools, Parts I and II, by K. C Bhattacharya (*Indian Press, Allahabad*), 1929.

IV.—AGRICULTURE.

The examination will consist of two papers of three hours each.

The first paper will be on the subject-matter in the syllabus up to and including sub-section (5) Tillage ; and the second paper on the remaining portion.

SYLLABUS.

(1) *Climatology*—Weather and seasons in the country and in the provinces.

(2) *Soils*.—Soil-forming processes.

Classification of soils on the basis of size of soil particles :—

Gravel (kankar).

Sand (bhur).

Sandy loam (retili domat).

Loam (domat).

Clay loam (matyar domat).

Clay (matyar).

Mechanical analysis of soils.—Determination of Stones, Gravels, Sand and Clay by simple sedimentation.

Texture of soils.—Arrangement and size of particles of soil ; Specific gravity , Pore space ; Surfaces exposed ; Friability

Organic matter in the soils.—Its sources and distribution and maintenance. Its effect on soil

Soil water.—Its forms, its movements

Control of soil moisture.—Run-off losses , Percolation , Evaporation Methods of checking the same.

Soil heat—Relation of heat to germination and growth. Sources of soil heat. Factors affecting soil temperature. Effect of colour radiation, convection and conduction.

(3) *Irrigation and Drainage*—

Water requirements of plants—Factors , affecting transpiration Wilting point Conserving of moisture. Effect of excessive moisture

Sources of water of irrigation—Rain, its annual and seasonal variations , Wells, Rivers, Canals, Tanks and Bandhis.

Types of simple water-lifts—Persian Wheel, Chain Pump, Charsa, Baldeo Balti, Dhekli

Distribution of water—Flow systems ; Pacca and Kachcha channels ; Planning and laying-out of irrigation channels

Drainage.—Earth bunds . Conditions making drainage necessary Possible relation between irrigation and drainage

(4) *Manures and manuring*—Farm-yard manure, Oil-cakes, Green manuring, poudrette, application ; Chemical fertilizers.

(5) *Tillage*.—Objects of Tillage and description of principal implements of tillage :—

- (a) Ploughs.
- (b) Cultivators including harrows.
- (c) Patela.
- (d) Hand tools

(6) *The Plant*.—General description of a plant and its parts and the functions of each. Plant Growth, Substances necessary for plant growth, Sources of those substances, Storage and movements of food materials. Necessary conditions for the normal growth of a plant—air, heat, light and moisture.

(7) *Farm Crops*.—Preliminary cultivation, sowing, weeding, irrigation, manurial requirements, harvesting, storage and marketing of the following crops :—

Wheat, gram, rice, maize, jawar, arhar, cotton, mustard, sannai, ambadi, potatoes, sugarcane, and vegetables.

(8) *Farm Animals*.—Buffaloes, cows and oxen, goats, their care and maintenance.

(9) *Patwari papers*.—Limited to village maps, khasra, khatauni and khewat.

Candidates are required to maintain note-books, of all work done, both theoretical and practical. These note-books should be inspected periodically and initialled by the teachers. They may be called for at the time of the examination.

Candidates will undergo the following course of practical work in connexion with the above syllabus :—

1. Each student is required to keep records of the following facts noted in the school observatory :—

- (a) Rainfall.
- (b) Maximum and minimum temperature of air in shade.

(c) Wind directions.

(d) The time of occurrence of frost, fog, hail, dust-storm.

(e) Afternoon temperature of black soil, light coloured soil, rolled soil and mulched soil

2. Separation of stones, gravel and fine soil by sieve Weight of different soils in unit volume. Organic matter in soil and sub-soil, its power of absorbing moisture Amount of percolation of water in a unit of time through sand, clay and loam. Classification of soils as clay, loam, sandy by sight and touch.

3. Rough estimates of amount of water discharged in one hour by the different water-lifts in use. Amount of water discharged on fields by pacca, kachcha, and puddled channels

4. Results of applications of green manuring, farm-yard manure, oil-cakes, ground bones, bone ash potash, nitrate, applied to school garden plots

5 Use of farm implements.

6 Drawings of the following plants —

Juar, cotton, wheat, gram, potato and okra (bhindi).

7. Records of notes of cultivation of at least one kharif crop, one rabi crop, one garden crop, from the time of preparation of seed-bed to marketing, actually observed by the candidate

8 Description of local breeds of farm animals Recognition of different feeding stuffs

General lay-out of farm buildings

Books recommended—

1 Meston Readers, Parts 1 to 3, by K S M A Quyum.

2. Krishi Shastra or Ilm Zarayat, by Tej Shanker Kochak.

(5) *Tillage*.—Objects of Tillage and description of principal implements of tillage :—

- (a) Ploughs.
- (b) Cultivators including harrows.
- (c) Patela.
- (d) Hand tools.

(6) *The Plant*.—General description of a plant and its parts and the functions of each. Plant Growth, Substances necessary for plant growth, Sources of those substances, Storage and movements of food materials. Necessary conditions for the normal growth of a plant—air, heat, light and moisture

(7) *Farm Crops*—Preliminary cultivation, sowing, weeding, irrigation, manurial requirements, harvesting, storage and marketing of the following crops :—

Wheat, gram, rice, maize, jawar, arhar, cotton, mustard, sannai, ambadi, potatoes, sugarcane, and vegetables.

(8) *Farm Animals*.—Buffaloes, cows and oxen, goats, their care and maintenance.

(9) *Paticari papers*—Limited to village maps, khasra, khatauni and khewat.

Candidates are required to maintain note-books of all work done, both theoretical and practical. These note-books should be inspected periodically and initialled by the teachers. They may be called for at the time of the examination.

Candidates will undergo the following course of practical work in connexion with the above syllabus :—

1. Each student is required to keep records of the following facts noted in the school observatory :—

- (a) Rainfall
- (b) Maximum and minimum temperature of air in shade.

(c) Wind directions.

(d) The time of occurrence of frost, fog, hail, dust-storm.

(e) Afternoon temperature of black soil, light coloured soil, rolled soil and mulched soil

2. Separation of stones, gravel and fine soil by sieve Weight of different soils in unit volume. Organic matter in soil and sub-soil, its power of absorbing moisture Amount of percolation of water in a unit of time through sand, clay and loam. Classification of soils as clay, loam sandy by sight and touch.

3. Rough estimates of amount of water discharged in one hour by the different water-lifts in use. Amount of water discharged on fields by pacca, kachcha, and puddled channels

4. Results of applications of green manuring, farm-yard manure, oil-cakes, ground bones, bone ash potash, nitrate, applied to school garden plots

5. Use of farm implements

6. Drawings of the following plants —

Juar, cotton, wheat, gram, potato and okra (bhindi).

7. Records of notes of cultivation of at least one kharif crop, one rabi crop, one garden crop, from the time of preparation of seed-bed to marketing, actually observed by the candidate

8. Description of local breeds of farm animals. Recognition of different feeding stuffs

General lay-out of farm buildings

Books recommended—

1. Meston Readers, Parts 1 to 3, by K. S. M. A. Qyum.

2. Krishi Shastra or Ilm Zarayat, by Tej Shanker Kochak.

3. Notes on Poultry-keeping in India, by Mrs. A. K. Fawkes.

4. Tisdale's Books on Dairying.

5. Monthly Journals, Leaflets and Bulletins issued by the United Provinces Agricultural Department.

6. Lessons in Indian Agriculture, by D. Clouston (Macmillan & Co, Ltd.).

7. Rahbar Zarait, by T. S. Kochak, published by the author. Price, Rs. 2-8.

8. Krishi Vigyan, Part I, by Sita Prasad Tiwari.

V.—DRAWING.

The examination will consist of two papers of three hours each : the first paper on Free Arm Drawing and the second paper on Geometrical Drawing.

SYLLABUS.

Free Arm.—This should be in Pastel, and should comprise common objects from nature.

The Round.—Such as Orange, Mango, Apple, Tomato, Lichi, Melon, Peach, Hockey and other Balls, Nutmeg, Walnut, etc.

The Cylindrical—Such as Flower-pot, Household Utensils, Degchies, Cups, Saucers, Surahi, Bowls, Tumblers, Lotas, bottles of kinds, Inkpots, Gloy Bottle, Paper-weight, Candle-stick, etc

The Rectilinear.—Open Book, Cigar and Cigarette Boxes, Match Box, Attaché Case, Cash Box, Flags, etc.

Miscellaneous.—Hockey Sticks, Cricket Bat, Tennis Racket, Mallet, Hammer, Screw Driver, Chisels, Padlock, Key, Scissors, Knives, Hatchet, etc.

Nature Study.—Simple flowers and leaves of all sorts. Butterflies. Beetles, etc.

The above outline which is but suggestive should be in Pastel on Tinted Paper and will involve instruction in the art of Blending Colours, Colour Harmonies, Colour Schemes and Shadows

Text-books recommended—

Pastel work for the standards, 3 volumes, by A G Tomkins, publishers Messrs. Isaac Pitman & Sons, London, Bath and New York. Rs 3 each vol.

Materials—Pastels, Paper etc (Reeves), obtainable from Messrs J N. Navalakhi & Co, Kalbadevi Road, Bombay.

Pastels, Agra Pencil Factory, Tajganj, Agra.

Geometrical Drawing.—(1) The theory and use of instruments, especially of the protractor and Marquise scale

(2) Plain block-letter writing.

(3) The whole of practical plane geometry

(4) Drawing to scale viz. scale of chords, diagonal scale, plain scale, comparative scales (to be done in ink).

Text-books recommended—

1. Geometry, Plane and Solid (Morris). (Longmans, Green & Co., Bombay and London)

2. New School of Art Geometry (Gill). (George Gill & Co, Minerva House, Warwick Lane, E C, London).

3. Roorkee Drawing Manual (Veale). (Roorkee Thomason College Book Depot, Roorkee).

Materials.—School Geometry set (Reeves).

VI.—MANUAL TRAINING.

The examination will consist of one paper of three hours in Drawing and a practical examination of four hours in Woodwork.

SYLLABUS.

(1) *Woodwork*—

- (a) A series of models graduated in respect of the tool manipulations involved to be made in wood from working drawings (drawn in plan and elevations, conventional isometric projection) or from a given pattern in wood; the construction of the models to involve the use of one or more of the following tools :—
 Jack Plane, Try Square, Marking Gauge, Marking Knife, Smoothing Plane, Tenon Saw, Bevil, Screw Driver, Firmer Chisel, Hammer, Mallet, Bradawl, Nail Punch, Compass, Firmer Gouge, Gimlet, Frame Saw, Spoke Shave, Brace and Bit, File.

The following joints at least should be included amongst the models :—

Half-lap, Housing, Mortise and Tenon, Half-lap Dovetail, Box Dovetail, Edge-dovetail, Bridle.

- (b) The care and maintenance in good working condition of the above-mentioned tools, excluding saw setting and sharpening.

(2) *Drawing*—

Drawing in plan and elevations of all models in the course and in conventional isometric projection of those of a rectangular shape.

NOTES.—1. A scheme drawn up on the above lines is given below. Teachers need not keep strictly to the particular model mentioned in this scheme, but if any changes in the models are made these should not involve changes in the new tool manipulations employed. The course should, if possible, be commenced in class VII.

2. Attention is invited to the suggestions for the teaching of Manual Training contained in Director of Public Instruction's circular no. 2 of

*Books recommended for the use of teachers :—

1. The Teacher's Handbook of Sleoyd, by O. Sallj-man. (*George Phillip & Sons*). 6s.
2. Manual Instruction ; Woodwork, by J. C. Pearson. (*George Phillip & Sons*). 6s.
3. McDougall's Light Woodwork, by David Thomas. (*McDougall's Educational Company, London*) 1s.
4. The Scholar's Woodwork Class-book, by T. W. Berry. (*Cassell & Co, London*). 1s.
5. Practical Drawing, by T. S. Usherwood. (*Macmillan & Co.*). 2s.
6. Educational Handwork—Junior Course, by J. L. Martin and C. V. Manley. (*Blackie & Sons*). 1s. 6d.
7. Educational Handwork—Intermediate Course, by J. L. Martin and C. V. Manley. (*Blackie & Sons*). 1s. 6d.
8. Educational Handwork or Manual Training, by A. H. Jenkins (*University Tutorial Press, Burlington House, Cambridge*).
9. The "Self-Help" Course of Woodwork Exercise, by E. J. Andrews. (*Charles & Dible, 10, Puternoster Square, London*) 2s. net.
10. Handicraft in Wood and Metal, Shuley and Hooper, *Batsford*, Rs. 9.

*In connexion with the books recommended for the use of teachers in this Prospectus it should be noted that there is in addition a number of books approved for the use of teachers generally (vide list of books approved for the use of teachers of Anglo-Vernacular and Vernacular Schools, dated July 31, 1916, and its supplements issued annually).

VII.—A MODERN EUROPEAN LANGUAGE.

French.

There will be two papers of three hours each. The first paper will consist of passages for translation from the Prescribed Text-books, questions on the Prescribed Text-books, and questions on Grammar. The second paper will consist of Unseen passages and idiomatic phrases for translation from French into English and *vice versa*.

Books prescribed—

1. *Ed. About*.—*Le Nez d'un Notaire* Macmillan's Edition. (Siepmann's Series).
2. *Du Camp*—*La Dette de Jeu*. (Cambridge University Press).
3. *Daudet*—*Lettres de mon Moulin*. [Edited by Bradley and Rieu (Clarendon Press)]
4. French Poetry for advanced students, by A. Watson Bain (Macmillan & Co), of which poems numbered 1, 9, 11, 12, 13, 14, 16, 31, 48 and 56 are prescribed.

Grammar recommended—

French Grammar (Sonnenschein's Parallel Grammar Series) or Heath's Modern French Grammar (Harrap)

NOTE.—The *visa voce* examination has been dropped for the present.

VIII.—DOMESTIC SCIENCE.

The examination will consist of two papers of three hours each. The first paper will contain questions on Physiology, Hygiene, Household Management and Home-Nursing. The second paper will consist of the practical examination in Sewing to be held at the same time as the examination in written work. There will also be an oral test in First Aid and Home-nursing, and a practical test in Cooking.

				Marks.
First paper	50
Sewing	20
First Aid and practical work in Home nursing	30

Candidates should be required to gain pass marks separately in—

- (a) First paper (Physiology, Hygiene, Household management and Home-nursing).
- (b) Sewing ; First Aid with practical work in home nursing

SYLLABUS.

As a basis for the teaching of Hygiene and Home-nursing there should be a preliminary simple treatment of the following topics in Elementary Physiology :—

The human skeleton, the organs of digestion, the circulation of the blood, the nervous system, respiration.

I.—*Hygiene.*

NOTE—Great importance should be attached to practical work wherever the subject admits of this.

Air.—Composition of air, importance of pure air, impurities of air, and diseases caused by impure air, ventilation.

Water.—Composition of water ; quantity of water required ; source of water-supply, springs, deep wells, surface wells, rivers, tanks ; how water is polluted ; how to prevent pollution of water, how to purify water ; boiling and filtering.

Food.—Composition of food ; composition of good diet and its importance ; preservation of food ; cooking of food ; drinks and condiments.

Personal Hygiene.—Cleanliness of body (hair, nails, teeth, etc.) ; clothing ; exercise ; importance of temperance ; the use of *pan*, opium, and other drugs ; spitting.

Precautions against diseases.—Infectious diseases (small-pox, measles and diphtheria, etc.); colds and influenza; tuberculosis; enteric fever; dysentery and diarrhoea; cholera; plague; malaria; itch; leprosy, ophthalmia (sore eyes).

II—*First Aid.*

Roller bandage, figure of eight as applied to knee, elbow, finger, ear; bandage for eye, nose, chin. Bleeding of different kinds; how to stop bleeding; drowning, burns; scalds; bruises, sprains; broken bones; dislocation; carrying injured people; fainting; sunstroke; hysteria, epilepsy, suffocation; foreign bodies in eye, ear, nose, and throat; bites of mad dogs; signs of madness in dogs; snake-bite, stings.

III—*Home-nursing.*

NOTE—None of the work is to be purely theoretical. Practice must be given in every point which allows of practical work.

1. *Room*—Bed, bedding, furniture, light, warmth; ventilation

2. *Nurse*.—Health; dress; qualifications of a nurse

3. *Duties of Nurse*.—Administration of medicine; pulse and temperature charts; bathing; changing of garments and bedding.

4. *External Remedies*.—Poultices; plasters, fomentations, ice, sponging, baths, temperature of baths.

5. *Food*.—Kind of food and preparation; way of giving.

6. *Infectious Illness*—Precautions during illness, disinfection of room, clothing, and bedding after illness; use of disinfectants

7. *Convalescence*—Occupations; visitors; rest, sleep and food.

IV—*Care and Training of Children.*

Food, sleep, exercise, play, clothing, cleanliness, surroundings.

V.—Household management.

A.—Choice of House. Furniture and Decoration. Distribution of rooms. Cleansing and care of house and furniture. Disposal of refuse and sewage. Precautions against flies and mosquitoes.

B.—Care of the kitchen.

Preparation of simple food.

Two of the following groups :—

- (i) Preparation of *roti*, rice, *dal*, and *tarkari*.
- (ii) Preparation and care of milk.
- (iii) Preparation and care of meat. (One dish only required.)

C.—Duties of the mistress of household.

Proper distribution of daily activities. Accounts and budgeting of expenditure.

VI.—Clothing.

(i) Choice and care of clothing.

(ii) Methods of washing cotton, woollen, and silk materials.

NOTE.—Practical work should be done, if possible.

(iii) Sewing and cutting out.

A good standard of skill will be required in the various stitches that are necessary in making up garments and in mending worn articles of clothing.

Each candidate should select three of the following groups :—

- (a) To cut and make up coat (*achkan*) or *pyjama* or shirt (*kurtā*) or waistcoat for a man.
- (b) To cut out and make up *kurti* or blouse or skirt or petticoat or *pyjama* for a woman.
- (c) To cut out and make up frock or bonnet or *pyjama* or *bandi* for a child.

(d) Drawn thread or crewel work or English-embroidery or *chikan* work or *sulme sitare*.

(e) Spinning.

(f) Weaving.

NOTE.—As an indication of the scope and standard of instruction in Hygiene and Home-nursing teachers are referred to sections II, III and V of Personal and Domestic Hygiene for the School and Home, by Mrs. Harold Hendley (Rai Sahib M. Gulab Singh & Sons, Lahore), also to Indian Manual of First Aid and Indian Home-Nursing, published by the Indian Council of the St. John Ambulance Association (Thacker, Spink & Co., Calcutta).

Books for teachers' reference—

1. Physiology, by T. Huxley.
2. Tropical Hygiene, Lukis and Blackham (Thacker, Spink & Co.).
3. Outline of Domestic Science (for Indian Readers), by Lilian Sawtell. (Longmans, Green & Co.)
4. Training of Children under five years
5. Child-welfare, by Dr. S. K. Mukerji. (Indian Press, Allahabad)

IX.—METAL WORK.

The examination will consist of one paper of three hours in Drawing and Theory, and a practical test for four hours in Forging and Fitting Work.

SYLLABUS.

(a) *Practical work*—A series of models graded in respect of tool manipulation to be made in metal from Working Drawings or from Patterns, and involving the use of Forge, Anvil, Vice, Tongs, Top and Bottom Tools, Drills, Hammers, Files, Stocks and Dies, etc. Exercises should include Drawing Down, Upsetting, Welding, Annealing, Hardening and Tempering, Rivetting, etc., and such objects as Punches (nail and centre), Scribing Knife, Nuts and Bolts, Rings, Chain Links, Hasp and

Staple, Keys (for shafting), Coat Hook, Wall Bracket, Letter Weight, Callipers, Wall-Holdfast, Cold Chisels, Drills, etc.

(b) *Theoretical work*.—Properties and uses of different metals, Iron (malleable and cast), Steel, Brass, etc. Sections and weights of above. Length calculations, Working heats, Care and maintenance of tools, Forge, etc.

(c) *Drawing*.—In orthographic projection of all models made during the course.

Books recommended—

1 Smithy and Forge, Crane, approximate price Rs. 2. (Publishers: Crosby Lockwood).

2. Smith's Work, Hasluck, Rs. 2. (Cassels).

3. Educational Handwork, Jenkins, Rs. 3. (University Tutorial Press).

4. Handicraft in Wood and Metal, Shirley and Hooper, Rs. 9 (Batsford).

5. Plain and Ornamental Forging. Schwarzkopf Wiley & Sons, Rs. 6-8-0.

X.—HISTORY OR GEOGRAPHY.

(The same course as in the compulsory subject.)

XI.—BOOK-BINDING.

The examination will consist of one paper of three hours and a practical examination (including oral test) not exceeding four hours.

Syllabus—

Theory (a).—Paper, its history and manufacture, varieties, sizes, weight, colour, surface, etc.

General book-binding materials, threads, tapes, covers, edges, tops, backings in various materials, cloth, leather, vellum. Adhesives, manufacture and use.

Forms of binding, cloth, paper, quarter and half-leather.

Decorative materials, gold leaf, silver-leaf, inks, colours and varnishes.

Tools and appliances (b): Guillotine, Stitching Frame, Punching Frame, Backing Press, Standing Press, Hand-working Tools, Hammers, Punches, Scissors, Needles, Knives, embossing Tools, etc.

Practical (c).—Folding and cutting papers to various sizes. Sewing by various methods including section and Tanni Silai. Rounding and backing, covers and corners in cloth, leather, etc. Simple decoration of book covers by tooling, embossing and colouring on various materials, lettering and gilding. The repair and re-backing of old books, care of books, preservation and repair.

Books suggested :—(a) For teachers—Book-binding and the Care of Books, by John Hogg.

(b) For students—Book-binding, by Cassels

XII.—SPINNING AND WEAVING.

The examination will consist of one paper of three hours and a practical examination (including oral test) not exceeding four hours.

Syllabus—

Spinning (a) Theory

1. A brief survey of the principles of seed selection, land preparation, cultivation, growth, distribution, ginning and marketing of cotton.

2. Types and classes of the different cottons grown in the various parts of the world with particular reference to Indian-grown cottons. The utilisation of all classes of cotton for the various kinds of cloth.

3. The physical properties of cotton, structure, length, diameter and colour of the different varieties.

4. The preparation of the cotton fibre for hand spinning, hand-ginning and cleaning.

5. Spinning by the spinning wheel. The principles of hand-drawing, twisting, and winding in comparison with various types of spinning wheel.

6. The qualities and usefulness of well-spun yarn. The effect of spinning on the preparatory and weaving processes.

7. Methods of disposal of yarn.

8. A brief survey of other raw materials used in spinning such as wool, silk, waste silk.

Spinning—(b) Practical.

The spinning wheel and its manipulation, three principles in operation, viz., drawing, twisting, and winding.

Weaving—(a) Theory.

1. Its numeration and explanation of the different forms in which yarn is supplied to the weaving section for making into cloth, e.g., cops, hanks, cones, cheeses, etc.

2. Winding on the "Charkha" and methods adopted when winding from the forms mentioned above. The necessity of good winding and also of the traverse showing how badly-made bobbins affect the subsequent processes.

3. Warping and its object. The methods used, such as single-end multiple and Ball-warping machine in the making of warps for the loom.

4. Sizing and its necessity. The common ingredients used and the methods of application to the yarn. Effect of faulty sizing and application in the after processes.

5. Methods used in the running-off of warps on the weaver's beam.

6. Drawing in, its necessity, object and manipulation, Hcalds and Reeds, Drawing-in implements.

Weaving.—"Gaiting" the warp in the loom.

Explanation of the three main motions, viz, shedding, picking beating-up. Shedding as done by pedals and applied to the various types of cloth. The manipulation of the pedals, picking and how it is done. Beating-up to produce different thickness or fineness of cloth

Description of the parts in a sley; shuttle, pickers, shuttle boxes and all sundry parts.

Calculations.—The system of counting yarns—cotton, wool, silk, etc.

The testing of counts, folding of yarns, quantity of warp and weft in a piece of cloth. Head knitting, reeds and warping.

Designing—The standard weaves such as plain, twill, satins, combination and re-arrangement of these weaves, stripes, mock lenos and similar cloths. Analysis of these cloths with drafting and lifting plans.

The make up and marketing of the above.

Finishing of cloths

Weaving (b) Practical—

The making of warps by the "single," "multiple" and "Ball warp" methods—Winding on to warp bobbins and also weft-purns. Sizing of yarn by hank and in ball warp "Running-off" of warps on to plains, drills, twills and simple tie-up designs

Books suggested for teachers' use and students' reference.—

1. Cotton Spinning, Vol. I, by W. S. Taggart. (Macmillan).

2. Cotton Weaving and Designing by J. J. Taylor (Longmans).
3. Hand-loom Weaving, by L. Hooker (Pitman).

XIII.—GENERAL SCIENCE (PHYSICS, CHEMISTRY, AND BIOLOGY).

There will be two papers of three hours each as follows :—

1st Paper—Physics and Chemistry.

2nd Paper—Biology and Chemistry.

(NOTE.—Each paper will consist of eight questions three of which will be in Chemistry.)

Syllabus—

(It is assumed that candidates taking General Science have completed the Science course laid down for the Upper Middle section as questions may be asked from this course also at the High School Examination)

I —Physics.

Pressure at different depths in liquids. Density. Specific Gravity. Archimedes' Principle and its applications. Flotation (Ships, Airship, Balloons, Iceberg). Air pressure. Effects of air pressure. Syringe. Simple water pump. How the pressure of the air is measured. Barometer movements and weather. Action of the football and bicycle pumps. Bicycle valve. Kites, aeroplanes. Steam pressure. Force on piston of steam engine. Simple manometer

Rectilinear propagation of light. Candle-power. Plane mirrors. Laws of reflection. Images in spherical mirrors (no formulae). Refraction. Magnifying glass. Simple ideas about the principles and use of Camera. Dispersion and Colour.

Electrification. Electro-copie. Conductors and insulators. Magnets. Polarity. Earth's Magnetism.

Compass needle. Cells and batteries. Electro-magnet. Simple explanation of the telegraph and the Electric Bell. Simple galvanoscope. Heating and chemical effects of a current.

Sources of heat. Expansion of solids, liquids, and gases. Effects of expansion; platinum and glass. Thermometers. Air and clinical thermometers. Freezing mixtures. Transference of heat. Davy's safety lamp. Winds. Cold nights with cloudless sky. Thermos-flask. Units of heat. Specific heat. Latent heat (no calculation). Cold on evaporation. Heat on compression. Humidity. Change of volume on melting. Boiling of liquids, vapour pressure; steam engine.

II.—Chemistry.

Solutions in water and other liquids. Crystallization. Slow and rapid evaporation. Saturated solutions. Elements, compounds, and mixtures. Study of the atmosphere. Oxygen and Nitrogen. Combustion, slow and rapid. Flame. Water. Properties of Hydrogen. Ammonia. Limestone. Sodium carbonate and caustic soda. Hard and soft waters. Acids. Bases. Salts. Chemical symbols. Conservation of mass. Carbon: Properties and varieties. Carbon dioxide. How plants use air. Respiration. Coal gas. Sulphur: properties and varieties. Sulphur dioxide. Chlorine. Hydrochloric acid. Phosphorus. Matches. Common salt. Properties of metals, non-metals. Alloys. Simple ideas of the properties of iron and steel. Petroleum sources and use. Soap. Glass.

III.—Biology.

Life of animals, based on the frog—External parts and their work, Internal parts and their work; Digestive system. food and digestion. Circulatory system and blood: work of blood and need for

2. Cotton Weaving and Designing by J. J. Taylor (Longmans).
3. Hand-loom Weaving, by L. Hooker (Pitman).

XIII.—GENERAL SCIENCE (PHYSICS, CHEMISTRY, AND BIOLOGY).

There will be two papers of three hours each as follows :—

1st Paper—Physics and Chemistry.

2nd Paper—Biology and Chemistry.

(NOTE.—Each paper will consist of eight questions three of which will be in Chemistry.)

Syllabus—

(It is assumed that candidates taking General Science have completed the Science course laid down for the Upper Middle section as questions may be asked from this course also at the High School Examination.)

I —Physics.

Pressure at different depths in liquids. Density. Specific Gravity. Archimedes' Principle and its applications. Flotation (Ships, Airship, Balloons, Iceberg). Air pressure. Effects of air pressure. Syringe. Simple water pump. How the pressure of the air is measured. Barometer movements and weather. Action of the football and bicycle pumps. Bicycle valve. Kites, aeroplanes. Steam pressure. Force on piston of steam engine. Simple manometer.

Rectilinear propagation of light. Candle-power. Plane mirrors. Laws of reflection. Images in spherical mirrors (no formulae). Refraction. Magnifying glass. Simple ideas about the principles and use of Camera. Dispersion and Colour.

Electrification. Electro-scope. Conductors and insulators. Magnets. Polarity. Earth's Magnetism.

Compass needle. Cells and batteries. Electro-magnet. Simple explanation of the telegraph and the Electric Bell. Simple galvanoscope. Heating and chemical effects of a current.

Sources of heat. Expansion of solids, liquids, and gases. Effects of expansion; platinum and glass. Thermometers. Air and clinical thermometers. Freezing mixtures. Transference of heat. Davy's safety lamp. Winds. Cold nights with cloudless sky. Thermos-flask. Units of heat. Specific heat. Latent heat (no calculation). Cold on evaporation. Heat on compression. Humidity. Change of volume on melting. Boiling of liquids; vapour pressure, steam engine.

II—Chemistry.

Solutions in water and other liquids. Crystallization. Slow and rapid evaporation. Saturated solutions. Elements, compounds, and mixtures. Study of the atmosphere. Oxygen and Nitrogen. Combustion, slow and rapid. Flame. Water. Properties of Hydrogen. Ammonia. Limestone. Sodium carbonate and caustic soda. Hard and soft waters. Acids. Bases. Salts. Chemical symbols. Conservation of mass. Carbon: Properties and varieties. Carbon dioxide. How plants use air. Respiration. Coal gas. Sulphur: properties and varieties. Sulphur dioxide. Chlorine. Hydrochloric acid. Phosphorus. Matches. Common salt. Properties of metals, non-metals. Alloys. Simple ideas of the properties of iron and steel. Petroleum sources and use. Soap. Glass.

III—Biology.

Life of animals, based on the frog.—External parts and their work, Internal parts and their work; Digestive system: food and digestion. Circulatory system and blood: work of blood and need for

2. Cotton Weaving and Designing by J. J. Taylor (Longmans).
3. Hand-loom Weaving, by L. Hooker (Pitman).

Coal gas Sulphur : properties and varieties Sulphur dioxide Chlorine. Hydrochloric acid. Phosphorus. Matches ; Common salt. Properties of metals, non-metals Alloys Simple ideas of the properties of iron and steel Petroleum sources and use Soap Glass.

III —Biology.

Life of animals, based on the frog—External parts and their work, Internal parts and their work ; Digestive system. food and digestion. Circulatory system and blood work of blood and need for

circulation. Lungs and breathing. Kidneys and excretion. Nervous system : sensation and the special senses. Muscles and movement. Bones and support. Reproductive system and reproduction. Habits and life history of the frog.

Elementary physiology of the human body.

General survey of the animal kingdom.—Illustrated mainly by local animals.

Life of plants based mainly on mustard (or bean plant).—Various forms of plants : trees, herbs, climbing plants, parasites, non-green plants. Parts of the plant and their work. Leaves : manufacture of food ; loss of water to air. Stem : carrying water and food ; support of leaves. Root : collecting water and salts from the soil ; holding the plant in position. Storage of food. Flower : pollination ; fertilization fruits and the scattering of seeds. The new plant in the seed ; germination. Production of new plants from stems and roots.

General survey of the plant kingdom.—Illustrated mainly by local plants.

The value of plants and animals to man.—Food, fuel, clothes, power, building materials, medicines, pleasure, scavenging of waste materials (dogs, jackals, crows, bacteria, fungi).

Animals and plant that are harmful to man.

(1) That feed on man and animals : ticks, lice, fleas, bedbugs, mosquitoes, intestinal worms.

(2) That feed on plants : destruction of plants by insects.

(3) That cause disease in man and animals : animal parasites (malaria parasite, kala azar, hookworm) and bacteria (cholera, plague, small-pox, tuberculosis, rabies, etc.).

(4) That cause diseases in plants : parasitic fungi (mildews, smuts, rusts, etc.).

(5) That carry disease - insects (flies, fleas, sandflies, mosquitoes) ; rats.

(6) That destroy property : rats ; white-ants ; beetles, bacteria and molds in food ; wood-rotting fungi, etc

(7) Control of parasites, disease-producing organisms and other pests, by nature (birds and insect-eating insects) and by man

IV.—Practical work.

The following list of experiments indicates the minimum amount of practical work required to be done by each student. Other experiments of equal educational value may be substituted. It should be possible for most teachers to get their students to perform additional experiments. The experiments should be performed individually as far as can be arranged. The teaching of theory should be fully illustrated by experiments and demonstrations are to be considered an essential part of the teacher's work. The course in Biology will not require extensive expenditure on equipment and materials. Practically all materials can be collected from the local fauna and flora. No microscopic work is expected to be done individually by the pupils, only that may be done by demonstration on the part of the teacher, when he believes it will add to the effectiveness of the work.

NOTE.—A chart giving a list of the experiments to be performed and the date on which each student completes each experiment should be maintained and hung in the laboratory at each school recognised in General Science.

Physics.

To show that the weight of a floating body is equal to the weight of the liquid displaced (using a loaded test tube in a graduated jar with different liquids).

Determination of the radius of a wire by Archimedes' Principle.

Determination of the relative density of (a) bodies which sink in water, (b) liquids.

To measure (a) the pressure of the lungs, (b) gas supply (if any).

Reflection at a plane mirror.

Focal length of (a) concave mirror, (b) convex lens by parallel rays method.

Relation between image and object produced by (a) concave mirror, (b) convex lens (no calculations).

Refractive index of glass and liquids.

Refraction through a pr.sm.

Cooling curve of water and wax.

Determination of the apparent expansion of water (by heating water in a flask and noting rise in level of surface)

To compare heat required to melt ice and to boil water.

To show that the loss of heat of one body is equal to the gain of heat in another.

To map lines of force by a small magnet charging an electroscope.

* Magnetic effect of a current.

Chemistry.

To observe the action of water on sodium, sodium chloride, potassium nitrate, sodium carbonate, copper sulphate

Crystallization of a salt.

To observe the action of heat on potassium nitrate, calcium carbonate, copper sulphate, iron, zinc, tin, lead, mercury, sulphur, phosphorus.

To determine the change in weight due to oxidation when a substance is sufficiently heated in air.

To find the proportion of oxygen and nitrogen in air.

To prepare oxygen from potassium chlorate and study its properties.

To prepare hydrogen from zinc and sulphuric acid and study its properties

To prepare chlorine from manganese dioxide and hydrochloric acid

To prepare hydrochloric acid from sodium chloride and sulphuric acid

To prepare ammonia gas from ammonium chloride and quicklime and study its properties.

To prepare carbon dioxide from limestone and hydrochloric acid and study its properties.

To find the volume of oxygen given off by heating 15 grams of potassium chlorate.

Biology

Observation of living frogs . habits and mode of life.

Demonstration of more important features of the internal parts. Students should sketch easier parts.

Observation of life history in the field and in the laboratory.

Demonstration of common representatives of the animal kingdom Students should be encouraged to collect materials , should be developed as a museum activity.

Collection and sketching of common plant forms

Study and sketch parts of plant

Simple experiments, mainly demonstrations, to show accumulation of food (starch) in leaves exposed to light That water is lost through the leaves. That plants require a continuous supply of water. That water rises through the stem That CO_2 is given off during respiration. That plants grown in darkness are not

Determination of the radius of a wire by Archimedes' Principle.

Determination of the relative density of (a) bodies which sink in water, (b) liquids.

To measure (a) the pressure of the lungs, (b) gas supply (if any).

Reflection at a plane mirror.

Focal length of (a) concave mirror, (b) convex lens by parallel rays method.

Relation between image and object produced by (a) concave mirror, (b) convex lens (no calculations).

Refractive index of glass and liquids.

Refraction through a prism.

Cooling curve of water and wax.

Determination of the apparent expansion of water (by heating water in a flask and noting rise in level of surface).

To compare heat required to melt ice and to boil water.

To show that the loss of heat of one body is equal to the gain of heat in another.

To map lines of force by a small magnet charging an electroscope.

Magnetic effect of a current.

Chemistry.

To observe the action of water on sodium, sodium chloride, potassium nitrate, sodium carbonate, copper sulphate

Crystallization of a salt.

To observe the action of heat on potassium nitrate, calcium carbonate, copper sulphate, iron, zinc, tin, lead, mercury, sulphur, phosphorus

To determine the change in weight due to oxidation when a substance is sufficiently heated in air.

To find the proportion of oxygen and nitrogen in air.

To prepare oxygen from potassium chlorate and study its properties.

To prepare hydrogen from zinc and sulphuric acid and study its properties.

To prepare chlorine from manganese dioxide and hydrochloric acid.

To prepare hydrochloric acid from sodium chloride and sulphuric acid

To prepare ammonia gas from ammonium chloride and quicklime and study its properties

To prepare carbon dioxide from limestone and hydrochloric acid and study its properties.

To find the volume of oxygen given off by heating 15 grams of potassium chlorate

Biology

Observation of living frogs. habits and mode of life.

Demonstration of more important features of the internal parts. Students should sketch easier parts.

Observation of life history in the field and in the laboratory.

Demonstration of common representatives of the animal kingdom. Students should be encouraged to collect materials, should be developed as a museum activity.

Collection and sketching of common plant forms

Study and sketch parts of plant

Simple experiments, mainly demonstrations, to show accumulation of food (starch) in leaves exposed to light. That water is lost through the leaves. That plants require a continuous supply of water. That water rises through the stem. That CO_2 is given off during respiration. That plants grown in darkness are not

green, but become green upon exposure to light. Process of germination; study and sketch (bean, chana, and castor bean).

Demonstration of common representatives of the plant kingdom. The project to be developed as for animals.

Collection of animal and human parasites; observation of their habits, and of their adaptations for such a mode of life.

Observation and collection of insects that feed on cultivated plants.

Collection of fungus diseases of plants, especially of crop plants; a study of the damage they cause.

Animals that carry disease: their habits and life histories.

Observation, and study of plants and animals that destroy property.

Methods of control of plant and animal pests.

Control of bacteria by heat, drying, chemicals.

Examination of the breeding places of mosquitoes, flies, rats. Experiments to show means of destruction.

Books suggested—

- (1) Gregory and Hodges—Experimental Science for Indian Schools (Macmillan).
- (2) Parsons—Everyday Science.
- (3) Marie Stopes—Elementary Physiology.
- (4) Potter—Biology by discovery.

APPENDIX.

A note on the general Science course for the guidance of teachers.

The course in General Science consists of Physics Chemistry and Biology and is intended to awaken the interest of young students in and give them an intelligent appreciation of things and life around them. With this

general purpose in view, the syllabus is mainly descriptive and all quantitative relations are omitted. The teacher should keep this main purpose of the syllabus in mind in presenting the different sections of the subject and emphasize the part of these sciences play in modern life. In Biology the teacher should emphasize the life-functions of frog and man rather than details of structure; in plants, it is not the shapes and kinds of structures that should be emphasized, but the fact that the plant is a living organism. How animals and plant obtain their food, breathe, react to their surroundings and reproduce their life rather than elaborate details of structure is the important thing.

Practically every item of the syllabus can be illustrated by a simple experiment and students should be encouraged to learn the subject more from direct experience and demonstration rather than by reading books alone. The teacher is recommended carefully to prepare his material and experiments before their demonstration in the class and induce students to write out notes of what they have seen. These notes supplemented by reading of suitable books must form the basis of his knowledge of the subject.

The syllabus lays down a list of experiments in each section which the student is expected to carry out himself. This does not, however, limit the teacher's freedom of suggesting additional experiments in any section. The student in the practical room should, in fact, have free access to material or apparatus and might be allowed, wherever possible, to repeat for himself the experiments which were shown in the class-room.

INTERMEDIATE EXAMINATION OF 1933.

N. B.—Alternative questions will be set in all question papers for the Intermediate Examination.

The following grouping of subjects is approved for the guidance of students and teachers. The subjects have been so grouped that, while providing a sound general education, suitable as an introduction to University studies, they should also fit the students to enter upon higher specialized courses in technical and professional institutions :—

General Arts.—Mathematics, Economics, *Civics, Geography, Drawing, a Modern Indian or European Language, Logic, a Classical Language, History and Allied Geography, Histories of Greece and Rome and Allied Geography. (*Any three should be taken.*)

General Science.—Mathematics, Drawing, Chemistry, Physics, Biology, Geography, Economics. (*Any three should be taken*)

For Medicine—Chemistry, Physics, and Biology

For Engineering—Mathematics, Physics, and Chemistry.

- For Teaching*—(1) History, Civics, and Geography.
 (2) History, Geography, and Mathematics.
 (3) History, Geography and (Physiology, Hygiene, and Child-Study) (*women students*).
 (4) Geography, Mathematics and (Physiology, Hygiene, and Child-Study) (*women students*).

*Students taking Civics are advised also to take History.

latter will include among the alternatives descriptive or narrative subjects. In the case of candidates who offer English as their mother-tongue the third paper will consist of an Essay, together with questions on English composition and on the history of English Literature from 1500, as in Hudson's Outline History of English Literature (Bell & Co.).

2 In the case of books prescribed for general study detailed knowledge of the text will not be required, but candidates will be expected to show that they have read the course with intelligence and with some appreciation.

Books prescribed—

Prose—(a) For detailed study—

- 1 A Book of English Prose by P. Seshadri (Oxford University Press) (omitting the Convalescent; the Beautiful, Dr. Skinner; El Dorado; the Dedicated Life; War).
2. Goldsmith's Vicar of Wakefield (abridged edition, the Indian Press, Ltd, Allahabad).

(b) For general study—

- 1 George Elliot's Silas Marner (Indian Press, Ltd., Allahabad).
2. Short Stories, by Buchan (Nelson).

Poetry—(a) For detailed study—

1. Tennyson—Enoch Arden.
2. The following poems from the 1928 edition of Palgrave's Golden Treasury, with additional poems (Oxford University Press, Indian edition, Re. 1) are prescribed :—

Shakespeare—"When to the sessions of sweet silent thought."

"Since brass, nor stone, nor earth, nor boundless sea."

Keats—"La Belle Dame Sans Merci."

Milton—"On his blindness."

"Captain, or Colonel, or Knight in Arms."

Tennyson—"Ring out, wild bells."

—"Tears, idle tears"

—"The splendour falls on castle walls."

Wordsworth—"The world is too much with us."

—"Upon Westminster Bridge."

Browning—"Prospice."

W. E. Henley—"Out of the night."

Robert Bridges—"Nightingale."

Christina Rossetti—"Up-Hill"

Rupert Brooke—"If I should die."

Masefield—"Sea-Fever"

3 Tagore (Macmillan's Poems from Tagore)—

"Leave this chanting and singing and telling of beads"

"The day is not yet done, the fair is not over,
the fair on the river-bank."

"Mother, let us imagine we are travelling."

"Sanatan was telling his beads."

"The night darkened. Our day's work had been done."

(b) For general study—

Shakespeare—"The Merchant of Venice."

Recommended for use by students—

The Pocket Oxford Dictionary.

NOTES—(a) Half the total of marks will be allotted to the portions for detailed study, 30 per cent to the portions for general study, and 20 per cent. to Unseen Passages and Grammar.

(b) Grammatical questions will be asked, including Parsing, Analysis, the Sequence of Tenses and conversion of the Direct and Indirect forms of speech.

(c) The attention of candidates is drawn to the fact that examiners have been instructed to deduct marks for inaccuracy in English.

MATHEMATICS.

There will be three papers of three hours each ; one paper in Algebra and Trigonometry, a second in Mensuration and Pure and Analytical Geometry, and a third on Elementary Dynamics and Statics.

(1) (a) *Algebra*—Quadratic equations involving two or more unknown quantities ; the theory of quadratic equations and of expressions of the second degree ; surds and imaginary expressions ; arithmetical, geometrical and harmonical progressions ; permutations and combinations ; theory of indices and logarithms, proof of binomial theorem for a positive integral index and the use of binomial and exponential theorems for any index.

(b) *Trigonometry*—Including solution of triangles and simple problems on inscribed, circumscribed, and ascribed circles.

(2) (a) *Pure Geometry*.—Loci ; proportion and similarity ; radical axis of two circles ; simple properties of pole and polar in respect of a circle ; simple properties of parabola

(b) *Analytical Geometry*.—Straight line, pair of straight lines, circle (including radical axis and pole and polar); equation to parabola in form $y^2=4ax$ and simple properties deduced therefrom ; simple properties of tangents and normals to the ellipse deduced from the equation $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$. (Oblique, cartesian and polar co-ordinates will not be required.)

(c) *Mensuration of Solids*.—Surfaces and volumes of parallelopeds and right prisms, pyramids, circular cylinders and cones, spheres, and spherical segments; frusta of pyramids, cones, and spheres.

The use of Trigonometry and Logarithms will be permitted in solving numerical examples.

(3) *Dynamics and Statics*—Velocity, composition of velocities ; relative velocity ; acceleration, rectilinear motion under uniform acceleration, composition of accelerations ; Newton's Laws of motion ; rectilinear motion under gravity in a vertical and down an inclined plane , motion of two masses connected by a string passing over a pulley ; projectiles , direct impact of smooth bodies ; definition and calculation of kinetic energy ; co-planar forces, parallel and non-parallel, and their composition ; equilibrium of a body under three forces ; moments , conditions of equilibrium of a body under a system of co-planar forces and simple examples , centre of gravity ; friction , work and power ; simple machines (lever, balance, system of pulleys, wheel and axle).

NOTE—The use of stencils and slide rule in answering questions in Mathematics is not allowed.

The following books are suggested (*not prescribed*) in addition to more elementary text-books :—

1. School Algebra, H. S. Hall, Parts I—III.
2. School Algebra, Part II, by Paterson (Clarendon Press).
3. Elementary Algebra, Part II, by P. Ross (Longmans).
4. Higher Algebra, Chapters I—XVII, by Hall and Knight (Macmillan).
5. Hall and Steven's School Geometry, Part VI.
6. Elements of Analytical Geometry, Part I, by Wanchoo (Indian Press, Ltd., Allahabad).
7. Co-ordinate Geometry, Smith or Loney (Macmillan).
8. Elements of Statics and Dynamics by Loney (Cambridge University Press).
9. Intermediate Trigonometry, by C. C. Ghosh (Macmillan).
10. Plane Trigonometry, Part I, by S. L. Loney (Macmillan).

CHEMISTRY.

(N.B.—Candidates will be required to pass in the theoretical as well as practical part of each Science subject.) The use of stencils and slide rule in answering papers in Chemistry is not allowed.)

There will be two papers of three hours each and a practical examination. The first paper will include metals and non-metals and the second paper general Chemistry and organic Chemistry.

The following syllabus is prescribed :—

The course for the High School Examination of 1933 with the following additions .—

Elementary and compound substances, mixtures, solution, chemical action, the laws of definite and multiple proportions, simple methods of the determination of equivalent weights, atoms, molecules, atomic and molecular weights, vapour density, the atomic theory and Avogadro's hypothesis, combination of gases by volume.

Valency, relation between equivalent and atomic weights, simple methods of determination of atomic weights, Dulong and Petit's law. Boyle's law, Charles' law, vapour pressure, diffusion.

Chemical symbols, formulae and equations, calculations of an easy nature.

Oxidation and reduction.

Elementary ideas as to the nature of dissociation in gases and electrolytic dissociation theory.

The outlines of the Periodic law studied from elements prescribed in the course.

Preparation and important properties of the following elements and compounds and proofs of the composition of the compounds marked* :—

Hydrogen, oxygen, water*, ozone, hydrogen dioxide, nitrogen, the atmosphere*, the effects of animal and vegetable life upon its composition, ammonia*, nitric

acid and nitrates, nitrous acid and nitrites, nitrous* and nitric* oxides, nitrogen peroxide, carbon, carbon* dioxide, carbon* monoxide, elementary ideas about combustion and structure of flame, coal gas, chlorine, hydrochloric* acid, the chlorides, chlorine peroxide, chloric acid and chlorates, bromine, iodine, their hydrides and salts.

Sulphur, *hydrogen sulphide, *sulphur dioxide and trioxide, sulphuric acid and the sulphates, sulphurous acid and sulphites.

Phosphorus, hydrogen phosphide, chlorides of phosphorus, phosphorus trioxide and pentaoxide, orthophosphoric acid.

Silica, silicates of Na, K & Ca, glass.

Sodium, potassium, their hydroxides, chlorides, nitrates, carbonates, sulphates

Calcium, strontium, barium, and their oxides, carbonates, sulphates, chlorides, nitrates

Magnesium, its oxide, chloride, sulphate, carbonate and nitrate

Lead, its chloride, sulphate, nitrate, and acetate.

Copper, the outlines of its metallurgy, its oxides, chlorides, sulphate, nitrate, and sulphides

Iron, the outlines of its metallurgy, its oxides (FeO , Fe_2O_3 , Fe_3O_4), chlorides, sulphates and sulphides.

Zinc, its oxide, chloride, carbonate and sulphate.

Mercury, oxides, chlorides, nitrates, sulphide.

Aluminium, oxide, chloride, sulphate.

Arsenic, hydride, oxides, sulphides.

Antimony, hydride, oxides, chlorides, sulphides.

Tin, oxides, chlorides, sulphides.

Silver, oxide, hydroxide, chloride, bromide, iodide, nitrate and sulphate.

Organic :—

A.—The preparation, typical properties, and structural relationship of the following compounds :—

Methane, ethane, ethylene, chloroform, iodoform.

Methyl alcohol and ethyl alcohol and ether.

Formaldehyde and acetaldehyde acetone.

Formic acid and acetic acid.

Ethyl acetate and methyl acetate.

Acetamide, acetyl chloride, acetic anhydride.

Acetylene.

Methylamine.

B.—The simpler properties of the following :—

Glycerol, oxalic acid, tartaric acid, fats, soaps (and saponification), starch, cane sugar, grape sugar (and fermentation), urea, benzene, nitrobenzene, phenol, aniline, benzoic acid, proteins.

Practical Work.

Students will be examined in Practical Chemistry.

Students are expected to perform the following experiments in the laboratory. An account of each experiment must be written by the student in a special note-book, which will be liable to examination by the examiners. This note-book should be kept in the charge of the laboratory instructor and each account of an experiment should be signed by him. The Principal of a College will be responsible for the production of this note-book when demanded by the proper authorities.

The practical course is as follows :—

1. Such practical work as is required for the High School Examination of 1933.

2. Analysis of simple salts soluble in water or hydrochloric acid composed of acids and bases mentioned in the following list :—Ag, Pb, Hg, Cu, Cd., Bi, As, Sb, Sn, Fe, Al, Cr, Ni, Co, Zn, Mn, Mg, Ca, Sr, Ba, Na, K, NH₄, Cl.,

Br, I, ClO_3 , SO_4 , SO_3 , NO_3 , NO_2 , PO_4 , S, CO_3 , C_2O_4 , acetate (*dry and wet methods*).

3 Preparation and purification of simple salts involving no special difficulty.

4. (a) Simple gravimetric experiments, such as change in mass on oxidation of magnesium and on heating barium chloride, sodium bicarbonate, or ferrous ammonium sulphate

(b) Simple volumetric estimations, such as the estimation of alkalis, acids and alkaline carbonates by titration.

5 Determination of melting and boiling points.

6. Qualitative detection of nitrogen, sulphur and one of the halogens, alone, or together, in an organic compound.

Books suggested—

- 1 SHENSTONE. Inorganic Chemistry (Arnold)
- 2 J. W. MILLOR. Introduction to Inorganic Chemistry (Longmans).
3. ROSCOE AND HARDEN : Inorganic Chemistry for advanced students
- 4 A Class-book of Organic Chemistry, by J. B. Cohen
- 5 Organic Chemistry, Part I, by Perkin and Kipping (W. and R. Chambers).
- 6 DONINGTON'S Class-book of Chemistry, Parts 1—4
- 7 HOLMYARD'S Inorganic Chemistry (Arnold) 6s. 6d.
- 8 HOLMYARD. Practical Chemistry (Bell & Sons, Ltd) 4s
9. OSCROFT. Inorganic Chemistry for Upper Forms (Bell & Sons, Ltd), 6s. 6d.
10. MALVEA : Practical Chemistry for Intermediate Colleges (Indian Press, Ltd., Allahabad). Rs. 2.

Organic :—

A.—The preparation, typical properties, and structural relationship of the following compounds :—

Methane, ethane, ethylene, chloroform, iodoform.

Methyl alcohol and ethyl alcohol and ether.

Formaldehyde and acetaldehyde acetone.

Formic acid and acetic acid.

Ethyl acetate and methyl acetate.

Acetamide, acetyl chloride, acetic anhydride.

Acetylene.

Methylamine.

B.—The simpler properties of the following :—

Glycerol, oxalic acid, tartaric acid, fats, soaps
(and saponification), starch, cane sugar, grape
sugar (and fermentation), urea, benzene,
nitrobenzene, phenol, aniline, benzoic acid,
proteins.

Practical Work.

Students will be examined in Practical Chemistry.

Students are expected to perform the following experiments in the laboratory. An account of each experiment must be written by the student in a special note-book, which will be liable to examination by the examiners. This note-book should be kept in the charge of the laboratory instructor and each account of an experiment should be signed by him. The Principal of a College will be responsible for the production of this note-book when demanded by the proper authorities.

The *practical* course is as follows :—

1. Such practical work as is required for the High School Examination of 1933.

2. Analysis of simple salts soluble in water or hydrochloric acid composed of acids and bases mentioned in the following list :—Ag, Pb, Hg, Cu, Cd., Bi, As, Sb, Sn, Fe, Al, Cr, Ni, Co, Zn, Mn, Mg, Ca, Sr, Ba, Na, K, NH₄, Cl.,

Br, I, ClO_3 , SO_4 , SO_3 , NO_3 , NO_2 , PO_4 , S, CO_3 , C_2O_4 , acetate (*dry and wet methods*).

3. Preparation and purification of simple salts involving no special difficulty.

4. (a) Simple gravimetric experiments, such as change in mass on oxidation of magnesium, and on heating barium chloride, sodium bicarbonate, or ferrous ammonium sulphate

(b) Simple volumetric estimations, such as the estimation of alkali, acids and alkaline carbonates by titration.

5. Determination of melting and boiling points.

6. Qualitative detection of nitrogen, sulphur and one of the halogens, alone, or together, in an organic compound.

Books suggested—

- 1 Suenstone Inorganic Chemistry (Arnold)
- 2 J W Millor: Introduction to Inorganic Chemistry (Longmans).
- 3 Roscoe and Harden. Inorganic Chemistry for advanced students
- 4 A Class-book of Organic Chemistry, by J B. Cohen
- 5 Organic Chemistry, Part I, by Peikin and Kipping (W and R. Chambers)
- 6 Donington's Class-book of Chemistry, Parts 1—4
- 7 Holmyard's Inorganic Chemistry (Arnold). 6s. 6d.
- 8 Holmyard. Practical Chemistry (Bell & Sons, Ltd) 4s.
- 9 Oseroff: Inorganic Chemistry, for Upper Forms (Bell & Sons, Ltd.), 6s. 6d.
- 10 Malvea: Practical Chemistry for Intermediate Colleges (Indian Press, Ltd., Allahabad). Rs. 2.

11. NEWTH : Chemical Lecture Experiments for teachers' use (Messrs. Longmans, Green & Co.) (latest edition). 8s. 6d.
12. HOLMYARD : Introduction to Organic Chemistry (Arnold).
13. BRUCE AND HARPER : Practical Chemistry, 1925 edition (Macmillan).
14. RANE AND KULKARNI : Practical Chemistry for Intermediate Students (Nand Kishore and Brothers, (Benares).

PHYSICS.

(N.B.—Candidates will be required to pass in the theoretical as well as practical part of each Science subject)

There will be two papers of three hours each as follows :—

1st Paper—Properties of Matter, Heat, and Light.

2nd Paper—Sound, Electricity, and Magnetism.

The following syllabus is recommended :—

General properties of matter.—Fundamental units and their measurement, Principle of Balance, Verniers, Callipers, Screw-gauge, Spherometer, Volume, Density, Specific gravity, Fluid pressure, Principle of Archimedes, Nicholson's hydrometer, Barometer, Boyle's law, Pumps, Siphon, Elementary notions of volume, elasticity, and Young's modulus in the case of solids. Isothermal and adiabatic elasticities of gases. Gravitation, simple harmonic motion. Pendulum. Value of " g ". Laws of simple machines, such as levers and pulleys. Laws of motion.

Heat—Temperature. Thermometers. Calorimetry. Specific heat. Latent heat. Expansion of solids, liquids and gases. Vapour pressure. Hygrometry. Change of state. Laws of unsaturated and saturated vapours. Conduction. Convection. Radiation. Reflection and

absorption of heat · Isothermal and adiabatic changes. Specific heat at constant volume and constant pressure. Relation of heat to work · Determination of J. The steam Engine

Light.—Laws of propagation · Reflection and refraction from plane and spherical surfaces. Dispersion. Spectra. Fraunhofer's lines · Telescope · Microscope. Spectrometer · Photometry. Phosphorescence. Fluorescence. Velocity of light · Elementary ideas of polarisation of light.

Sound —Transverse and longitudinal waves · Nature of sound waves · Intensity. Pitch. Quality · Mode of propagation · Reflection. Refraction · Stationary waves · Beats · Resonance · Vibrations of strings and air columns · Monochord and organ pipes. · Determination of velocity in solids, liquids, and gases · Musical scale. The gramophone

Magnetism and Electricity —Magnetisation. Permanent magnets · Magnetic induction · Unit of magnetism. Magnetic field · Lines of force and lines of induction. Tangent A and B positions of Gauss · Deflection and vibration magnetometers · Magnetic moments · Earth as a Magnet · Magnetic elements · H Declination and Dip and their determinations · Electrostatic unit of quantity · Coulomb's law of force · Electric field. Gold leaf electroscope · Surface density Potential · Capacity. Leyden jar · Capacity of a parallel plate condenser · Electrophorus · Wimshurst's machine

Voltaic cells · Electric current and its magnetic effects. E. M. unit of current · Galvanometers. Ammeters. Voltmeters · Ohm's law and its verification · Unit of resistance and Potential difference · Specific resistance. Practical and absolute units · Determination of resistance. Wheatstone's bridge. P. O. Box. Heating effect of current. Joule's law · Determination of J.

Electric glow lamp. Electric arcs. Chemical effects of current. Faraday's laws of Electrolysis. Electrochemical equivalent. Voltmeters. Storage cells. Electro-magnetic relations. Electro-magnetic induction. Induction coil. Simple dynamo. Motor. Electric Telegraph. Telephone. Microphone. Thermopile. X-rays.

Books suggested—

1. A Text-book of Physics by R. S. Willows (Messrs. Arnold & Co.).
2. Everyday Physics by H. E. Hadley (Macmillan & Co.,) Rs. 4 .
3. A Text-book of Practical Physics for Intermediate classes, by S. R. Suri (Uttar Chand Kapur & Sons, Lahore).

There will be also an examination in practical work.

The laboratory course is indicated by the subjoined list of experiments. An account of each experiment must be written by the student in a special note-book which will be examined. The account of each experiment should be signed by the Demonstrator, and the books should be kept in his charge.

LIST OF EXPERIMENTS.

Mechanics—

Applications of the Triangle of Forces.
Determination of "g" by the pendulum.
Nicholson's hydrometer.

General properties of Matter—

Measurements of mass by the balance.
Use of the Spherometer.
" Screw Gauge.
" Callipers.
Reading the Barometer.

Heat—

Testing fixed points of Thermometers.
Determination of Specific Heats.
" " Latent Heats.

Construction of a graph illustrating the rate of cooling of a liquid.

Verification of Boyle's law.

Determination of the co-efficient of linear expansion.

Determination of the relation between the pressure and temperature of a gas when its volume is kept constant.

Light—

Reflection and refraction of light at plane and spherical surfaces.

Determination of refractive indices.

Focal lengths of mirrors and lenses.

Sound—

Determination of the velocity of sound by resonance.

„ the frequency of a fork by sonometer.

Magnetism—

Mapping out lines of force by a small magnet.

Determination of neutral points in a magnetic field.

Comparison of magnetic moments by the magnetometer.

Comparison of magnetic fields by a vibrating magnet.

Electricity—

Variation of magnetic force at centre of a coil with radius, number of turns, and strength of current.

Determination of resistance by the use of Wheatstone's wire bridge.

Determination of resistance by the use of Ammeter and Voltmeter.

Combination of cells in series and parallel

Comparison of electromotive forces by the potentiometer.

NOTE.—The use of aids in answering questions in Physics is not allowed, but the slide rule may be permitted in the practical examination in Intermediate Physics.

Recommended for teachers' reference library :—

- (1) Text-book of Heat, by Stewart and Satterly (University Tutorial Press).
- (2) Text-book of Light, by Stewart and Satterly (University Tutorial Press).
- (3) Text-book of Sound, by Catchpool (University Tutorial Press).

BIOLOGY.

There will be two papers of three hours each and a practical examination : the first paper on Zoology and the second paper on Botany.

The following syllabus is prescribed. Instructions for the teaching of Biology are appended :—

I.—Zoology.

(N.B.—Candidates will be required to pass in the theoretical as well as practical part of each Science subject.)

A.—Living and non-living matter. The distinctive properties of living matter (protoplasm), and its chemical composition. The structure and life-history of Amoeba and malaria-parasite as examples of the Protozoa. A general conception of the structure and phenomena of the animal cell ; direct and indirect cell division. The union of cells to form tissues and the combination of tissues to form organs.

B.—The structure of Hydra as an example of the Metazoa. The principle of the physiological division of labour and the correlated differentiation of structure.

C.—The structure and bionomics of an Indian earth-worm, as an example of a segmented animal.

D.—The structure of the cockroach as a type of Arthropoda. A general survey of the life-history of the mosquito and house-fly, and their economic importance.

E.—The general characters of the Chordata.

F.—The general anatomy, histology, and physiology of the various systems or organs in the frog.

G.—An elementary knowledge of the anatomy and osteology of the rabbit or other common mammal. The brain and eye of the sheep, and the skull of the dog may be substituted for those of the rabbit.

H.—A general classification of the animal kingdom with the characteristics of the principal phyla.

I.—Reproduction, sexual and asexual, ova and spermatozoa; oögenesis and spermatogenesis. The elementary facts of the fertilisation and segmentation of the ovum, the outlines of the development and larval history of the frog, the three primary germ-layers and the organs derived from them.

II.—Botany.

(N.B.—Candidates will be required to pass in the theoretical as well as practical part of each science subject.)

A.—The structure and germination of seeds, the morphology of the root, stem and leaf. The chief types of floral structures. The chief types of inflorescence and the common types of fruits.

B.—The parts of a typical vegetable cell, the cell contents and their microchemical reactions, the division of a cell, the chief types of plant tissues. A comparative study of the internal structure of the root, stem and leaf of the Angiosperms. The structure of the reproductive organs of the Angiosperms.

C.—The structure of *Bacillus subtilis* and the modes of nutrition among the Bacteria.

D.—The structure, physiology, and life-histories of *Ulothrix*, *Spirogyra*, *Mucor* and yeast.

E.—The structure and life-histories of a moss and a fern, and the phenomenon of alteration of generations.

F.—The life-history of Angiosperms. General structure of flowers and fruits, recognition and economic importance of the following families :—

Cruciferae, Malvaceae, Leguminosae, Compositae, and Liliaceae.

G.—An outline of the classification of the vegetable kingdom to illustrate grades of structure and methods of reproduction.

H.—Elementary plant physiology; stability of the plant body, the usual constituents of plant food; assimilation; transpiration; respiration; the main facts about growth; the chief types of movements.

Practical Work.

Students are expected to keep a record of all practical work in a special laboratory sketch-book, which will be liable to examination by the examiners. The laboratory instructors should sign the result of each day's practical work.

A—The microscopical study of Amoeba and Hydra; the study of Hydra by means of transverse and longitudinal sections

The general dissection of the earthworm, cockroach, and frog; life-history of the mosquito; a microscopical study of the chief animal tissues from fresh or prepared preparations of muscle, nerve, cartilage, bone, blood, and connective tissue; the microscopical study of the earthworm by means of fresh preparations and transverse sections; a microscopical examination of the kidney, liver, spinal cord, stomach, ovary, and testis of the frog. The skeleton of the frog.

The osteology of the rabbit (the skull of the dog may be substituted for that of the rabbit) and the dissection of the alimentary, vascular, and reproductive systems of the rabbit or squirrel or rat.

B.—The dissection of plants and parts of plants ; the preparation, simple staining and study of microscopical sections of plants ; A practical study by microscopical examination and otherwise of Spirogyra, Ulothrix, bacteria, yeast, Mucor, a moss, a fern, and the vegetative and reproductive organs of Angiosperms treated in an elementary manner

The description of a flowering plant and its parts in semi-technical language

(Where fresh material cannot be obtained recourse should be had to prepared specimens.)

Text-books suggested :—

1. PARKER and BHATIA . Elementary Course of Practical Zoology. (Macmillan.)
2. HOLMES . Biology of the Frog. (Fourth edition)
3. MARSHALL and HURST : Practical Zoology. (Murray)
4. RANGACHARI . Handbook of Botany for India. (Varadachary and Company, Madras, 1925.)
5. GAGER : Fundamentals of Botany (Blakiston.)
6. HUXLEY Elementary Physiology. (Macmillan.)
7. SHIPLEY . Life. (Macmillan)
8. TRANSEAU . General Botany. (World Book Company, New York.)
9. BAILL, K. N. : Indian Zoological Memoirs. I, Phectima (Methodist Publishing House, Lucknow, 1926) Re 1-8-0
10. SMITH, OVERTON and OTHERS : Text-book of General Botany (second edition) (Macmillan and Company)

APPENDIX.

Instructions for the teaching of Biology.

1. The teacher must consider the purpose for which he teaches Biology—to prepare students for the university, for medical and forest colleges, and for more intelligent and more joyful living. Biology deals with the world of life surrounding the student, and every effort should be made to present Biology as a living subject, rather than as a vast mass of unrelated and (to the students) often meaningless facts to be memorized.

2. Teachers may take more liberty in teaching Biology than has been considered possible in the past. They should feel that they are not too rigidly bound by the syllabus. Much of what is commonly accepted as the interpretation of the syllabus, and as the proper content of Biology, is a tradition from the past. Teachers may, to a much larger extent, determine for themselves what they are to regard as the proper things to include in their teaching, and the proper emphasis to be given to these things, the syllabus will then become a friendly guide.

3. The syllabus is a record of work that ought to be covered, and the teacher may take up the various topics in whatever order he thinks best.

4. The additional items in the new syllabus are not intended to enlarge the syllabus, but to shift the emphasis given to the various parts of it. For instance, it is not intended that the cockroach shall be studied in minute detail, but that it shall be made the basis for acquaintance with the great assemblage of arthropods. The mosquito is to illustrate metamorphosis, and is used because of the great importance of mosquitoes to man, because it can be observed anywhere, and because it can be readily reared in the laboratory. The mosquito

is to illustrate also the carrying of disease by insects, and the malaria-parasite is an illustration of a disease producing organism transmitted by an insect. The economic and bionomic importance of these animals is to be emphasized, rather than complete details of their structure.

Likewise, it is intended to allow considerable freedom to the teacher by permitting the use of mammalian types that are most readily available. The purpose is to become acquainted with the characteristic features of mammalian anatomy, rather than with minute details of one animal only, to the exclusion of all others.

In Botany more emphasis should be put on what plants do, and how they work, than on extensive study of various growth forms, which have little meaning for the students unless correlated with the great problems of plant economy. Moss is added to the syllabus as a simple clear, and easily accessible plant illustrating sex organs and alteration of generations; it should be treated from this point of view, and no effort should be made to consider its anatomy in the detail usually regarded necessary in the fern.

DRAWING.

There will be two papers, each of three hours' duration: the first paper on Solid Geometrical Drawing and the second paper on Free Arm Memory Drawing.

Syllabus—

Free Arm—In Pastels on Tinted Paper or Water Colours on white Cartridge paper.

Progressive work in groups of the common objects listed for High Schools such as—

Plate of Oranges, Tomatoes, and Bananas; Candlestick and Matches, Ink-pot and Pen, Gloy Bottle and

Brush ; Bundles of Fire-wood ; Glass of Water or Milk, Chinese Lantern, Liquids in Bottles ; Umbrellas, etc.

Nature Study Advanced.—The more difficult Flowers Bunches of Flowers, Leaves with Fruit and Flowers, Compound Leaves.

The above, which is but suggestive, will involve instruction in the art of blending colours, colour harmonics, colour schemes and shadows, together with technicalities such as tint-softening, blending, direct colouring, light tint on dark and dark on light, use of opaque colours and backgrounds.

Memory Drawing (a)—Object such as listed above which may be placed before students for a limited period, after which the object shall be taken away and the drawing made.

(b) The drawing of some familiar and common objects entirely from memory.

A number of small objects may be placed once a week on a covered up tray, exposed, say, for ten seconds, and the class be asked to write down as many objects as they remember to have seen.

Text-books recommended.—Pastel work, vols. I and II, by H. A. Rankin (Messrs. Isaac Pitman & Sons). Price Rs. 1 per vol.

Materials—As for the High School Examination of 1933 (Free Arm.)

Geometrical—Solid Geometry, simple solids, plans, elevations, sections and sectional elevations of such, conic and orthographic projection, elementary perspective drawing, and all forms of Plain and Diagonal Scales.

Text-books and Materials.—As for the High School Examination of 1933 (Geometrical).

ECONOMICS.

There shall be two papers of three hours each. The first paper shall cover Production, Consumption and Taxation, and the second paper Exchange and Distribution.

Introductory.

Subject-matter. Relation to other sciences. The development of Economic life.

Production.

Relation between wants and production. The factors of production.

Land—Natural resources of India. Soil and Climate. Sources of power. Raw materials.

Labour—Density and distribution of population in India. Health and vital statistics. Occupations.

Capital (fixed and circulating).—Buildings and machinery. Means of communication and transportation in India. Irrigation

Organization (management plus enterprise)—Combination of the factors of production in village industries and in factories. Efficiency of the factors of production. Different uses and how efficiency increases. Efficiency of labour increased by education. Division of labour and specialization of machinery. Large scale production and its limitations. Diminishing and increasing returns. Development of industrial organization. Its relation to means of transportation. Accompanying changes in rural industries and in agriculture in India. Extensive and intensive cultivation.

Exchange.

Barter—Conditions of barter. How both parties gain in utility by exchange.

Exchange by sale and purchase. Demand and supply schedules and curves. Balancing of demand and supply in a local market. Relation of price to expenses of production. Changes in the expense of production. The development of markets. Causes of the extension of markets. India's imports and exports.

The machinery of exchange. Money. Kinds and functions of money. Standard and token coins. Monetary standards (single and double). Gresham's law. Convertibility of paper money in India. Credit and Credit Instruments. Hundies and Cheques. Main types of Indian banks and their functions. The *sahukari* and *sarafi* systems. All the above should be illustrated by Indian examples. (*Foreign exchanges and the history of Indian currency and banking are excluded.*)

Distribution.

The problem of distribution.

Rent—The law of rent as applied to India. Land tenure in the United Provinces.

Salaries and Wages—Real and money wages. Wages as determined by supply and demand of labour. The standard of living. Mobility of labour in India. Influence of social customs.

Interest.—Net and gross interest. Mobility of capital in India. Principles of co-operative credit and its advantages for India.

Profits.—As the reward of enterprise. The field for enterprise in India.

Consumption.

Utility—Marginal and total utility. Law of diminishing utility. Law of demand. Elasticity of demand.

Satisfaction as the end of all economic activity. Wants and their classification. Division of income among different items of expenditure. Family budgets.

Relations of saving to spending. The social side of spending.

Taxation.

A description of the taxes and other sources of revenue and items of expenditure of the Imperial Government, of the United Provinces and of the District Boards and Municipalities of the United Provinces; simple distinction between direct and indirect taxes. (Nothing of the theory of taxation is to be taught)

NOTE—Candidates may be required to draw charts, graphs and maps in the written examination, to frame budgets and analyse them, and to solve problems relating to costs of production.

The following books should be consulted —

- 1 *Carter and Carmichael*.—Elementary Economics. (Revised edition) (Ginn & Co.)
- 2 *Moreland*—Introduction to Economics for Indian students. (Macmillan & Co)
- 3 *India in 1929-30* (the latest edition of the publication available in July, 1931, being recommended), published by the Central Publicity Office. (Chapters dealing with economic progress only are to be read.)
- 4 *P. Banerjee*—A study of Indian Economics (third edition, 1928). (Macmillan & Co)

5. The chapter on the United Provinces in the appendix to the Report of the Royal Commission on Agriculture.

6. *E. C. Bhatly*.—A handbook of practical and written work in Economics. (Indian Press, Allahabad)

Teachers should also consult—

1. *V. G. Kale*—Indian Economics. (Aryabhusan Press, Poona.)
2. *Marshall*.—Economics of Industry. (Macmillan & Co.)

3. *Clay*.—Economics for the General Reader. (Macmillan & Co.)
4. *Jack*.—Economic Life of a Bengal District. (Clarendon Press, Oxford.)
5. *Mann*.—Life and Labour in a Deccan Village. (Oxford University Press.)
6. *B. G. Bhatnagar*.—Bases of Indian Economy. (Ram Narain Lal, Allahabad.)
7. *Lettice Fisher*.—Getting and Spending. (Collins's Clear Type Press, London.) 3s. 6d.
8. *Jathar and Beri*.—Indian Economics (2 volumes) (Oxford University Press.)
9. *Fairchild*.—Elements of Economics.
10. *F. H. Robinson*—Elements of Economics, Book I and II.
11. *J. P. Singhal*—Elements of Economic Principles. (University Book Depot, Agra.)
12. *Thomas*.—Element of Economics. (The Gregg, Publishing Co.).
13. Report on an enquiry into working class budgets in Bombay by G Findlay Shirras. (Government of Bombay Labour office.)
14. *R. K. Mukerjee*.—Rural Economy of India. (Longmans, Green and Co.)

Teachers should give facts and figures from the latest edition of the Indian Year Book ("Times" Press).

Practical Work.

Teachers should take out students to study small industries, markets, and conditions of living in both city and country. The principles should be illustrated from these studies. The following is the

minimum amount of practical work that should be done by students :—

- (1) Two budgets of consumption : one of an artisan, one of a cultivator, if possible, with the student's own suggestions for improvement
- (2) Two statements showing the expenses of production, for one month, or a longer period, or for a fixed quantity of product, of two small industries, with suggestions for the improvement of the industry
- (3) Four diagrams illustrating the above four statements
- (4) Two maps representing economic conditions in India or parts of India

Written Work.

Teachers should insist on as much written work as possible. The following methods are suggested :—

NOTE—Teachers should not usually dictate notes, but should require students to write out their own notes after each lecture from rough notes taken in class and from memory. These notes should be inspected and corrected by the teacher

Questions.—At the beginning of the lecture period teachers should frequently give out a single question on the work of the day before and allow the student 5 or 10 minutes to write out the answer, which should be corrected and returned to the students.

Essays—Occasional essays may be assigned

The following written work is the minimum to be done by each student :—

- (1) Two long examinations of at least 2½ hours each or six one-period tests, or one such examination and three such tests
- (2) Ten questions set in class to be answered in about ten minutes each.

- (3) Two essays of about ten pages, or four essays of about five pages. (One long essay and - two short essays are advised.)

In the case of *private candidates*, double the number of essays *plus* a description of a market or fair and of a cottage industry or a co-operative society may be submitted in place of items no. (1) and (2) of the written work.

CIVICS.

There will be two papers of three hours each : the first paper on Civic Theory and the second paper on Indian Civics.

Paper I—Civic Theory.

Syllabus—

Nature of society. The state in relation to society. Functions and structure of government, forms of government. The place of local institutions in political life. Meaning of citizenship. Benefits from society, state or local institutions to the citizen. Duties and rights of citizenship. A citizen's participation in the life of his town, his province, his country. A citizen's relations with non-political associations like the colleges, clubs, religious organizations, co-operative societies, etc.

Books recommended :—

1. Raleigh .. Elementary Politics. (Oxford University Press.)
2. Lay Citizenship.
3. Sir Henry Jones.. Principles of Citizenship.
4. S. V. Puntambekar An Introduction to Civics and Politics. (The Indian Press, Limited, Allahabad.)

*Paper II.—Indian Civics.**Syllabus—*

Structure of Indian government, central and provincial. Working of Indian government. Indian municipalities, district boards, village institutions, with particular reference to those of the United Provinces of Agra and Oudh. Education in India Indian social life. Cultural movements in Modern India. National movements in modern India.

Books recommended —

1. Marris and Garner Civil Government.
2. G. Anderson .. British Administration.
- 3 S. M. Bose .. Working of the Indian Constitution (Oxford University Press.)

HISTORY AND ALLIED GEOGRAPHY.

Candidates may choose from the following groups of two papers each, each paper being of three hours.

N B —Candidates are expected to draw free hand maps of India and Great Britain and Ireland

Group A.

Paper I.—Indian History from the earliest time to 1919.

Paper II —British History. 1485—1919.

Group B.

Paper I.—Indian History from the earliest time to 1919.

Paper II.—European History, 1453—1919.

Alternative groups of books recommended for Paper I under Groups A and B —

Group A.

Srinivasachari and Ramaswami Aiyangar : A History of India, Parts I, II and III. (Srinivas Varadachari & Co., 4, Mount Road, Madras).

or

Group B.

1. Imperial Gazetteer, Vol. II.
2. LANE-POOLE, S. : Mediaeval India (Story of Nations Series). (T. Fisher Unwin, Ltd.)
3. ROBERTS, P. E. : Historical Geography of the British Empire, Vol. VII, Parts I and II. (Clarendon Press, Oxford.)

or

Group C.

1. AIYANGAR, R. : Pre-Muselman India. (Longmans, Green & Co.)
2. GARRETT AND KOHLI : The Muhammadan Period. (Longmans)
3. RUSHBROOK WILLIAMS ; The British Period. (Longmans)

Books recommended for Paper II under Group B—

1. RAMSAY MUIR : Atlas of European History.
2. A. J. GRANT : History of Europe. (Longmans, Green & Co.)
3. THATCHER and SCHWILL : History of Europe. (John Murray, London)
- J. H. ROBINSON : History of Western Europe. (Ginn & Co., Boston, New York, U. S. A.)

Books recommended for Paper II under Group A—

1. WARNER and MARTEN : Groundwork of English History. (Blackie & Son, Ltd.)
2. TOUT, T. F. : History of Great Britain III. (Longman's Green & Co.)
3. R. B. MOWAT : A new History of Great Britain. (Oxford University Press)
4. S. R. GARDINER : A School Atlas of English History. (Longmans, Green & Co.)

HISTORIES OF GREECE AND ROME AND ALLIED GEOGRAPHY.

There will be two papers of three hours each

Paper I.—History of Ancient Greece.

Books recommended :—

1. EDMONDS, C. D. Greek History for Schools.

(Cambridge University Press)

2. J. B. BURY : Greek History for Beginners.

3. E. ABBOT : Pericles (G. Putnam & Sons)

Paper II—History of Ancient Rome up to 476 A. D.

Books recommended :—

1. BRYANT, E. E. A Short History of Rome.

(Cambridge University Press)

2. SHUCKBURGH : Augustus.

3. SHUCKBURGH : A Short History of Rome for Beginners

GEOGRAPHY.

There will be two papers of three hours each. The first paper will contain questions on Part I of the syllabus and the second paper on Parts II and III of the syllabus.

I.—World Geography with intensive study of the regional Geography of Eurasia and North America compared, or of the three southern continents compared.

NOTE—Teachers will be expected throughout to develop the human side of Geography including the relations of Geography and History

II—Study of the survey map with special reference to 1: $\frac{1}{1,000,000}$ Survey of India and Adjacent Countries Series, sheet no. 43 (Srinagar) or no. 52 (Leh), or no. 53 (Delhi and Simla), also 1 inch Survey of India Map no. 63K/12. Study of the principles of the chief map-projections, such as, Cylindrical (Mercator), Orthographic, Stereographic, Spherical, Conical, Elliptical (Mollweide). Study of the weather maps for the months

of January, 1932, and July, 1932, published by the Meteorological office, Simla, and of other distribution maps.

The work should show that outdoor geographical studies including practical map-work have formed a feature of the course.

III.—Economic Geography with special reference to India. The world position of India : its natural resources, its economic development. The general relation between geographic factors and the production of the major raw materials and food-stuffs. Sources of power. Factors affecting transport, exchange of commodities, and the localization of major industries.

The world distribution of the following vegetable products :—

Wheat, rice, tea, coffee, vine, cotton, jute, sugar, rubber, tobacco. Conditions of their growth.

Books recommended.—

- I.—Russell : North America (Oxford). 10s. 6d.
- Rodwell-Jones and Bryan : North America (Methuen). 12s.
- Dawson North America. Vol. I (Stanford). 15s
- Gannett : North America Vol. II (Stanford). 15s.
- Keane : Asia. Vols. I and II (Stanford). 15s each
- Chisholm : Europe. Vols. I and II (Stanford). 15s. each.
- Keane : Central and South America. Vols. I and II (Stanford) 15s.
- Keane : Africa. Vols. I and II (Stanford) 15s. each.
- Mackinder : Britain and the British Seas (Oxford Press). 10s. 6d.

George : Relations of History and Geography.
(Oxford.) 5s.

Little : The Far East (Oxford). 10s. 6d.

Griffith Taylor : Australia—Physiographic and
Economic. (Clarendon Press) 3s. 6d.

McMunn and Coster : A Regional Geography
of Europe. (Oxford) 4s. 6d

Unstead and Taylor : Regional
and General Geography for
Students. (Philip.) 7s 6d

Leonard Brooks : New Regional
Geography, Book IV.
The World (London Uni-
versity Press) 7s 6d.

May be used as
text-books by
the students.

II.—Esson and Philip : Map-reading Made Easy.
(Philip) 3s. 6d.

Dickson : Maps, how they are made, how to
read them. (Bacon) 6d

Young and Fairgrieve : A class-book of Practi-
cal Geography. (Philip) 2s. 6d.

Simmons and Richardson : An Introduction to
Practical Geography (Macmillan.) 4s.

Unstead: Practical Geography (Oxford Press). 4s.

Mort : An Elementary Practical Geography
(Blackie). 2s. 6d

Davis Elementary Meteorology (Ginn). List
price, \$2 50.

III —Chisholm . Commercial Geography (Longmans).
25s.

Curr : Commercial Geography (Black). 4s.

Lyde : Man and His Markets (Macmillan). 3s.

Herbertson . Man and His Work 1s. 6d.

Goodchild Geography and Man (Ram Narain
Lal, Allahabad) Rs. 2

Statesman's Year Book (Macmillan). 20s.	} Every two or three years.
Whittaker's Almanack. 4s.	

Indian Year Book. ("The Times of India" office). Rs 5-4-0. To be used as a text-book.

Imperial Gazetteer of India. Vols. III and IV (Oxford.) 7s. 6d. each.

Atlas of Commercial Geography (Cambridge University Press). 3s.

The Oxford Economic Atlas (Oxford Press). 0s.

Additional reference books :—

Lake : Physical Geography (Cambridge University Press). 12s.

Salisbury : Physiography for Schools. Shorter Course. (Murray) 6s.

Davis Elementary Physical Geography (Ginn) 5s 6d.

Tarr Elementary Physical Geography (Macmillan). 7s 6d.

Mill : The Realm of Nature (Murray). 5s.

Philip's sets of maps of the various continents and of India, with explanatory handbooks.

Philip's sets of synthetic maps (for students' use). 1s. per packet.

Philip's Modern School Atlas of Physical, Political and Commercial Geography. 7s. 6d.

LOGIC.

There will be two papers of three hours each : the first paper on Deductive Logic and the second paper on Inductive Logic.

Deductive Logic.

The following syllabus is prescribed :—

Definition, scope, and value of Logic. Nature of thinking. The laws of thought. The relation of thought and language. Terms and their classification. Denotation and Connotation of terms. The predicables. Formal division and definition. Propositions, their import. Reduction of statements to logical form. Distribution of terms. Nature and forms of inference. The opposition of propositions and various forms of deduction. The syllogism, its figures and moods. Reduction, direct and indirect. Hypothetical, disjunctive and mixed syllogisms. The Dilemma, Enthymeme, Sorites and Epicheirema. Function and value of syllogism. Analysis of deductive arguments. Fallacies.

Inductive Logic.

The following syllabus is prescribed —

The nature and presuppositions of inductive inference. Causation, its significance and importance in induction. Observation and experiment. Classification, nomenclature and terminology. Hypothesis. Imperfect induction—simple enumeration and analogy. Methods of scientific induction. The deductive method of investigation. Analysis of inductive arguments and application of inductive methods. Explanation and establishment of law. The relation of induction to deduction. Fallacies.

Books recommended (*not prescribed*) to indicate the standard of treatment of the topics prescribed in the syllabus.—

1. Introductory Text-book of Logic. S. H. Mellone (Blackwood and Sons, Edinburgh).
2. Intermediate Logic. Welton and Monahan. (University Tutorial Press, London).

3. Elementary Logic, Deduction and Induction :
Diwan Chand. (Narayan & Co., Meston
Road, Cawnpore.)
4. Inductive Logic : P. K. Ray.

A MODERN INDIAN LANGUAGE.

Hindi.

There will be three papers, each of three hours' duration : the first paper will be set on the prescribed Poetry and Alankar, the second paper on the prescribed Prose and Drama, and the third paper on Unseen and Composition. Questions on History of Hindi literature and critical questions will be distributed over the first and second papers.

Paper I.—Poetry and Alankar.

Text-books prescribed :—

1. Padya Ratna Sangrah (Sahitya Ratna Bhandar, Agra).
2. Din Dayal Giri.—चन्द्रोक्ति कल्पद्रुम (Nagari Pracharini Sabha, Benares.)
3. एक संहार and वन वैभव (Sahitya Sadan, Chirgaon, Jhansi). Annas 8.

Paper II.—Prose and Drama.

Paper I.—Poetry and Unseen.

Text :—

(a) حسان بن ثابت

أمت ذاب الأصابع والجوارء -

هل رسم دارسة المقام يباب -

- عرفت ديار زينب بالكثير - ٢
 صلى الله على الذين تتابعوا - ٣
 لا والله ما قدرني هذيل - ٥
 والله انا لا انفارق ما جذا - ٦
 وشق له من اسمي كي يجعله - ٧
 ما بال عيني لا تدام كانما - ٨
 ايمت خلفه في غير ذي دخل - ٩
 تادوني ليل يثرب اعسر - ١٠
 اظن عيينة ان زارها - ١١
 الا بالفوم هل له لحم دافع - ١٢
 اعرض عن العوراء ان اسمعتها - ١٣
 لقد جدعت اذان كعب و عامر - ١٤
 اذ الله حيا معشرا مفعالهم - ١٥
 ذهبت بابن الزبير رقة - ١٦
 واقد بكيت و عز مهلك حنفر - ١٧
 لقد ورث الضلالة عن ابيه - ١٨
 ابا لهب ابلغ بان مصدا - ١٩
 الله اكرمنا بنصر نبيه - ٢٠
 هل المجد الا السون العود والدي - ٢١
 ايك بكيت عيناك ثم تبادرت - ٢٢
 الذين اذال العشير فان تكن - ٢٣
 و بثوب تعلم اننا بها - ٢٤
 و ممسك بصداع الراس من سكر - ٢٥
 ابلغ هوارن اعليا و اسفليا - ٢٦
 سقم كفاة حولا من عداوتكم - ٢٧
 لو خلق اللوم انسانا يكلمهم - ٢٨
 ثوب بكيت بضع عشرة حبة - ٢٩

(b) شعر النصارى Page. No. of lines. Poet.

- (1) امية ابن الصلت 220 9 اذكر حاجتي ام قد كفاني
 (2) قبيصة ابن النصارى 94 4 الم تر ان الورد عود صدره

INTERMEDIATE EXAMINATION IN COMMERCE OF 1933.

The following are the subjects of examination :—

Compulsory subjects—

1. English.
2. Book-keeping and Accountancy.
3. Business Methods and Correspondence.
4. (a) Elementary Economics.
(b) Commercial Geography.

Optional subjects—

One of the following :—

1. Steno-typing (shorthand and typewriting).
2. Elements of Banking.
3. Elements of Industrial Organization.
4. Mathematics

The following papers will be set :—

1. *English*—Two papers of three hours each.
2. *Book-keeping and Accountancy*.—Two papers of three hours each.
3. *Business Methods and Correspondence*.—Two papers of three hours each : one paper on Business Methods and one paper on Correspondence, precis-writing, etc.
4. *Elementary Economics and Commercial Geography*.—Two papers of three hours each : one paper on Elementary Economics and one paper on Commercial Geography.
5. *Steno-typing*

{	<i>Shorthand</i> .—One paper of three hours, <i>Typewriting</i> —One paper of one hour.
---	--------------------------------------------------------------------------------------------
6. *Elements of Banking*.—One paper of three hours.
7. *Elements of Industrial Organization*.—One paper of three hours.
8. *Mathematics*.—Two papers of three hours each.

No.	Subject.	Paper.	Time (hours)	Marks for each paper.	Total marks for each subject	Minimum pass marks.
COMPULSORY						
1	English ..	First paper (Prose)	3	50	100	33
		Second paper (Composition and translation)	3	50		
2	Book keeping and Accountancy.	First paper	3	50	100	33
		Second paper	3	50		
3	Elementary Economics and Commercial Geography.	First paper (Economics).	3	50	100	33
		Second paper (Geography)	3	50		
4	Business Methods and Correspondence.	First paper (Business methods)	3	50	100	33
		Second paper (Correspondence, precis-writing, etc)	3	50		
OPTIONAL						
1	Steno-typing	First paper (Shorthand)	3*	50	100	33
		Second paper (Typewriting)	1	50		
2	Elements of Banking	One paper ..	3	100	100	33
3	Elements of Industrial Organisation	One paper ..	3	100	100	33
4	Mathematics	First paper ..	3	50	100	33
		Second paper	3	50		

* Excluding five minutes' interval between the dictation of the two sections in Shorthand.

Correspondence.

This will consist of—

- (a) Commercial and official correspondence.
- (b) Rewriting in plain language of passages from market reports (financial and commodity markets) with explanations of selected terms and phrases occurring in the passages.
- (c) Précis-writing.

Book recommended (not prescribed):—

Modern Commercial Correspondence, by John K. Grebby. (MacDonald & Evans, London.)

Précis-writing, by K. L. Govil (Goutam Brothers & Co., Cawnpore).

Elementary Economics.

(The treatment of the subject should be very elementary and, as far as possible, it should be illustrated by reference to Indian conditions.)

The subject-matter and scope of Economics, fundamental notions, and simple definitions. Relation between wants, efforts, and satisfaction.

Production—Factors of production. Land, Labour, Capital and organization.

Nature and Limitations of land; Division of labour and other factors of efficiency of labour; Organization of capital.

Laws of increasing, diminishing, and constant returns.

Wants.—Diminishing utility. Value—its determination. Balancing of supply and demand.

The Machinery of exchange. Money and banking, both to be illustrated from Indian examples (including the Sahukari system, in the villages and the Sarafi system in cities). Convertibility of paper money in India. Cheques and Hundis (Foreign exchanges are excluded).

Distribution—Rent—interest—wages—profits (with particular reference to Indian conditions).

Books recommended (but not prescribed as text-books) :—

1. Outlines of Economics, by J. T. Goodchild (University Book Dépôt, Agra).
2. PENSON : Economics of Every-day Life, Part I.
3. MORELAND : Introduction to Economics (Macmillan & Co)
4. JEVONS : Money and Banking in India
- 5 Introduction to Economics for Indian Students, by W. H. Moreland. (Macmillan & Co, St Martin's Street, London)
- 6 The Economics of Every-day Life, by Sir T. H. Penson. (Cambridge University Press)

Commercial Geography.—(a) An elementary study of the principles of economic Geography on the basis of regional divisions, and their correlation with the distribution of the principal commercial commodities and industries

(b) Trade Centres, Ports, Trade Routes.

(c) Detailed study of India on the regional basis on the lines indicated above.

Books recommended :—

- (1) Rudmose Brown's "Principles of Economic Geography."
- (2) Howarth's "A Short Commercial Geography."

TYPEWRITING.

The syllabus will be the same as in Commerce for the High School Examination of 1933, but of a more advanced character—the speed to be 30 words per minute.

There shall be no paper on the theory of typewriting.

The maximum marks and the time allotted to the papers in this subject are as follows :—

	<i>Marks.</i>	<i>Time allowed.</i>
Type-copying	$\left\{ \begin{array}{l} (a) \text{ Passage and letter.} \\ (b) \text{ Tabular statement.} \end{array} \right.$	$\left. \begin{array}{l} 35 \\ 15 \end{array} \right\} \text{One hour.}$
Total ..	<hr/> 50 <hr/>	

Books recommended :—

1. Pitman's or Remington's Typewriting Manual.
2. A Typewriting Manual for Indian Students, by E. M. Moffatt and V. A. Kshirsagar (Methodist Publishing House, Lucknow).
3. The New Manual of Typewriting, by Y. D. Keshkar and Jagdish Saran (Methodist Publishing House, Lucknow).

SHORTHAND.

1. Writing in shorthand from a passage dictated at the rate of 80 words a minute, for a period of ten minutes.
2. Writing in shorthand from a business letter of general commercial phraseology, dictated at the rate of 80 words a minute, for a period of five minutes.
3. Transcription of both the above.

Book recommended :—

Pitman's Instructor, by Pitman & Sons, London.

ELEMENTS OF BANKING.

1. The nature of Banking.
2. The functions of a banker.
3. The meaning of Banking and other mercantile terms.

4. Simple banking operations.
5. The English money market.
6. Elements of foreign exchange.
7. The constituents of the Indian Money Market.
8. Indigenous Banking in India : "Shroffs" and Mahajans and their operations
9. The Indian joint-stock Banks.
10. The Imperial Bank of India.

Paper II. (a) (1) —Pure Geometry as given in parts V and VI of Hall and Stevens' Geometry.

(a) (2) *Analytical Geometry*.—Straight lines, Circles, Elementary properties of Conics.

(b) Elements of Differential Calculus.

INTERMEDIATE EXAMINATION IN AGRICULTURE OF 1933.

—Preference for admission to this course will be given to candidates who have studied (a) Chemistry and Physics, or (b) Agriculture for admission test examination.

The following are the subjects of examination :—

Group 1.

		Maximum marks.	Time allowed.
PAPER I.—Chemistry	..	25	Three hours.
PAPER II.—Physics	..	25	Ditto.
Practical Chemistry.		25	Ditto.
Practical Physics		25	Ditto.
Total	..	<u>100</u>	

Group 2.

PAPER I.—Botany	..	25	Three hours.
PAPER II.—Zoology	..	25	Ditto.
Practical Botany		25	Ditto.
Practical Zoology		25	Ditto.
Total ..		<u>100</u>	

Group 3.

PAPER I.—Physical properties of soil, soil geology, climatology	..	30	Three hours
PAPER II.—Tillage and Plant Feeding, Principles of manuring,			

laws. Elementary ideas as to the nature of dissociation and of the ionic theory.

The outline of the periodic law.

The following elements and their compounds :—

Hydrogen and Oxygen—their preparation and properties. Oxidation and reduction. Oxides, acids, bases and salts.

Water :—Electrolysis ; synthesis ; solution ; crystallization ; efflorescence and deliquescence ; pure and natural waters ; temporary and permanent hardness : methods of softening water.

Nitrogen ; ammonia ; oxides of nitrogen ; nitric acid and the nitrates ; nitrification.

The atmosphere, its chief constituents and properties.

The family of the halogens with special reference to chlorine, hydrochloric acid and the chlorides.

Carbon ; forms of carbon ; carbon dioxide and the carbonates.

Sulphur ; sulphur dioxide and trioxide ; sulphuric acid and the sulphates ; sulphuretted hydrogen and the sulphides.

Phosphorous ; phosphorus pentoxide ; phosphoric acid and the phosphates.

Arsenic and arsenious oxide.

Silicon, silica and the silicates.

Mercury and Silver—their oxides, chlorides and nitrates.

Copper—its sulphate, nitrate and oxides.

Lead—its oxides, chlorides and sulphate.

Iron—its oxides, sulphate, chloride and phosphate ; steel, cast iron and wrought iron.

Aluminum—its oxides, sulphate and chloride.

Zinc—its oxide, chloride and nitrate.

Manganese—its oxides, chloride, sulphate and potassium permanganate.

Calcium—its oxide, hydroxide, chloride, nitrate, sulphate, carbonate and phosphate.

Barium—its oxide, carbonate chloride and sulphate.

Magnesium—its oxide, chloride, sulphate, carbonate and phosphate.

Sodium, Potassium and Ammonium—their hydrates, chlorides, nitrates, sulphates, carbonates and phosphates.

B.—Organic.

General composition ; physical properties and general classification of carbon compounds

Hydrocarbons, saturated and unsaturated—methane, ethane, ethylene and acetylene.

Alcohols ; methyl and ethyl alcohols ; glycerine.

Aldehydes and ketones ; formaldohyde, acetaldehyde, acetone.

Ethers —Ethyl ether.

Acids ; formic, acetic, butyric, oxalic, lactic and citric

Fats, oils and soaps

Carbohydrates : grape sugar, fruit sugar, cane sugar starch and cellulose.

Proteins : Albumin.

Practical work in Chemistry.

Differentiation between chemical compounds and mechanical mixtures

Solution ; suspension ; sedimentation ; decantation ; filtration ; precipitation ; crystallization and distillation

Examination of the important atmospheric constituents.

Preparation of hydrogen, oxygen, nitrogen, nitrous oxide, nitric oxide, nitric acid, ammonia, chlorine, hydrochloric acid, sulphur dioxide and carbon dioxide.

Heat energy :—Source ; modes of transference ; effects of heat on matter ; thermometry ; specific heats ; evaporation and boiling ; vapour pressure ; condensation and frost ; latent heats ; hygrometry and dew point ; mechanical equivalent of heat.

Radiant energy :—Source of light ; mode of propagation ; light waves ; shadows ; illumination ; reflection ; transmission ; absorption and dispersion of light ; magnification ; images ; telescope ; microscope.

Magnetic energy :—Magnets ; magnetic forces ; magnetization , compass

Electric energy :—Electrification by friction : insulators ; conductors ; electroscope ; electrophorus. Electricity generated by chemical action ; by dynamos. Resistance ; magnetic effect of current ; transformation of electric energy into heat, light and power ; practical acquaintance with galvanometers, voltmeters, ammeters, electrolysis. (Simplest forms.)

Practical Work in Physics.

Accurate determination of length, area, mass, volume and density. Use of calipers, screw gauge, spherometer, balance, burette and squared paper.

Determination of acceleration due to gravity by the simple pendulum.

Verification of the law of parallelogram of forces.

Verification of the principles of parallel forces and of the lever.

Determination of centre of gravity of plane laminas.

Determination of co-efficient of friction.

Determination of efficiency of a system of pulleys.

Use of the Nicholson's Hydrometer.

Use of the hydrostatic balance : determination of specific gravities of—

(1) insoluble sinking solid, (2) floating solid, (3) liquid.

Verification of Boyle's Law and practice in barometer reading.

Use of the density bottle : determination of true and apparent density of soils and pores pace.

Practice in reading various thermometers.

Determination of Humidity and Dewpoint

Determination of Boiling point

Preparation of a graph showing cooling of water by radiation.

Determination of specific heat —(1) Method of mixture, (2) method of radiation.

Determination of Latent heats of vaporization and fusion.

Reflection of light : use of plane and concave mirrors.

Refraction of light : determination of Refractive index.

Determination of focal length of a converging lens.

Practice in use of a telescope and of a microscope

Magnetization of needles and determination of their poles

Charting of lines of force due to a magnet in different positions.

Use of simple electroscopes (Gold leaf and Pith ball).

Construction of a simple cell and use of the simple galvanometer.

Determination of Electromotive force by the potentiometer or balance method.

Determination of Electric resistance by substitution method

The following books are suggested for reference —

1. A High School Course in Physics, by F. R. Gorton (D Appleton and Co, New York) Price, about Rs. 5.

2. Every-day Physics, by H. E. Hadley (Macmillan and Co., Ltd., London).

GROUP II.

Biology.

(The course will aim at the study of the phenomena exhibited by living matter as illustrated by lower plants, animals, and their organs.)

Introduction.—Living and non-living matter ; study of life in its simplest form as illustrated by *Amœba*, *Nostoc*, *Euglena*, *Volvox*, *Paramœcium*, and *Spirogyra* ; general properties of protoplasm as the basis of all life.

The cell, animal and vegetable, its growth and simple division ; combination of cells to form tissues ; combination of tissues to form organs as illustrated by *Hydra* and Moss.

I. Botany.

Study of plant in general.

External morphology of the plant organs : stem, root, leaf, flower, fruit, and seed.

Internal Morphology—

(a) Plant cell.

(b) Stem, root, and leaf

Reproduction—

Vegetative reproduction.

Sexual reproduction—

(a) The flower : structure and functions.

(b) Pollination.

(c) The seed : development, structure, dissemination.

(d) The fruit : development, types, functions.

(e) Germination.

Physiology elementary study of the following :—

(a) Chemical composition of plants.

(b) Water in plants ; intake of water and inorganic salts.

(c) Carbon-assimilation.

(d) Transportation ; food storage.

(e) Transpiration.

(f) Respiration.

(g) Growth.

Rapid survey of the plant kingdom.—Bacteria, spirogyra, mucor, moss, fern cyeas

Study of botanical characters of (Field and garden crop plants should be used as far as possible)—Cruciferae, Malvaceae, Leguminosae, Rosaceae. Cucurbitaceae, Compositaceæ, Solanaceac, Euphorbiaceae, Liliaceae. Gramineac.

Books recommended —

1. Lowson and Sahni Text-book of Botany (Indian edition) (London : University Tutorial Press or Thacker, Spink and Company, Calcutta).
2. Percival .. Agricultural Botany (Duckworth)
3. Ranga Chari . Elementary Botany for Indian Schools (Government Press, Madras)
4. Gager .. Fundamentals of Botany (Blakiston)
5. Transeau .. General Botany (World Book Company)
6. Farmer and Chowdhry Practical Introduction to the Study of Botany. (Longmans, Green and Company, Limited)

II.—Zoology.

Acquaintance with the following types as illustrations of the various kinds of life :—

Tapeworm, Earthworm, Leech, Snail and Slug, Termite, Fish, Frog.

General organization of earthworm, fresh-water mussel, lobster and cockroach.

Elementary anatomy and physiology of the important systems of the following :—

Amphioxus, fish, frog, fowl and squirrel or other small mammal.

Books recommended—

1. Theobald .. Agricultural Zoology (W. Blackwood).
2. Gilbert Bourns Comparative Anatomy of Animals (G. Bell and Sons).
3. Marshall .. Physiology of Farm Animals (Macmillan, Calcutta).
4. Marshall and Practical Zoology (Smith Elder Hurst. and Company).

Practical work in Botany.

A general study of the plant as a whole.

Growing of plants from seeds, different types of germination of seeds.

Examination of seedlings to study external morphology of primary organs

Simple and compound microscopes—Study of their parts and their uses.

Examination and description of various types of roots, stems and leaves, their constituent parts and their modification.

Examination under microscope of cotton fibres, hairs, starch and air bubbles.

Study of unicellular organisms such as Yeast, Nostoc, Spirogyra, leaves of Vallisneria and staminal hairs of Tradescantia to demonstrate protoplasmic movements.

Freehand section with staining practice of root, stem and leaf and their description.

Study of cell-wall, protoplasm, vacuoles, nucleus, plastids and starch grains.

.Iodine test of starch grains.

Examination, dissection and descriptive study of flowers and their parts and the study of their functions.

Examination and identification of fruits and seeds.

Identification of Nostoc, Euglena, Spirogyra, Mucor, Moss and parts of fern and cycas.

Study of external botanical characters, including identification of plants of common field and garden crops belonging to families in the syllabus.

Practical work in Zoology.

1. Microscopic study—

I The examination and study of the microscope and its parts

II The study of the living cell—

(a) Examination of pond water

(b) Amoeba

(c) Eggs of mosquito and fly

(d) Blood corpuscles

(e) Scrapings from inside of mouth.

2. The study of microscopic slides—

(a) Mouth parts of the various insects

(b) Important minute structures of the types of study

II Preparations for microscopic examination—

(a) Stimulated muscle in salt solution

(b) Ciliated cells in salt solution

(c) Setae of earthworm in glycerine or water.

(d) Mouth parts and gizzard of cockroach in glycerine or water

4. Study of the external characters and habits of the living animal included in the course, excepting endoparasites.

5. Demonstration dissections in batches—
Heart and eye of sheep or goat.

6. Osteology—

- (a) Study of dentition in dog, horse or ox.
(b) Study of limbs of horse and ox.

7. Dissection by individual students—

- (a) Grasshopper for all important systems.
(b) Pond snail for body organization only.
(c) Squirrel for all the important systems.
Other mammals—their organs may be substituted.

8. Collection and preservation of the types of study.
Their preparation for the museum—

- (a) Stages of the animals used as types for life history.

- (b) Insects—Grasshoppers, butterflies or moths.

9. Rearing a butterfly or moth, preferably silk moth.

10. Field observations—

- (a) Animals in their natural habitats.

- (b) Breeding places of harmful insects and their pests. Housefly, mosquito and termite.

- (c) The insect pest selected for the year.

- (d) Bird selected for study and its habits.

11. Students will make daily records of the "Field observations" and laboratory work in special notebooks prescribed by the teacher in charge. The books will be submitted in the final examination as part of the practical work, duly certified as the *bona fide* work of the candidate.

Books suggested—

1. Theobald : Agricultural Zoology (William Blackwood and Sons, Edinburgh, London)
2. Kellog and Doane : Economic Zoology and Entomology.
3. Pusa Bulletins . . . Nos 113, 6 and 143.

GROUP III

I.—ELEMENTARY SOIL SCIENCE.

Soil Geology.—The origin of soils, classification and nature of soil-forming rocks; recognition of the following rocks and their chief characteristics :—

- (1) Igneous : granite, syenite, diorite, biabaso ; gabbro ; basalt
- (2) Sedimentary : limestone, sandstone, shale ; Dolomite.
- (3) Metamorphic schists : gneiss, marble, slate ; quartzite.

The mineral constituents of the more important soil-forming rocks, their nature and composition.

The importance of felspars in the formation of clay

The nature of kaolinite

Acid and basic rocks and their effect upon soils formed from them.

The physical properties of soils —Pore space, number of soil particles per given volume and their relation to surface area exposed to moisture and air, resistance to cultivation operations, plasticity, absorption, cohesion; limits of moisture for successful tillage, effect of presence of organic matter on soil structure, effect of lime, effect of cultivation, sources of soil heat, specific heat of the soil; specific gravity, apparent and absolute, of the soil; effect of colour on absorption of heat and of humus on conductivity of heat; effect of decay of organic matter on soil temperature, control of soil temperature.

Soil classes.—Classification of soils into sand, loam, clay, calcareous, humic and peaty soils and the nature of each class; division of the United Provinces into its natural soil classes and the characteristics of each class.

Tillage and plant food in the soil.—Objects, kinds and timeliness of tillage. Chemical and physical effects of tillage. Elements necessary for plant growth and their sources; abundant and deficient elements in the soil; conversion of organic matter into plant food, conditions necessary for bacterial activity in the soil; the Nitrogen cycle briefly explained; the relation of air, water and heat to plant food in the soil, the presence of lime and its importance to the production of plant food.

General principles of manuring in relation to soils.—The effect of organic manures on the texture of soils, the correct time of application of manures in relation to irrigation and rain water; losses of plant food by incorrect manuring; losses by incorrect storage and their prevention; acidity and defoliation due to excessive and unsuitable manuring; remedies for this condition; condition of soil necessary before application of fertilisers can be profitable; the essential difference between organic manures and inorganic manures as regards effect on soils; methods of manuring with both organic manures and chemical fertilisers.

The following books are suggested for reference:—

1. The Soil, by A. D. Hall (John Murray, London).

2. The Physical Properties of Soils, by A. G. McCall (Orange Judd and Company, New York). Price about Rs. 2-12

3. First Principles of Soil Fertility, by Alfred Vivian (Orange Judd and Company, New York, or Christian Book and Tract Society, Allahabad). Price Rs. 2-7.

4. Soils, their Properties and Management, by Lyon, Fippin and Buckman (Macmillan and Company, New York). Price Rs. 10.

5. Soils and Fertilizers, by Harry Snyder (Macmillan and Company, New York).

Climatology—The distribution of rainfall, its effect upon the composition of soils; determination of humidity; factors affecting dew; changes in atmospheric temperature and their effect upon humidity; winds and their importance in farming; snow, ice and frost and their relation to the soil; methods of obtaining data for climatic reports, simple instruments used in meteorological observations; climate in relation to soils and plant growth

The following books are suggested for reference —

1. Agricultural Meteorology, by Warren Smith (Macmillan and Company, New York)

2. Forecasting Weather, by W. A. Shaw (Constable and Company, London)

General principles of irrigation and drainage.—(a) *Irrigation*—The necessity of irrigation, water requirements of crops and the danger of excessive water; methods of reducing water requirements of crops: evaporation and its relation to plant growth; prevention of losses of irrigation water, amount of seepage in the three main classes of soils, sands, loams and clays, the construction of irrigation channels, measurement of discharge of water from outlets, measurement of water in flowing channels: relation of depth in inches to total quantity of water per irrigation; systems and methods of irrigating crops, lift and flow irrigation, appliances commonly used for lifting water, simple calculations of discharge from common irrigation appliances

(b) *Drainage*.—The necessity of removing surplus water from the soil; the dangers resulting from excessive

Soil classes.—Classification of soils into sand, loam, clay, calcareous, humic and peaty soils and the nature of each class; division of the United Provinces into its natural soil classes and the characteristics of each class.

Tillage and plant food in the soil.—Objects, kinds and timeliness of tillage. Chemical and physical effects of tillage. Elements necessary for plant growth and their sources; abundant and deficient elements in the soil; conversion of organic matter into plant food, conditions necessary for bacterial activity in the soil; the Nitrogen cycle briefly explained; the relation of air, water and heat to plant food in the soil, the presence of lime and its importance to the production of plant food.

General principles of manuring in relation to soils.—The effect of organic manures on the texture of soils, the correct time of application of manures in relation to irrigation and rain water; losses of plant food by incorrect manuring; losses by incorrect storage and their prevention; acidity and defoliation due to excessive and unsuitable manuring; remedies for this condition; condition of soil necessary before application of fertilisers can be profitable; the essential difference between organic manures and inorganic manures as regards effect on soils, methods of manuring with both organic manures and chemical fertilisers.

The following books are suggested for reference:—

1. The Soil, by A. D. Hall (John Murray, London).

2. The Physical Properties of Soils, by A. G. McCall (Orange Judd and Company, New York). Price about Rs 2-12.

3. First Principles of Soil Fertility, by Alfred Vivian (Orange Judd and Company, New York, or Christian Book and Tract Society, Allahabad). Price Rs 2-7.

4. Soils, their Properties and Management, by Lyon, Fippin and Buckman (Macmillan and Company, New York). Price Rs. 10

5. Soils and Fertilizers, by Harry Snyder (Macmillan and Company, New York).

Climatology.—The distribution of rainfall, its effect upon the composition of soils, determination of humidity; factors affecting dew; changes in atmospheric temperature and their effect upon humidity, wind and their importance in farming; snow, ice and frost and their relation to the soil; methods of obtaining data for climatic reports, simple instruments used in meteorological observations, climate in relation to soils and plant growth

The following books are suggested for reference:—

1. Agricultural Meteorology, by Warren Smith (Macmillan and Company, New York)

2. Forecasting Weather, by W. A. Shaw (Constable and Company, London)

General principles of irrigation and drainage—(a) *Irrigation*—The necessity of irrigation, water requirements of crops and the danger of excessive water; methods of reducing water requirements of crops; evaporation and its relation to plant growth, prevention of losses of irrigation water; amount of seepage in the three main classes of soils, sands, loams and clays; the construction of irrigation channels, measurement of discharge of water from outlets, measurement of water in flowing channels: relation of depth in inches to total quantity of water per irrigation, systems and methods of irrigating crops; lift and flow irrigation; appliances commonly used for lifting water, simple calculations of discharge from common irrigation appliances

(b) *Drainage*—The necessity of removing surplus water from the soil; the dangers resulting from excessive

dairy cow, bullock, young stock and goat ; practice in watering and exercising ; familiarity with the appearance and use of common medicines and antiseptics ; ability to throw an animal with ropes ; market value of dairy, draft cattle and goats ; keeping of records of dairy cattle.

The following books are suggested for reference :—

1. Feeding of Crops and Stock, by A. D. Hall.
2. The Complete Farmer, by Premrose McCom-mell.
- 3 Judging Live-stock. by John A. Craig (Kenyon Printing Company, Des Moines, Iowa). Price, Rs. 7.
4. Feeds and Feeding (abridged edition), by Henry and Morrison. Henry and Morrison, Madison, Wiscon). Price, Rs. 10.

III Farm Machinery.—Workshop practice in wood and iron. Practical study of the plough, harrow, cultivator, roller and planker ; ability to plough with desi mould board and disc ploughs ; familiarity with the methods of hitching ; adjustment of implements and methods of ploughing : familiarity with the use of common seed-drills, weeding and cultivation with power and hand implements, grinding, cancrushing and foddercutting

The following books are suggested for reference :—

1. Farm Mechanics, by Crawshaw and Lehman (Manual Arts Press, Peoria, Illinois, U. S. A.).
- 2 Farm Machinery and Farm Motors, by Davidson (Thacker, Spink and Company). Price, Rs. 11-8.

IV. Calculations.—The following simple calculations to be noted in the student's note-book. Field

notes attested by the teacher to be produced at the examinations :—

- (1) Time taken to plough, harrow, cultivate and plank one acre, under the following conditions :—

Hard soil,

Soft soil,

Sod, and

Stubble.

- (2) The variation in time taken in area ploughed with differences in depth and width of ploughing under similar conditions.
- (3) The area sown with simple seed drills per day calculated from the work done in two hours ; probabilities of error.
- (4) Quantity of work done in hand-weeding, harrowing, etc., per hour by a given number of labourers; in this case students.
- (5) Calculations of discharge of water from outlets, from irrigation channels and from irrigation appliances.
- (6) Estimation of loss by evaporation and seepage.
- (7) Estimation of area of land irrigated in a given time by irrigation appliances in common use ; duty of water.
- (8) Increase in outturn of crops by top dressing with chemical fertilisers and oil-cakes.
- (9) Calculation of quantity of fodder chopped by machine worked (a) by hand, (b) by electricity or other power, and comparison with hand-chopping with gadasa.

dairy cow, bullock, young stock and goat ; practice in watering and exercising ; familiarity with the appearance and use of common medicines and antiseptics ; ability to throw an animal with ropes ; market value of dairy, draft cattle and goats ; keeping of records of dairy cattle.

The following books are suggested for reference :—

- 1 Feeding of Crops and Stock, by A. D. Hall.
2. The Complete Farmer, by Premirose McConnell.
- 3 Judging Live-stock, by John A. Craig (Kenyon Printing Company, Des Moines, Iowa). Price, Rs. 7.
4. Feeds and Feeding (abridged edition), by Henry and Morrison. Henry and Morrison, Madison, Wiscon) Price, Rs. 10.

III. Farm Machinery.—Workshop practice in wood and iron. Practical study of the plough, harrow, cultivator, roller and planker ; ability to plough with desi mould board and disc ploughs ; familiarity with the methods of hitching ; adjustment of implements and methods of ploughing ; familiarity with the use of common seed-drills ; weeding and cultivation with power and hand implements ; grinding, canecrushing and foddercutting.

The following books are suggested for reference :—

1. Farm Mechanics, by Crawshaw and Lehman (Manual Arts Press, Peoria, Illinois, U. S. A.).
2. Farm Machinery and Farm Motors, by Davidson (Thacker, Spink and Company). Price, Rs. 11-8.

IV. Calculations.—The following simple calculations to be noted in the student's note-book. Field

notes attested by the teacher to be produced at the examinations :—

- (1) Time taken to plough, harrow, cultivate and plank one acre, under the following conditions :—

Hard soil,

Soft soil,

Sod, and

Stubble

- (2) The variation in time taken in area ploughed with differences in depth and width of ploughing under similar conditions.
- (3) The area sown with simple seed drills per day calculated from the work done in two hours ; probabilities of error.
- (4) Quantity of work done in hand-weeding, harrowing, etc., per hour by a given number of labourers; in this case students.
- (5) Calculations of discharge of water from outlets, from irrigation channels and from irrigation appliances.
- (6) Estimation of loss by evaporation and seepage.
- (7) Estimation of area of land irrigated in a given time by irrigation appliances in common use ; duty of water.
- (8) Increase in outturn of crops by top dressing with chemical fertilisers and oil-cakes.
- (9) Calculation of quantity of fodder chopped by machine worked (a) by hand, (b) by electricity or other power, and comparison with hand-chopping with *gandasa*.

credit. Relation of the rate of interest to the supply of capital. Causes of saving.

Why do wages differ? Grades of labour. Efficiency of labour. Real and nominal wages. Cost of living and the standard of living. Relation of wages to the supply of labour. Relation of birth-rates and death-rates to income.

Organization and management.—In what different ways might wheat be produced? Does the method depend upon situation? Wages? The rate of interest? Education? Quality of the product? How is the method actually determined? By whom?

Carry out this reasoning for milk and other common necessities.

In what cases is it most profitable to use a railway, a bicycle, and one's feet? Compare the uses of hand-writing, typewriting and printing press. Hand-sewing and the sewing machine. Why do primitive methods continue in use along with more advanced ones?

Money, banking and foreign exchange, barter, uses of money, reasons for minting and for free coinage, paper money and cheques. The work of banks and their economic importance. India's foreign trade and its advantage.

Taxation —The necessity for taxation. The income-tax, custom duties, land revenue and excise. Who bears these taxes? Reasons for progressive taxation. Imperial and local taxation.

The following books are suggested for reference :—

1. Elements of Economics, Vol. I, by Alfred Marshall (Macmillan & Co., London).

An Introduction to Economics for Indian Students, by Moreland.

or

MATHEMATICS.

ALGEBRA :—Quadratic equations involving one or two unknown quantities.

Arithmetical and Geometrical Progressions.

Permutations and Combinations.

The Binomial Theorem for positive integral index.

Proportions and Variations.

Use of indices and logarithms.

Practical use of the Slide Rule.

GEOMETRY AND MENSURATION :—Simple Plane and Solid Figures, excluding any detail about the sections of a cone.

Similar figures and proportionals.

Field book.

Collinear points and concurrent straight lines.

TRIGONOMETRY :—Trigonometrical Ratios.

Easy trigonometrical identities and equations.

Solution of triangles.

Practical measurement of angles of elevation, heights and distances, including the necessary calculations.

GRAPHS :—Variables and co-ordinates.

Statistical graphs and those governed by a natural law.

Continuity and discontinuity of graphs. Problems.

Graphs and Algebraical expression of functions.

The linear graph.

Use of Cartesian co-ordinates :—Distance between two points. Distance between a straight line and a point.

Angle between two straight lines.

The quadratic graphs.

Practical Graphical Interpolation.

INTEGRATION :—Small errors ; Infinitesimal quantities.

Differentials : Differential coefficient.

Easy standard forms of differentiation explained (without elaborate proofs). Sum and product of functions.

Summation of series.

Integration considered as summation of a series of differentials.

A few very easy standard forms of integrals (without elaborate proofs). Integration by parts.

Easy determinations of length, area and volume.

Practical use of the planimeter and the opisometer.

List of Intermediate Colleges in the United Provinces (not maintained by Government) recognized for the Intermediate Examination of 1932.

LIST OF RECOGNIZED INSTITUTIONS

423

Serial no.	Name of college.	Subjects in which recognition has been given.	Remarks.
		MEERUT DIVISION.	
1	Meerut College, Meerut	English, Persian, Sanskrit, History, Logic, Economics, Mathematics, Physics, Chemistry, Civics, Drawing, Urdu, Hindi and Biology.	Recognized provisionally in Civics and Biology up to 1933.
2	D. A. V. Intermediate College, Debra Dun.	English, Persian, Sanskrit, Modern History, Logic, Economics, Mathematics, Physics, Chemistry, Civics and Hindi.	Provisional recognition extended to 1932.
3	N. R. E. C. Intermediate College, Khurja, district Bulandshahr.	English, Persian, Sanskrit, Modern History, Logic, Mathematics, Physics, Chemistry, Civics, Economics, Urdu and Hindi.	Recognized provisionally in Civics and Economics up to 1932.
		AGRA DIVISION.	
4	Agra College, Agra	English, Persian, Sanskrit, History, Logic, Economics, Mathematics, Physics, Chemistry, Biology, and Hindi.	Recognized provisionally in Hindi up to 1933.
5	St. John's College, Agra	English, Persian, Sanskrit, Logic, Modern History, Economics, Mathematics, Physics, Chemistry, Biology, Geography, Urdu and Hindi.	Provisional recognition in Urdu and Hindi; extended to 1932. Recognized permanently in Urdu and Hindi, from 1933. Recognized provisionally in Geography up to 1933.

INTEGRATION :—Small errors ; Infinitesimal quantities.

Differentials : Differential coefficient.

Easy standard forms of differentiation explained (without elaborate proofs). Sum and product of functions.

Summation of series.

Integration considered as summation of a series of differentials.

A few very easy standard forms of integrals (without elaborate proofs). Integration by parts.

Easy determinations of length, area and volume.

Practical use of the planimeter and the opisometer.

12	D. A. V. College, Cawnpore	English, Persian, Sanskrit, History, Logic, Economics, Civics, Mathematics, Physics, Chemistry, Urdu and Hindi.	Recognized provisionally in Civics, Urdu and Hindi up to 1932. Recognized permanently in Civics and Hindi from 1933.
13	B. N. Sanatan Dharm Intermediate College, Cawnpore.	English, Sanskrit, Modern History, Economics, Mathematics, Hindi, Logic, Geography, Urdu, Physics, Chemistry, Biology and Civics.	Recognized provisionally up to 1932. Recognized permanently in all subjects except Civics from 1933. Recognized provisionally in Civics up to 1933.
14	Evang Christian Intermediate College, Allahabad.	English, Persian, Sanskrit, Latin, Modern History, Ancient History, Logic, Economics, Mathematics, Physics, Chemistry, Geography, Biology, Urdu and Hindi.	Recognized provisionally in Geography, Urdu and Hindi up to 1933.
15	Kayastha Pathabala Intermediate College, Allahabad.	English, Persian, Sanskrit, Modern History, Ancient History, Logic, Economics, Mathematics, Physics, Chemistry, Biology and Civics.	Recognized provisionally in Civics up to 1933.
16	Anglo-Bengali Intermediate College, Allahabad.	English, Sanskrit, Modern History, Logic, Mathematics, Economics and Bengali.	Recognized provisionally up to 1933.
17	Udai Pratap College and Hewitt Khattriya School, Benares.	English, Persian, Sanskrit, History, Logic, Economics, Mathematics, Physics, Chemistry and Hindi.	Recognized provisionally in Hindi up to 1933.
18	St. Andrew's College, Gorakhpur	<p style="text-align: center;">BENARES DIVISION.</p> <p style="text-align: center;">GORAKHPUR DIVISION.</p> <p>English, Persian, Sanskrit, History, Logic, Mathematics, Physics, Chemistry, Biology and Economics.</p>	

Serial no.	Name of college.	Subjects in which recognition has been given.	Remarks.
6	Balwant Rajput Intermediate College, Agra.	AGRA DIVISION—(concluded).	
7	Radhaswami Educational Institute, Agra.	English, Persian, Sanskrit, Modern History, Logic, Economics and Mathematics.	Recognized provisionally up to 1933.
8	Dharam Samaj Intermediate College, Aligarh.	English, Persian, Sanskrit, History, Logic, Mathematics, Physics, Chemistry, Biology, Economics, Urdu and Hindi. English, Mathematics, History, Economic, Logic, Sanskrit, Persian, Urdu, Hindi, Physics, and Chemistry.	Recognized provisionally in Urdu and Hindi up to 1933. Recognized provisionally up to 1933.
9	Bareilly College, Bareilly	ROHILKHAND DIVISION.	
10	Shyam Sunder Memorial Intermediate College, Chandausi, district Moradabad.	English, Persian, Sanskrit, Modern History, Logic, Economics, Mathematics, Physics, Chemistry, Urdu and Hindi. English, Persian, Sanskrit, Modern History, Logic, Mathematics, Physics, Chemistry, Economics and Hindi.	Recognized provisionally in Urdu and Hindi up to 1934. Recognized provisionally in Hindi up to 1932. Recognized permanently in Hindi from 1933.
11	Christ Church College, Cawnpore	ALLAHABAD DIVISION.	
		English, Persian, Arabic, Sanskrit, Latin, Modern History, Ancient History, Logic, Economics, Mathematics, Physics, Chemistry, Urdu and Hindi.	Recognized provisionally in Urdu up to 1932.

COLLEGES FOR EUROPEANS.

25	St. George's Intermediate College, Mysore.	English, Mathematics, Modern History, Ancient History, Latin, French, Physics, and Chemistry	
26	St. Joseph's College, Naini Tal	English, Modern History, Ancient History, Latin, Mathematics, Physics and Chemistry.	Recognised provisionally up to 1914
27	Phulander Smith College, Naini Tal	English, History, Economics, Latin, French, Physics, Chemistry and Mathematics.	
28	La Martinière College, Lucknow	English, Latin, Ancient History, Modern History, Mathematics, Physics, Chemistry and Geography.	

List of Government Intermediate Colleges recognized for the Intermediate Examination of 1932.

ROHILKHAND DIVISION.

29	Government Intermediate College, Morehabad.	English, Persian, Arabic, Sanskrit, History, Logic, Mathematics, Physics and Chemistry.	
----	---------------------------------------------	-----------------------------------------------------------------------------------------	--

ALLAHABAD DIVISION.

30	Government Intermediate College, Allahabad.	English, Persian, Arabic, Sanskrit, History, Logic, Mathematics, Physics, Chemistry, Biology, Economics, Urdu and Hindi	Recognized provisionally in Urdu and Hindi up to 1932.
----	---------------------------------------------	-------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------

31	Government Intermediate College, Etawah.	English, Persian, Arabic, Sanskrit, History, Logic, Mathematics, Physics and Chemistry.

APPENDIX A.**Dates of the High School, Intermediate, and Intermediate Examinations in Commerce and Agriculture of 1932.**

In 1932—The High School, the Intermediate, the Intermediate Examinations in Commerce and Agriculture will commence on March 30, 1932.

APPENDIX B.

Byelaws of the Board framed under section 20 of the Intermediate Education Act, 1921.

1. At all meetings of the Board, seven members inclusive of the Chairman shall form a quorum.
2. If a quorum is not present thirty minutes after the advertised time of the meeting, there shall be no meeting.
3. If, in the course of a meeting any member calls attention to the absence of a quorum, the Chairman shall dissolve the meeting.
4. Every question shall be decided by a majority of the votes of the members present. In the case of the votes being equally divided, the Chairman shall have a second vote.
5. If a member continuously disregards or questions any order or ruling of the Chairman made at a meeting of the Board, the Chairman may take the vote of the meeting as to whether such member shall not be suspended for that day. If the members present decide upon suspension, the Chairman shall declare the offending member suspended, and such member shall be bound immediately to withdraw.
6. No motion which has been negatived by the Board shall be again brought forward, except with the permission of the Chairman, within one year from the date upon which it was negatived.
7. All meetings of the Board shall be presided over by the *ex officio* Chairman of the Board. In the absence of the Chairman, the members present shall elect a Chairman.
8. Meetings of the Board and of its committees shall, unless for special reasons the Chairman otherwise directs, be held at Allahabad.
9. The election of co-opted members of the Board shall be held at the annual meeting of the Board.
10. Notice in writing of meetings of the Board shall be despatched to all members of the Board not less than three weeks before the meeting, together with the agenda paper for the meeting.
11. No business other than that contained in the agenda paper shall be transacted at a meeting unless with the consent of the Chairman.
12. Notice of a motion or resolution to be moved at a meeting of the Board must be in the hands of the Secretary not less than 10 days before the meeting.
13. All questions as to whether proper notice of a motion has been given shall be decided by the Chairman, whose decision shall be final.
14. (a) No motion or resolution of which due notice has not been given may be moved at a meeting of the Board, except—
 - (1) to adjourn a debate,
 - (2) to adjourn the meeting,
 - (3) to dissolve the meeting,

- (4) to change the order of business,
- (5) to refer any matter to any authority of the department or the University or the Government,
- (6) to pass to the next item of business,
- (7) to appoint a committee,
- (8) to resolve the meeting into a committee,
- (9) to propose that the question be now put.

(b) A motion under (1), (2), (6) or (9) above shall be put to the vote without discussion.

(c) Motions under (1), (2), (3), (4), (6), (8) and (9) shall only be moved with the previous consent of the Chairman.

15. Every motion shall be affirmative in form, and shall begin with the words "that".

16. Every motion must be seconded, otherwise it shall drop. The seconder of a motion may reserve his speech with the permission of the Chairman.

17. When a motion that is in order has been seconded, it shall be stated from the Chair, before it is discussed.

18. If no member rises to speak to the motion after it has been stated from the Chair, the Chairman shall proceed to put the question to the vote.

19. Not more than one motion and one amendment thereto shall be placed before the meeting at the same time.

20. A motion once disposed of shall not be again brought forward at the same meeting, or at any adjournment thereof.

21. No amendment shall be proposed which would in effect constitute a direct negative to the original motion.

22. Every amendment must be relevant to the motion upon which it is moved.

23. No amendment shall be proposed which substantively raises a question already disposed of by the meeting, or which is inconsistent with any resolution already passed by it.

24. The order in which amendments that are in order are to be taken up shall be determined by the Chairman.

25. An amendment must be seconded in the same way as a motion, otherwise it shall drop. A seconder of an amendment may reserve his speech with the permission of the Chairman.

26. When an amendment that is in order has been moved and seconded, it shall be stated from the Chair.

27. The mover of a motion for dissolution or adjournment has no right of reply.

28. When the Chairman has ascertained that no other member entitled to address the meeting desires to speak the mover of the original resolution may reply upon the whole debate.

29. No member shall speak to the question after the mover has entered on his reply.

30. When the debate is concluded, the Chairman shall, after summing up, if he so desires, put the question to the vote thus —

- (1) If there is an amendment, the Chairman shall state the motion and the amendment and take the vote of the meeting.
- (2) If the amendment is negatived, the original motion shall be again stated from the Chair, and, subject to the foregoing regulations, any other amendment which is in order may then be proposed thereto.
- (3) If an amendment is carried, the motion, as amended, shall be stated from the Chair, and may then be debated as a substantive question, to which any further amendments to the original motion which are in order, so far as they shall be applicable, may be proposed, subject to the foregoing regulations. Such further amendments shall be disposed of in the same manner as the original amendment. When all the amendments have been thus dealt with, the Chairman shall take the vote of the meeting on the motion, as amended, as the substantive resolution.

31. A motion for dissolution or adjournment may be moved at any time as a distinct question, but not as an amendment, nor so as to interrupt a speech.

32. If a motion for dissolution is carried, the business before the meeting shall drop.

33. If a motion for adjournment is carried, the meeting shall be adjourned, and the business shall be resumed at the adjourned meeting.

34. A motion for the adjournment at a debate to some specified date and hour may be moved in the like manner, and if it be carried shall have the effect of postponing the debate on the question under consideration till the date and hour specified, and the other items on the agenda paper shall be proceeded with. If the motion be negatived, the debate shall be resumed.

35. A meeting or a debate, renewed or continued after an adjournment is to be decided one with that preceding the adjournment.

36. A motion to pass to the next item of business may be made at any time, in like manner, and subject to the same rules as one for adjournment. If such motion be carried, the motion under consideration and the amendment thereon, if any, shall drop.

37. At any time after a motion or amendment has been made a member may request the Chairman to put the question, and, if it appears to the Chairman that the motion has been sufficiently discussed, he may close the discussion by calling upon the mover for his reply, and may then put the question to the vote.

(4) to change the order of business,

(5) to refer any matter to any authority of the department or the University or the Government,

(6) to pass to the next item of business,

(7) to appoint a committee,

(8) to resolve the meeting into a committee,

(9) to propose that the question be now put.

(b) A motion under (1), (2), (6) or (9) above shall be put to the vote without discussion.

(c) Motions under (1), (2), (3), (4), (6), (8) and (9) shall only be moved with the previous consent of the Chairman.

15. Every motion shall be affirmative in form, and shall begin with the words "that".

16. Every motion must be seconded, otherwise it shall drop. The seconder of a motion may reserve his speech with the permission of the Chairman.

17. When a motion that is in order has been seconded, it shall be stated from the Chair, before it is discussed.

18. If no member rises to speak to the motion after it has been stated from the Chair, the Chairman shall proceed to put the question to the vote.

19. Not more than one motion and one amendment thereto shall be placed before the meeting at the same time.

20. A motion once disposed of shall not be again brought forward at the same meeting, or at any adjournment thereof.

21. No amendment shall be proposed which would in effect constitute a direct negative to the original motion.

22. Every amendment must be relevant to the motion upon which it is moved.

23. No amendment shall be proposed which substantively raises a question already disposed of by the meeting, or which is inconsistent with any resolution already passed by it.

24. The order in which amendments that are in order are to be taken up shall be determined by the Chairman.

25. An amendment must be seconded in the same way as a motion, otherwise it shall drop. A seconder of an amendment may reserve his speech with the permission of the Chairman.

26. When an amendment that is in order has been moved and seconded, it shall be stated from the Chair.

27. The mover of a motion for dissolution or adjournment has no right of reply.

28. When the Chairman has ascertained that no other member entitled to address the meeting desires to speak the mover of the original resolution may reply upon the whole debate.

50. Notice of meetings of committees may be sent to members by the Conveners through the Secretary or direct, but in the latter case a copy of the notice must invariably be sent to the Secretary.

51. Meetings of all ordinary committees of the Board shall, as far as possible, be held immediately before the meetings of the Board.

52. The Convener of a committee shall furnish to the Secretary a copy of the report of every meeting of the committee together with a list of the members present.

53. The quorum of a committee shall not be less than a majority of the members constituting it.

54. If the meeting of a committee fails for want of a quorum, the meeting may be adjourned to some other date when the members present will, even in the absence of a quorum, transact the business notified for the original meeting. The business of a meeting which fails for want of a quorum may also be transacted by correspondence.

55. Committees of Courses may dispose of their business partly by meeting and partly by correspondence.

56. At meetings of committees of the Board every question shall be decided by a majority of the votes of the members present. In the case of the votes being equally divided, the person presiding shall have a second vote.

56(a). A member of a Committee of Courses or of the Curriculum Committee or of a Sub-Committee who has or has had any pecuniary interest in a book which is submitted to the Committee or Sub-Committee for consideration as a text-book or for class use shall withdraw from the meeting while the book is under discussion.

57. As soon as practicable, after meeting of the Board, a draft of the minutes of such meeting shall be submitted by the Secretary to the Chairman and attested by him. The minutes shall then be printed and circulated to all members and such of them as were present shall, within a fortnight of the issue of the minutes, communicate to the Secretary any exceptions they may take to the correctness thereof. The minutes and the exceptions taken, if any, shall be laid before the next meeting of the Board and the minutes in their final form shall then be confirmed.

58. In any case not provided for by these byelaws the Chairman shall be entitled to give his own ruling as to procedure.

38. No member shall speak for more than fifteen minutes. When proposing a motion or amendment, or for more than ten minutes when seconding or speaking to a motion or amendment, or when replying.

39. The Chairman may, at any stage in the proceedings, at his own discretion or at the request of a member, explain the scope and effect of the motion or amendment which is before the meeting. He may also, at the conclusion of a debate, sum up the debate, if he so desires.

40. Any member may, with the permission of the Chairman, rise, even while another is speaking, to explain any expression used by himself which may have been misunderstood by the speaker, but he shall confine himself strictly to such explanation.

41. Any member may call the Chairman's attention to a point of order even while another member is addressing the meeting, but no speech shall be made on such point of order.

42. The Chairman shall be the sole judge on any point of order, and may call any member to order, and may, if necessary, dissolve the meeting or adjourn it to some hour on the same or the following day.

43. A motion or amendment may be withdrawn by permission of the Chairman by any member who has given notice of such motion or amendment.

44. Any motion or amendment standing in the name of a member who is absent from a meeting may be brought forward by any other member.

45. On putting any question to the vote, the Chairman shall call for an indication of the opinion of the Board by a show of hands in the affirmative and negative and shall declare the result thereof according to his opinion.

46. A motion for the appointment of a committee on a subject under debate may be made by any member at any time, and without previous notice.

47. A motion for the appointment of a committee must define the purpose for which the committee is to serve and the number of members to compose it. Amendments for enlarging or restricting the number may be made without previous notice. If the motion is carried, the member moving shall name the persons whom he wishes to form the committee. A ballot shall then be taken, if necessary, and the requisite number appointed from those who obtain the largest number of votes.

48. The convener of a committee shall be appointed at the time of the appointment of the committee.

49. The resolutions of a committee appointed by the Board shall be embodied in a report. The report shall be presented to the Board at its next meeting, subject to due notice.

22. Dr. Ishwari Prasad, History Department, Allahabad University.
23. Dr. Gorakh Prasad, Reader, Mathematics Department, Allahabad University
24. Mr. Saligram Bhargava, Reader, Physics Department, Allahabad University.
25. Rai Sahib S C Deb, Reader, Chemistry Department, Allahabad University (*deceased*)
26. Mr A C Mukerji, Reader, Philosophy Department, Allahabad University, Allahabad
27. Dr R N Ghosh, Lecturer, Physics Department, Allahabad University, Allahabad
28. Dr Iqbal Kishen Taimni, Lecturer, Chemistry Department, Allahabad University, Allahabad
29. Mr G D. Karwal, Economics Department, Allahabad University.
30. Mr. S M Zamin Ali, Allahabad University—(Arabic, Persian and Urdu).
31. Miss C R Poovaiyah, Principal, Crothwaite Girls' Intermediate College, Allahabad—(English)
32. Mr S Ranjan, Reader, Botany Department, Allahabad University Allahabad
33. Dr Huru Lal Mehra, Reader, Zoology Department, Allahabad University, Allahabad
34. Mr Gokal Chand, Principal, Kayasth Pathshala Intermediate College, Allahabad—(English)
35. Mr Brij Raj, Professor, Kayasth Pathshala Intermediate College, Allahabad—(English and Hindi).
36. Mr N B. Mitra, Ewing Christian College, Allahabad—(Mathematics)
37. Mr. J C Powell-Price, Inspector of Schools, Lucknow-cum-Fyzabad Division, Lucknow—(History).
38. Dr Tara Chand, Principal, Kayasth Pathshala University College, Allahabad—(History and Urdu).
39. Mr B. N. Kar, Principal, Anglo-Bengali Intermediate College, Allahabad—(English).
40. Dr K C Mehta, Professor of Biology, Agra College, Agra
41. Mr H. Krall, Professor of Chemistry, Agra College, Agra.
42. Mr. T D Sully, Professor of Philosophy, St John's College, Agra.
43. Maulvi S M. Ibn Ibrahim, Professor of Arabic and Persian, Agra College, Agra.
44. Mr. F. J. Feilden, Principal, Agra College, Agra—(English).
45. Mr. J. D Tahib-uddin, Principal, Government Training College, Lucknow—(Geography).
46. Mr. Narayan Das, Principal, Radhaswami Educational Institute, Agra—(English and Logic).

APPENDIX C.

List of the Panel of Inspectors for the Inspection of Intermediate Colleges.

The following persons have been nominated by the Board under Regulation 4, Chapter VII of the Board's Regulations, for the inspection of Intermediate Colleges in association with the Divisional Inspector of Schools :—

1. Dr. S. A. Khan, Head of the Department of History, Allahabad University, Allahabad—(History).
2. Dr. P. K. Acharya, Head of the Sanskrit Department, Allahabad University, Allahabad—(Sanskrit and Bengali).
3. Dr. N. R. Dhar, Allahabad University, Allahabad—(Chemistry and French)
4. Mr. H. Tinker, Principal, Government Training College, Allahabad—(Geography and Science).
5. Dr. E. Higginbottom, Principal, Agricultural Institute, Naini (Allahabad)—(Agriculture)
6. Dr. W. S. Dudgeon, Professor of Botany, Ewing Christian College, Allahabad
7. Maulvi M. A. Nami, Lecturer, Arabic and Persian, Allahabad University, Allahabad.
8. Mr. C. D. Thompson, Professor of Economics, Allahabad University, Allahabad
9. Mr. W. G. P. Wall (now Inspector of Schools, Allahabad division),—(Physics)
10. Mr. R. S. Weir, Assistant Director of Public Instruction, Allahabad—(Science)
11. Dr. Meghnad Saha, Professor of Physics, Allahabad University, Allahabad
12. Qazi Khurshed Ahmad, Vice-Principal, Government Intermediate College, Allahabad—(Mathematics)
13. Dr. D. R. Bhattacharya, Allahabad University—(Biology).
14. Dr. Ram Prasad Tripathi, Allahabad University—(History).
15. Mr. S. K. Rudra, Allahabad University—(Economics)
16. Pandit Amarnatha Jha, Allahabad University—(English and Hindi).
17. Dr. J. H. Mitter, Allahabad University—(Biology).
18. Dr. Beni Prasad, Head of the Department of Political Science, Allahabad University.
19. Dr. R. D. Ranade, Head of the Philosophy Department, Allahabad University.
20. Dr. A. Siddiqi, Head of the Arabic and Persian Department, Allahabad University
21. Mr. A. C. Banerji, Head of the Mathematics Department, Allahabad University.

22. Dr. Ishwari Prasad, History Department, Allahabad University.
23. Dr. Gorakh Prasad, Reader, Mathematics Department, Allahabad University.
24. Mr. Sahgram Bhargava, Reader, Physics Department, Allahabad University.
25. Rai Sahib S. C. Deb, Reader, Chemistry Department, Allahabad University (*deceased*).
26. Mr. A. C. Mukerji, Reader, Philosophy Department, Allahabad University, Allahabad.
27. Dr. R. N. Ghosh, Lecturer, Physics Department, Allahabad University, Allahabad.
28. Dr. Iqbal Kuben Taimni, Lecturer, Chemistry Department, Allahabad University, Allahabad.
29. Mr. G. D. Karwal, Economics Department, Allahabad University.
30. Mr. S. M. Zamin Ali, Allahabad University—(Arabic, Persian and Urdu).
31. Miss C. R. Pooviah, Principal, Crosthwaite Girls' Intermediate College, Allahabad—(English).
32. Mr. S. Ranjan, Reader, Botany Department, Allahabad University, Allahabad.
33. Dr. Huru Lal Mehra, Reader, Zoology Department, Allahabad University, Allahabad.
34. Mr. Gokal Chand, Principal, Kayasth Pathshala Intermediate College, Allahabad—(English).
35. Mr. Brij Raj, Professor, Kayasth Pathshala Intermediate College, Allahabad—(English and Hindi).
36. Mr. N. B. Mitra, Ewing Christian College, Allahabad—(Mathematics).
37. Mr. J. C. Powell-Price, Inspector of Schools, Lucknow-cum Fyzabad Division, Lucknow—(History).
38. Dr. Tara Chand, Principal, Kayasth Pathshala University College, Allahabad—(History and Urdu).
39. Mr. H. N. Kar, Principal, Anglo-Bengali Intermediate College, Allahabad—(English).
40. Dr. K. C. Mehta, Professor of Biology, Agra College, Agra.
41. Mr. H. Krall, Professor of Chemistry, Agra College, Agra.
42. Mr. T. D. Sully, Professor of Philosophy, St. John's College, Agra.
43. Maulvi S. M. Ibn Ibrahim, Professor of Arabic and Persian, Agra College, Agra.
44. Mr. F. J. Feilden, Principal, Agra College, Agra—(English).
45. Mr. J. D. Talib-uddin, Principal, Government Training College, Lucknow—(Geography).
46. Mr. Narayan Das, Principal, Radhaswami Educational Institute, Agra—(English and Logic).

47. Mr. D. L. B. Riley, Agra College, Agra—(History).
48. Mr. J. T. Goodchild, St. John's College, Agra—(Commerce).
49. Dr. K. C. Pandya, St. John's College, Agra—(Chemistry).
50. Dr. S. C. Sarkar, Principal, Balwant Rajput Intermediate College, Agra—(Biology).
51. Pandit Krishna Lal Misra, Agra College, Agra—(Sanskrit).
52. Mr. J. C. Taluqdar, St. John's College, Agra—(History).
53. Maulvi Abid Husam Faridi, St. John's College, Agra—(Persian).
54. Mr. H. Mark, St. John's College, Agra—(Logic).
55. Mr. Shyama Charan, Agra College, Agra—(Mathematics).
56. Mr. L. P. Mathur, St. John's College, Agra—(Zoology).
57. Mr. M. M. Sharif, Professor of Philosophy, Aligarh Muslim University, Aligarh—(Logic and Urdu).
58. Dr. L. K. Hyder, Professor of Economics, Aligarh Muslim University, Aligarh—(Economics).
59. Mr. M. Hyder Khan, Professor of Chemistry, Aligarh Muslim University, Aligarh.
60. Dr. A. S. Tritton, Professor of Arabic, Aligarh Muslim University, Aligarh.
61. Major E. W. Dann, Professor, Aligarh Muslim University, Aligarh—(Geography and English).
62. Mr. R. Firebrace, Professor of English, Aligarh Muslim University, Aligarh.
63. Mr. P. A. Rashid, Lecturer in English, Aligarh Muslim University, Aligarh.
64. Mr. Inamullah, Reader in English, Aligarh Muslim University, Aligarh.
65. Mr. A. B. A. Haleem, Professor of History, Aligarh Muslim University, Aligarh.
66. Mr. Muhammad Habib, Professor of History, Aligarh Muslim University, Aligarh.
67. Dr. Syed Zafarul Hasan, Professor of Philosophy, Aligarh Muslim University, Aligarh.
68. Mr. F. D. Murad, Reader in Physics, Aligarh Muslim University, Aligarh.
69. Dr. Qasim Ali Mansuri, Professor of Chemistry, Aligarh Muslim University, Aligarh.
70. Mr. Allah Baksh, Reader in Chemistry, Aligarh Muslim University, Aligarh.
71. Mr. Hamid-uddin Khan, Reader in Persian, Aligarh Muslim University, Aligarh.
72. Mr. Syed Hadi Husam, Reader in Persian, Aligarh Muslim University, Aligarh.

73. Pandit Ram Swarup Shastri, Reader in Sanskrit, Aligarh Muslim University, Aligarh.

74. Dr. Ataullah Butt, Reader in Zoology, Aligarh Muslim University, Aligarh.

75. Mr. A. M. Kurensby, Aligarh Muslim University, Aligarh—(Mathematics.)

76. Maulvi Mahdi Husain Nasiri, Headmaster, Government High School, Aligarh—(Arabic, Persian and Urdu) (*deceased*)

77. Mr. Chundi Lal Sahney, Principal, Government Intermediate College, Jhansi—(Physics)

78. Mr. H. Sanjiva Rao, Principal, Queen's Intermediate College, Benares—(English)

79. Mr. A. B. Dhruva, Pro-Vice-Chancellor, Benares Hindu University, Benares—(Sanskrit).

80. Mrs. Padma Bai S. Rao, Principal, Theosophical National Girls' School and Women's College, Benares—(English)

81. Pandit Gopinath Kaviraj, Principal, Government Sanskrit College, Benares—(Sanskrit).

82. Mr. B. A. English, Principal, Udal Pratap College and Hewett Kshattriya School, Benares—(English).

83. Mr. Chandu Prasad, Queen's Intermediate College, Benares—(Physics).

84. Mr. U. C. Nag, Professor of English, Benares Hindu University, Benares.

85. Dr. P. N. Dutt, Professor of Physics, Benares Hindu University, Benares.

86. Dr. M. B. Rane, Professor of Chemistry, Benares Hindu University, Benares.

87. Mr. A. C. Dutt, Vice-Principal, Bareilly College, Bareilly—(English)

88. Mr. D. P. Bhattacharya, Professor of Mathematics, Bareilly College, Bareilly.

89. Mr. W. Owens, Principal, Bareilly College, Bareilly—(English).

90. Pandit Tej Shankar Kochak, Agricultural School, Bulandshahr—(Agriculture).

91. Rev. C. D. Wood, Christ Church College, Cawnpore—(English).

92. Lala Diwan Chand, Principal, D. A. -V. College, Cawnpore—(English and Logic).

93. Dr. N. G. Chatterjee, Assistant Chemist, Government Technological Institute, Cawnpore.

94. Mr. P. Seshadri, Principal, Sanatan Dharm College of Commerce, Cawnpore—(English).

95. Mr. C. Maya Das, Principal, Agricultural College, Cawnpore—(Agriculture).

96. Mr. Hira Lal Khanna, Principal, B. N. S. D. Intermediate College, Cawnpore—(Mathematics).
97. Mr. S. C. Chatterji, Principal, Christ Church College, Cawnpore—(Logic and English).
98. Mr K. S. Bhatnagar, Sanatan Dharm College of Commerce, Cawnpore—(Economics).
99. Pandit Har Dutt Sharma, Sanatan Dharm College of Commerce, Cawnpore—(Sanskrit).
100. Pandit Ajodhya Nath Sharma, Sanatan Dharm College of Commerce, Cawnpore—(Hindi).
101. Dr. Ganesh Prasad, Hardinge Professor of Higher Mathematics, Calcutta University.
102. Rai Sahab J. Mukerji, Principal, S. S. Memorial Intermediate College, Chandausi—(English) (*deceased*).
103. Mr. Lahahman Prasad, Principal, D. A.-V. Intermediate College, Dehra Dun—(English).
104. Mr. Sudhir Kumar Ghosh, Principal, Government Intermediate College, Etawah—(Physics).
105. Pandit Durga Dutt Joshi, Principal, Government Intermediate College, Fyzabad—(Chemistry).
106. Mr. H. G. Nandi, St. Andrew's College, Gorakhpur—(Logic).
107. The Rev. A. C. Pelly, Principal, St. Andrew's College, Gorakhpur—(English).

158. Mr. K. P. Bhatnagar, Professor, D. A. V. College, Cawnpore—(Economics).

APPENDIX D.

List of the Teaching Staff of Colleges in the United Provinces recognized by the Board.

MEERUT COLLEGE, MEERUT.

Affiliated in Arts, 1892 and 1893; in Science, 1906; in Law, 1893.

This institution owes its origin to the liberality of the nobility and gentry of the Meerut division, who created an Endowment Fund for the encouragement of higher education within the division.

The College, which is aided by the Government and by the District and Municipal Boards, teaches up to the M.A., B.A., B.Sc. and LL.B. standards, and also for the Intermediate Arts, Science and the Commerce Examinations of the Board.

There is a Business department in which Typewriting, Shorthand and Book-keeping are taught.

The College stands on its own grounds, 63 bighas in extent. The building consists of (1) the College, (2) old Hindu Hostel including quarters for Indian Professors, (3) new Hindu Hostel with a Pooja Hall given by L. Hardeo Prasad, (4) third Hindu Hostel, (5) Muhammadan Hostel, (6) Principal's and Vice-Principal's bungalows. The College Hostels provide accommodation for 226 students and there are twelve Professors living in residential quarters in the College compound.

The new College building, which up to the present has cost about Rs. 1,00,000 consists of two wings, one containing the Arts classes and the other the Laboratories and Science lecture rooms, with workshop and gas plant.

The institution was founded in 1892, and is governed by a Board of Management, but the immediate control of the College is in the hands of an Executive Committee, three members of which are *ex-officio* and the rest elected by the Board of Management.

An endowment, producing some Rs. 400 annually, was given by the late Rai Ramanuj Dayal Bahadur. The endowment is spent in providing scholarships to poor students of the Meerut College.

There are also —

- (1) Four L. Har Sahai Scholarships of Rs. 4 each.
- (2) Rai Bahadur Nihal Chand Scholarship for the best Sanskrit student of the Vaish community. (Rs 60 a year.)
- (3) Four L. Nanak Chand Scholarships (one for each year) for Hindu students whose circumstances render it difficult to continue their studies. (Rs 312 a year)
- (4) A Scholarship of Rs 5 per mensem on behalf of the Beopar Sahayak Bank, Ltd, Meerut, for a needy student of the Meerut College.

(5) Professors' and students' King Edward VII Memorial Scholarships (eight scholarships of Rs. 4 and eight of Rs. 3 each were awarded during the year 1924-25).

(6) Hafiz Abdul Karim Scholarships for needy Muhammadans. (During the year 1924-25 eight Scholarships of Rs. 600 in all were awarded.)

Besides these scholarships nine Government Scholarships were awarded during the year 1924-25 to the meritorious students of the College.

The "Hem Swarup Medal" is awarded annually to the best student in the fourth year B.A. class; the "Nirtya Kali Dass Silver Medal" to the best student in the fourth year II So. class; and the "Ganga Saran Silver Medal" to the first student in the Intermediate Arts and the "Oswini Coomarr Silver Medal" to the first student in the Intermediate Science class.

DAYANAND ANGLO-VEDIC INTERMEDIATE COLLEGE, DEHRA DUN.

This institution was first started at Meerut in 1893 as a school under the control of a committee of management. The school was afterwards taken over to Dehra Dun in 1904 and the munificent liberality of Thakur Puran Singh Negi infused a new life into it. The signal success and improvement which began to attend the institution from 1912 encouraged the Managing Body to take steps for raising its status, and it was converted into an Intermediate College in 1922. It attracts students not only from different parts of India but also from places such as Nepal, Burma and Kabul.

The College has an ideal site commanding a view of the Himalayas and measuring about 20 acres. The College buildings which have been erected at a cost of three lakhs of rupees now comprise 16 spacious class rooms, a library, a Professors' common room and a big central hall. Two large wings called the Shatabdi Blocks have recently been completed at a cost of Rs. 54,000 containing four separate lecture halls and two laboratories.

The Hostels are surrounded by extensive playing fields and have accommodation for about 200 students. All Hostels have resident Superintendents, almost all of them being teachers in the College. The laboratories are equipped with adequate arrangements for practical work in Physics and Chemistry. The apparatus and chemicals alone cost Rs. 20,000. One lakh of rupees is annually spent on the maintenance of the College and Hostels. Attached to the College and under the control of the Principal is a Sanskrit Pathshala which imparts free instruction up to the standards of Shastri, Acharya and Tirtha Examinations of the various Indian Universities.

The staff consists of 37 experienced and qualified teachers, among whom are to be reckoned 9 M.A.'s and M.Sc.'s and 6 B.A.'s and B.Sc.'s trained or experienced.

Adequate provision has been made for the physical welfare of the students and athletic instruction is imparted according to Indian as well as European methods. Religious instruction constitutes a special feature of the institution. The College has Debating Societies, the object of which is to inculcate in the students a higher conception of civic life and stimulate the powers of expression. Extensive additions have been made to the

College Library which consists of carefully-selected educational books. The Reading Room is provided with useful periodicals, newspapers and magazines, both English and Vernacular. Drawing, Painting and Handicrafts receive special encouragement and the College Museum affords ample testimony to it. First-aid lectures are regularly given for the purpose of promoting social service among the students.

INSTRUCTIVE STAFF.

1. Lakshman Prasad, M.A., Principal English X and XI
2. A. D. Banerji, M.A., B.L., Vice-Principals Civics, XI and XII; History, X to XII.
3. B. N. Chhibbar, B.A., L.T. .. English, Geography and History, X.

 Acharya, Advanced Hindi.
21. Raghubar Dayal Acharya .. Sanskrit, IX.
22. Syed Abbas Husam, Experienced Persian, IX.

N. R. E. C. INTERMEDIATE COLLEGE, KHURJA.

The N. R. E. C. Intermediate College, Khurja, was established as a High School in 1903 by the late Hon'ble Rai Nathi Mal Bahadur, C.I.E., and his brother Lala Ram Sahai Mal. It continued to prosper under the fatherly care of the founders until 1915 during which period the main building consisting of a hall and 20 rooms and Gorind and Hewett Hostels each accommodating about 100 students were built at a cost of about Rs. 1,59,319. The Hon'ble Rai Nathi Mal Bahadur, C.I.E., died in 1915, but he very sagaciously had made over the institution in his lifetime to a Board of Trustees and had endowed it handsomely. The endowment at present consists of a village worth about Rs. 80,000 and cash Rs. 99,000, invested in various securities.

The Board of Trustees are managing the institution since 1909. Two very fine blocks, one Physics laboratory and the other for the Chemistry laboratory, have been built since and also a bungalow for the Principal and one set of six class rooms for classes IX and X at a cost of about Rs. 22,834, Rs. 16,310, Rs. 10,287 and Rs. 16,339 respectively.

Another block of six rooms has been built for the Intermediate and C.D. classes which were added in 1923 and 1924 respectively.

A hostel for College classes is nearing completion. The Government has generously given the entire cost of both the above.

INSTRUCTIVE STAFF.

AGRA COLLEGE, AGRA.

In 1819 Pandit Ganga Dhar Shastri bequeathed to the East India Company the rents of certain lands in the districts of Aligarh and Muttra for the promotion of education. In accordance with the Shastri's will the Agra College was opened in 1823, the endowment then yielding over Rs. 22,000 a year. Subsequently, Government added to the income and raised the College to its present status.

In 1883 the management was transferred to a Board of Trustees. At the time of the transfer the Trustees made an appeal to the noblemen and gentlemen of the Province of Agra, and a lakh of rupees was added to the endowment while the capital of the Scholarship Fund was raised from Rs. 25,000 to Rs. 58,500. The Maharaja of Iharatpur maintains additional scholarships.

The immediate control of the College is in the hands of a committee, two of the members of which are official, the rest nominated by the Trustees.

The College formerly consisted of two departments, viz., the College proper under a principal and the School under a head master. But in July, 1909, the School department was handed over to Government by the Trustees in order that they might be free to devote all their resources for the benefit of the College.

There are 422 students enrolled in the Intermediate (Arts and Science) classes, 331 in the degree and post-graduate classes of the College department and 204 in the Law department, including 65 students who have taken both M. A. or M. Sc. and Law simultaneously.

There are 378 College students residents in the College Hostels and 77 in the Caste Boarding Houses.

INSTRUCTIVE STAFF.

1. F. J. Fielden, M.A. (London), Principal.
M.A. (Cantab).
2. Chandra Puri Goswami, M.A., Professor of English.
LL.B. (Allahabad).
3. Syed Mohd. Ibn Ibrahim, M.A. Ditto Arabic and Persian.
(Allahabad), First Class, Arabic.
4. Krishna Lal Misra, M.A. .. Professor of Sanskrit.
5. P. M. Bhambhani, B.A. (Hons.), Ditto Philosophy.
M.A. (Bombay).
6. Hari Ram, M.A., B.T. (Punjab), Lecturer in English.
English, M.A. (Allahabad),
Philosophy.
7. Nagendra Nath Mookerji, M.A., Ditto ditto.

ST. JOHN'S COLLEGE, AGRA.

The College is under the general control of the Church Missionary Society and a Governing Body of which the Bishop of Lucknow is *ex-officio* Chairman.

The object of the College is twofold : to provide education on Christian principles for the Christian under-graduates of the University and to provide an opportunity for those who have been brought up in the religious atmosphere of a mission school to continue their student life in surroundings similar to those to which they have grown accustomed.

The Degree and Intermediate classes have not been separated and the students of both the classes live together in the five College Hostels.

The College provides instruction in Arts, Science and Commerce for both Intermediate and Degree students.

There are various scholarships both for Christian and non-Christian students, details of which may be had from the College office.

RADHASWAMI EDUCATIONAL INSTITUTE, AGRA.

This institution was founded by the Radhaswami Satsang Sabha, Dayalbagh, Agra, with the object of placing the education of boys and girls on a sound moral and spiritual basis. It was raised to the High School standard in July, 1918, and to the status of an Intermediate College in 1922. The institution is recognized in History, Geography, Persian, Sanskrit, Science and Drawing for the High School Examination and in Physics, Chemistry, Biology, Mathematics, History, Economics, Logic, Persian, Sanskrit, Urdu and Hindi for the Intermediate Examination of the Board.

The institute is located in a healthy locality outside the township of Agra and classes are conducted in a magnificent double-storied building of red brick interspersed with white marble, constructed by the Sabha at a considerable cost.

The management of the institution is placed in the hands of a Managing Committee consisting of eleven members. The institute is in receipt of grant from the provincial revenues and the difference between the income and expenditure of the Institute is made good by the Radhaswami Satsang Sabha from its funds besides meeting this difference, the Sabha has, up to this time, spent about 5 lakhs on the construction and equipment of College buildings, hostels, residential quarters for the staff, etc.

Of the important and distinguishing features of the Institute mention may be made of the following :—

- (1) The majority of the students live in the hostels and quarters have been provided to almost all the members of the staff in the vicinity of the Institute, so that they may associate closely and frequently with the pupils.
- (2) It is an all-India institution and boys from all parts of the country are admitted and made to live and dine like members of a common brotherhood.

(3) Manual Training is encouraged among the senior boys and facilities for the same are provided in our Model Industries workshop.

(4) A religious class is held every Sunday in which lectures are delivered on non-denominational theistic subjects and general principles of morality, with the object of making the students God-fearing and God-loving young men.

BALWANT RAJPUT INTERMEDIATE COLLEGE, AGRA.

The origin of this Institution may be traced back to the year 1833, when Thakur Umrao Singhji and his brother, Kunwar Nanni Lal Singhji of Kotla, established a Boarding House in their private residence at Bagh Farzana at Agra with only 20 Rajput boys under a Superintendent and a Tutor. They forthwith enlisted the support of several Rajput zamindars, chief among whom were—Raja Baldeo Singhji of Awagarh, Raja Lachman Singhji of Waxirpura, Kunwar Lekhraj Singhji of Gabbana and Thakur Kalyan Singhji of Jalalpur.

In 1886, Raja Balwant Singhji, C. I. E. of Awagarh, feeling the want of a suitable English school for Rajput boys, in which the traditional characteristics of the race could be fostered, purchased the present site of the college with a few old dilapidated buildings at a cost of Rs. 13,000. Subsequently, a sum of rupees one lakh was paid from his Estate for the construction of the school buildings which were constructed, during 1907-08 and 1912-13, at a cost of Rs. 1,03,000 through the munificence of the said Raja Sahib.

In 1887, the Hostel was formally opened by Sir Auckland Colvin, the then Lieutenant-Governor of the United Provinces, and was named the Jubilee Rajput Boarding House.

By the year 1899, the school was placed on a firm footing through the strenuous efforts of Raja Balwant Singhji of Awagarh and the Hon. Raja Rampal Singh Bahadur of Kalakanlar. The school was formally opened by Mr. Imfrey, then Commissioner of Agra division.

In 1908, the school passed directly under the management of Raja Balwant Singhji and enjoyed his paternal care until his demise in 1909. He had, however, left by a codicil of his will, the enormous sum of rupees 9 lakhs for the maintenance of the school which, since then came to be known as the Balwant Rajput High School in loving memory of its illustrious founder. The whole of this sum in Government Promissory notes was kept in deposit with the Treasurer of Charitable Endowments for the United Provinces, bearing interest at 3 per cent.

The Balwant Rajput High School Trust came into being in 1915 and His Honour the Lieutenant-Governor of the United Provinces condescended to become a visitor of the School. The School, and since lately

the College, is under a Committee of Management of which the District and Sessions Judge of Agra is the President and Raja Suryapal Singhji Sahib of Awagarh is the Vice-President and Honorary Secretary.

The admirable success which began to attend the Institution in past years encouraged the Managing Committee to raise its status and it was transformed into an Intermediate College in 1928. At present it is affiliated to the Board of High School and Intermediate Education, United Provinces, for the Arts Section only, but steps are being taken to start the Science section in the coming year. A sum of Rs 1,40,000 has now been given by Raja Suryapal Singh Sahib of Awagarh from his private purse for the advancement of the College.

The College enjoys an ideal site with seven extensive play-grounds within the College area. The Boarding House provides accommodation for 300 boys and is divided into 8 blocks, viz, (1) Kashmir block, (2) Udaipur block, (3) Awagarh block, (4) Jaipur block, (5) Dikaner block, (6) Karauli block, (7) Jodhpur block and (8) Alwar block, after the name of Rajput states.

There is a separate Boarding House outside the College compound for boys under 14 years, placed under the charge of a house master and a whole-time Doctor of the College, who resides there.

In 1922 the Warden system was introduced in the Hostels, which is still in vogue with added facilities for the wards.

The Hostel has a dispensary which is attended by the whole time Doctor and is also provided with a Library and a Reading-Room apart from those existing in the College.

The College Library contains more than 3,000 volumes and large additions are being made every day. The College has a big Central Hall, spacious Class-rooms and a well equipped Reading-room regularly supplied with periodicals, newspapers and magazines. There is also a religious instructor and prayers are regularly offered by the students under his guidance. Admission is open to all but reduced fees are charged from the Rajputs.

Besides the college scholarships aggregating Rs 2,550 awarded to deserving students, there are also special Awagarh Scholarships amounting to Rs. 288.

The College has a Literary Society and publishes a quarterly Magazine which provide ample facilities to the students to improve their literary faculties.

One of the special features of the College is the strict attention paid to compulsory games and sports directed by the Games Secretary, the Drill Master and the members of the Staff.

DHARMA SAMAJ INTERMEDIATE COLLEGE, ALIGARH.

This institution is maintained by the Dharma Samaj Society founded by the late Rai Sahib L. Badri Prasad, a prominent rais of Aligarh. The main object of the Society, which is a registered body according to Societies Registration Act, XXI of 1860, is to spread education. This Society started a Sanskrit Pathshala about the end of the last century; but owing to the increasing demands of English education and want of accommodation in the local High Schools, English classes were added to the Pathshala

and it was recognised as a Middle School in 1909. Two years later it rose to be a High School and from 1911 to June, 1929, it continued to be called the Dharma Samaj High School. The College classes have been opened from July, 1929. The Dharma Samaj Intermediate College is recognised by the Board of Secondary and Intermediate Education for the teaching of History, Logic, Mathematics, Economics, Sanskrit, Persian, Hindi and Urdu. From July, 1930, the College has been recognised for the teaching of Science-Physics and Chemistry in the Intermediate classes and to ensure efficient teaching of these subjects, two separate laboratories have been fully equipped. In addition to teaching the ordinary subjects of the curriculum prescribed by the Department of Education and the Board, a special course of lessons on religious instruction is taught to the students.

Its immediate control is in the hands of the Managing Committee of the Dharma Samaj Society assisted by an Education Committee of which the Principal is an *ex officio* member.

The institution gets a grant from the Provincial Government and the Aligarh Municipal Board. It also gets income from landed property endowed by the late Rai Sahib L. Badri Prasad and interest on Rs. 42,000 invested in Government securities.

The main College building consists of a big hall having on two of its sides seven small class rooms for the teaching of some optional subjects. In addition to this there are three blocks, the biggest of which consists of 12 class rooms, 6 of them being 22 feet by 23 feet each, and 6 (six) 22 feet by 35 feet each. There are two side blocks of 4 rooms each. Classes from VII to XI are accommodated in these rooms. The lower classes from III to VI have been shifted to a newly constructed separate building.

There are at present two rented hostels attached to the college. A new hostel building has been almost completed in the college premises. The College has acquired an adjoining plot of land measuring about 12½ acres. The ground has been properly levelled, and provides accommodation for several playing fields for hockey, foot-ball, cricket, volley-ball, etc.

The College has its own monthly magazine to which students are encouraged to contribute frequently. In addition to this, the College possess a number of students associations that contribute to its corporate life : the Student's Common Room, the Debating Society, the Hindi Sahitya Parishad, the Dharma Samaj College Athletic Association, the Scout Troop, the Junior Red Cross Society, the Old Boys' Association and the Brotherhood Association, the principal aim of which is to give help to poor deserving students. There is a running shield for Elocution Competition presented by the Honble Rai Bahadur Sir Sita Ram, M.A., LL.B., President of the United Provinces Legislative Council in honour of his late father L. Jugal Kishore Ji.

BAREILLY COLLEGE.

This College was started in 1884 in the form of College classes attached to the Bareilly High School to take the place of a College formerly maintained by Government at Bareilly, which, having been originally started as a school in 1836, became a College in 1850, and on the abolition of the College department in 1877 was converted into a High School.

The College is maintained from a fund raised by public subscription, among the original subscribers having been the Most Hon'ble the Marquis of Ripon, K.C., His Highness the late Nawab of Rampur, His Highness the late Maharaja of Darbhanga, Raja Jagat Singh of Jajpur, Raja Malhara Rao Vinayek, Raja Jai Kishan Das, C.S.I. of Moradabad, Munshi Newal Kishore, C.I.E., Maharani Sarnomas of Kasumbazaar, Bengal and others. The College is aided by Government and by the principal district and municipal boards of Rohilkhand and Kumaun.

An increase in the Endowment Fund and handsome donations from Raja Kishan Kumar of Moradabad, the late Rai Sheo Baksh, Rai Bahadur, and Rani Narami Koer, supplemented by liberal contributions from Government, have made the foundation of the College as an independent institution possible, and it has now been transferred to buildings which were erected on a site presented by His Highness the Nawab of Rampur, and were opened by His Honour Sir J. D. LaTouche, K.C.S.I., Lieutenant-Governor of the United Provinces, on July 17, 1906.

The general control of the College is vested in a Board of which the Commissioner of Rohilkhand is President, the executive management being in the hands of a committee elected from the Board of Control.

There is a residential house for students erected by Government. It has accommodation for 72 students. The library is well-equipped and is divided into general and departmental sections. The departmental sections are in charge of professors of the various departments.

The students' organizations comprise a College Debating Society called the Union, a Hindi Literary Society, a Urdu Literary Society and a Boarding House Debating Union. The College Common Room is managed by students themselves. All the organizations are under the direct supervision of members of the staff.

The College teaches up to the B.A. and B.Sc. standards of the University of Agra, and prepares for the Intermediate Examinations in Arts and Science and the Commerce, conducted by the Board of High School and Intermediate Education, United Provinces. The Intermediate and Commerce classes are carried on in the same building as the Degree classes and with very largely the same staff.

Besides six Government stipends, there is a scholarship fund for the benefit of the poor and deserving students of the Bareilly College. There are 13 endowed and 12 municipal and other scholarships. Medals and prizes are annually awarded to deserving candidates.

The College has undergone considerable development and an extension fund has been opened for purposes of further expansion. The family of the late Lala Brij Mohan Lal have donated over Rs. 15,000 towards the construction of a chemistry block in his memory. The building is complete and the equipment has been finished by Messrs. Mansfield and Sons, Calcutta.

The number of students at the close of the session was 155 in the Intermediate, and 29 in the Intermediate Examination in Commerce classes.

INSTRUCTIVE STAFF.

1. William Owens, B.A. (Sydney and London), M.B.E., Principal. English, XII.
2. A C Dutt, M.A. (Allahabad and Lucknow), M.B.A.S. (England). English, XI and XII. Vice-Principal.
3. M. M. Guptara, M.A., (Allahabad), Gold Medalist and Q.E., Victoria Jubilee Medal Holder. Ditto.

18. R. S. Mathur, M.Sc. (Agra) .. Physics, XII.
19. Lakshmi Narayan, M.Sc. (Allahabad), F.C.S. Chemistry, XI and XII.
20. A. K. Bhattacharyya, (Allahabad), Chemistry, XI and XII. M.Sc., Research Scholar in Chemistry.

SHYAM SUNDAR MEMORIAL INTERMEDIATE COLLEGE, CHANDAULI.

Recognized, 1909.

This institution was founded in loving memory of the late Sahu Shyam Sundar by his widow Ram Ram Kahi Devi, K.I.H., and mother Srimati Tulsi Devi, *raises*, bankers and landholders of Chandauli. It was started as a High School in the year 1909, and raised in 1933 to the status of a College teaching up to the standard of the Intermediate and Commercial Diploma Examinations.

The College stands on an ideal site measuring about 173 *byahze*. The buildings comprise five blocks.

There is a net annual income from endowments of Rs. 9,000 and annual grant of Rs. 5,000 for the upkeep of the College classes.

Hostels.—Attached to the College are five hostels to accommodate 250 boarders. A whole-time medical officer, a dairy, a *dhobi*, a barber and a book and stationery shop have been provided within the College premises.

Courses of study.—As prescribed by the Board, Lectures on First-Aid and Hygiene and lessons on Music are also given.

Scholarships, prizes and medals

A number of small scholarships aggregating in value Rs. 116 per annum and medals and prizes are awarded annually to deserving students.

Games.—Ample provision exists. One shield and three cups are annually competed for by the different teams of the College.

Besides a College magazine which appears once a quarter, there are a number of associations, viz., *Commerce Association, Nagri Pracharini Sabha, Historical Society, Debating Society and Old Boys' Association, A Poor Boys' Aid Library* and a *Loan Fund* are managed by the Old Boys' Association for the benefit of the poor students.

CHRIST CHURCH COLLEGE, CAWNPORE.

Affiliated in Arts B. A 1892 ; B.A. 1893 ; M. A 1899.

Degree classes re-started, 1926.

College classes were, at the outset, held in the High School building
A separate College building was erected and opened for use in 1897

To the main building additions have since been made. In 1906 a
Science lecture room and Physical and Chemical laboratories were built.
In 1911 the reading room was enlarged and converted into a Library. The
College Hall was enlarged and re-furnished in 1916.

The College Hostel provides accommodation for about 70 students,
Hindu, Muhammadan and Christian. It was opened in 1893 and has since
been enlarged by the addition of two new blocks. A European member
of the staff is in residence as Warden of the Hostel.

The College is under the general control of the Lucknow Diocesan Board
of Missions and a Governing Body of which the Right Rev. the Lord Bishop
of Lucknow is Chairman.

INSTRUCTIVE STAFF.

DAYANAND ANGLO-VEDIC COLLEGE, CAWNPORE.

The Dayanand Anglo-Vedic College, Cawnpore, was started in the year 1919 as a Degree College affiliated to the University of Allahabad including Intermediate (Arts) and Commercial Diploma Classes. Now the College is affiliated to the University of Agra for the Master of Arts and Bachelor of Laws, Arts, Science and Commerce Examinations and is also affiliated to the Board of High School and Intermediate Education, United Provinces for the Intermediate Examination in Arts, Science and Commerce.

The College was housed in a bungalow for the first six years. The accommodation available in it was found to be inadequate and the construction of a new building was commenced in the year 1924. Now the College building consists of :—(a) Science Block of 10 big rooms (six rooms 30' x 36' and four rooms 20' x 30') and six smaller rooms; and the Main College Building having 20 lecture rooms, 7 smaller rooms and the Central Hall (70' x 56'). The College building is one of the finest educational buildings in the Province, situated in healthy environments and consisting of airy commodious class rooms.

The number of students on the 31st March, 1929, was 482; 207 in the Degree Classes and 275 in the Intermediate Classes.

The results achieved by the students of the College at the University and Intermediate Board's Examination have been satisfactory. The percentage of passes has uniformly been above the average.

The number of scholarship and stipend holders during the year was 31 in the Intermediate Classes, and 39 students got concession in fee.

The College Hostel is situated in close proximity to the College and provides accommodation for about 280 boarders.

The College maintains Football, Cricket, Hockey and Volley Ball Teams. Basket Ball, Tennis, Badminton and Indian Games are also played. There is also a boating and swimming club. Provision is made for Physical Exercise also. The College won the following Cup and Shields in the Games organized by the Cawnpore Inter College Tournament Committee besides numerous medals won by individual sportsmen —

- (1) Mrs. David Hockey Cup. (For the third year consecutively)
- (2) Babu Brijendra Swarup Tug-of-war Shield (for the fourth year consecutively).
- (3) Babu Dwarka Prasad Singh Regatta Championship Shield.

The following associations are maintained in the College —

- (1) The College Union
- (2) The Historical Association.
- (3) The Economic Association.
- (4) The Hindi Sahitya Samity and
- (5) The Commerce Union.

This year, for the first time, the College published two issues of the College Magazine.

The Special Features of the College are as follows —

- (1) Religious and moral instruction in accordance with the broad principles of Vedic Theology is given in addition to the secular education required for the various University and Board's Examinations.
- (2) Students are brought in close personal touch with their professors who not only supervise their studies but also see that they make proper use of their opportunity to develop a good moral character.

(3) Simple living and high thinking is the guiding principle for all who work in the College as Professors or as students.

BISHAMBHAR NATH SANATAN DHARMA INTERMEDIATE COLLEGE, CAWNPORE.

The College is under the general control of Brahmavarta Sanatan Dharma Mahamandal, Cawnpore. It aims at imparting the liberal education in Arts and Science up to the Intermediate standard in such a religious atmosphere that its products may be inspired by the high ideals of the Sanatan Dharma.

The institution was first started in 1917 as a small Pathshala, which, within two years, developed into a Middle School. In 1922 it was raised to the status of a High School with commerce as its special feature. Being the only institution of its kind in the vicinity it soon gained in popularity.

Thanks to the munificence of late Raj Bishambhar Nath Bahadur, who in addition to the endowment of property worth one lakh of rupees, made a gift of a valuable garden on the Mall, which enabled the Managing Committee to convert the institution into an Intermediate College.

The College is recognised in the following subjects —

1 English	7 Physics.
2 Mathematics	8. Chemistry
3 Sanskrit	9 Biology
4 History	10 Geography
5 Logic	11. Economics
6. Hindi	12 Urdu

There are two departments of the College, distributed over in two separate buildings. The upper department consisting of classes VII to XII is in the new building on the Mall, and the lower department consisting of classes III to VI is accommodated in the old building on the Weston road.

INSTRUCTIVE STAFF

Specialised in Manual Training.

EWING CHRISTIAN INTERMEDIATE COLLEGE, ALLAHABAD.

In October, 1840, the British East India Company made over its College work at Allahabad to the American Presbyterian Mission. When the Civil Station was removed from the Jumna in 1833 the Mission purchased the Court building for educational work and started a Collegiate School. After a few years college classes were given up and school classes alone continued, the institution being known as the Jumna Mission School or the A. P. Mission High School.

In 1900 the American Presbyterian Mission decided to reopen the College at Allahabad, and the First Class was formed in 1901. In order to keep school and College separate, the old court building was torn down and a better home for the school erected at the western end of the Jumna compound, leaving the eastern end free for the College.

This has now the following buildings —A main College building with a Laboratory for Biology, a Library (of more than ten thousand volumes) administrative offices, eleven lecture rooms, and an Assembly Hall to seat one thousand, a Laboratory for Physics and one for Chemistry; an Infirmary, ten residences for members of the Staff, and five Hostels, with a total accommodation for two hundred. Four of the Hostels are arranged with suites of rooms for one or more unmarried professors.

In 1923, as a result of the reconstruction of the University of Allahabad, the College gave up its B. A. and M. A. classes to the University, and was resolved into two Institutions—an Intermediate College, which took over classes IX and X from the High School, and an Internal College which provided Hostels for University students and gave them tutorial instruction.

The Intermediate College now (August, 1925) has 580 students on its roll

**KAYASTHA PATHSHALA INTERMEDIATE COLLEGE,
 ALLAHABAD.**

The Kayastha Pathshala owes its origin to the magnificent generosity and far-sighted patriotism of Munshi Kala Prasad Kulbhaskar, who gave away his entire property for the intellectual, moral and physical uplift of the Hindu community. In 1873 it was started as a Primary School; it was raised in 1878 to the status of an Anglo-Vernacular School, and in 1882 to that of a High School. In 1925-26 it was affiliated to the Allahabad University up to the Intermediate standard and in 1914 to the B.A.

Since April, 1932, the Kayastha Pathshala has been divided into three departments—

- (i) The Internal College of the University which provides residence and tutorial and supplementary instruction for students reading in the University,
- (ii) The Intermediate College, which consists of classes IX and X of the High School; the First and Second-year classes of the College (called now classes XI and XII), and the First and Second-year commerce classes preparing candidates for the Commercial Diploma Examination of the Intermediate Board; and
- (iii) The Middle School which consists of classes III to VIII.

In January 1931, there was a redistribution of classes in the Intermediate College and the Middle School. Classes VII and VIII of the Middle School were transferred to the Intermediate College when the latter was moved to its new buildings in Canning Road opposite George Town. These comprise of a magnificent double storied block, designed according to the modern requirements of an Intermediate College with a beautiful central hall and spacious and well-ventilated class rooms. There is a separate double storied block for the laboratories. The main block measured 305 feet in length. The buildings are very substantially built with reinforced concrete roofing at a cost of Rs. 4,20,000 and are situated on extensive grounds covering ninety-three acres.

ANGLO BENGALI INTERMEDIATE COLLEGE, ALLAHABAD.

This institution took its birth as a humble 'pathshala' in November, 1877, when the Bengali residents of Allahabad, feeling the want of a suitable school for imparting English education to the Bengali boys through the medium of their mother-tongue, made a small beginning with a handful of boys and one teacher in a private house in the city. With the help of private subscriptions this infant school steadily worked its way through many weary years of struggle. In the year 1886 it became a self-supporting institution with 178 boys on its roll and it taught up to the Entrance Standard of the Calcutta University down to 1898, and in 1899 it was affiliated to the Allahabad University, sending up boys for the Entrance examination every year and achieving excellent results in most years.

In 1894 Sir Promoda Charan Banerji laid the foundation-stone of the present building, and on 23th November, 1899, the late Sir Arthur Strachey, Chief Justice, opened the school in the new building as it then stood. At the end of December, 1925, when it had completed 48 years of its existence, it had 523 boys on its roll. With the sanction of the Board of High School and Intermediate Education the school was raised to the status of an

Intermediate College, which was formally opened on July 9, 1926. Recognition, in the first instance, was limited to English, Mathematics, Sanskrit, Modern History and Logic, and in 1928, it was extended to two more subjects, Bengali and Economics.

There is a Literary Union in the college; its aim is to train its members in the art of public speaking and improve their power of debate and elocution in English and Vernacular. Every student is required to attend the meetings of the Union.

An Historical Society has been recently started for the benefit of students taking up history as one of their subjects. Persons of note are invited, whenever convenient, to give the boys the benefit of their experience, knowledge, observation, and thinking.

The college endeavours to administer unto each student the proper dose of physical exercise. It believes that sound education must rest on a sound physical basis.

The Scouts' department is under the direction of experts, who are thoroughly convinced of the great power for doing good that the Scouting movement carries.

The college makes special efforts in developing a genuine feeling of brotherhood between students and students, and of cordiality between teachers and students. Once, at least, every year the teachers, students and their guardians meet at college by way of re-union on the occasion of Basant Panchami.

In the interest of teachers there is a Teachers' Benefit Fund, towards which a minimum subscription of Re. 1 per mensem is contributed by each member of that organisation.

Besides free and half free studentships there are various scholarships and, for the benefit of needy and deserving scholars, a Students' Benefit Fund has been created for the last two years by the joint efforts of the staff and the students.

To remove the crying need of out station students a hostel has been started this year in a decent house taken on rent.

The college is located in a double storied commodious building in a healthy part of the town on the City Road, and has ample play grounds.

The management of the college is controlled by the Allahabad Bengal Educational Society, which is a registered body.

The institution is placed in the hands of a managing committee formed out of the above society consisting of a President, two Vice-Presidents, one Secretary, two Assistant Secretaries, and 25 elected members. The present office-bearers are as follows —

President —Hon'ble Mr. Justice Lal Gopal Mukerjee.

Vice-Presidents —Hon'ble Mr. Justice Lal Mohan Banerji,

and

Mr. Hari Mohan Roy, B.A., B.L.

Secretary.—Rai Bahadur Hem Chandra Ganguli.

Asstt. Secretaries.—Mr. Nohn Behari Mitra, M.A.,
and

Mr. Jyotish Chandra Chatterji, M.Sc.

21. Gagan Chandra Mukherji, M.A. (to be temporary). Bengali, XII to IX.

UDAI PRATAP COLLEGE AND HEWETT KSHATTHIYA SCHOOL, BENARES.

The Uday Pratap College and Hewett Kshattriya School was originally a High School founded by Raja Uday Pratap Singh, C.S.I., of Bhunga, with an endowment of 10½ lakhs of rupees for the purpose of spreading English education among the Kshattriya community and fostering the traditional characteristics of the Kshattriya race. The endowment was generously increased in July, 1931, by the Maharani Sahiba, widow of the late founder, to 12½ lakhs to provide for increase of salaries to the staff and has recently been further increased by her to 18½ lakhs to raise the school to the status of an Intermediate College.

The management of the institution is under the control of the Local Government assisted by a committee of management composed of Government officials and Kshattriya Rajas and gentlemen.

His Excellency the Governor of the United Provinces and some Kshattriya Ruling Chiefs are visitors of the school.

The school was opened on the 1st of January, 1909, in the old school building by Sir H. V. Lovett, K.C.S.I., I.C.S., the then Commissioner of Benares. The foundation-stone of the new building was laid on the 25th November, 1909, by His Honour Sir J. P. Hewett, C.C.S.I., K.C.I.E., the then Lieutenant-Governor, United Provinces.

A new Science Laboratory has been constructed and equipped at a cost of about Rs. 75,000.

The grounds cover more than 50 acres. The total value of land and building exceeds 8 lakhs of rupees.

The staff consists of a European Principal and a Vice-Principal and over 30 Assistants, most of whom are Kshattriyas and resident.

Foundation scholarships, aggregating Rs. 3,990, are awarded annually on the combined results of the half-yearly and yearly examinations. One Edward Kshattriya scholarship each year to the value of Rs. 90, also Bhunga Raj scholarships aggregating Rs. 634, are now tenable only in this institution.

All masters and pupils before their appointment are required to make a declaration of loyalty to the British Government, and a promise to keep aloof from sedition, race hatred, rowdiness, and rivalry. The aim and object of this institution as set forth by its founder is not only to stimulate English education amongst his community, but also to turn out God-fearing Kshattriyas, loyal to the King-Emperor, dutiful to their parents, and respectful towards their superiors.

ST. ANDREW'S COLLEGE, GORAKHPUR.

The Intermediate classes were opened in 1931 when recognition was granted in the usual subjects including Science. There were 23 students in the two classes in that year and they formed additional classes to the Mission High School. In the year 1935 the numbers had risen to 35 and recognition was granted in Physiology. During these early years the Rev. B. J. Kennedy was Principal.

About the year 1915 it was decided to open B.A. classes for which a new building was a necessity. It was made possible by a generous gift from a friend of the College and was opened during the principalship of Dr. Garfield Williams in 1916 by Sir James Meeson, the then Lieutenant-Governor of the United Provinces. The Intermediate classes were moved to the

building, but the teaching of Science subjects was dropped. Since that date the numbers have steadily risen until to-day the numbers in these classes total 170.

Another step forward in the history of the College was made possible in 1925 by the liberal help from the local gentry. A new Science department was built and recognition was granted by the Intermediate Board in Chemistry, Physics and Biology. This department like the Arts department is well built, well equipped and well staffed.

The College is under the control of the Church Missionary Society. It endeavours to meet the needs of higher education in the Gorakhpur division. In examination results its record is remarkably good. It is well situated in a convenient site with play-ground close at hand, but its hostel accommodation is at present inadequate. It is hoped to make good this weakness as soon as possible.

LUCKNOW CHRISTIAN COLLEGE, LUCKNOW.

This institution was founded in the year 1866 in Inayat Bagh, and in the year 1877 the school was removed to Golaganj and a beautiful and strong brick building known as the Centennial High School was built.

The College was founded in 1883 by the late Rev. Dr. B. H. Badley, whose name the Science block bears. It gradually grew to be a first grade college affiliated to the B. A. and B. Sc. standards of the Allahabad University.

The School of Commerce founded in 1892 has had Government patronage and has given instruction in commercial subjects, especially in Shorthand and Type-writing, to scores of Government officials deputed by Government, as well as to hundreds of other young men now in business life. The College has the distinction of being the inventor of Urdu Shorthand.

With the establishment of the Lucknow University this College was made an Intermediate College in the year 1921. It has two other departments connected with it, the School of Commerce and the Centennial Middle School both in separate buildings.

There is an enrolment of 751 in all the departments of this institution during the current year. The Intermediate College has an enrolment of 498 this year, the largest enrolment being in the Science and Commercial Diploma classes.

There are two hostels connected with the College, one for Christian students called the Osman Caldwell Hostel with accommodation for 120 students, and the other the C. L. Baro Hostel (named after an ex-Principal of this College) with accommodation for 120 students.

The buildings are most commodious and their hygienic condition is all that could be wished. The Science Laboratories for Physics, Chemistry and Biology have been equipped at a cost of about Rs. 2,00,000.

There are six Americans and 24 Indians on the teaching staff. There are 11 M.A.'s, four M.Sc.'s, seven B.A.'s, three B.Sc.'s, one B.Com., one commercial diploma-holder in addition to a highly-qualified Pandit, a Shastri and a well-qualified assistant Maulvi. Of these three are trained teachers.

There is a whole-time Physical Director, who is an American gentleman. The students play cricket, foot-ball, hockey, basket-ball, volley-ball and base-ball and tennis. Every student has to undergo an annual compulsory physical test.

There is satisfactory arrangement for the medical supervision of students. Two qualified doctors have been appointed by the institution for this purpose.

There are two Literary Unions or Debating Clubs in the College which meet every Saturday. There is also a Literary Union conducted by the inmates of the C. L. Baro Hostel under the supervision of the head of the department of English. Annual Oratorical Contests are held and prizes are awarded to the best speakers among the students. Musabaras are also held annually. This year the College has started classes in Elocution and in Music.

There is a good library connected with the College which has nearly 4,200 volumes on almost all profitable subjects, and it is well organized. It is supplied with the leading English, American, and Indian newspapers and magazines.

The College not only tries to give intellectual training to its students, but it also endeavours to turn out loyal and law-abiding and useful citizens. Their moral and religious welfare is carefully looked after. The Christian students have their Students' Christian Association, Church Services and Young People's Society which they regularly attend. There are organizations like the Friends Federation within the institution which encourage all students to take an active part in social and community service. The development of true character is recognized by the College as its supreme task.

The College has an "Old Boys' Association" and its members are beginning to take an active interest in the welfare of their Alma Mater.

The College is under the control of the Methodist Episcopal Church.

SHIA INTERMEDIATE COLLEGE, LUCKNOW.

In 1914-15 Nawab Sir Fateh Ali Khan Qazilbash started a movement for opening a college for Shia boys and invited the co-operation of his co-religionists in India. A fund called the Shia College Fund amounting to rupees nine lakhs was raised under the leadership of the Nawab in course of a few years. The Government also offered to contribute half the cost of secular instruction in the College when started.

In July, 1920, the Shia Intermediate College was opened with two Intermediate classes and two years later the 9th and 10th classes of the Shia School, which were opened in 1919, were transferred to the Intermediate College. The College has thus four classes and prepares boys for the

Intermediate and High School Examinations of the Board. There is also a Theological department which imparts instruction in Shia Theology. Attendance at Theology lectures is compulsory for Shia boys, but optional for others.

Without detriment to the main object of the College youths of other denominations are freely admitted to the College.

The supreme control, direction and management of the Shia Intermediate College and the Shia School are vested in a Board of Trustees. The executive administration and government of the Shia Intermediate College and its hostel, subject to the general control and supervision of the Board of Trustees, rest in a Managing Committee of twelve members.

KANYAKUBJ INTERMEDIATE COLLEGE, LUCKNOW.

It was in the year 1913 that the Kanyakubj community, at its conference under the Presidentship of Pandit Gokaran Nath Misra, M.A., resolved to open a Kanyakubj English School. The resolution was given

effect to on July 3, 1918, when Raja Sahib Lieutenant Pandit Kali Charan Misra of Bareilly laid the foundation of the Kanyakubj school.

In July, 1920, permission was obtained for opening classes IX and X. The High School began its work in July, 1921. On the opening of class X in 1922 it was found desirable to raise it to the Intermediate standard, for which a request was made to the Director of Public Instruction.

On April 5, 1923, the Director of Public Instruction sanctioned the raising of the High School to the Intermediate standard. Accordingly in July, 1923, XI class was opened, and in July, 1924, XII class was added.

The building is erected in a purely Hindu style and consists of a central big hall, with a gallery running all round. The rooms are spacious and airy. There is provision for expansion on the first floor which at present consists of four big rooms.

The situation of the college is ideal. Its site is one of the healthiest in Lucknow. There are extensive grounds on all sides. The Hostel has an accommodation for 60 students and is double-storied.

There are several societies and associations conducted by the students under the guidance of the teachers. "The Vidyarathi Sahayak Stores" supplies books, stationery, school material and other academical requisites to the college and students. Many students are given monetary assistance out of the funds collected by the students under the auspices of above sabha.

The college Athletic Association looks after the health of the students there are three different societies under it to provide for (1) games and matches, (2) sports, drill and gymnastics and (3) scouting, first aid and hygiene. Games and Physical exercise are compulsory for all students. A trained Director of Physical Culture supervises these activities.

A specialist of Indian music imparts knowledge and practice of music to students up to VIII class and organises the chorus for daily prayer with which the regular college work begins every day.

Moral and religious discourses are given by teachers to the students immediately after the prayer, on two days of the week.

A reading room under the supervision of a senior teacher caters for the students.

Two munificent endowments of a lac and sixty thousand rupees have promised this year by Rai Sahab Pandit Jai Narain Misra and Rai Bahadur Pandit Sukhdeo Behari Misra and the school building for classes III to VIII is soon to be erected. The college department only will then continue in the present building and the lower classes will be housed in the new building.

ST. GEORGE'S COLLEGE, MUSSOORIE.

Founded in 1853 on a site acquired by the Italian Capuchin Mission, surrounded by an extensive and well-wooded estate, the College was staffed by the Mission Fathers up to 1893, the last clerical Principal being the learned and esteemed Father Duggan, who handed over to the Irish Brothers of St. Patrick in January of that year.

The coming of the Brothers marks the beginning of a new era in the history of the College. Primarily intended as it was for the higher education of the sons of better class Europeans in India the College, under the Principalship of Rev. Brother Stapleton, took on the tone of the Home public schools and intended its curriculum to meet the highest demands of those who sought in India the benefits of a Home education without the excessive expenditure and separation from their families that going Home would entail.

At this time the College taught for the Provincial High, Middle and Primary Examinations, the Entrance Examinations of the various public departments, and of the Roorkee Engineering College. St. George's was also affiliated to the University of Allahabad.

Under the Principalship of Rev. Bro. Haverty new buildings, including an entirely new wing, were erected, the north wing was raised and re-roofed and many structural changes were made to render the edifice more suitable for its purpose. Under Rev. Bro. Smyth the present extensive playing flat—literally hewn out of the rock—was completed, and to his successor, Rev. Bro. Dineen, the College owes the hospital, an airy and comfortable building situated at a sufficient distance from the main block and staffed by a fully qualified medical attendant and a trained sister; as well as the commodious teachers' quarters for the lay staff. To the Rev. Bro. Commins, who succeeded Bro. Dineen, is largely due the present excellent tone in the matter of field sports of which the College is justly proud.

Quite recently, under Rev. Bro. Doyle, St. George's has taken rank as a Secondary College, entitled to teach up to the Intermediate Arts. Owing to his exertions, and at very considerable expense, two Science Halls have been built and recognition is sought to enable the College to teach Intermediate Science. The existing Intermediate Arts Class is flourishing. Graduates in Arts and Science on the staff are doing excellent work, and

the success of the College in the Cambridge Locals entitles St. George's to the front rank among such institutions.

ST. JOSEPH'S COLLEGE, NAINI TAL.

St. Joseph's College, Naini Tal, was founded in 1868 by the Capuchin Fathers. It was handed over to the Irish Christian Brothers in 1892. Its beginnings were small, whether with regard to buildings or numbers. New wings were added in 1900, 1910 and 1920, and minor improvements were made yearly. The numbers increased from 27 in 1893 to 302 in 1925. The College has well-equipped laboratories and libraries. It has four good play-grounds and a swimming and rowing club.

PHILANDER SMITH COLLEGE, NAINI TAL.

Philander Smith College, is the result of the amalgamation of the Oak Openings Boys' High School, Naini Tal, and the Philander Smith Institute of Mussoorie. The latter was founded by a Mrs. Smith, widow of Mr. Philander Smith of Illinois. Her interest in the education of the Anglo-Indian and domiciled European community had been awakened through the influence of the Reverend Denis Osborne of the Methodist Episcopal Church, who opened the school in 1865. Oak Openings School was opened by the Rev. J. W. Waugh, D.D., of the Methodist Episcopal Church, in 1880 at Stoneleigh which, since its evacuation by the Diocesan Boys' School, had been occupied by the Lieutenant-Governor. It moved to its present site in 1889. In 1903, took place the union with the school at Mussoorie, which had outgrown the accommodation there. The number of students, which was then under 100, has now grown to over 200.

The College prepared students for the Cambridge Senior and Junior Certificates, for the Roorkee Engineering College and for the Board's Intermediate Arts and Science Examinations.

LA MARTINIÈRE COLLEGE, LUCKNOW.

La Martinière College is the result of an order in the will of Major-General Claude Martin (Hon. East India Co.'s Service), a native of Lyons, in France, who died in Lucknow in 1800 A.D. He leaves his house to be "A School or College for teaching young men the English language and Christian religion."

Owing to legal difficulties 40 years passed before his will was carried into effect, but in that year the High Court of Calcutta passed an order instituting the College. The College ran till 1857, when under Mr. Schilling 98 boys entered the Residency and played their part in that memorable siege. On being relieved the College went to Benares, but returned to Lucknow in 1859.

From that date onward it has occupied a prominent place in European education in the north of India. Under the guidance of Mr. Sykes, who was Principal from 1880 to 1908, the College dominated the entrance to the Engineering College, Roorkee, and the work of the school was made subservient to this ideal.

When Mr. Sykes retired the College was re-organized along the lines suggested by Sir Haicourt Butler, the then Deputy Commissioner of Lucknow. The College was extended in 1912 and laboratories and numerous buildings for masters were added. Recognition as an Intermediate College was obtained in 1923.

The College, which is housed in the fine old building of "Constantia," has an enrolment of about 270 of whom about 220 are Europeans and Anglo-Indians (200 residents and 20 day scholars) and about 50 are Indian day scholars. The bulk of the boys aim at the Cambridge School Certificate, and the Intermediate class caters for those who care to go up for higher education.

With the funds provided by the Founder the College maintains a very strong staff of teachers, most of whom are trained, and in addition provides for a roll of foundationers 100 strong. Election to the Foundation is made by the Governors, who include the Chief Judge of the Chief Court of Oudh, the Commissioner, the General Commanding, the Deputy Commissioner, and two co-opted members. The finances of the College are in the hands of Trustees, who are the European Members of the Executive Council of His Excellency the Governor, United Provinces, and the Legal Representatives to Government, United Provinces.

**CROSTHWAITE GIRLS' INTERMEDIATE COLLEGE,
ALLAHABAD.**

This institution was started in the year 1894, under the auspices of the Association for the Higher Education of Women in the United Provinces of Agra and Oudh—a body constituted at the suggestion of the late Sir Charles Crosthwaite, K.C.S.I., the then Lieutenant-Governor of the United Provinces. A primary school was first established in Lucknow and was given the name of the Crosthwaite School. The school could not prosper in Lucknow, and in 1898 was removed to Allahabad, where it was located for some time in muhalla Mahajam Tola. In 1908 the present site, comprising about 40 bighas of land, was obtained for it. The school which was started only with the primary classes grew into a Vernacular Middle School. In the year 1910 it was converted into an English Middle School, and in 1915 into a High School. The first group of students came out successfully in the Matriculation Examination of the Allahabad University in 1918. Classes for preparing candidates for the Intermediate Examination were opened in 1919, and the school developed into a second grade college with the result that the first group appeared at that examination in 1921. When the Board of High School and Intermediate Education was constituted the institution was recognized by that body and permitted to

teach almost all the important subjects excepting Science for both the Intermediate and High School Examinations. Besides these Intermediate classes for the training of women teachers were also added in July, 1921.

A new hostel, "Lady Sunder Lal Hostel," was completed in the year 1920 at a cost of Rs. 80,000 and provides accommodation for Hindu, Muhammadan, and Christian pupils, 96 in number. It has been recognized by the Allahabad University for the residence of the girls studying for the various University Examinations. The tutorial staff consists of a Lady Principal assisted by 17 other teachers of whom nine are graduates and nine under-graduates. The number of trained teachers in the staff is eight.

INSTRUCTIVE STAFF.

1. Miss C. R. Pooraiyah, B.A., Principal. English, XII, XI; and Indian History, X.
2. Mrs M. Sharma, M.A., ETC .. English, IX and X.
3. Miss L. Pathak, M.A. (English) .. English, XII to X.
4. Miss C. Misra, M.A. Sanskrit, XII and XI; and Hindi, IX and X.

13. Miss Noble, Intermediate and Domestic Science, IX, and Special training in Drawing. Drawing, X and IX.
14. M. Babu Ram, Abul Fazl and Urdu, X, XI and IX. Intermediate.

ISABELLA THOBURN COLLEGE, LUCKNOW.

The Isabella Thoburn College received its charter in 1896 and was affiliated to the Allahabad University. It grew out of the Lal Bagh School which had been opened in 1870 and was the natural outgrowth of an increasing demand for the education of women in the higher classes. The College continued its affiliation with the Allahabad University presenting candidates for the Intermediate Examination and for the B.A. The

College and the School were administered in conjunction until the year 1910 when a separate Principal was provided for the School, and the College administration became wholly distinct. As the number increased the accommodation at Lal Bagh became insufficient, and in 1921 the new site was procured just outside the municipal limits of Lucknow and new buildings were erected. When the Lucknow University was organized, there being no women's department provided in the University scheme, Isabella Thoburn College was permitted to retain its B.A. classes and now serves the purpose of a women's college for the University. The old affiliation with the Allahabad University was discontinued from the time of the organisation of the Lucknow University.

The College maintains the following departments :—

The Intermediate (classes XI and XII)

The University B.A. (B.Sc.).

The Training Department (E. T. C.).

The Education department for the training of Graduates (Diploma in Teaching, Lucknow University).

The present total enrolment is 131.

The College compound is known as Chand Bagh. Nichol's Hall contains class rooms, laboratories, library and offices. There are two hostels, a common dining room and a hospital, while the staff live in the same compound. Each hostel is in charge of two American teachers who act as wardens. The buildings are all airy and open, solidly constructed, and are fire-proof. The College maintains its own water system and sewage system, but is lighted with electricity from the city supply.

The examination results have always been good, but this does not indicate that all efforts are concentrated on academic work. Various social and helpful activities are carried on both within and without the College by the students and teachers. The aim is to train young women for useful living and helpful service in and for India.

THEOSOPHICAL NATIONAL GIRLS' SCHOOL AND WOMEN'S COLLEGE, BENARES.

The Theosophical National Girls' School and College for women was established in 1913 by Dr. Annie Besant and Miss F. Arundale with the idea of imparting to Indian girls an education which, while preserving all that is best and highest in the ancient ideal of womanhood, would endeavour to equip the Indian girls for the changed life of to-day. The institution, which for many years was carried on entirely by private effort, has now won recognition and support from Government, and is a recognized College preparing students for the examinations of the Board of High School and Intermediate Education; it also prepares candidates appearing privately for the B.A. Degree examination of the Benares Hindu University.

The School and College buildings are situated in the extensive grounds adjoining the premises of the Indian section of the Theosophical Society, thus securing the proper conditions for the effective carrying on of the work of the institution. There are large play-grounds, where the girls can play about in sufficient privacy and seclusion.

The staff consists of a number of Indian ladies drawn from the best families who have devoted their lives to the service of their fellow-women. They bring to the work a spirit of consecration, and by living in close association with them the pupils will be able to imbibe the spirit of Hindu culture, which is so vital for the regeneration of India. There is also on the staff a number of European ladies who have come to India with the desire to help the country, who are in thorough sympathy with Indian culture and are gladly co-operating with the Principal in the work of lifting the womanhood of India to its proper position in the life of the nation.

GOVERNMENT INTERMEDIATE COLLEGE, MORADABAD.

The Government School, Moradabad, was established some seven years after the Mutiny.

It remained under Government control up to 1883, and afterwards it was made over to the District Board and it remained under the control of the Board up to June, 1910.

From July, 1910, it again became a Government institution.

In July, 1922, its status was raised to that of an Intermediate College.

The Moradabad citizens and public made a contribution of about a lakh of rupees in cash and property. The cash was deposited with the Treasurer, Charitable Endowments, and the property under the control of the Collector.

The income of the Moradabad High School Endowment is Rs. 4,000 a year.

A hostel with accommodation for 103 boarders is attached to the institution.

GOVERNMENT INTERMEDIATE COLLEGE, ALLAHABAD.

The old Government High School was raised to the standard of an Intermediate College in 1922. Mr. O. J. Gardener, M.A., F.R.S., was the first Principal. Provision was made for the teaching of the following subjects in the Intermediate classes:—History, Logic, Sanskrit, Persian, Arabic, Mathematics, Physics and Chemistry. Biology was introduced in 1923. As the proposed College building has not yet been constructed the Intermediate classes at present meet in the building which was meant for the junior classes of the old Government High School. There are two sections each in classes IX to XII with a total enrolment of 213 students.

INSTRUCTIVE STAFF.

28. Krishna Nand	Sanskrit, X; Hindi IX.

GOVERNMENT INTERMEDIATE COLLEGE, ETAWA.

The beginnings of the institution were laid as far back as 1856, when Mr. A. O. Hume, the then Collector, started a school in the old city. The outbreak of the Mutiny retarded its progress for a time but after the storm was over the zeal and earnestness of the founder enlisted the sympathy of a large section of the local gentry and the school was soon in a flourishing condition. The Zilla School, under the name of the Hume High School, continued to exist with varying fortune, till with a change in the policy of Government, the institution was turned into a Government High School. After about a decade the old building and the Library were acquired by the authorities of the Sanatan Dharam High School, and the Government High School was located in a new building, built according to the approved model near the railway station. The school was raised to the status of an Intermediate College in 1923, under the management and control of the Government.

The rates of fees, etc., are the same as in other Government Intermediate Colleges.

In addition to the scholarships granted by the Government there are a few local scholarships and prizes detailed as follows:—

1. H. C. PATHAK SCHOLARSHIPS.

The income received from the endowment is expended in awarding annually two scholarships of the value of Rs. 4 per mensem each, and one of the value of Rs. 6 per mensem tenable for one year by students under 18 years of age of classes VIII to X, preference being given to those who are poor and bona fide residents of the town or the district.

2. HUME SCHOLARSHIPS.

The income derived from the endowment, invested by Mr. A. O. Hume, is spent on four scholarships of the value of Rs. 6 each. Two of the scholarships are awarded for proficiency in English and two for proficiency in Mathematics to scholars who are below 14 years of age.

3. DISTRICT BOARD SCHOLARSHIPS.

There are four scholarships of the value of Rs. 2 each to be awarded to the most eligible boarders, who are the residents of the district.

4. TONK PRIZE.

A sum of Rs. 40, the interest yielded by the endowment of the Nawab of Tonk is divided between the two best students in Mathematics in classes IX and X.

5. DEVILLO PRIZE.

A prize of Rs. 40 is awarded annually to the best student of class X.

There are three hostels attached to the College with accommodation for about 120 scholars. One of the hostels is reserved for a particular class of Rajputs, who live rent-free and enjoy other concessions as well.

INSTRUCTIVE STAFF

1. S. K. Ghosh, M.Sc., Principal .. Physics, XII.
2. Jagadish Prasanna Mukerji, M.Sc., Mathematics, XII and XI.

Kavya Tirth.
20. Rajendra Prasad Srivastava. Holds Drawing, X and IX.
Certificate of Industrial Ap-
prentice and Drawing class Ex-
amination, Thomason College,
Roorkee.

GOVERNMENT INTERMEDIATE COLLEGE, JHANSI.

The College was opened in the year 1921 as a result of the recommendations of the Sadler Commission on the Calcutta University. It is situated on the Gwalior Road at a distance of a mile and-a-half from the heart of the city in an open place. The building consists of two big blocks with quadrangles in the middle. These blocks are joined to each other by the hall. One of these blocks was constructed for the junior classes III to VIII, while the other for classes IX to XII—the new type of Intermediate College. The two blocks have sufficient accommodation in them for opening double sections in all the classes. A little to the west of the College building is a workshop for the Manual Training Classes which unfortunately could not so far be started for want of funds.

The College has within its compound two hostels with quarters for the superintendents in each, one for the junior and the other for the senior students with a total accommodation of ninety boarders in both. There are extensive playgrounds although not yet properly laid out. The whole building was constructed at a cost of Rs. 5,05,000.

The College is wholly maintained by Government.

INSTRUCTIVE STAFF.

1. Churni Lal Sahney, M.Sc. (Allahabad). Physics, XII.
2. Mirza Abdul Haq Beg, M.A. (Allahabad). English, XII, XI and X.
3. Vithal Jankrishna Kale, M.A., B.Sc., Mathematics, XII and XI.
L.T. (Allahabad).

22. Brij Raj Tiwari, B.L.C., C.T. (Agra) Science Pract., IX and X.

QUEEN'S INTERMEDIATE COLLEGE, BENARES.

The Queen's College, Benares, is now an Intermediate College affiliated to the Board of High School and Intermediate Education, United Provinces. But before 1922 it was a first grade College affiliated to the Allahabad University in Arts and Science. It is maintained by Government, and is under the control of the Education department. The tuition fees vary from Rs. 0-8-0 to Rs. 1. Government scholarships are awarded according to the results of the Board's examinations. There are also local scholarships, amounting to about Rs. 100 per mensem.

INSTRUCTIVE STAFF.

GOVERNMENT INTERMEDIATE COLLEGE, ALMORA.

The College was started in July, 1931, by adding Intermediate classes to the Government High School. A scheme for building an Intermediate College on a new site fell through for want of funds, and the College is still housed in the buildings of the Government High School. It is hoped that a new Junior school will be begun next year. The following subjects are taught.—

Mathematics, Physics, Chemistry, Sanskrit, Persian, Arabic, History, Logic and Economics

INSTRUCTIVE STAFF

1. Naipal Singh, B.A. (Oxon.), B.A. English History, XI; Eng. Com., (Allahabad), Principal XII; Eng. Rapid Reading, XA and XB

GOVERNMENT JUBILEE INTERMEDIATE COLLEGE, LUCKNOW.

This institution was started as an aided High School in 1887 on the occasion of the first Jubilee of the late Queen Victoria. It was taken over by Government on April 1, 1903, and in July, 1922, was raised to the status of an Intermediate College. The options taught in the High section are the three Indian classical languages, Science, Drawing and Commerce, while in the Intermediate section the College is recognized in Mathematics, Chemistry, Physics, Biology, History, Logic, the three Indian classical languages, Economics, Urdu and Hindi.

INSTRUCTIVE STAFF

1. Rai Sahib Pandit Kalyan Prasad, M.A. Principal.

GOVERNMENT JUBILEE INTERMEDIATE COLLEGE, LUCKNOW.

This institution was started as an aided High School in 1887 on the occasion of the first Jubilee of the late Queen Victoria. It was taken over by Government on April 1, 1903, and in July, 1922, was raised to the status of an Intermediate College. The options taught in the High section are the three Indian classical languages, Science, Drawing and Commerce, while in the Intermediate section the College is recognized in Mathematics, Chemistry, Physics, Biology, History, Logic, the three Indian classical languages, Economics, Urdu and Hindi.

INSTRUCTIVE STAFF.

1. Rai Sahib Pandit Kahi Prasad, B.A. Principal.
2. Anil Nath Ghosh, M.Sc., Vice-Principal. Chemistry, XI Sc., and XII Sc.
3. Parmeshwar Dayal, M.Sc. (Allahabad), F.R.S. (London). Physics, XI Sc., and XII Sc.
4. B. L. Agarwala, M.A., O.T., LL.B. History XII Arts and XI Arts (Allahabad), M.A.S., M.B.H.S., and IX. M.B.H.S.

4. B. L. Agarwala, M.A., C.T., LL.B. History XII Arts and XI Arts (Allahabad), M.B.A.S., M.B.H.S., and IX. M.B.H.S.

In the College athletics, as far as possible, every student takes part in one game or another. The College maintains almost all games, both Indian and European.

The health of the students is looked after by a regular medical officer with the assistance of a whole-time Compounder in charge of the College Dispensary.

Besides the Government scholarships, a large number of stipends and scholarships provided by public bodies and friends and sympathisers of the College are available to the students of the College. In 1928-29, 61 scholarships, 33 freeships and 34 half-freeships were given to the students of the College.

A Poor Boys' Fund, collections for which are made by the Staff and students, is also maintained for the help of poor and deserving students.

(Prev.)
10. Tadak Singh Kushwaha, B. Com., Lecturer in Commerce and
LL.B. Instructor in Typewriting.

AGRICULTURAL INSTITUTE, NAINI, ALLAHABAD.

The Agricultural Institute was founded in 1912, in the belief that the improvement of Indian agriculture is fundamental to all material and spiritual progress. In particular the Institute has emphasized the training of scientific agriculturists, rather than agricultural scientists. It has striven to prepare its students to take their places as farmers, on their own land or for others, and as teachers, either in schools or in the Agricultural services. Many have been successfully engaged in such work.

Following the purchase in 1912 of 275 acres considerable progress has been made in improving the land and in erecting the necessary buildings. A gift has been received which is making possible the extension of the farm to 1,000 acres. On the farm the students actually carry on farming operations, while in the class rooms and scientific laboratories they learn the theory which governs the practice.

Students have come from all over India, from Kashmir to Assam, and even from Mesopotamia and the Fiji Islands. A number have been sent here by Indian States and others by several missions. Believing that students who complete the course satisfactorily should receive a diploma recognized by the Government the Institute has brought to the attention of the educational authorities the need for an agricultural course. In this it has now been successful.

In January, 1925, the Minister of Education approved the action of the Board of High School and Intermediate Education in instituting a diploma course in agriculture.

This course is of Intermediate College rank, on the analogy of the Diploma in Commerce, and is designed to prepare students for the Degree Course in agriculture as well as to fit them to manage farms or to teach agriculture in lower schools. The Board of High School and Intermediate Education, United Provinces, has granted provisional recognition to the Allahabad Agricultural Institute to prepare students for the Agricultural Diploma Examination up to the Examination of 1930.

The Dairy department has always played an important part in the Institute. It was thus particularly gratifying when the Institute was invited to teach to the newly-sanctioned Indian National Diploma in Dairying. This course prepares men to manage private dairies or to enter Government dairy service.

Because of the increasing demand for teachers of agriculture and for teachers in rural schools adapted to the needs of the community, the Institute opened in July, 1923, the Rural Teachers' Training Course. In connexion with this course a rural community school has been opened, which affords an opportunity for the students in the training course to observe methods and to teach under supervision.

AGRICULTURAL COLLEGE, CAWNPORE.

In 1893 a small school was started near the present site of the Agricultural College with the object of training selected men as kanungoes under the Department of Revenue, United Provinces. Agriculture then formed a very small part of the training imparted. In 1906 the school course of two years was elaborated to a three years' course and the school raised to the status of a College. From 1906 to 1913 the College Diploma was a qualification for entry into the Subordinate Agricultural Service of the United Provinces and the grade of supervisor kanungo in the revenue service. In the autumn of the latter year a school was re-opened for the training of kanungoes, and a scheme for the re-organization of the College was promulgated. This re-organization came into force in October, 1914. Under this order the management of the college is vested in a governing body which deals with admissions, fees, grants of stipends, the curriculum of the College, holidays and such other matters of internal administration as may be put before it.

Three courses are now given. The first of these is one of two years' duration terminating in the Agricultural Diploma Examination of the Board of High School and Intermediate Education, the second a four years' course terminating in the College Diploma of Licentiate in Agriculture; and the third a two years' course in the Vernacular which is mainly practical in character.

Following the purchase in 1912 of 275 acres considerable progress has been made in improving the land and in erecting the necessary buildings. A gift has been received which is making possible the extension of the farm to 1,000 acres. On the farm the students actually carry on farming operations, while in the class rooms and scientific laboratories they learn the theory which governs the practice.

Students have come from all over India, from Kashmir to Assam, and even from Mesopotamia and the Fiji Islands. A number have been sent here by Indian States and others by several missions. K. E. M. UDAIBHAN JAT INTERMEDIATE COLLEGE, LAKHAOTI (BULANDSHAHR).

The origin of this institution may be traced back to the year 1905, when Rai Bahadur Ch. Amar Singh, O.B.E., of Pali started a Boarding School in his private residence at Pali with only a small number of boys under a warden and a tutor. In the year 1910 this humble "Pathshala" of Pali was removed to Lakhaoti where it began to work as a Primary School and continued working in that capacity till 1913 when it was raised to the standard of a middle school. Rai Bahadur Ch. Amar Singh, O.B.E., feeling the want of a suitable English High School for Jat boys, in which the traditional characteristics of the community could be encouraged enlisted the support of several Jat Zamindars, chief among whom was the late Rani Raghuvir Kunwar of Sahaspur Estate and got recognition for starting High School classes in the year 1919. The institution achieved admirable success as a High School and its managing committee felt encouraged to raise its status. On April 1, 1930, His Excellency Sir Malcolm Hailey, O.C.S.I., K.C.S.I., Governor of the United Provinces of Agra and Oudh and His Highness the Maharaj Rana of Dholpur visited the Jat High School. The former made a fervent appeal to the Jat Community to help the institution and the latter accepted the patronship of it and promised to help it in all possible ways. As a result of His Highness' kindness and His Excellency's sympathies the High School transformed itself into an Intermediate College on July 20, 1931. At present it is affiliated to the Board of High School and Intermediate Education, United Provinces, for the agriculture section only but steps will soon be taken to see it a full grade College.

The College aims at preparing "complete man" and loyal citizens by broadening the spiritual and material outlook of its students. It endeavours to raise the moral tone of the students by inculcating upon them healthy moral ideas. It provides special facilities to such poor and deserving students as would otherwise have been deprived of the benefits of education. It provides special training in practical and theoretical agriculture and those sciences which are closely allied to agriculture.

The College is situated on a very healthy site which is not only charming but salubrious.

The residential system of the college encourages free and amiable intercourse between the teachers and the taught and is largely responsible for the stimulating atmosphere of the institution. About 80 per cent of the students reside in college hostels.

Adequate attention is given to the physical development of the students. Besides Hockey, Football and Cricket, Indian games are also encouraged. The college owns extensive play grounds.

The qualification for admission to the first two courses is the High School Certificate or a certificate of equivalent standing. For the Vernacular Course no special educational qualifications are demanded, but candidates must be able to read and write the Vernacular fluently, preference being given to such as have reached the standard of the Vernacular Final or Middle standard in an English school.

K. E. M. UDAIBHAN JAT INTERMEDIATE COLLEGE, LAKHAOTI (BULANDSHAHR).

The origin of this institution may be traced back to the year 1905, when Rai Bahadur Ch. Amar Singh, O.B.E., of Pali started a Boarding School in his private residence at Pali with only a small number of boys under a warden and a tutor. In the year 1910 this humble "Pathshala" of Pali was removed to Lakhaoti where it began to work as a Primary School and continued working in that capacity till 1913 when it was raised to the standard of a middle school. Rai Bahadur Ch. Amar Singh, O.B.E., feeling the want of a suitable English High School for Jat boys, in which the traditional characteristics of the community could be encouraged enlisted the support of several Jat Zamindars, chief among whom was the late Rani Baghvir Kunwar of Saharapur Estate and got recognition for starting High School classes in the year 1919. The institution achieved admirable success as a High School and its managing committee felt encouraged to raise its status. On April 1, 1939, His Excellency Sir Malcolm Hailey, C.O.S., K.C.S.I., Governor of the United Provinces of Agra and Oudh and His Highness the Maharaj Rana of Dholpur visited the Jat High School. The former made a fervent appeal to the Jat Community to help the institution and the latter accepted the patronship of it and promised to help it in all possible ways. As a result of His Highness' kindness and His Excellency's sympathies the High School transformed itself into an Intermediate College on July 26, 1931. At present it is affiliated to the Board of High School and Intermediate Education, United Provinces, for the agriculture section only but steps will soon be taken to accredit it a full grade College.

The College aims at preparing "complete man" and loyal citizens by broadening the spiritual and material outlook of its students. Its endeavour is to raise the moral tone of the students by inculcating upon them healthy moral ideas. It provides special facilities to each poor and deserving student as would otherwise have been deprived of the benefits of education. It provides special training in practical and theoretical agriculture and those sciences which are closely allied to agriculture.

The College is situated on a very healthy site which is not only charming but salubrious.

The residential system of the college encourages free and amiable intercourse between the teachers and the taught and is largely responsible for the stimulating atmosphere of the institution. About 60 per cent. of the students reside in college hostels.

Adequate attention is given to the physical development of the students. Besides Hockey, Football and Cricket, Indian games are also encouraged. The college owns extensive play grounds.

In order to create an *esprit de corps* among the students free scope is allowed for the establishment of literary and social institutions. Members of the College staff guide the students in these organizations.

The college owns a dispensary of its own and has secured the services of a very efficient Doctor who pays daily visits to its hostels.

The managing committee of the college is a registered body according to Societies Registration Act XXI of 1860.

APPENDIX H.

List of apparatus and chemicals for an Intermediate College and a High School.

Section A.

(For 24 boys in a class.)

Column A gives the minimum requirements for work up to the High School Examination only.

Column B gives the minimum requirements for work up to the Intermediate Examination only.

Quantity.		
A	B	
PHYSICS (GENERAL).		
12 ..	12 ..	Balances, 250 g.m. in case, beams graduated.
12 ..	12 ..	Weight Boxes from 1 g.m. to 100 g.m.
2 ..	12 ..	Ditto "001 g.m. to 100 g.m.
4 ..	4 ..	Spring balance, to weigh 10 lb.
2 sets	2 sets	Weights, $\frac{1}{2}$ oz. to 1 lb.
2 doz.	2 doz.	Half Metro Rules, Maple Wood, cm. on one side and inches on the other.
1 ..	2 ..	Metro Rules, ditto.
..	2 ..	Screw Gauges, ordinary.
..	2 ..	Ditto good quality, with ratchet.
..	0 ..	Clamp Pullers, brass.
1 doz.	1 doz.	Protractors, brass, ordinary.
..	4 ..	Hare's apparatus, simple form.
1 doz.	1 doz.	Stools for specific gravity experiments.
16 only	16 only	Bunsen Burners or Spirit Lamps.
2 doz.	2 doz.	Retort stands, with clamps, small; base 7" x 4" with rod 24".
2 "	2 "	Tripods, triangular top.
1 lb.	2 lb.	Lead shot.
1 "	2 "	Mercury pure.
1 ..	1 ..	Mercury Tray.
..	10 ft.	Rubber tubing, thin, $\frac{1}{8}$ " pressure.
2 doz.	3 doz.	Flasks, flat-bottom, 200 C.C.
1 "	1 "	Ditto 100 C.C.
2 "	3 "	Ditto 500 C.C.
3 "	3 "	Beakers, with spout, ht. 6 cm. 100 C.C.
3 "	3 "	Ditto ht. 9 cm. 250 C.C.
..	1 "	Ditto ht. 14.5 cm. 1,000 C.C.
1 gross	1 gross	Corks, assorted.
5 lb.	5 lb.	Glass tubing 5 m.m., 8 m.m. and 10 m.m.
..	1 "	Glass rod.
..	1 "	Thermometer tubing.
1 gross	1 gross	Test-tubes, 5" x 5/8".
2 only	2 only	Relative density bottles (small flasks can be used).
1 doz.	1 doz.	Graduated jars, 100 C.C.
..	6 only	Vernier Calipers.
..	4 "	Spherometers.
..	2 "	Pendulums for "G" experiment.

Section A—(continued).

Column A gives the minimum requirements for work up to the High School Examination only.

Column B gives the minimum requirements for work up to the Intermediate Examination only.

Quantity.		
A	B	
..	1 set	Pulley System.
..	6 only	Hook's Law apparatus (cheap form).
..	1 "	Fortin's Barometer (student's form).
..	2 "	Stop-watches (cheap form).
..	3 "	Hydrometers.
12 pairs	12 pairs	Compasses.
4 "	4 "	"
2 reels	2 reels	"
12 pairs	12 pairs	"
2 quires	2 quires	"
2 "	2 "	"
12 ..	12 ..	"
12 ..	12 ..	"
24 ..	24 ..	"
3	3	Ditto 4 cm. do.
1 ..	1	Cube truly cut in hardwood 10 cm. do.
1 ..	1 ..	Ditto 1 ft. do.
3 ..	3	Rectangular blocks (wood) graduated in inches, 4"×3"×1".
3 ..	3	Ditto ditto 4"×3"×2".
3 ..	3 ..	Ditto ditto 4"×3"×4".
24 ..	24 ..	Cylinders truly cut in hardwood, dia. 3 cm. and height 5 cm.
3 ..	3 ..	Spheres truly cut in hardwood, dia. 4 cm.
1 ..	1 ..	Wooden rectangular prism, 8×4×3 cm., graduated in cm., top layer, one row and one cube removable.
6 ..	6 ..	Graduated glass cylinders, 500 C.C. } 2 each.
		Ditto 300 C.C. }
		Ditto 50 C.C. }
1 ..	1 ..	Litre glass jugs, graduated
1 ..	1 ..	Pint ditto.
2 sets	2 sets	Small cylinders of iron, brass, copper, and tin, of the same dimensions.
2 ..	2 ..	Small cubes of iron, brass, copper, and tin, of the same dimensions.
1 set ..	1 set ..	Brass bucket and cylinder for verification of Archimedes' principle.
12 ..	12 ..	Tin chimneys for spirit lamps, if required.
12 ..	12 ..	Clay-pipe triangles.
16 pieces	16 pieces	Wine gauze, 6" square, 30 meshes.
12 ..	12 ..	Iron tongs, 6" long, plain.
12 ..	12 ..	Glass Flasks, round bottom, 500 C.C.

MAGNETISM AND ELECTRICITY—
(concluded).

2 doz.	2 doz.	Binding Screws.
..	1 only	Copper Voltameter.
1 ..	1 ..	Voltameter for electrolysis of water.
1 lb. ..	2 lb. ..	Copper sulphate.
1 " ..	1 " ..	Zinc sulphate.
3 ..	3 ..	Sal. Ammoniac.
..	2	Galvanometers—Tangent.
..	2 ..	Mirror Galvanometers (Stewart); with lamps and scale.
..	1 ..	D'Arsonval Galvanometer.
..	4 ..	Wheatstone Bridges, cheap.
1 ..	1 ..	Dip circle (simple form).
1 doz.	1 doz.	Magnets, small, 6".
..	1	Ammeter (cheap with 1—6 amperes range) 1/10"
..	1 set ..	Resistances.
..	1 ..	Condensers (simple plate).
..	1 ..	Model of a Dynamo.
1 lb. each	1 lb. each	Copper Wire, nos. 18, 20, 26.
..	1 lb. ..	Ditto Silk covered.
..	1 reel	Unspun Silk.
..	1 lb. ..	Soft Red Wax.
..	1 ..	Voltameter, cheap (1—10 volts, 1/10).
..	2 ..	Reversing Keys.
1 ..	1 ..	Electric Bell.
1 ..	1 ..	Electrophorus.
1 ..	1 ..	Morse Key.
1 ..	1 ..	Piece Lode Stone.
1 ..	1 ..	Horse-shoe magnet with armature, 6".
1 ..	1 ..	Packet steel knitting needles.
1 doz.	1 doz.	Sewing needles.
1 ..	1 ..	Flat cast-iron rod, 1" long.
1 doz.	1 doz.	Steel clock springs.
1 ..	1 ..	Glass rod, 12".
9 ..	9 ..	Ebonite rods, 12".
2 ..	2 ..	Shellac rods, 12".
12 pieces	12 pieces	Flannel.
2 " ..	2 " ..	Silk.
2 ..	2 ..	Pith-ball pendulums.
2 ..	2 ..	Simple cell elements.
2 ..	2 ..	Magnetic needles and stands, 3" and 6".

Section B.

Column A gives the minimum requirements for work up to the High School Examination only.

Column II gives the minimum requirements for work up to the Intermediate Examination only

Quantity.		PHYSICS WORK BENCH TOOLS.
A	B	
1	1	
1	1	Cutting pliers.
..	1	Ditto flat nose.
1	1	Bench back saw.
1	2	Hammers.
2	3	Screw drivers (set of three).
2	6	Triangular and square files.
1	3	Flat files.
1	2	Half round files.
..	1	Automatic hand drill.
1	1	Spirit level mounted.
..	1	Measuring tape, 50 ft.
..	..	Nails, assorted.
..	..	Brass and iron screws.

Section C.

Column A gives the minimum requirements for work up to the High School Examination only.

Column B gives the minimum requirements for work up to the Intermediate Examination only.

Quantity.		
A	B	
CHEMISTRY (GENERAL).		
..	12 ..	Balances, 250 g.m. with beams graduated sensitive to 1/10th of a milligram in cases.
..	11 ..	Sets of weights with forceps, .0001 to 50 g.m.
..	1 ..	Set of ditto ditto .0001 to 100 g.m.

APPENDIX I.

FORMS.

(1) Forms of applications for the recognition of Institutions for the Board's Examinations.

Application for the recognition of _____

School
Intermediate College for the High

School ^{or} Intermediate Examination.
and

1. (a) The general desirability of the institution with reference to the suitability and sufficiency of existing institutions in the locality.

Statement by the authorities of the institution.	Remarks of Inspector or Inspectors.
(b) The special aims of the institution.	
Statement by the authorities of the institution.	Remarks of Inspector or Inspectors.

(c) The probable effect on existing institutions

Statement by the authorities of the institution.

Remarks of Inspector or Inspectors.

2. Is the Committee of Management registered as a society under Act XXI of 1860?

Names of the members of the Committee of Management.

Names of the members of the Executive Committee
(if any).

	3. Name of Manager or Secretary or Correspondent, as the case may be.	Remarks of Inspector or Inspector	
	Statement by the authorities of the institution.

RULES FOR THE GUIDANCE OF CANDIDATES.

1.—The dates and the hours of the High School Examination of 1931 will be notified separately.

2.—The doors of the Examination Hall will be opened a quarter of an hour before the commencement of each examination and will be closed at the time of commencement daily, after which no candidate will be admitted.

3.—A seat marked with his Roll number will be allotted to each candidate and a book in which to write his answers will be found on his desk. Candidates will be required to find out their allotted seats for themselves.

4.—Candidates are not to have about them, while sitting to answer their papers, any books, notes or papers whatever.

5.—The answer must be written on one side of the page only, the other side may be used for rough work and no portion of the answer-book provided may be torn out. If a candidate wishes to cancel any part of his answers, he may do so by drawing distinct lines across it.

6.—All candidates are required to provide their own pens, pencil or pastel, etc. To answer the Second Paper of Domestic Science on sewing and cutting out candidates are required to provide their own needles, thread, and pair of scissors. Blotting paper will be supplied in the answer-books.

7.—Candidates must obey any instructions they receive from the Officer in charge of the Examination.

8.—Candidates must produce their admission cards when demanded.

9.—A duplicate copy of the admission card is issued on payment of Rs 2 (two).

10.—No guarantee is given to the candidates as to the order in which, and the dates on which, the question papers will be given to them.

11.—Candidates must await the publication of the result in Part IV of the *United Provinces Government Gazette*. No inquiries by wire or letter can be attended to. If any candidate wants a copy of Part IV of the *Government Gazette*, in which the result will be published, he should apply for it to the Superintendent, Government Press, Allahabad.

†The following places are the centres of examination:—Delhra Dun, Meerut, Khurja, Agra, Bareilly, Moradabad, Chandausi, Etawah, Cawnpore, Allahabad, Jhansi, Benares, Gorakhpur, Almorah, Lucknow, Fyzabad.

The list of centres is subject to additions and alterations by the Board

RULES FOR THE GUIDANCE OF CANDIDATES.

1.—The dates and the hours of the Intermediate Examination of 1931 will be notified separately.

2.—The doors of the Examination Hall will be opened a quarter of an hour before the commencement of each examination and will be closed at the time of commencement daily, after which no candidate will be admitted.

3.—A seat marked with his Roll number will be allotted to each candidate and a book in which to write his answers will be found on his desk. Candidates will be required to find out their allotted seats for themselves.

4.—Candidates are not to have about them while sitting to answer their papers, any books, notes or papers, whatever.

5.—The answer must be written on one side of the page only, the other side may be used for rough work and no portion of the answer-book provided may be torn out. If a candidate wishes to cancel any part of his answers, he may do so by drawing distinct lines across it.

6.—All candidates are required to provide their own pens. Blotting paper will be supplied in the answer books.

7.—Candidates must obey any instructions they receive from the officer-in-charge of the Examination.

8.—Candidates must produce their admission cards when demanded.

9.—A duplicate copy of the admission card is issued on payment of Rs. 2.

10.—No guarantee will be given to the candidates as to the order in which, and the dates on which, the question papers will be given to them.

11.—Candidates must await the publication of the result in Part IV of the *United Provinces Government Gazette*. No inquiries by wire or letter can be attended to. If any candidate wants a copy of Part IV of the *Government Gazette* in which the result will be published, he should apply for it to the Superintendent, Government Press Allahabad.
